Complete 14 hours from one or more of the following areas: graphic design and multimedia; engineering prep and electronics; construction systems; information technology; architecture and furniture design; manufacturing; computer science; trade and technical. For specific courses, please visit www.et.byu.edu/tte or contact the School of Technology advisement center in 250 SNLB.

✔ REQUIREMENT 3 Complete 4 Courses

Complete four registrations of the following (except when enrolled in TTE 476R):

TEE 291R - Undergraduate Seminar *You may take this course up to 4 times.*	0.5

✔ REQUIREMENT 4 Complete 1 Course

MATH 110 - College Algebra	3.0
MATH 111 - Trigonometry	2.0

✔ REQUIREMENT 5 Complete 2 Options

Professional Education Component:

Licensure requirements: Contact the Education Advisement Center, 120 MCKB, 422-3426, to schedule the final interview to clear your application for the secondary teaching license. You should be registered for your last semester at BYU prior to the scheduled appointment.

✔ OPTION 5.1 Complete 7 Courses

CPSE 402 - Educating Students with Disabilities in Secondary Classrooms	2.0
SC ED 353 - Multicultural Education for Secondary Education	2.0
SC ED 375 - Adolescent Development and Classroom Management	3.0
TEE 276A - Exploration of Teaching A	2.0
TEE 276B - Exploration of Teaching B	2.0
TEE 377 - Teaching Methods in Technology Education	2.0
TEE 378 - Practicum in Technology Education	2.0

Note: Fingerprinting and FBI clearance must be completed prior to enrolling in TTE 276R.

✔ OPTION 5.2 Complete 12.0 hours from the following Courses

TEE 476 - Secondary Student Teaching	12.0

Student teachers/interns must complete three forms in their LiveText accounts (PIBS, CDS, FED) and attach their TWS to the LiveText account for their program. All four must be completed to be cleared for graduation.

✔ REQUIREMENT 6

Complete department packet and exit interview.

Program Outcomes

UETS Standard 1: Learner Development

Each candidate understands cognitive, linguistic, social, emotional, and physical areas of student

development.

UETS Standard 2: Learning Differences

Each candidate understands individual learner differences and cultural and linguistics diversity.

UETS Standard 3: Learning Environments

Each candidate works with learners to create environments that support individual and collaborative learning, encouraging positive social interaction, active engagement in learning, and self-motivation.

UETS Standard 4: Content Knowledge

Each candidate understands the central concepts, tools of inquiry, and structure of the discipline.

UETS Standard 5: Assessment

Each candidate uses multiple methods of assessment to engage learners in their own growth, monitor learner progress, guide planning and instruction, and determine whether the outcomes described in content standards have been met.

UETS Standard 6: Instructional Planning

Each candidate plans instruction to support students in meeting rigorous learning goals by drawing upon knowledge of content area, Core Curriculum standards, instructional best practices, and the community context.

UETS Standard 7: Instructional Strategies

Each candidate uses various instructional strategies to ensure that all learners develop a deep understanding of content areas and their connections, and build skills to apply and extend knowledge in meaningful ways.

UETS Standard 8: Reflection and Continuous Growth

Each candidate is a reflective practitioner who uses evidence to continually evaluate and adapt practice to meet the needs of each learner.

UETS Standard 9: Leadership and Collaboration

Each candidate is a leader who engages collaboratively with learners, families, and colleagues, and community members to build a shared vision and supportive professional culture focused on student growth and success.

UETS Standard 10: Professional and Ethical Behavior

Each candidate demonstrates the highest standard of legal, moral, and ethical conduct as specified in Utah State Board Rule R277-515.

ITEEA Standards for Technological Literacy

Each candidate possesses a knowledge of and an ability to implement a contemporary technology and engineering education program based on all 20 of the Standards for Technological Literacy

developed by the International Technology and Engineering Educators Association (ITEEA).

TESOL K-12

Minor

Hours 19 Credit Hours

Program Requirements

This minor is designed to prepare students to teach students who are English learners in public schools. A teaching minor may only be received by students graduating with a teaching major. In order to graduate with this minor, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 350 MCKB, (801) 422-3426.

Courses must be taken in sequential order and no more than two TELL courses can be taken in the same semester/term.

Because the TESOL K-12 minor is now part of the required major programs for elementary education, early childhood education, and special education mild/moderate, students enrolled in these majors will meet some of the course requirements within their major program. Please contact Education Student Services, 350 MCKB, (801) 422-3426 with any questions.

For students accepted into the major after August 1, 2014, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a total GPA of 3.0 or higher throughout the program and to qualify for student teaching. For details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

✔ REQUIREMENT 1 Complete 1 Course

CPSE 425 - Foundations in Language Arts Instruction for Students with Disabilities	3.0
EL ED 323 - Foundations of Literacy Development	3.0
ELANG 223 - Introduction to the English Language	3.0

✔ REQUIREMENT 2 Complete 1 Course

CPSE 480 - Educational and Multicultural Issues in Special Education	3.0
EL ED 203 - Foundations of Multicultural Education	3.0
SC ED 353 - Multicultural Education for Secondary Education	2.0

✔ REQUIREMENT 3 Complete 1 Course

TELL 410 - Second Language Acquisition	2.0

REQUIREMENT 4 Complete 1 Course

CPSE 420 - Assessment and Evaluation of Students with Exceptional Needs	3.0
EL ED 213 - Instructional Design and Assessment for all Learners	3.0
TELL 420 - Assessing Linguistically Diverse Students	2.0

REQUIREMENT 5 Complete 1 Course

CPSE 430 - Teaching Reading/Language Arts to Students with Disabilities	3.0
EL ED 333 - Teaching Literacy in the Primary Grades (K-2)	3.0
TELL 430 - Developing K-12 Literacy in a Second Language	2.0

REQUIREMENT 6 Complete 1 Course

TELL 440 - Content-Based Language Instruction	2.0

REQUIREMENT 7 Complete 1 Course

CPSE 460 - Collaborating with School and Family	3.0
TELL 450 - Family, School, and Community Partnerships	2.0

REQUIREMENT 8 Complete 4.0 hours from the following Courses

Complete four credit hours of the following after all the courses above have been completed:

TELL 477R - TESOL K-12 Student Teaching	4.0v

Program Outcomes

Please contact the individual department for outcome information.

Theatre Arts Education K-12

BA

Hours	83 Credit Hours
LEP	Limited Enrollment Program.
MAP	Major Academic Plan

Program Requirements

This major is designed to prepare students to teach in public schools. In order to graduate with this major, students are required to complete Utah State Office of Education licensing requirements. To view these requirements go to http://education.byu.edu/ess/licensing.html or contact Education Student Services, 120 MCKB, (801) 422-3426.

For students accepted into the major after August 1, 2014, grades below C in any required coursework in a teaching major or teaching minor will not be accepted. Teacher candidates must maintain a total GPA of 3.0 or higher throughout the program and to qualify for student teaching. For details on admission and retention requirements for teaching majors and teaching minors, see Educator Preparation Program Requirements in the Undergraduate Catalog.

A teaching minor is not required for licensure. However, it is strongly recommended.

✔ REQUIREMENT 1 Complete 2 Options

Pre-theatre courses:

Complete the following pre-theatre courses with a B grade or better:

✔ OPTION 1.1 Complete 1 Course

TMA 101 - Introduction to the Theatre	3.0
TMA 102 - Introduction to Film	3.0

Note: TMA 102 is strongly recommended to enhance media literacy.

✔ OPTION 1.2 Complete 1 Course

TMA 160 - Theatre Production 1	1.0

✔ REQUIREMENT 2 Complete 1 Course

Complete the following and be admitted to the licensure program by application during TMA 276 (see the department office, D-581 HFAC). NOTE: FBI fingerprint and background clearance must be completed before enrollment in TMA 276.

TMA 276 - Exploration of Teaching Theatre	3.0

✔ REQUIREMENT 3 Complete 3 Courses

Foundation courses:

TMA 115 - Introduction to Performance Studies	3.0
TMA 123 - Acting Fundamentals	2.0
TMA 236 - Script Analysis for Production	2.0

✔ **REQUIREMENT 4** Complete 5 Courses

Theatre core courses:

TMA 201 - Dramatic Performance: Antiquity to Renaissance	3.0
TMA 202 - Dramatic Performance: Renaissance to the Present	3.0
TMA 260R - Theatre Production 2	3.0v
TMA 301 - Contemporary Performance Practices	2.0
TMA 360R - Theatre Production 3	3.0v

✔ **REQUIREMENT 5** Complete 2 Courses

TMA 395 - Dramatic Literature 1	3.0
TMA 396 - Dramatic Literature 2	3.0
TMA 397 - Dramatic Literature 3	3.0

✔ **REQUIREMENT 6** Complete 16 Courses

Major courses:

TMA 121 - Voice and Diction	2.0
TMA 127 - Beginning Stage Combat	1.0
TMA 252 - Puppetry	2.0
TMA 257 - Storytelling	2.0
TMA 266 - Principles of Stage Craft	2.0
TMA 267 - Principles of Makeup	2.0
TMA 336 - Directing Principles and Practices	3.0
TMA 361 - Stage Management 1	2.0
TMA 368 - Scenic Art	2.0
TMA 375 - Theory and Practice of Teaching Drama in Elementary Classrooms	2.0
TMA 377A - Theatre Methods and Instruction: Design	2.0
TMA 377B - Theatre Methods and Instruction: Secondary Curriculum	2.0
TMA 377C - Theatre Methods and Instruction: Applied Theatre	2.0
TMA 377D - Theatre Methods and Instruction: Elementary Curriculum	2.0
TMA 436 - Theatre Directing Practicum	3.0
TMA 457 - Media in the Contemporary Classroom	3.0

✔ **REQUIREMENT 7** Complete 2 Options

Professional Education Component:

Licensure requirements: Contact the Education Advisement Center, 120 MCKB, 422-3426, to schedule the final interview to clear your application for the secondary teaching license. You should be registered for your last semester at BYU prior to the scheduled appointment.

✔ **OPTION 7.1** Complete 3 Courses

CPSE 402 - Educating Students with Disabilities in Secondary Classrooms	2.0
SC ED 353 - Multicultural Education for Secondary Education	2.0

SC ED 375 - Adolescent Development and Classroom Management	3.0

✔ **OPTION 7.2** Complete 12.0 hours from the following Courses

SC ED 496R - Academic Internship: Secondary Education *You may take up to 12 credit hours.*	12.0
TMA 476 - Secondary Student Teaching	12.0

Student teachers/interns must complete three forms in their LiveText accounts (PIBS, CDS, FED) and attach their TWS to the LiveText account for their program. All four must be completed to be cleared for graduation.

Program Outcomes

Effective Communication

Students will demonstrate their ability to communicate effectively with their peers, students and other teaching and learning communities by exhibiting a working knowledge of curriculum design, delivery and assessment along with examples of their own self-reflective practices.

Strategies

Students will demonstrate their ability to integrate dramatic strategies and skills into arts and non-arts based elementary and secondary educational environments by practicing educational sensitivity to differences in students and learning preferences.

Professional Pedgogical Practices

Students will demonstrate professional pedagogical practices by thinking critically about educational trends and transferring their knowledge and training in theatre arts education into creating, developing, and implementing standards-based comprehensive theatre curriculum into their classroom and professional communities.

Scholarly Abilities

Students will demonstrate their scholarly ability as theatre practitioners by applying appropriate technology to curriculum, exhibiting a working knowledge of all major elements of theatre history, theory, and practice, and engaging with the great works of theatre and media.

Ethics

Students demonstrate their ability to practice and articulate their ethics of theatre by applying gospel-centered values as they contribute to classrooms and individual learners, exercising moral reasoning when faced with ethical dilemmas in their classroom, school or district, and demonstrating a commitment to making a positive difference in their sphere of influence.

Basic Competence Level

EPP candidates will meet the Utah Effective Teaching Standards (UETS) at the basic competence level.

TMA 561R - Stage Management Project	6.0v
TMA 599R - Academic Internship: Media	9.0v
TMA 599R - Academic Internship: Theatre	9.0v
TMA 599R - Academic Internship	9.0v

Program Outcomes

Core Concepts

Students will demonstrate a comprehension of the core concepts, processes, history, and theory of performance.

Technical Skills

Students will implement analytical, conceptual and technical skills in a variety of performance practices.

Creative Voice

Students will integrate knowledge of core concepts, and technical and collaborative skills into a personal approach to creation.

Character Building

Students will demonstrate a commitment to honoring their religious convictions, respecting the ethics of representation, and serving humanity.

Career Development

Students will develop a variety of skills and materials that will prepare them for graduate studies, teaching opportunities, professional production, or other performance-related work.

Top

Theatre Arts Studies

Minor

Hours 19 - 20 Credit Hours

Program Requirements

✔ REQUIREMENT 1 Complete 2 Courses

Prerequisite courses:

TMA 101 - Introduction to the Theatre	3.0
TMA 160 - Theatre Production 1	1.0

Complete and submit declaration form for the theatre arts studies minor to the department office (D-581 HFAC).

✔ REQUIREMENT 2 Complete 3 Courses

Core courses:

TMA 115 - Introduction to Performance Studies	3.0
TMA 201 - Dramatic Performance: Antiquity to Renaissance	3.0
TMA 202 - Dramatic Performance: Renaissance to the Present	3.0

✔ REQUIREMENT 3 Complete 1 Course

TMA 123 - Acting Fundamentals	2.0
TMA 236 - Script Analysis for Production	2.0
TMA 251 - Playwriting 1	3.0
TMA 352 - Drama in the Elementary Classroom	2.0
TMA 380 - Dramaturgy 1	3.0

✔ REQUIREMENT 4 Complete 1 Course

TMA 260R - Theatre Production 2 *You may take this course up to 1 time.*	3.0v
TMA 360R - Theatre Production 3 *You may take this course up to 1 time.*	3.0v

✔ REQUIREMENT 5 Complete 1 Course

TMA 395 - Dramatic Literature 1	3.0
TMA 396 - Dramatic Literature 2	3.0

Program Outcomes

Please contact the individual department for outcome information.

Top

Theoretical and Applied Ethics

Minor

Hours 14 Credit Hours

Program Requirements

REQUIREMENT 1 Complete 1 Course

PHIL 213 - Introduction to Ethics	3.0

REQUIREMENT 2 Complete 1 Option

OPTION 2.1 Complete 4 Courses

From the following, complete 4 courses in ethics, social and political philosophy, or history of philosophy with an emphasis on ethics:

PHIL 217R - Social and Political Philosophy	3.0
PHIL 313R - History of Ethics	3.0
PHIL 320R - Studies in Ancient Philosophy	3.0
PHIL 330R - Studies in Medieval Philosophy	3.0
PHIL 340R - Studies in Modern Philosophy	3.0
PHIL 350R - Studies in Contemporary Philosophy	3.0
PHIL 413R - Topics in Ethics	3.0
POLI 362 - Reason, Revelation, and Politics	3.0
POLI 367 - Contemporary Political Theory	3.0

Note 1: No more than six credit hours may double-count for both the Philosophy major and the Theoretical and Applied Ethics minor.

Note 2: One approved 2 or 3 credit course in ethics from another department may substitute for any single course listed in the electives list above. (The Philosophy Department maintains a list of ethics courses offered by other BYU departments.)

Program Outcomes

Please contact the individual department for outcome information.

Tourism Studies

Minor

Hours 18 Credit Hours

Program Requirements

REQUIREMENT 1 Complete 3 Courses

GEOG 120 - Geography and World Affairs	3.0
GEOG 347 - Tourism: A Conceptual Framework	3.0
GEOG 348 - Tourism: Patterns and Analysis	3.0

REQUIREMENT 2 Complete 2 Courses

BUS M 241 - Marketing Management	3.0
GEOG 349 - Global Adventure Travel	3.0
GEOG 350 - Tourism Planning	3.0
GEOG 353 - Heritage and Cultural Tourism	3.0
HIST 369 - Travel and Tourism in America	3.0
RECM 300 - Creating a Good Life through Recreation	3.0

REQUIREMENT 3 Complete 1 Course

Regional courses:

GEOG 245 - Geography of Utah	3.0
GEOG 250 - United States and Canada	3.0
GEOG 255 - Middle and South America	3.0
GEOG 260 - Europe	3.0
GEOG 265 - Russia and the Former Soviet Union	3.0
GEOG 271 - Middle East	3.0
GEOG 272 - East Asia	3.0
GEOG 285 - Africa South of the Sahara	3.0

Program Outcomes

Please contact the individual department for outcome information.

Western American Studies

Minor

Hours 18 Credit Hours

Program Requirements

REQUIREMENT 1 Complete 1 Course

AM ST 300 - Literature and Cultures of the American West	3.0

REQUIREMENT 2 Complete 3 Options

Clusters:

Complete one course from three of the following four clusters:

OPTION 2.1 Complete 1 Course

Natural Environment Cluster:

GEOL 101 - Introduction to Geology	3.0
PWS 150 - Environmental Biology	3.0
PWS 215 - Principles of Range Management	3.0
PWS 225 - Principles of Wildlife and Fisheries Management	3.0

OPTION 2.2 Complete 1 Course

Human Heritage Cluster:

HIST 360 - American West to 1900	3.0
HIST 361 - The American West Since 1900	3.0

OPTION 2.3 Complete 1 Course

Social Environment Cluster:

ANTHR 345 - American Culture	3.0
ANTHR 346 - Anthropology of Mormonism	3.0
ANTHR 350 - Archaeological Cultures of North America	3.0
ECON 274 - American Economic History	3.0
SOC 327 - Sociology of the LDS Church and Its People	3.0

OPTION 2.4 Complete 1 Course

Arts and Literature Cluster:

ENGL 364 - (Not currently offered)	

ENGL 368 - Literature of the Latter-day Saints	3.0
ENGL 392 - American Folklore	3.0
SPAN 365 - Mexican-American Culture	3.0

✔ **REQUIREMENT 3** Complete 1 Option

Electives:

Complete additional elective courses (6 hours) to make a total of 18 hours. Electives may be chosen from the courses listed above that have not been used (included in the list below), from the additional courses listed below, or from topical courses on Western themes offered through academic departments or the Honors Program.

✔ **OPTION 3.1** Complete 6.0 hours from the following Courses

AM ST 390R - Topics in American Studies	3.0
AM ST 392R - American Studies Lecture Series: Presentations on American Studies/Western American Studies	1.0
AM ST 399R - Academic Internship	6.0v
ANTHR 317 - Native Peoples of North America	3.0
ANTHR 345 - American Culture	3.0
ANTHR 346 - Anthropology of Mormonism	3.0
ANTHR 350 - Archaeological Cultures of North America	3.0
ANTHR 530 - Great Basin Archaeology	3.0
ANTHR 535 - Southwest Seminar	3.0
ARTHC 345 - American Art	3.0
ARTHC 353 - American Art 1876-1950	3.0
ECON 274 - American Economic History	3.0
ENGL 364 - (Not currently offered)	
ENGL 368 - Literature of the Latter-day Saints	3.0
ENGL 392 - American Folklore	3.0
GEOG 245 - Geography of Utah	3.0
GEOG 250 - United States and Canada	3.0
GEOG 306 - Public Land Conservation	3.0
GEOL 101 - Introduction to Geology	3.0
HIST 360 - American West to 1900	3.0
HIST 361 - The American West Since 1900	3.0
HIST 363 - The Spanish Frontier in North America	3.0
HIST 364 - Utah	3.0
HIST 382 - Mormonism in the American Experience	3.0
HIST 385 - Latinos in the United States	3.0
HIST 386 - Nineteenth-Century American Indian History	3.0
HIST 387 - Twentieth-Century American Indian History	3.0
POLI 311 - State and Local Government and Politics	3.0
POLI 317 - Public Opinion and Voting Behavior	4.0v
PWS 150 - Environmental Biology	3.0
PWS 215 - Principles of Range Management	3.0
PWS 225 - Principles of Wildlife and Fisheries Management	3.0
PWS 375 - Environmental Policies and Laws	3.0
PWS 411 - Watershed Management	3.0
REL C 342 - Pioneers and Persecution, 1846-1899	2.0
REL C 343 - The Global Church, 1900 to the Present	2.0
SOC 327 - Sociology of the LDS Church and Its People	3.0
SPAN 365 - Mexican-American Culture	3.0

Wildlife & Wildlands Conservation

BS

Hours	67 Credit Hours
MAP	Major Academic Plan

Program Requirements

REQUIREMENT 1 Complete 20 Courses

BIO 447 - Mammalogy	3.0
PWS 100 - Plants in the Environment	3.0
PWS 113 - Safety Certifications for Field Biologists	1.0
PWS 115 - Introduction to Wildlife and Wildlands Conservation	1.0
PWS 215 - Principles of Range Management	3.0
PWS 225 - Principles of Wildlife and Fisheries Management	3.0
PWS 275 - Genetics and Reproduction	3.0
PWS 282 - Introduction to Soil Science	3.0
PWS 283 - Introduction to Soil Science Laboratory	1.0
PWS 330 - Rangeland Plant Identification and Ecology	3.0
PWS 335 - Comparative Animal Nutrition	3.0
PWS 344 - Natural History of Wildlife	3.0
PWS 350 - Rangeland Ecology	3.0
PWS 355 - Rangeland Vegetation Measurements and Analysis	3.0
PWS 357 - Techniques for Wildlife Investigations and Management	3.0
PWS 375 - Environmental Policies and Laws	3.0
PWS 416 - Rangeland Vegetation Improvement	3.0
PWS 417 - Rangeland Planning and GIS	3.0
BIO 446 - (Bio - PWS) Ornithology	3.0
PWS 492 - Wildlife and Wildlands Conservation Senior Seminar	1.0

REQUIREMENT 2 Complete 15.0 hours from the following Courses

Complete 15 elective credit hours from the following course list. With the help of your advisor, select courses to qualify for 2-3 federal job series (wildlife biologist, ecologist, range conservationist, GIS specialist, soil conservationist, botanist, fisheries biologist):

BIO 220 - Biological Diversity: Animals	4.0
BIO 230 - Biological Diversity: Plants	4.0
BIO 235 - Field Botany	3.0
BIO 270 - Animal Restraint	1.0
BIO 380 - Comparative Animal Physiology and Anatomy	4.0
BIO 420 - Evolutionary Biology	2.0
BIO 430 - Plant Classification and Identification	4.0
BIO 441 - Entomology	3.0

BIO 442 - Advanced Invertebrate Zoology	5.0
BIO 443 - Ichthyology	3.0
BIO 445 - Herpetology	4.0
BIO 450 - Conservation Biology	3.0
BIO 452 - Marine Biology	4.0
BIO 525 - Animal Disease, Biosecurity, and Zoonoses	3.0
BIO 541 - Aquatic Entomology	4.0
BIO 556 - Limnology	3.0
BIO 557 - Stream and Wetland Ecology	4.0
GEOG 211 - Map Use and Interpretation	4.0
GEOG 212 - Introduction to Geographic Information Systems	3.0
GEOG 306 - Public Land Conservation	3.0
GEOG 412 - Advanced Geographic Information Systems	3.0
PDBIO 482 - Developmental Biology	3.0
PWS 270 - Animal Husbandry	3.0
PWS 301 - Plant Growth and Reproduction	3.0
PWS 303 - Soils Conservation and Resources	3.0
PWS 315 - Conflict Resolution Management	1.0
PWS 324 - Wildlife Law Enforcement	3.0
PWS 325 - Fisheries and Wetlands Management	3.0
PWS 411 - Watershed Management	3.0
PWS 419 - Forest Management and Ecology	3.0
PWS 440 - Plant Physiology	3.0
PWS 511 - Environmental Biophysics: Soil and Plant Water Relations	4.0
PWS 512 - Rangeland Landscape Ecology and Geographic Information Systems	3.0
PWS 547 - Ungulate Conservation and Management	2.0
PWS 553 - Restoration Ecology	3.0
PWS 554 - Wildlife Behavioral Ecology	3.0

✔ **RECOMMENDED** Complete 10 Courses

Recommended courses for preprofessional track. These recommended preprofessional courses can be used to satisfy the elective credits above.

CHEM 105 - General College Chemistry	4.0
CHEM 106 - General College Chemistry	3.0
CHEM 107 - General College Chemistry Laboratory	1.0
CHEM 351 - Organic Chemistry	3.0
CHEM 352 - Organic Chemistry	3.0
CHEM 353 - Organic Chemistry Laboratory--Nonmajors	2.0v
PDBIO 120 - Science of Biology	2.0
PHSCS 105 - General Physics 1	3.0
PHSCS 106 - General Physics 2	3.0
PHSCS 107 - General Physics Lab 1	1.0
PHSCS 108 - General Physics Lab 2	1.0

✔ **RECOMMENDED** Complete 1 Course

One of the following courses is recommended:

BIO 380 - Comparative Animal Physiology and Anatomy	4.0
PDBIO 305 - Human Physiology (with lab)	4.0
PDBIO 362 - Advanced Physiology	3.0

Students interested in GIS applications should consider a minor in geographic information

systems (20-23 hours). See the Geography Department for details.

Program Outcomes

Stewardship and Professional Judgement

Identify and articulate principles of stewardship as a basis for professional judgment.

Plant and Wildlife Identification

Identify wildland plants and wildlife species and describe how they function in the environment.

Wildlands Management

Apply knowledge of ecology to wildland management.

Tools, Techniques, and Application

Demonstrate ability to apply tools, techniques, analytical thought, and the scientific method to ecological and management issues.

Conflict Resolution and Mutli-disciplinary Teams

Gain experience and be prepared to be leaders in conflict resolution and important members of multi-disciplinary teams.

Women's Studies

Minor

Hours 16 Credit Hours

Program Requirements

REQUIREMENT 1 Complete 1 Course

WS 222 - (WS-Soc) Introduction to Women's Studies	3.0

REQUIREMENT 2 Complete 2 Courses

WS 392R - Women's Studies Colloquium *You may take this course up to 2 times.*	1.0

REQUIREMENT 3 Complete 9.0 hours from the following Courses

Only two courses from any one department can be taken towards the minor requirements.

ANTHR 431 - Kinship and Gender	3.0
ARTHC 301 - Women in Art	3.0
COMMS 481 - Gender, Race, and Class in the Media	3.0
ENGL 396 - Studies in Women's Literature	3.0
HIST 318 - European Women's History	3.0
HIST 319 - The Family in Europe	3.0
HIST 358 - Gender and History in Latin America	3.0
HIST 378 - History of American Families	3.0
HIST 384 - United States Women's History	3.0
HLTH 450 - Women's Health Issues	3.0
POLI 342 - Gender and Politics	3.0
POLI 472 - International Political Economy of Women	3.0
PSYCH 306 - Psychology of Gender	3.0
SFL 461 - The Family and the Law	3.0
SFL 471 - Philosophies of Family Work and Relationships	3.0
SOC 323 - Racial and Minority-Group Relations	3.0
SOC 360 - Introduction to Family Sociology	3.0
SOC 367 - Sociology of Gender	3.0
WS 332 - Mormon Women's History	3.0
WS 350 - Medieval European Women Writers	3.0
WS 351 - Early Modern European Women Writers	3.0
WS 352 - Modern European Women Writers	3.0
WS 354 - Pan American Women Writers	3.0
WS 370 - Women in Science	3.0

WS 390R - Women's Studies Special Topics	3.0v
WS 395R - Mentored Study Experience	3.0v
WS 399R - Women's Studies Internship	3.0v
WS 422 - Theories of Women's Studies	3.0

✔ **REQUIREMENT 4** Complete 1 Course

WS 492 - Women's Studies Capstone	2.0

Program Outcomes

Women and Society

1. Students will be able to demonstrate knowledge of the ways different social institutions and issues (race, ethnicity, class, health and science, religion, family relationships, sexuality, communication, the media, gender-based violence, government and law, education, employment) intersect with and affect women's lives.

Women

2. Students will be able to demonstrate knowledge of the worldwide contributions of women (individually and collectively) to history, culture, politics, health, science, religion, family, etc.

Effective Communication and Analysis

3. Students will be able to read, write, and think analytically. They will be able to conduct research using primary and secondary sources and communicate that research effectively in oral, written, and multi-media presentations.

Top

World Dance

Minor

Hours 16.0 - 16.5 Credit Hours

Program Requirements

✔ REQUIREMENT 1 Complete 1 Course

Complete the following with a grade of B or better:

DANCE 270 - World Dance Technique 1	1.0

The Dance Department requires a minimum of 8 hours to be completed in residency at BYU for this minor program. These hours may also go toward BYU's 30-hour residency requirement for graduation.

✔ REQUIREMENT 2 Complete 5 Courses

Core courses:

DANCE 172 - Western: Square and Contra Dance	1.0
DANCE 260 - Introduction to Dance	3.0
DANCE 271 - Clog Dance Technique 1	1.0
DANCE 370 - World Dance Technique 2	1.0
DANCE 376 - Methods of Teaching World Dance	2.0

✔ REQUIREMENT 3 Complete 5.0 hours from the following Courses

Only 2 credit hours total may be used for performance classes, either Dance 378R or Dance 478R.

DANCE 371R - Clog Dance Technique 2	1.0
DANCE 373 - Hungarian Dance: Practice and Theory, Technique 2	1.0
DANCE 374R - Irish Dance: Practice and Theory, Technique 2	1.0
DANCE 377 - World Dance Choreography	2.0
DANCE 378R - Folk Dance Performance, Intermediate *You may take up to 2 credit hours.*	1.0
DANCE 474R - Percussive Step Styles	1.0
DANCE 477 - Dance - a Reflection of Culture	2.0
DANCE 478R - Folk Dance Performance Company *You may take up to 2 credit hours.*	2.0

✔ REQUIREMENT 4 Complete 1 Course

Choose the course that best fits your ballet technique level.

DANCE 190 - Ballet, Beginning	1.0
DANCE 192 - Character Dance	1.0

✔ **REQUIREMENT 5** Complete 2.0 hours from the following Courses

DANCE 272 - Chinese Dance: Practice and Theory, Technique 1	1.0
DANCE 273 - Hungarian Dance: Practice and Theory, Technique 1	1.0
DANCE 274R - Irish Dance: Practice and Theory, Technique 1	1.0
DANCE 275 - Polynesian Dance: Practice and Theory, Technique 1	1.0
DANCE 277 - Spanish Dance: Practice and Theory, Technique 1	1.0
DANCE 278 - Ukrainian Dance: Practice and Theory, Technique 1	1.0
DANCE 279 - Indian Dance: Practice and Theory, Technique 1	1.0

Program Outcomes

Please contact the individual department for outcome information.

Writing and Rhetoric

Minor

Hours 19 Credit Hours

Program Requirements

REQUIREMENT 1 Complete 3 Courses

ENGL 322 - Fundamentals of Rhetoric	3.0
ENGL 324 - Writing with Style	3.0
ENGL 400 - Portfolio Capstone for Writing and Rhetoric Minors	1.0

REQUIREMENT 2 Complete 1 Course

ENGL 311 - Writing About the Arts and Humanities	3.0
ENGL 312 - Persuasive Writing	3.0
ENGL 316 - Technical Communication	3.0

REQUIREMENT 3 Complete 9.0 hours from the following Courses

Complete 9 additional credit hours from the following (courses will not double count between this requirement and that above). Note: Engl 399R must be in a rhetoric- or writing-related profession; Engl 495 may have prerequisites.

ENGL 211 - Rhetoric and Civilization 1	3.0
ENGL 212 - Rhetoric and Civilization 2	3.0
ENGL 218R - Creative Writing	3.0
ENGL 220 - Composing Personal History	3.0
ENGL 311 - Writing About the Arts and Humanities	3.0
ENGL 312 - Persuasive Writing	3.0
ENGL 316 - Technical Communication	3.0
ENGL 324 - Writing with Style	3.0
ENGL 325 - Visual Rhetoric	3.0
ENGL 326 - Digital Culture	3.0
ENGL 327R - Studies in Rhetoric	3.0
ENGL 328R - Studies in Composing	3.0
ENGL 399R - Academic Internship	9.0v
ENGL 495 - The Senior Course	3.0

Program Outcomes

History, Theory, and Criticismv

Students will define, explain, and debate the principles and practices from rhetorical theories throughout history, showing meta-cognitive awareness of the effective interpretive and composing processes involved in a rhetorical approach to reading and producing acts of communication.

Composing and Presentational Skills in a Variety of Genres

Students will employ an expanded repertoire of composing skills and processes to produce effective texts in a variety of genres and modes of discourse, including multi-modal texts combining print, visual, digital, and other means of communication.

Grammar and Style

Students will use grammar and style to analyze, imitate, and create effective and appropriate discourse in a wide variety of communicative acts.

Courses

American Heritage

Synthesis of American constitutional and economic principles, and patterns of historical development.

A HTG 100

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Historical Context

Explain the historical context within which the Founders' constitutionalism relates to more recent concerns of democracy and rights

Origins of the Constitution

Understand the religious, historical, political and economic origins of the Constitution

Apply knowledge

Apply their knowledge of the Constitution to analyze major historical, political and economic issues.

Active Citizens

Become better informed, more active citizens.

Principles of Accounting

Financial and managerial accounting principles. Basic accounting statements, processes, and management applications. Open to all students.

ACC 200

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring
Offered	Independent Study also.

Course Outcomes

Intelligently Converse

Intelligently converse about the following areas:
a. The role of accounting in international business
b. The role of information systems in financial reporting
c. Fraud and how to prevent fraud
d. The theory and practice of income taxes
e. Investing in stocks
f. Career planning and spiritual decision making
g. Managerial accounting as a competitive tool
h. Personal budgeting and financial planning

Balance sheets and income statements

Construct and interpret a balance sheet and income statement understanding its usefulness in business and investment decision making.

Internal Accounting tools

Construct and use internal accounting tools such as cost-volume-profit analysis, budgets, product cost reports, and nonroutine decision analyses to understand how to make better business management decisions.

Terms and Concepts

Comfortably use accounting terms and concepts in business-related discussions.

Write a Memo

Write a brief, focused memo demonstrating basic understanding of background business reading material.

Tools and Resources

Use computer-aided learning tools and online learning resources.

Learning Outcome

Manage workload in a self-paced learning environment.

Principles of Financial Accounting

First course in concepts and methods underlying financial statements.

ACC 201

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	
Offered	Independent Study only.

Course Outcomes

Financial Statements

Construct and interpret a balance sheet and income statement.

Internal Accounting Tools

Construct and use internal accounting tools such as budgets, product cost reports, breakeven analysis, and non-routine decision analyses.

Analyzing Transactions

Analyze transactions, record those transactions, and then use the accounting cycle to generate accounting reports.

Financial Accounting Rules

Apply the financial accounting rules that exist in the following areas: revenue recognition, inventory, compensation, long-term assets, bonds, and leases.

Ethical Dimensions of Business Problems

Intelligently discuss the ethical dimensions of a variety of accounting-related business problems.

Computer-Aided Tools

Use computer-aided learning tools and online learning resources.

Managing Workloads

Manage workload in a self-paced learning environment.

Top

Principles of Managerial Accounting

Second course in the elementary series covering managerial problems and control of business operations.

ACC 202

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	ACC 201
Taught	
Offered	Independent Study only.

Course Outcomes

Statement of Cash Flows

Construct and interpret a statement of cash flows, including operating cash flows, investing cash flows, and financing cash flows.

Internal Accounting Tools

Construct and use internal accounting tools such as budgets, product cost reports, breakeven analysis, and nonroutine decision analyses.

Analyzing Transactions

Analyze transactions, record those transactions, and then use the accounting cycle to generate accounting reports.

Financial Accounting Rules

Apply the financial accounting rules that exist in the area of inventory for a manufacturing company.

Ethics in Business

Intelligently discuss the ethical dimensions of a variety of accounting-related business problems.

Computer-Aided Learning Tools

Use computer-aided learning tools and online learning resources.

Managing Workloads

Manage workload in a self-paced learning environment.

Top

Business Law in the Environment

Introduction to legal principles and institutions affecting business.

ACC 241

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Marriott School of Management major status.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Sources, Courts, Jurisdiction, Crimes, and Torts

Demonstrate a working knowledge of and the ability to analyze issues of law applied to relevant facts for the following topics: sources of law, courts and their procedures, jurisdiction, crimes, and torts.

Contract Formation, Defects in Agreement, Statue of Frauds, Parole Evidence rule and Third Party Rights

Demonstrate a working knowledge of and the ability to analyze issues of law applied to relevant facts for: contract formation, defects in agreement, the statute of frauds and the parole evidence rule, third party rights, and breach/remedies.

Agency Formation and Termination, Partnerships, LLC's, Corporate Formation and Operation

Demonstrate a working knowledge of and the ability to analyze issues of law applied to relevant facts for: agency formation and termination, partnerships, LLC's, and corporate formation and operation.

Ethical Principles

Apply ethical principles to legal problems.

Top

Introduction to Accounting 2

Additional issues in financial and managerial accounting. Review of issues related to balance sheet accounts, performance evaluation and capital budgeting.

ACC 300

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ACC 200
Note	For non-business majors.
Taught	Fall, Winter, Spring, Summer
Offered	Available as Independent Study only.

Course Outcomes

Learning Objective

Construct and interpret both a balance sheet and income statement that include elements more advanced than the basic items typically introduced in the first accounting course.

Learning Objective

Construct and interpret a statement of cash flows.

Learning Objective

Apply the financial accounting rules that exist in the following areas:
a. Revenue recognition
b. Inventory
c. Long-term assets
d. Bonds
e. Leases
f. Stockholders' equity
g. Investment securities

Learning Objective

Employ the time value of money in a financial accounting context.

Learning Objective

Apply managerial accounting concepts in the following areas:
a. Use the concepts of financial leverage and operating leverage to assess a company's riskiness.
b. Perform cost-volume-profit analysis using regresssion to identify the fixed and variable components of a mixed cost and in multiple-product settings.
c. Track product costs through a manufacturing process.
d. identify problems through the use of cost variance analysis.

Learning Objective

Independently manage time and workload for a variety of tasks.

Top

Principles of Accounting 2

Additional coverage of issues in financial and managerial accounting. Review of issues related to balance sheet accounts, performance evaluation, and capital budgeting.

ACC 305

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ACC 200 & FIN 201
Taught	Winter

Course Outcomes

Learning Outcome

Construct and interpret both a balance sheet and income statement that include elements more advanced than the basic items introduced in Acc 200.

Learning Outcome

Construct and interpret a statement of cash flows.

Learning Outcome

Apply the financial accounting rules that exist in the following areas:
a. Revenue recognition (including SAB 101)
b. Inventory
c. Long-term assets (including impairment)
d. Bonds
e. Leases (including the financial ratio impact of operating leases)
f. Stockholders' equity (including accumulated other comprehensive income)
g. Investment securities (including use of the market adjustment account)

Learning Outcome

Employ the time value of money in a financial accounting context.

Learning Outcome

Apply managerial accounting concepts in the following areas:
a. Use the concepts of financial leverage and operating leverage to assess a company's riskiness.
b. Perform cost-volume-profit analysis using regresssion to identify the fixed and variable components of a mixed cost and in multiple-product settings.
c. Track product costs through a manufacturing process (including use of process costing).
d. identify problems through the use of cost variance analysis.

Learning Outcomes

Construct and use simple Excel spreadsheets in a variety of business settings.

Learning Outcome

Independently manage time and workload for a variety of tasks.

Top

Principles of Accounting 2

Additional issues in financial and managerial accounting. Review of issues related to balance sheet accounts, performance evaluation and capital budgeting.

ACC 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ACC 200
Taught	Fall, Winter, Spring
Offered	Available on BYU campus only.

Course Outcomes

Learning Outcome

Construct and interpret both a balance sheet and income statement that include elements more advanced than the basic items introduced in Acc 200.

Learning Outcome

Construct and interpret a statement of cash flows.

Learning Outcome

Apply the financial accounting rules that exist in the following areas:
a. Revenue recognition (including SAB 101)
b. Inventory
c. Long-term assets (including impairment)
d. Bonds
e. Leases (including the financial ratio impact of operating leases)
f. Stockholders' equity (including accumulated other comprehensive income)
g. Investment securities (including use of the market adjustment account)

Learning Outcome

Employ the time value of money in a financial accounting context.

Learning Outcome

Apply managerial accounting concepts in the following areas:
a. Use the concepts of financial leverage and operating leverage to assess a company's riskiness.
b. Perform cost-volume-profit analysis using regresssion to identify the fixed and variable components of a mixed cost and in multiple-product settings.
c. Track product costs through a manufacturing process (including use of process costing).
d. identify problems through the use of cost variance analysis.

Learning Outcome

Construct and use simple Excel spreadsheets in a variety of business settings.

Learning Outcomes

Independently manage time and workload for a variety of tasks.

Business and Accounting Information Systems

Inputs, processing, outputs, and files of several transaction-processing subsystems. Foundation for understanding internal control. Variety of tools used to design, create, or document accounting information systems (AIS) to achieve organizational objectives.

ACC 401

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Admission to SOA.
Taught	Fall

Course Outcomes

Business Processes and Report Control Deficiencies

Analyze a set of business processes and report control deficiencies

Evaluate Various Controls

Learn how to evaluate the appropriateness of various controls

Model Data Relations

Model data relations required to support an accounting information system

Communicate Effectively

Communicate effectively both in writing and in presentations

Use Technology Effectively

Use technology effectively in solving business problems.

Cost and Managerial Accounting

Cost and managerial accounting topics, including production processes, product costing, cost behavior analysis with regression, differential costing, capital budgeting, throughput accounting, performance measurement, and budgeting.

ACC 402

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Admission to SOA.
Taught	

Course Outcomes

Use Management Accounting

Know how to use management accounting to plan, control, and evaluate business processes.

Apply Management Accounting Concepts

Apply management accounting concepts to real-world settings.

Function in a Team Setting

Demonstrate an improved ability to function in a team setting.

Use Excel Effectively

Use Excel effectively to analyze and solve business problems.

Intermediate Financial Accounting 1

Financial reporting issues for balance sheet, income statement, and cash-flow statement. Revenue recognition, accounting for long-term assets, investment securities, and derivative instruments; consolidation.

ACC 403

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Admission to SOA.
Taught	Fall, Winter

Course Outcomes

Apply Financial Accounting Procedures

Apply intermediate-level financial accounting procedures to the construction and interpretation of balance sheets, income statements, and statements of cash flows.

Evaluate Ethical Considerations

Evaluate the ethical considerations of such accounting-related topics as earnings management and the strategic choice of accounting procedures.

Fair Values

Understand the use of fair values in accounting.

Analyze Business Issues

Use the structure of financial statements and an understanding of financial accounting standards and processes to analyze business issues in an unstructured, case-based setting.

Financial Accounting 2

Accounting for receivables and inventory. Major reporting issues associated with liabilities and stockholder's equity. Introduction to computing basic and diluted earnings per share.

ACC 404

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Admission to SOA.
Taught	

Course Outcomes

Prepare Journal Entries and Footnote Disclosures

Demonstrate, through homework, quizzes and examinations that you can prepare journal entries and footnote disclosures required to account for and report in compliance with GAAP the following areas:
Leases
Derivatives
Stock related transactions
Earnings per share
Investments
Consolidations
Income taxes

Accounting for Changes and Error Corrections

Demonstrate, through homework, quizzes and examinations, that you can apply the appropriate procedures for accounting for changes and error corrections.

Fundamentals of Taxation

Tax principles applicable to business entities and individuals; tax compliance issues; tax planning as part of overall strategic planning process for businesses and individuals.

ACC 405

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Admission to SOA.
Taught	

Course Outcomes

Learning Outcomes

Demonstrate a working knowledge of taxation

Learning Outcomes

Work effectively in groups to solve unstructured tax problems related to taxation.

Learning Outcomes

Demonstrate an ability to communicate at a professional level in both writing and verbal presentations.

Learning Outcomes

Demonstrate working skills in using information technologies commonly expected of entry level professionals in taxation

Financial Statement Auditing

Introduction to framework providing financial statement assurance; integrating accounting and business knowledge with concepts from other disciplines such as statistics and law; framework applied to major business cycles, providing specific knowledge in financial statement auditing.

ACC 406

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Admission to SOA.
Taught	

Course Outcomes

Learning Outcomes

be able to identify, define and apply the key concepts related to the financial statement auditing process and the audit of internal control

Learning Outcomes

be able to combine their knowledge of the auditing process with analytical reasoning to reach justifiable auditing decisions.

Learning Outcomes

be able to develop audit strategies for several of the major financial statement cycles

Learning Outcomes

be able to identify, define and apply the basic concepts underlying professional ethics

Learning Outcomes

be able to perform basic audit analyses using software used in audit practice

Learning Outcomes

be able to identify and define the primary components of the environment in which auditors operate

Corporate Financial Reporting

Accounting principles of corporate financial reporting. Judgments managers make preparing financial statement information. How complexities, alternatives, and impacts affect completed financial statements.

ACC 440

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ACC 200 & BUS M 301; or ACC 200 & BUS M 201; or ACC 200 & FIN 201
Note	For nonaccounting majors.
Taught	Winter

Course Outcomes

Learning Outcomes

Identify financial statement areas where managers can exercise significant judgment and identify how managers choices in these areas impact earnings reported in financial statements. Specific areas addressed include the following:

1. Financial Forecasts
2. Primary Financial Statements
3. Earnings Management
4. Leases
5. Pensions
6. Financial statement footnotes
7. Long-lives Assets
8. Inventory accounting
9. Income Taxes

Learning Outcomes

Demonstrate the proficiency to address CFA exam questions over the topic areas covered in this course.

Learning Outcomes

Apply ethical considerations to earnings management issues.

Money, the Financial System, and the Economy

Applications of industry analysis and microeconomic principles in the macroeconomic environment that influences individuals and financial intermediaries that transact in money and credit markets.

ACC 453

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Understanding Banking Concepts

Understand interest rates, rate determination and discounted present value.

Stocks and U.S. Treasuries

Understand differential spot, forward & derivatives, futures and options markets, with specific application to stocks and US Treasuries.

Financial Intermediaries

Understand the function and management of financial intermediaries.

Aggregate Economics

Understand basic aggregate economics: actual and potential supply and actual demand and their implication for growth, employment and inflation.

Trade and Exchange Rates

Understand trade and exchange rates.

Advanced Financial Accounting

Advanced financial accounting topics including pensions, earnings per share, accounting changes, and deferred income taxes.

ACC 503

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Marriott School Graduate Core.
Taught	Fall, Spring

Course Outcomes

Learning Outcomes

To acquire and practice an “advanced” level of problem solving, to become proficient in financial accounting.

Learning Outcomes

Be able to communicate effectively both orally and in writing

Learning Outcomes

Develop a sense of ethical values that translate into the business community

Learning Outcomes

Learn to work in and to develop an effective team.

Top

Accounting Research Seminar

Professional standards and professional literature of accounting and auditing; related academic research. Research tools, information technologies, and critical analysis emphasized.

ACC 515

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to MAcc.
Taught	Fall

Course Outcomes

Learning Outcomes

Become proficent researching technical accounting issues using professional databases and other resources.

Learning Outcomes

Improve your ability to explain and defend your accounting recommendations, both orally and in writing.

Learning Outcomes

Improve your ability to thrive within a team of accounting professionals.

Learning Outcomes

Become familiar with and apply decision making frameworks and identify pitfalls and biases that affect decisions in personal and business settings.

Learning Outcomes

Understand and better explain accounting theory, methods of measurement, and academic accounting research.

Learning Outcomes

Increase your desire to learn throughout your career and your lifetime, to continually sharpen your mind.

Learning Outcomes

Assist you in your quest for perfection and eternal life (the mission of Brigham Young University).

Introduction to Academic Research

Fundamentals of academic research, including the scientific method, the philosophy of science, and the areas and methodologies of academic research.

ACC 516

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to the MAcc predoctoral track.
Taught	Fall

Course Outcomes

Learning Outcomes

Use fundamental concepts from the philosophy of science (e.g., causality, validity, and threats to validity) to evaluate and critique various approaches to researching issues in accounting.

Learning Outcomes

Identify an interesting and consequential issue in accounting and develop related ideas and theory into an interesting, motivated, and researchable question.

Learning Outcomes

Develop the ability to apply tools from the philosophy of science to effectively critique actual research papers.

Learning Outcomes

Communicate complex topics relating to academic research both orally and in writing.

Top

Academic Research Applications

Basic SAS programming; practice using Compustat and CRSP databases; performing archival research.

ACC 517

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	ACC 516; Admission to the MAcc predoctoral track.
Taught	Winter

Course Outcomes

Learning Outcomes

Learn to program in SAS

Learning Outcomes

Learn how to extract data from the Compustat and CRSP databases

Learning Outcomes

Learn to perform archival academic research

Advanced Taxation

Tax laws as they apply to selected tax entities, with an introduction to tax research methodology.

ACC 522

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Marriott School Graduate Core.
Taught	Fall

Course Outcomes

Learning Outcomes

Describe and discuss important tax and nontax factors involved in selecting the entity type for a particular business.

Learning Outcomes

Determine common corporate book-tax differences in accounting for various corporate transactions and reconcile the book and taxable income of a corporation.

Learning Outcomes

Compute a corporation's income tax provision under the ASC 740 rules and understand the proper financial statement disclosure for a corporation's income tax expense related items.

Learning Outcomes

Describe and discuss important tax and nontax issues relevant to corporate and flow-through entities.

Tax Research Methodology

In-depth treatment of research and procedures emphasizing communication and presentation of findings.

ACC 523

Hours	3.0 Credit, 3.0 Lecture, 6.0 Lab
Prerequisites	Admission to MAcc.
Taught	

Course Outcomes

Learning Outcomes

Use internet tax research tools such as CCH and RIA to find appropriate primary and secondary authority.

Learning Outcomes

Identify, critically analyze, and solve tax issues through independent and team based research.

Learning Outcomes

Communicate your research results both in written form and in oral presentations.

Learning Outcomes

Work effectively in teams.

Learning Outcomes

Do all of the above with high ethical standards both in a structured and unstructured environment.

Accounting Information Systems Risk and Control

Understanding the risks involved in accounting information systems and the proper design, documentation, and validation of mitigating controls. Theory and application.

ACC 525

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to MAcc.
Taught	Winter

Course Outcomes

Learning Outcome

To build Zion by challenging students to become better spiritually and professionally.

Learning Outcome

To improve students' ability to learn on their own and to perform in relatively unstructured environments.

Learning Outcome

To improve students' ability to communicate in both written and verbal forms.

Learning Outcome

To further cultivate students' ability to work together in teams to accomplish tasks.

Learning Outcome

To develop students' technical competency in risk management practices and Microsoft Excel.

Top

Advanced Financial Statement Auditing

Accounting methodology, professional auditing standards, and current issues.

ACC 530

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to MAcc; Acc 515 or equivalent.
Taught	Fall

Course Outcomes

Learning Outcomes

Use auditing concepts and variables (e.g., client acceptance, risk assessment, materiality, understanding and testing of internal controls, analytical procedures, substantive audit testing, documentation of evidence, and completing an audit engagement) to make audit planning, testing, and evaluation decisions.

Learning Outcomes

Apply auditing and assurance concepts to real-world case studies.

Learning Outcomes

Apply statistical sampling concepts to auditing tests of controls, transactions, and balances.

Learning Outcomes

Demonstrate basic proficiency with an auditing software package that is widely used in practice.

Learning Outcomes

Collaborate in teams to solve problems and present findings in both written and oral forms.

Learning Outcomes

Examine issues currently facing the profession (e.g., regulation, new standards, fair value, legal liability, independence, competition, new services)

Learning Outcomes

Examine characteristics of good professional judgment as well as common threats to good judgment.

Learning Outcomes

Deliberate on the spiritual and ethical implications of dilemmas faced by accounting professionals.

Advanced Management Accounting

Advanced concepts, including the role of accounting in strategic and operational decision-making.

ACC 531

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	Marriott School Graduate Core; Acc 515 or equivalent.
Taught	Fall

Course Outcomes

Learning Outcomes

Use management accounting knowledge and research skills to recommend a costing approach in an unstructured setting

Learning Outcomes

Use OROS Quick Software to build an activity-based cost system

Learning Outcomes

Assess customer profitability and revenue management using activity-based costing

Learning Outcomes

Use theory of constraints to analyze business processes

Learning Outcomes

Communicate the results of analysis verbally and in writing

Learning Outcomes

Work well in teams

Advanced Professional Financial Accounting

Advanced financial accounting topics including pensions, earnings per share, accounting changes, and deferred income taxes.

ACC 540

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Marriott School Graduate Core; Acc 515 or equivalent.
Taught	Winter

Course Outcomes

Learning Outcomes

Understand technical accounting issues

Learning Outcomes

Work in teams

Learning Outcomes

Understand current developments

Top

Financial Statement Analysis

Analysis of financial statements and the accompanying footnotes. How various accounting methods might affect interpretation and use of financial information.

ACC 541

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Learning Outcomes

Analyze company performance using analytical procedures.

Learning Outcomes

Evaluate relative company performance

Learning Outcomes

Use forecasting and valuation software

Learning Outcomes

Work well in teams.

Learning Outcomes

Communicate the results of technical analyses verbally and in writing.

Top

Fair Value and Other Measurements in Accounting

Case-based course that examines theoretical and practical issues surrounding fair value and other measurement issues. Focuses on techniques used in practice for measuring financial instruments, acquisitions, revenue recognition, and asset impairments, among others.

ACC 542

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ACC 515 & ACC 530
Taught	Winter

Course Outcomes

Explain the concept of measurement

Students will explain the concept of measurement and how it applies to accounting situations.

Critique current measurement objectives and concepts

Students will critique the current state of measurement objectives and concepts in financial reporting standards.

Explain and evaluate the fair value vs. historical cost debate

Students will explain and evaluate the current debate between fair value measurement and historical costs.

Generate alternative measurement attributes

Students will generate alternative measurement attributes that could reasonably be used in real-world situations.

Recognize, recall, evaluate, and compare current measurement attributes in financial reporting.

Students will recognize, recall, evaluate, and compare the primary measurement attributes used in current financial reporting standards.

Implement measurement approaches in common scenarios

Students will implement measurement approaches in common scenarios such as revenue recognition, goodwill, allocation of purchase prices in acquisitions, asset impairment, fair value

measurements, stock compensation, securitization models, loan loss reserves, and relief from royalty.

Increase confidence discussing and applying measurement approaches

Students will increase their confidence discussing and applying measurement approaches in various real-world settings.

International Accounting and Multinational Enterprises

Accounting from an international perspective: flow of information in multiple currencies, complying with reporting requirements, setting budgets and monitoring performance, and controlling corporate assets through reports and audits.

ACC 545

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Spring

Course Outcomes

Accounting differences

Identify the major reasons accounting differs around the world.

Convergence forces

Describe the forces of convergence of accounting standards

IFRS pros and cons

Evaluate the pros and cons of adopting IFRS for financial reporting in capital markets worldwide.

Compare GAAP and IFRS

Compare U.S. GAAP and IFRS for the following accounting issues: intangibles, consolidation, segment reporting, and foreign currency transactions and translation.

MNEs

Explain how MNEs deal with the issue of foreign exchange risk management, corporate governance, performace evaluation and control, auditing, and taxation.

Top

Fraud Prevention and Detection

Fraud prevention, detection, investigation, issues, and methodology. Examination of past frauds with hands-on cases and computer exercises to identify increased fraud risk, interrogate data, and design prevention and detection controls.

ACC 550

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Learning Outcomes

Become familiar with several forms of fraud and the methods that fraud examiners use to prevent and detect it.

Learning Outcomes

Develop expertise in detecting financial statement fraud from the external auditor perspective.

Learning Outcomes

Gain knowledge of how to use technology to detect fraud.

Data Communications and Security

Principles of data communication and security, local- and wide-area networks, hardware, software, infrastructure, standards, policies, baseline security, web security, cryptography, operations, and security management.

ACC 555

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to MAcc.
Taught	Winter, Spring

Course Outcomes

Learning Outcomes

Understand how networks work

Learning Outcomes

Demonstrate knowledge of the Open Systems Interconnection (OSI) and Internet Models of data communications

Learning Outcomes

Demonstrate knowledge of Local Area Networks, Wireless Networks, Backbone Networks, and the Internet

Learning Outcomes

Demonstrate knowledge of Network Security

Top

Database Analysis and Design

Concepts and techniques of database system development. Focal areas include: structures, integrity, retrieval, manipulation, validation, and analysis. SQL used as basis for data interrogation.

ACC 556

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to a Marriott School graduate program.
Taught	Winter

Course Outcomes

Analyze Data and Propose Structures

Analize data requirements and propose data structures to meet these requirements.

Evaluate appropriateness of data structures

Learn how to evaluate the appropriateness of various data structures

Model Data Relations

Model data relations required to support an accounting information system

Communicate effectively

Communicate technical requirements effectively.

Solve Business Problems

Use technology effectively in solving business problems.

Management Consulting and Projects

Projects-oriented course where students get hands-on experience performing consulting jobs for businesses in Utah. Class includes both in-class instruction and business experience.

ACC 557

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to MAcc.
Taught	Fall, Winter

Course Outcomes

Learning Outcomes

Identify the field of management consulting and the role of a management consultant.

Learning Outcomes

Learn the tools and techniques used during a consulting engagement; including diagnosis, planning, and problem solving.

Learning Outcomes

Apply management consulting skills to consulting situations.

Learning Outcomes

Contribute to your project team through timely communication and assuming responsibility for your assigned role.

Learning Outcomes

Demonstrate through a final written and oral report to the client that you are able to communicate effectively, both orally and in writing.

Learning Outcomes

Understand and apply ethical principles to consulting situations.

Special Problems in Federal Taxation

Special property transactions, accounting periods and methods, tax payments and credit, tax concepts, and reporting tax liability.

ACC 560

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ACC 523.
Taught	Fall

Course Outcomes

tax consequences of property transactions

Determine the tax consequences of property transactions

corporate tax income

Properly calculate corporate tax income

S Corporations

Develop an understanding of S corporation

Corporate Taxation 1

Federal income taxation of corporations and shareholders.

ACC 561

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ACC 523
Taught	Winter

Course Outcomes

Forming a coporation

Understand the tax consequences of forming a corporation

corporate dividend distribution

Understand the tax consequence of corporate dividend distributions

Corporate redemptions

Understand the tax treatment of corporate redemptions

liquidations

Understand the tax treatment of corporate distributions in complete liquidation

use Code and Regs

Learn to use the Internal Revenue Code and Treasury Regulations to solve problms

Writing and research skills

Improve writing and research skills

Corporate Taxation 2

Continuation of Corporate Taxation 1. Includes consolidated returns.

ACC 562

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Merger/acquisition and CTR tax issues

Identify relevant merger/acquisition and CTR tax issues when given various data-rich scenarios.

Solutions to tax issues

Generate a reasonable solution to various tax issues and substantiate the solution with relevant tax authority.

Teamwork

Work effectively with a team to practice responding, given support from a tax-expert, to an authentic and "messy" real-world restructuring scenario.

Professional Presentation

Give a professional presentation of a restructuring plan to a client in a way that makes complex issues understandable and that demonstrates an ability to "think on your own."

Top

Taxation of Partnerships

Federal income taxation of general and limited partnerships and partners.

ACC 563

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ACC 523
Taught	Winter

Course Outcomes

Learning Outcomes

Perform tax research to resolve complex partnership tax problems. This includes using hte latest tax research databases and technology to complete the research.

Learning Outcomes

Demonstrate technical tax expertise in the taxation of partnerships.

Learning Outcomes

Work effectively in groups to solve complex tax problems.

Learning Outcomes

Communicate the results of complex tax issues orally and in writing.

Taxation of Estates, Gifts, and Fiduciaries

Federal taxation of property transferred by death and gift; federal taxation of income of trusts and estates.

ACC 564

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ACC 523
Taught	Fall

Course Outcomes

Learning Outcomes

Comprehend and apply the federal income tax laws dealing with estates and trusts

Learning Outcomes

Comprehend and apply the federal transfer tax laws dealing with gifts. Special emphasis is given to understanding the marital deduction.

Learning Outcomes

Comprehend and apply the federal transfer tax laws dealing estates. Special emphasis is given to transfers prior to death requiring inclusion in the gross estate and property transferred to the surviving spouse that qualifies for the marital deduction.

Learning Outcomes

Becoming familiar with and able to complete the forms for filing estate, gift, and trust returns

Current Tax Policy

Intensive study of special and current tax topics and policies.

ACC 565R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ACC 523
Taught	Winter, Spring

Course Outcomes

Learning Outcomes

Comprehend and apply the federal income tax laws dealing with the computation of an individual's adjusted gross income.

Learning Outcomes

Understand the law dealing with the standard deduction, the personal and dependency exemption, and the filing status.

Learning Outcomes

Understand the law dealing with allowable itemized deductions for an individual

Learning Outcomes

Understand the law and its application in the computation of the alternative minimum tax.

Learning Outcomes

Understand the credits available to an individual and their proper order of application.

Top

Tax Accounting Methods and Accounting for Income Taxes

Accounting periods and methods, corporate income taxation, and accounting for income taxes under ASC 740.

ACC 566

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ACC 523
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Taxation of Foreign Income

Federal taxation of foreign transactions.

ACC 568

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Acc 561 or concurrent enrollment.
Taught	Winter

Course Outcomes

Learning Outcomes

Understand and discuss:
1. The U.S. tax policy implications dealing with both outboudn and inbound transactions.
2. The impact U.S. tax law has on international business.
3. The relationship and application of Income Tax Treaties
4. Issues dealing with intercompany pricing between controlled entities.

Learning Outcomes

Apply skills involving the U.S. taxation of multinational commerce, including:
1. Identify icome source and allocation and apportionment of deductions.
2. Calculate a taxpayer's direct and deemed paid foreign tax credit.
3. Identify taxpayers who are eligible for hte foreign earned income exclusion and calculate the amount of hte exclusion.
4. Identify a controlled foreign corporation (CFC) and compute the CFC's subpart F income and the deemed distribution that flows through to the U.S. shareholders.
5. Understand and apply the rules dealing with foreign taxpayers earning income and oding business in the U.S.

Readings and Conference

In-depth study one-on-one with chosen professor on topic of mutual interest not currently covered in existing courses.

ACC 591R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	SOA director's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Learning Outcomes

To build Zion by challenging students to become better spiritually and professionally.

Learning Outcomes

To help students learn how to generate high quality research ideas.

Learning Outcomes

Refine students' ability to write experimental research proposals and design experimental research studies.

Learning Outcomes

Improve students' abilities to lead and participate in research seminar discussions.

Top

Academic Internship: Accounting

On-the-job experience and training in industry, government, or public accounting firms.

ACC 599R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 9.0 Lab
Prerequisites	Internship coordinator's consent.
Taught	

Course Outcomes

Role of accounting and finance in business

Learn through experience the role of accounting and finance in business.

Accounting Career Opportunities

Explore and obtain information on accounting career opportunities.

Theory in business courses

Expand upon the theory and concepts taught in accounting and business courses.

Networking

Network with professionals and identify possible mentors.

Enrich future course work

Return with experiences that will enrich future course work.

Top

Leadership Laboratory--Freshmen

Basic fundamentals of military leadership--drill, courtesy, planning, and organizing at various levels of responsibility.

AEROS 100

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Basic Military Skills

Know and apply basic military skills

Basic Field Training Skills

Know and apply basic field training skills

Advanced Field Training Skills

Know and apply advanced field training skills

Physical Fitness

Be physically fit

Top

Leadership Laboratory--Freshmen

Basic fundamentals of military leadership--drill, courtesy, planning, and organizing at various levels of responsibility.

AEROS 101

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Basic Military Skills

Know and apply basic military skills

Basic Field Training Skills

Know and apply basic field training skills

Advanced Field Training Skills

Know and apply advanced field training skills

Physical Fitness

Be physically fit

The Air Force Today

Development, organization, and core values of the U.S. Air Force, emphasizing the foundations of officership.

AEROS 110

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Concurrent enrollment in Aeros 100.
Taught	Fall

Course Outcomes

Air Force History

Know the history of the Air Force, how it is organized and what it does for the country

Career Opportunities

Know what career opportunities are available as an Air Force officer

Air Force Benefits

Know the benefits afforded members of the military

Life Skills

Know and develop productive life skills

Communications Skills

Demonstrate basic oral and written communications skills

Top

Aerospace Defense, General Purpose, and Support Forces

U.S. Air Force Major Command structure and the origins of the Air Force.

AEROS 111

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Concurrent enrollment in Aeros 101.
Taught	Winter

Course Outcomes

Air Force History

Know the history of the Air Force, how it is organized and what it does for the country

Career Opportunities

Know what career opportunities are available as an Air Force officer

Air Force Benefits

Know the benefits afforded members of the military

Life Skills

Know and develop productive life skills

Communications Skills

Demonstrate basic oral and written communications skills

Leadership Laboratory--Sophomores

As listed for Aeros 100/101. Increased emphasis on performance level.

AEROS 200

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Basic Military Skills

Know and apply basic military skills

Basic Field Training Skills

Know and apply basic field training skills

Advanced Field Training Skills

Know and apply advanced field training skills

Physical Fitness

Be physically fit

Leadership Laboratory--Sophomores

As listed for Aeros 100/101. Increased emphasis on performance level.

AEROS 201

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Basic Military Skills

Know and apply basic field training skills

Basic Field Training Skills

Know and apply basic field training skills

Advanced Field Training Skills

Know and apply advanced field training skills

Physical Fitness

Be physically fit

The Developmental Growth of Air Power

Development of various concepts of air power employment, emphasizing factors that have prompted research and technological change through the early 1960's.

AEROS 210

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Concurrent enrollment in Aeros 200.
Taught	Fall

Course Outcomes

Air and Space Power

Know the key terms and definitions used to describe air and space power

Evolution of Air and Space Power

Comprehend the events, leaders, and technical developments that surrounded the evolution of USAF air and space power

Communications Skills

Demonstrate basic verbal and written communication skills

Air Force Core Values

Comprehend the Air Force Core Values and examples of their use throughout the evolution of USAF air and space power

The Developmental Growth of Air Power

Development of various concepts of air power employment, emphasizing factors that have prompted research and technological change from Vietnam to the present.

AEROS 211

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Concurrent enrollment in Aeros 201.
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Leadership Laboratory--Juniors

As listed for Aeros 100/101. Students perform as cadet officers. Emphasis on leadership development.

AEROS 300

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Basic Military Skills

Know and apply basic military skills

Basic Field Training Skills

Know and apply basic filed training skills

Advanced Field Training Skills

Know and apply advanced field training skills

Physical Fitness

Be physically fit

Leadership Laboratory--Juniors

As listed for Aeros 100/101. Students perform as cadet officers. Emphasis on leadership development.

AEROS 301

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Basic Military Skills

Know and apply Basic Military Skills.

Basic Field Training

Know and apply Basic Field Training Skills.

Advanced Field Training Skills

Know and apply Advanced Field Training Skills.

Pysical Fitness

Be physically fit.

Top

Leadership Laboratory--Honor Guard

Fundamentals of military leadership and M-1 rifle drill; emphasizes need for response to vested authority, with opportunity to develop confidence, military bearing, and other interpersonal skills; students perform as cadet leaders.

AEROS 305R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter

Course Outcomes

Basic Military Skills

Know and apply basic military skills

Air Force Traditions

Know and apply Air Force traditions, ceremonies and customs

Top

Management and Leadership

Writing, speaking, and listening as communication skills; management concepts; responsibilities and ethics for an Air Force junior officer.

AEROS 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Concurrent enrollment in Aeros 300.
Taught	Fall

Course Outcomes

Leadership

Define the concept of leadership

Leadership and Management Relationship

Explain the relationship between leadership and management

Leadership Effectiveness

Explain the ways of determining leadership effectiveness

Leadership Theories

Identify the major research theories of leadership and its processes

Interactional Framework of Leadership

Explain the interactional framework of leadership

Top

Management and Leadership

Principles of leadership, problem solving, decisions, discipline, and human relations. Emphasis on career planning as an Air Force junior officer.

AEROS 311

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Concurrent enrollment in Aeros 301.
Taught	Winter

Course Outcomes

Leadership

Define the concept of leadership.

Leadership and Management

Explain the relationship between leadership and management.

Determining Leadership Effectiveness

Explain the ways of determining leadership effectiveness.

Major Research Theories

Identify the major research theories of leadership and its processes.

Interactional Framework

Explain the Interactional Framework of Leadership.

Academic Internship: Leadership Intern Program

Air Force ROTC field leadership training course. Provides advanced fundamentals of military leadership, planning, organizing, and team building at various levels of responsibility.

AEROS 399R

Hours	4.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Department chair's consent.
Note	Enrollment limited to Air Force ROTC cadets.
Taught	Spring, Summer

Course Outcomes

Air Force Core Values

Understand and implement in theoretical situations Air Force core values

Leadership

Explain Air Force leadership principles

Effective Leadership

Recognize the traits and methods of effective leadership in the military

Leadership Laboratory--Seniors

As listed for Aeros 100/101. Senior cadets perform in leadership positions in planning and conducting all activities of the cadet corps.

AEROS 400R

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Basic Military Skills

Know and apply basic military skills

Basic Field Training Skills

Know and apply basic field training skills

Advanced Field Training Skills

Know and apply advanced field training skills

Physical Fitness

Be physically fit

Top

Leadership Laboratory--Seniors

As listed for Aeros 100/101. Senior cadets perform in leadership positions in planning and conducting all activities of the cadet corps.

AEROS 401R

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Basic Military Skills

Know and apply basic military skills

Basic Field Training Skills

Know and apply basic field training skills

Advanced Field Training Skills

Know and apply advanced field training skills

Physical Fitness

Be physically fit

Top

National Security Affairs

Civilian control of military, civil-military interaction, the forming of defense strategy. Military profession; Russia, Europe, and East Asia regional studies.

AEROS 410

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Concurrent enrollment in Aeros 400R.
Taught	Fall

Course Outcomes

National Security Policy

Know the basic elements of national security policy and process

Air and Space Power Functions

Know the air and space power functions and capabilities

Military Roles

Understand selected roles of the military in society

Military Profession

Understand current issues affecting the military profession

Military Justice

Understand the military justice system

Air Force Commander

Comprehend the responsibility, authority, and functions of an Air Force commander

Communication Skills

Apply listening, speaking, and writing skills in Air Force particular formats and situations with accuracy, clarity, and appropriate style

Military Transition

Understand the factors that facilitate a smooth transition from civilian to military life

Top

National Security Affairs

Africa, Middle East, and Latin American regional studies; military operation other than war; military justice system; officer professional development.

AEROS 411

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Concurrent enrollment in Aeros 401R.
Taught	Winter

Course Outcomes

National Security Policy

Be able to explain the basic elements of national security policy and process.

Air and Space Power

Know the air and space power functions and capabilities.

Role of the Military

Differentiate between selected roles of the military in society.

Current Military Issues

Be able to discuss current issues affecting the military profession.

Military Justice

Know how the military justice system operates.

Responsibility of an Air Force Commander

Comprehend the responsibility, authority, and functions of an Air Force commander.

Communication Skills

Apply listening, speaking, and writing skills in Air Force particular formats and situations with accuracy, clarity, and appropriate style.

Transitioning to Military Life

Be capable of applying the factors that facilitate a smooth transition from civilian to military life.

First-Year Afrikaans

Basic language skills.

AFRIK 101

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

First-Year Afrikaans

Basic language skills.

AFRIK 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	AFRIK 101
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

Second-Year Afrikaans

Conversation, vocabulary building, and reading and writing skills, emphasizing reading.

AFRIK 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	AFRIK 102
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Vocabulary

Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Elaboration

Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Grammar

Review and increase understanding of basic language structures.

Culture

Discuss in the target language common products and practices related to every-day life in the target culture.

Second-Year Afrikaans

Emphasis on literature and culture with continued writing, grammar, listening, and speaking.

AFRIK 202

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	AFRIK 201; Teacher may waive prerequisite based on prior experience.
Note	Culminating course for Languages of Learning requirement. This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	

Course Outcomes

Communication skills

In both written and spoken target language, communicate with reasonable accuracy about real-world activities with well-educated members of the target-culture accustomed to dealing with non-native speakers.

Comprehension

Understand every-day written and verbal instructions. Comprehend concrete details and global meaning of intermediate-level written and spoken passages related to familiar topics that native speakers encounter routinely in their daily life.

Cultural Knowledge

Discuss in the target language cultural practices related to every-day life in the target culture. Acquire basic background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.).

General Education Requirements

Complete language and cultural aspects of General Education"Languages of Learning" and "Global & Cultural Awarness" requirments.

Second-Year Conversation

Intermediate listening comprehension and speaking skills.

AFRIK 211R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	AFRIK 201
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Conversation

Speak comfortably about predictable, familiar topics related to daily activities; this includes the ability to Initiate, maintain, and close simple conversations and to ask and respond to simple questions.

Survival Transactions

Carry out "survival" transactions (shopping, getting directions, ordering meals, etc.)

Pronunciation and Accuracy

Be understood by native speakers accustomed to dealing with non-native speakers.

Third-Year Conversation

Advanced conversational skills.

AFRIK 311R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	AFRIK 202
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Conversations

Speak comfortably about predictable, familiar topics related to daily activities and current events; this includes the ability to Initiate, maintain, and close simple conversations and to ask and respond to simple questions

Organized Speech

Begin to speak in "oral paragraphs."

Strategies

Apply appropriate strategies to deal with unpredictable language situations.

Pronunciation and Accuracy

Be understood by native speakers unaccustomed to dealing with non-native speakers.

Top

Literature and Cultures of the American West

Literature and cultural representations of the American West and the frontier.

AM ST 300

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

One

Students will be able to cite major texts of western American literature and theory to support logical arguments about western literature and culture.

Two

Students will be able to place a variety of western literary texts within historical, religious, environmental, social, and literary contexts, considering the American West as a distinct US region and as an engine in the construction of broader American and international cultures.

Three

Students will be able to persuasively communicate their mastery of major historical and conceptual themes and issues that are distinctive to the study of the American West demonstrating competence with written conventions of the field.

Critical Reading and Theory

Read critically and analyze in the context of appropriate literary and cultural theories major and selected minor texts and associated with the American West.

Research and Writing

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the literature and cultures of the American West.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

American Studies History and Theory

Offers a historical, theoretical, and practical overview of the discipline of American Studies.

AM ST 303

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

One

In this course, students will gain insights into the field of American Studies that will orient them as they, outside of class, create and tweak their plans of study and pursue extra-curricular activities. These insights into the discipline of American Studies will also help students to maintain a sense of themselves as American Studies majors even as they are enrolled in courses taught in other disciplines.

Two

Through a series of readings, discussions, and writing assignments, this course affords students a view of American Studies as a coherent field with its own disciplinary history and preoccupations. These activities will also help students gain a knowledge of the ways in which the field of American Studies has been interdisciplinary, drawing intellectual energy from history, literary studies, anthropology, feminist studies, and other fields

Three

In this course, students will think systematically about the ways American Studies scholars analyze various aspects of American culture. Students will also put these thoughts into practice

Four

American Studies graduates will be able to formulate both their oral and written arguments coherently, support them clearly, and communicate them effectively to their audiences using correct conventions of language and some stylistic flair-all according to the best practices of the variety of disciplines and situations in which they are engaged. In this course, students will present oral arguments; they will also write two formal papers.

American Studies Methodologies and Writing Practices

Offers students a practical grounding in American Studies methodologies and approaches to writing.

AM ST 304

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	AM ST 303
Taught	Winter

Course Outcomes

Engage Disciplinarily and Interdisciplinarily

Students will be able to define American Studies as a distinct discipline with its own intellectual history, analytical strategies, and scholarly methodologies even as they draw from and converse with other disciplines examining the American experience.

Analyze Rigorously

Students will be able to read critically and analyze a variety of cultural texts and artifacts using the theoretical approaches central to the field of American Studies. Students will develop the skills necessary to analyze their peers' writing and their own writing with an eye towards composition and revision.

Communicate Persuasively

Students will construct a conference length (8-10 page) paper employing purposeful rhetorical moves, responsible research strategies, and American Studies methods to develop a coherent and logical argument that makes a significant claim. Students will mature as writers as they devise productive and flexible individual and collaborative processes of writing, including methods for gathering evidence, organizing their argument, prewriting, drafting, revising, editings, proofreading, and peer reviewing.

Top

Film in American Culture

Selected readings, lectures, and analysis of specific motion pictures as social documents, reflecting different facets of the American experience.

AM ST 360

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

One

Students will be able to define and analyze a selected group of American films using methods and perspectives drawn from American Studies and film studies, and by the end of the semester will be able to apply those methods and perspectives to a broader range of films.

One

Students will be able to define and analyze a selected group of American films using methods and perspectives drawn from American Studies and film studies, and by the end of the semester will be able to apply those methods and perspectives to a broader range of films.

Two

Students will be able to rigorously analyze thematically or chronologically selected films to gain insight into American culture and American experience.

Two

Students will be able to rigorously analyze thematically or chronologically selected films to gain insight into American culture and American experience.

Three

Students will formulate clearly and persuasively supported arguments using best practices in the study of film and American culture.

Three

Students will formulate clearly and persuasively supported arguments using best practices in the study of film and American culture.

Topics in American Studies

Multidisciplinary study of a carefully defined problem in American culture. Topics vary.

AM ST 390R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

One

Students will be able to employ disciplinary and interdisciplinary perspectives to address a key problem or question in American culture.

One

Students will be able to employ disciplinary and interdisciplinary perspectives to address a key problem or question in American culture.

Two

Students will, in a variety of written assignments, rigorously analyze cultural and textual research sources.

Two

Students will, in a variety of written assignments, rigorously analyze cultural and textual research sources.

Three

Students will be able to communicate persuasively in oral and written forms following the conventions of the field.

Three

Students will be able to communicate persuasively in oral and written forms following the conventions of the field.

Top

American Studies Lecture Series: Presentations on American Studies/Western American Studies

Introduce research in American Studies and Western American Studies. Speakers from BYU and other institutions share their research. Students engage with lecturers by developing questions, then evaluate and write about ideas.

AM ST 392R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Engage Disciplinarily and Interdisciplinarily

Students will be introduced to the latest research in American Studies and Western American Studies by attending a weekly lecture series.

Engage Disciplinarily and Interdisciplinarily

Students will be introduced to the latest research in American Studies and Western American Studies by attending a weekly lecture series.

Thinking Critically

Students will be able engage with the lecturers by asking questions and responding to teach lecture.

Thinking Critically

Students will be able engage with the lecturers by asking questions and responding to teach lecture.

Analyze Rigorously

Students will be able to evaluate and write clearly about the ideas presented in the lectures.

Analyze Rigorously

Students will be able to evaluate and write clearly about the ideas presented in the lectures.

Top

Academic Internship

Examining the American experience from a variety of standpoints. Honing skills in writing; literary criticism; historical research; and social, political, and economic analysis.

AM ST 399R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Program coordinator's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

One

Using available resources, students will be able to work independently to arrange and complete an internship that will help them explore post-graduation career possibilities.

One

Using available resources, students will be able to work independently to arrange and complete an internship that will help them explore post-graduation career possibilities.

Two

Students will be able to analyze and act in accord with the conventions, texts, and/or artifacts of the field in which they arrange their internship; they will develop a fuller understanding of regional, national, and/or international modes of American experience.

Two

Students will be able to analyze and act in accord with the conventions, texts, and/or artifacts of the field in which they arrange their internship; they will develop a fuller understanding of regional, national, and/or international modes of American experience.

Three

Students will improve their oral and written skills according to the best practices of the internship situation in which they are engaged, as evaluated by internship supervisors and coordinators.

Three

Students will improve their oral and written skills according to the best practices of the internship situation in which they are engaged, as evaluated by internship supervisors and coordinators.

Top

Senior Capstone

In-depth review of American Studies theories, methods, and criticism; content varies; requires original research and substantial writing of paper intended for publication.

AM ST 490

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	AM ST 303 & AM ST 304; Senior status or program coordinator's consent.
Taught	Fall, Winter

Course Outcomes

Engage Disciplinarily and Interdisciplinarily

Through class discussions and writing activities, students will be able to demonstrate a fluency in the disciplinary trends of American Studies, an understanding of the field's inherent interdisciplinarity, and an ability to draw upon knowledge that they have acquired in courses taken in other disciplines.

Engage Disciplinarily and Interdisciplinarily

Through class discussions and writing activities, students will be able to demonstrate a fluency in the disciplinary trends of American Studies, an understanding of the field’s inherent interdisciplinarity, and an ability to draw upon knowledge that they have acquired in courses taken in other disciplines.

Analyze Rigorously

Students will be able to demonstrate high proficiency in reading critically and analyzing primary historical, secondary historical, theoretical, and critical texts. Students will exhibit this high proficiency through engaging in the methods central to the field of American Studies: textual analysis, archive building, institutional contextualization, and theorizing.

Analyze Rigorously

Students will be able to demonstrate high proficiency in reading critically and analyzing primary historical, secondary historical, theoretical, and critical texts. Students will exhibit this high proficiency through engaging in the methods central to the field of American Studies: textual analysis, archive building, institutional contextualization, and theorizing.

Communicate Persuasively

Capstone participants will be able to formulate both their oral and written arguments coherently, support them clearly, and communicate them effectively to their audiences using correct conventions of language, style, and the best practices of the discipline.

Communicate Persuasively

Capstone participants will be able to formulate both their oral and written arguments coherently, support them clearly, and communicate them effectively to their audiences using correct conventions of language, style, and the best practices of the discipline.

Work Independently

Students will be able to develop their own research project (formulate a sophisticated research question, independently conduct primary and secondary research, and employ the writing skills they have developed over the course of the major) in order to write an original 15–20 page research paper in the last third of the course.

Work Independently

Students will be able to develop their own research project (formulate a sophisticated research question, independently conduct primary and secondary research, and employ the writing skills they have developed over the course of the major) in order to write an original 15–20 page research paper in the last third of the course.

Top

Introduction to Ancient Near Eastern Studies

Historical background, research skills, and methods of academic inquiry relevant to ancient Near Eastern Studies.

ANES 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Intro to and Challenges within ANES Scholarship

Introduce students to the issues in the study of the Ancient Near East that have an impact on understanding the Hebrew Bible and the New Testament, including a discussion on the challenges "believing" students face, LDS in particular. This will include a discussion of some of the ethical issues in current scholarship.

Developing ANES skills

Help students critically read, discuss, research and write about ancient texts with methodological rigor and academic integrity.

Survey ANES history, culture and major texts

Introduce students to the field of Ancient Near Eastern Studies, including the historical and geographical breadth from 3000 b.c.e. down to 600 c.e., the development of the field of study, the major texts and their standard editions, research skills, major terms, and employment possibilities.

History and Culture of Ancient Israel

Israelite history and culture in Canaan/Israel from c. 2000 B.C. to A.D. 200. Methodology for using the Bible in historical research.

ANES 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 238; or HIST 239
Taught	Fall odd years

Course Outcomes

Factual knowledge about history and culture

Students will know and be able to interpret the significant events and developments in the history of ancient Israel within the large context of the ANE, and know and be able to interpret the main features of the culture of ancient Israel, based on textual and artifactual data.

Historical value of the Bible

Be able to analyze and discuss the value and limitations of the Bible as a reliable source of historical information, and be able to relate and analyze major opinions on this issue in the field of biblical studies.

Research and Writing

Be able to research, analyze, and write clearly and persuasively about the issues just listed.

Researcher approach and bias

Have considred how their own faith-views impact their approach to certain of the issues just listed.

Top

Readings in Ancient Near Eastern Texts to 330 B.C

Reading and analysis of major ancient Near Eastern texts in English translation. Methodology for dealing with potential biblical parallels.

ANES 331

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HIST 238
Taught	Winter even years

Course Outcomes

Working with Texts

Students will be able to competently read, analyze, and communicate about ANE texts.

Contextualizing Texts

Extrapolate cultural and historical information from primary texts, while accurately placing them in their original historical and cultural context.

Scholarship on ANE Texts

Critically analyze and write about scholarly theories on major ANE texts.

Readings in Classical Near Eastern Texts

Reading and analyzing major ancient Near Eastern texts in English translation. Methodology for dealing with potential biblical parallels.

ANES 332

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Working with Texts

Students will be able to competently read, analyze, and communicate about Classical Near Eastern texts.

Contextualizing Texts

Extrapolate cultural and historical information from primary texts, while accurately placing them in their original historical and cultural context.

Scholarship on Classical Near Eastern Texts

Critically analyze and write about scholarly theories on major Classical Near Eastern texts.

Top

Archaeological Fieldwork in the Near East

Archaeological fieldwork and corresponding field school activities in the Near East.

ANES 353R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Ancient Near Eastern Studies coordinator's consent.
Taught	

Course Outcomes

Fieldwork Experience

Credit for those students who participate in an authorized "dig" somewhere in the Near East, thus gaining firsthand experience with archaeological techiques, such as excavating, analyzing, and recording data. A written report on the experience is required for academic credit.

Top

Hebrew Bible Studies

Current analytical methods used in academic study and interpretation of the Hebrew Bible.

ANES 363

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	HEB 231
Taught	Winter odd years

Course Outcomes

ANES 363 Theories

Students will be introduced to the variety of interpretative strategies and theories about the Hebrew Bible

ANES 363 LDS Interpretation

Students will analyze and interpret passages of scripture from the Hebrew Bible assisted by and comparing LDS and non-LDS sources and approaches.

ANES 363 Student's Approach to Hebrew Bible

Students will reflect and write about their own approach to the Hebrew Bible.

Top

Directed Readings in Ancient Near Eastern Studies

Directed individual study of historical topics or ancient texts.

ANES 390R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Recommended	Written plan of study approved by both instructor and program coordinator.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Disciplinary Knowledge

Students will deepen understanding and skills as outlined in individualized contract between student and professor.

Top

Topics in Ancient Near Eastern Studies

Topical studies in the ancient Near East based on student interest and faculty expertise.

ANES 392R

Hours	2.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Research and Methodology

Students will demonstrate their ability to research and write / present in-depthabout a particular ANE topic, situating it within the larger field of ANES, employing both rigor and academic integrity.

Advanced Topics in Ancient Near Eastern Studies

Seminar involving in-depth examination of an ancient Near Eastern topic and then writing about it.

ANES 430R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Research and Methodology

Students will demonstrate at a senior level their ability to research and write / present in-depth about a particular ANE topic, situating it within the larger field of ANES, employing both rigor and academic integrity.

Senior Seminar in Ancient Near Eastern Studies

Capstone seminar utilizing research, analytical, and writing skills to produce a senior research paper on an ancient Near Eastern topic.

ANES 495

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Research and Methodology

Students will be able to do rigorous research in the area of their academic specialty that will result in a 20-25 page publishable senior paper, which, in turn, should prepare the student for further graduate work.

Presentation and Peer Review

Students will learn how to better present their own research and do quality peer review of other's work.

Publishing and Presenting

Students will learn how to navigate and understand the publishing process, includinghow to solicit publication of work and how to find scholarly symposia and other suitable venues to present their research.

Top

Social/Cultural Anthropology

Aspects of society and culture: kinship, beliefs, economy, and political order among peoples worldwide. Methods and perspectives used in social/cultural anthropology.

ANTHR 101

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Social/Cultural Anthropology

- Come to understand culture as a way of interpreting experience, and realize that culture informs both social life and individual psychology, shaping and coloring how people perceive and act in the world.
- Grasp the social scientific principles and reasoning involved in ethnography, and recognize the value, limitations, and ethical implications of this way of making sense of social conduct.
- Acquire an informed awareness of other cultural worlds-an appreciation of other ways of being human-of believing, behaving, and belonging, including their kinship organization and ritual, economic, and political practices.
    - Learn to see personal beliefs, values, attitudes, and conduct-including kinship organization and ritual, economic and political practices-from the perspective of people with different ideas about the way the world works.
- Develop an increased ability to write effectively.

Self-Examination

You will learn to do hard things.

The Aims of BYU Education

The Aims of a BYU Education stipulates that students cultivate an informed awareness of the peoples, cultures, languages, and nations of the world. The Global and Cultural Awareness requirement enhances that awareness with a greater understanding and appreciation of the varieties of human experience across time and space. Inherent in the notion of global and cultural awareness is the perspective that we are all spiritual offspring of the same God, that in addition to our common humanity we also possess a nascent divinity. The Global and Cultural Awareness requirement seeks to help BYU students come not only to see the relativity of many of their own, culturally-derived notions but also to go forth to serve, having had meaningful discussion about or hands-on experience in dealing with real world global issues and problems.
1. Students will acquire *informed awareness* of either a) a culture outside their own, or b) the interplay of cultures, languages, and/or nations at an international level.
2. Students will experience *thoughtful reflection* on the above, as demonstrated in a structured, guided manner under the direction of a faculty member. Evidence of reflection implies written or

spoke analysis that will include a consideration of the student,??s own responses to the culture or global issue, often involving comparison, and will demonstrate informed awareness.
3. Students will develop greater empathy and charity, and begin to gain a global perspective, by learning to see themselves from another,??s point of view.
"

Top

Archaeology Field Trip

Archaeology field trip to Four Corners.

ANTHR 103

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Meet weekly prior to trip. Students responsible for food and camping costs. Limited enrollment
Taught	Fall Term 1

Course Outcomes

On-site archaeological field experiences.

Through on-site study, students will gain archaeological knowledge related to the major cultures of the Great Basin and Southwest regions of the United States.

Top

Anthropological Films

Examination of other cultures through ethnographic or archaeological film.

ANTHR 108R

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Note	Can be taken separately or concurrently with Anthr 101 or 110.
Taught	Fall, Winter

Course Outcomes

Diversity of Cultures and Cultural Systems

Through an exposure, critique, and study of ethnographic films, students will gain knowledge of the diverse types of human cultural systems in existence today in addition to the methodologies utilized to study and record them.

Top

Honors Introduction to Archaeology

Studying past human behaviors and cultures by applying scientific principles and reasoning; exploring case studies concerning archaeological discoveries.

ANTHR 110

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Learning Objectives

Having completed this requirement,students should be able to demonstrate an understanding of the basic scientific principles which undergird the scientific process, including the strengths and weaknesses of this process. appreciate the excitement of discovery that has accompanied important scientific developments. demonstrate how scientific methodology can be used to analyze real-world science-related problems. evaluate scientific data and claims in order to make rational decisions on public-policy science issues that affect their community.express their thoughts (in oral, graphical, and written formats) on scientific topics clearly, including appropriate use of basic scientific vocabulary and effective interpretation of quantitative data. reflect rationally upon the interface between science and religion.

Learning Outcomes

This course should help students to demonstrate an understanding of the basic scientific principles which undergird the scientific process, including the strengths and weaknesses of this process. Students will learn to appreciate the excitement of discovery that has accompanied important scientific developments as well as demonstrate how scientific methodology can be used to analyze real-world science-related problems. Students will become adept at evaluating scientific data and claims in order to make rational decisions on public-policy science issues that affect their community. As students complete the course they will learn to express their thoughts (in oral, graphical, and written formats) on scientific topics clearly, including appropriate use of basic scientific vocabulary and effective interpretation of quantitative data, as well as reflect rationally upon the interface between science and religion.

Course Objectives

Upon completion students should be able to demonstrate an understanding of the basic scientific principles which undergird the scientific process, appreciate the excitement of discovery that has accompanied important scientific developments, demonstrate how scientific methodology can be

used to analyze real-world science-related problems, evaluate scientific data and claims in order to make rational decisions on public-policy science issues that affect their community, express their thoughts (in oral, graphical, and written formats) on scientific topics clearly, including appropriate use of basic scientific vocabulary and effective interpretation of quantitative data, and reflect rationally upon the interface between science and religion.

Top

Introduction to the Major

Overview of anthropology major and graduation requirements; preparing for senior thesis sequence; career opportunities; and graduate school application process.

ANTHR 150

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Introduction to Basic Theories and Methodologies

Students in this course will gain an introductory level understanding of the basic assumptions of the disciplines of Anthropology and Archaeology as well as their historical development along with examples of applications of various methodologies in the field.

Expectations

On completion of the course students should be

- Familiar with the scope of the Anthropology major, its requirements, and ways of fulfilling these
- Have a viable Career track plan
- Have a viable Graduate School plan
- Have a revised and approved MAP for their time at BYU and have met with their Faculty Advisor
- Be aware of the Field School requirements and options for both Archaeology and SocioCultural tracks
- Be acquainted with Faculty
- Have participated in a designated service project

Top

Foundations of Social Theory

Theoretical and philosophical antecedents of modern social theory; ideas and theorists that shaped the formation of anthropology as a discipline.

ANTHR 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ANTHR 101
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Anthropological Theory

This course will lead to four learning outcomes: 1) knowledge of the foundational theorists of social science; 2) personal skills in evaluating the relevance and /or applicability of their theories; 3) recognition of the reliance on foundational theory in our world today, and; 4) increased aptitude for critical thinking and expression.

Social Theory: Research Skills and Methods

Students will gain a knowledge of the foundational theorists of social science.

Human Cultural Diversity

Students will gain personal skills in evaluating the relevance and/or applicability of the theories of the foundational theorists in the social sciences as well as a recognition of the reliance on foundational theory in our world today.

Critical Thinking and Analysis

Students will gain an increased aptitude for critical thinking and expression.

Foundations of Anthropological Theory

Ideas from the founders of social and cultural anthropology and archaeology as disciplines, particularly at the turn of the 20th century.

ANTHR 202

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ANTHR 101
Taught	Fall, Winter

Course Outcomes

Critical Thinking and Analysis

Students will gain a knowledge of the foundational theorists of both sociocultural and archaeological anthropology, particularly at the turn of the 20th century.

Research Skills and Methods

Students will gain personal skills in evaluating the relevance and/or applicability of foundational theorists in sociocultural anthropology and archaeology.

Human Cultural Diversity

Students will gain a recognition of our reliance on foundational theory in our world today.

Critical Thinking and Analysis

Students will gain an increased aptitude for critical thinking and expression through course assigments.

Contemporary Theory

Important current theoretical frameworks in anthropology.

ANTHR 203

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ANTHR 101
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Contemporary Theory

- Students will develop an enhanced understanding of human beings and human being through the paradigms of the most important theorists and theories applicable to anthropology and archaeology.
- Students will begin their preparation to write a theoretically informed senior thesis and to eventually produce an accurate and insightful interpretation of another system of thought and tradition of social practice.
- Students will be able to describe the positions, ideas, and approaches utilized to analyze human artifacts and institutions.
- Students will demonstrate the ability to think soundly and critically, to communicate effectively, and to write a clear and convincing essay.

Human Cultural Diversity

Students will develop an enhanced understanding of human beings and being human through course assignments.

Research Skills and Methods

Students will be prepared to write a theoretically informed senior these, to eventually produce an accurate and insightful inerpretation of another system of thought and tradition of social practice through course assignments. These assignments will also assist each student in being able to describe the positions, ideas, and approaches that will most help he/she in making sense of human artifacts and institutions, of particular activities, events, roles, places, and other objects.

Research Skills and Methods

Students will demonstrate the abilities to think soundly, to communicate effectively, and to write a clear and convincing essay.

Experiments in Ancient Technology

Processes by which tools and other objects were produced anciently; experimental reproduction and use of ancient tools and their scientific analysis..

ANTHR 207

Hours	3.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Applications in Theory and Methodology

Through the hands on learning of the most important technological development of early human societies. students will gain a better appreciation of artifact analysis as well as cultural development. Topics that may be covered are cordage making, flint knapping, pottery development, etc. depending on the background of the directing faculty.

Introduction to Archaeology: Method and Theory

Field and analytic methods and their relevance to data acquisition; use of theory and the relation of theory to methods.

ANTHR 215

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Archaeological Methodology and Theory

Students will gain a knowledge of the history of archaeology as well as an exposure to basic archaeological theory and methodological practices in the field. Through this study, students will also gain a knowledge of the most important figures in archaeology as well as the major sites world-wide integrated with a chronology of world pre-history and history relevant to archaeological research.

Critical Thinking and Understanding

Learning activities for this course have been designed to help students:

- gain a more detailed knowledge of the history of archaeology;
- develop a greater understanding archaeological theory and method;
- develop and apply these skills and knowledge;
- and further develop skills in critical thinking, research and argumentative writing.

Top

Applied Anthropology

Anthropological principles and methods applied to business, education, environment, government, communication, national and international development, and health sectors. Ethically and culturally appropriate strategies for researching and participating in planned socio-cultural change.

ANTHR 247

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Learning Objectives

This course has the objectives to introduce students to career options outside academia and to help them explore graduate programs that will prepare them for those careers. This course will also introduce them to theoretical and ethical issues in applied and practicing anthropology and to some of the current social problems that are dominating the field. Students will learn the basic training in the skills and methodologies, (including report writing), that they will use as an applied anthropologist.

Top

Biological Anthropology

Relationships between human biology, environment, social structure, and culture. Concepts and data on race, primates, evolution, population genetics, growth, and sociobiology.

ANTHR 300

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Biological and Envronment Relationship

Develop an understanding of the relationships between human biology, environment, social structure.

Course Objectives

Upon completion of this course, students will be able to analyze humans as bio-cultural beings; living in both a
cultural and natural setting. Students will also gain a basic understanding of evolutionary concepts in general, and human evolution specifically.

Data collection and analysis

Collect data on race, primates, evolution, population genetics, growth, and sociobiology.

Top

Human Osteology

Identification and treatment of skeletal material found in archaeological excavations.

ANTHR 301

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Human Osteology

In archaeology, the recovery of human remains is often a critical part of field work. Students will thus learn all the necessary skills involved with identifying osteological remains and their relationship to both archaeological and forensic analysis including relationships to race, gender, and human disease and diet. Modern techniques of analysis will be a major focus of this course.

Top

Language, Culture, and Society

Linguistic anthropology as a way of doing ethnography; language as symbolic form, vehicle of thought, and instrument of social interaction; speech events as cultural texts.

ANTHR 309

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Language, Culture, and Society

- Develop an enhanced understanding of human language.
- Prepare to do effective ethnography, to eventually produce an accurate and insightful interpretation of another system of thought and tradition of communicative practice.
- Describe the positions, ideas, and approaches that will most help you to make sense of speech acts and events, or to "interpret social and cultural systems through the manifold lenses afforded by language and speech."
- Demonstrate the ability to think soundly, to communicate effectively, and to write a clear and convincing essay.

Museums and Cultures

Role of museums in society. Analyzing museum content, use, and sociology. Visits to and critiques of area museums. Final projects with real museums in the region.

ANTHR 311

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Course Objectives

-This course will give participants a sound foundation in understanding the important roles museums play as cultural symbols in world societies, as well as exploring how individual types of museums becomes unique paradigms of cultural memory, education, and identity.
-This course will give students the opportunity to understand the diverse ways in which societies utilize and conceptualize museums.
-This course will provide students with hands-on final projects involving the collections and institutions of museums in the the Utah Valley region.

Application

1. Students will be able to examine museums as institutions, including their social impact and specific exhibitions.
2. Students will be familiar with the major museum fields.
3. Students will learn how to work as a team to give motivating and persuasive presentations.

Top

Intercultural Communication

Communication processes as affected by proxemic, kinesic, linguistic, social, institutional, worldview, value differences, and other aspects of culture. Seminar/workshop: theory, research methods, applications.

ANTHR 312

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Independent Study only.

Course Outcomes

Intercultural Communication

After taking this course, you should be able to discuss the following questions and to give examples to illustrate your explanations:
1. What must we take into account if we want to learn how to communicate appropriately and effectively with members of other societies?
2. How does culture shape communication and social interaction in general?
3. What values, beliefs, and attitudes seem to shape the interactions and communications of members of mainstream middle-class American society? And how do these patterns compare and contrast with those of other societies with which you are familiar?

Top

Museum Registration and Legal/Ethical Issues

Managing museum collections: cataloging, loans, ethics, legal issues, object handling, basic object conservation. Practical experience working with museum objects and specific museum challenges.

ANTHR 314

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ANTHR 311
Taught	Winter

Course Outcomes

Collection Disciplines

Students will be familiar with registration/collections management/collections care disciplines

Handson Experience

Students will gain hands-on, real-life experience with museum collections and registration

Technical Writing

Students will be familiar with technical writing for collections care (mainly object description and condition reporting)

Collection Management

Students will be learn basic project management skills in managing collection projects

Museum Ethics and Laws

Students will have a basic understanding of museum ethics and laws affecting museum collections

Native Peoples of North America

Indian groups at the time of the European arrival; social organization, beliefs, values, economy, and adaptation to environment.

ANTHR 317

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Native American Cultures in Context

Through course assignments, students will gain an introductory knowledge of the major Native American cultures at the time of European contact including but not limited to social organization, belief systems, values, economies, and adaptations to environments.

Material Culture

Through course assignments and hands-on access to the collections of the BYU Museum of Peoples and Cultures, students will gain a greater depth of knowledge concerning the diverse range of material culture represented by the indigenous peoples of North America.

Critical Thinking, Research, Analysis, and Writing Skills

Through course assignments, students will increase their skill sets in critical thinking, research, analysis, and writing skills in the disciplines of anthropology and archaeology.

Top

Guatemalan Society and Culture

History, culture, society, and life (economic, familial, religious) among peoples of Guatemala. Guatemala as exemplar of colonial, cultural, and global processes evident throughout Latin America.

ANTHR 326

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Course Objectives

Using Guatemala as a case study, a country which exemplifies the political, economic, and religious histories of Latin America, students will learn the basic relationships between cultural principles, social structure, environmental constraint, and important symbols in Latin America, as well as how these cultural institutuions were constructed through historical processes of violent and peaceful social interaction.

Application

When you finish this course, you should be albe to converse with other scholars about the social history and economic conditions that gave rise to major culturally standardized forms of behavior in Guatemala and in the country you most want to learn about in Latin America.

Peoples of Africa

Political, economic, and social organization, family life, language, worldview, religion, ritual, artistic expression, ecological adaptation, and contemporary development issues among rural and urban sub-Saharan peoples.

ANTHR 330

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Course Objectives

In this course students will learn of the variety of cultures to be found within sub-Saharan Africa as we look at indigenous people in western, eastern and southern Africa. Among the issues examined will be the impact of colonialism, gender and fertility, political and economic systems – particularly the impact of war and acts of violence, as well as health and healing, and belief systems.

Application

By applying basic Anthropological concepts and theory to the data sets described in the assigned readings and class discussions, students will learn to think anthropologically, to apply the knowledge they have acquired and to analyze and understand human activity, sociality and thought. Additionally they will develop a solid knowledge and understanding of human diversity and cultures within the geographic location. They will also be enhancing their ability to communicate, both orally and in written work.

Top

Peoples of India

Society and culture on the Indian subcontinent. Stratification, kinship, marriage, religion, politics, economics.

ANTHR 335

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Overview of Peoples & Cultures of India

Students will be provided an overview of the peoples and cultures of South Asia with an emphasis on India; a region consisting of several hundred languages, multiple ethnicities, many religious traditions, and competing political orientations.

Readings and Films

Students will receive increased knowledge of the cultures of India through in-depth readings, lectures, discussions, and films.

Increased Critical Thinking and Writing Skills

Students will increase their capacity for critical thinking skills and writing within the discipline through discussions, exams, and a written research papers.

Cinema and Culture in India

Anthropology of film in India; the world's largest film industry. Indian cultural and linguistic diversity. How different film genres reflect, distort, or utilize Indian cultural diversity. Evidences in the film work of Satyajit Ray.

ANTHR 336

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Spring

Course Outcomes

Cultural Diversity and Research Methods

This course aims to introduce the varied products of the world's largest film industry to students with no specialized knowledge of the subject. The first objective is to survey the linguistic and cultural diversity of India, examining how different genres of Indian film relfect, distort, or utilize this diversity, and contrast them with Western films on India, the perspectives and presuppositions of which are often very different.

Interpretations of 'universality.'

Students will become acquainted with many of the above major themes in more depth by analyzing the work of Satyajit Ray (1921-1992), the Indian film-maker Western critics are most familiar with. Students will learn how the content, style, and objectives of Ray's films were shaped by his intellectual and cultural contexts. Western as well as Indian critics have often portrayed Ray simply as a "univeral humanist" or "transnatioanl auteur." Students in this course will learn how to interpret the universality of Ray's work as a cultural product dialectically related to its unrelenting particularism.

Top

Peoples of the Middle East

Ecology, social organization, and beliefs of nomadic, rural, and urban groups between western Africa and Pakistan.

ANTHR 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Cultures & Peoples of the Middle East

Students will gain an introductory level understanding of the variety of cultures, ethnic groups, religious variances, and competing political entities representative of the regions included in the MIddle East. Special emphasis will be placed on applying this knowledge to archaeological and anthropological perspectives, disciplines, and professions.

Creative Thinking, Analysis, Research, and Writing Skills

Through course assignments, students will increase their skills in creative thinking, analysis of data, research, and writing.

Ecology, social organization, beliefs, nomadic, rural, and u

Through course assignments, students will gain a knowledge and demonstrate their comprehension of the ecologies, social organizations, religious beliefs, and variances between nomadic, rural, and urban groups in the Middle East.

Ethnonationalism and Southeast Asia

Historical and ethnographic perspectives on social and political dynamics in Southeast Asia, including upland ethnic minority issues, ethnonationalistic movements, geopolitical influences, war, genocide, religious dynamics, and the rise of nationalism in the region.

ANTHR 341

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Anthr 101.
Taught	Winter

Course Outcomes

Theory Building

Through this course, students will engage with some of the more prominent theoretical perspectives on the rise of nationalism, ethnonational dynamics, ethnic differentiation, and conflict.

Cultural Diversity

Using the courses' theoretical base, students will engage with ethnographic material on mainland Southeast Asia in order to understand the history of the region in all of its cultural and political diversity.

Critical Thinking Skills

Students will hone critical thinking skills through seminar discussions where we critique different theoretical perspectives, apply them to and test them with a variety of Southeast Asian ethnographic materials, and develop theoretical lines of coherence from these different social theorists.

Cultural Diversity

Through the assignments of this course, students will also learn to see and therefore critique nationalist consciousness and the politics of statecraft, and apply this crtiique to the ethnographies and historical accounts that we read in the seminar.

Top

Chinese Culture and Society

Cultural and social institutions of traditional and modern China, including mainland China, Taiwan, Hong Kong, or other areas of Chinese impact.

ANTHR 343

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter odd years

Course Outcomes

Chinese Culture

Students will gain knowledge of the varieties of cultures encompassed in the vast domains of China as well as the basic social paradigms of Chinese society. Through this study, students will also gain a basic knowledge of the history of China and its importance in both past and present world contexts.

Top

American Culture

Perspectives and methods for making sense of mainstream middle-class American society; American ways of being-in-the-world, of believing, behaving, and belonging; American cultural themes.

ANTHR 345

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

American Culture

- Develop an enhanced understanding of what it means to be American.
- Learn how to use the stories Americans tell about themselves as portholes through which to peer into the ordinarily invisible world of American culture.
- Be able to describe the values, beliefs, and attitudes that shape and color how Americans perceive and act in the world, that inform American social and political life as well as individual psychology.
- Demonstrate theability to think soundly, to communicate effectively, and to write a clear and convincing memoir of a specific American experience that reveals a particular, readily identifiable aspect of American culture.

Top

Anthropology of Mormonism

Intensive analysis of Mormon society and culture using a range of anthropological perspectives.

ANTHR 346

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Anthropology-Mormonism

Students will gain a knowledge of the development of Mormonism as a distinct religious and cultural force within American society as well as its impact in world-wide contexts. The emergence of Mormonism as a 'culture' and the evolution of its assumptions and unique cultural characteristics will also be emphasized. Students will gain practice in applying current anthropological theories to a culture familiar to the majority of participants, but perhaps never thought about by students through the disciplinary assumptions of anthropology.

Top

Contemporary Japan

Using movies and popular media to examine the social structures and family life dynamics of contemporary Japan.

ANTHR 348

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Cultural Diversity

Through a study of the cultural constructs of Contemporary Japan, students will gain an understanding of the historic development of Japanese society and its place within a modern world context.

Top

Archaeological Cultures of North America

Cultural developments of North American Indians (Canada, U.S., and northern Mexico) before Columbus.

ANTHR 350

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Archaeology of the Native Cultures of North America and Nort

Students will gain an introductory level comprehension of the diverse cultural developments of North American indigenous peoples as well as selected examples from Canada and Northern Mexico through the study of archaeological evidence and material culture.

Hands-On Exposure to Native American Material Culture

Students will gain a more in-depth comprehension of the diversity and complexity of data sets regarding archaeological evidence via material cultural remains by hands-on interactions with the collections of the Museum of Peoples and Cultures at BYU.

Critical Thinking, Research, Analysis, and Writing

Through course assignments, students will increase their skills in critical thinking, research, analysis, and writing. Emphasis will be placed on writing in the discipline.

Top

Archaeology and the Bible

Setting and context of the Bible as clarified and supplemented from archaeology, history, and related studies. Archaeological methods.

ANTHR 351

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years, Winter odd years

Course Outcomes

Biblical Archaeology

Students will gain knowledge of the development of Biblical archaeology as a field within the overall umbrella of the discipline of anthropology. This study will include extensive study of the both the defining personalities and methodologies in this sub-area of archaeology, as well as the major excavated sites in the Levant associated with Biblical events. Students will also gain a knowledge of the historical development of the Near East through its archaeological contexts, and the debates existing between differing methodologies associated with the use of the Bible as a primary document.

Top

Mesoamerican Archaeology

Cultural and environmental bases of ancient civilizations in Mexico and Central America. Olmec, Maya, Toltec, and Aztec cultures.

ANTHR 355

Hours	3.0 Credit, 2.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Archaeology of Mesoamerica

Students will gain knowledge of the major archaeological sites excavated and studied in Meso-America with an emphasis on critiquing archaeological methodologies and theory as they have been applied to specific archaeological sites in the field. Through this study, students will also gain a knowledge of the history and cultural development of the major societies and cultures of this region and the role that archaeology plays in assisting in providing data related to questions associated with the development and decline of these entities.

Archaeology of Egypt

Survey of the most important archaeological sites, artifacts, and monuments of Egypt, their cultural contexts, as well as major methodological developments in Egyptian archaeology and Egyptology.

ANTHR 375

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Identify important Sites and artifacts

-Students will master a survey of the most important archaeological sites, artifacts, and monuments of Egypt, their cultural contexts, as well as major methodological developments in Egyptian archaeology and Egyptology.
-Students will increase their abilities to think critically and creatively with regard to archaeological methodologies and theories in the field of Egyptology.
-Students will improve their abilities to give both a professional oral/speaking presentation and a critical written research paper of over 12 pages in length.

Strata-graphic Analysis

-Students will be able to place the artifacts and architectural remains of Ancient Egypt in a strata-graphic sequence in order to prepare them for excavation on-site in Egypt.

Archaeology of the Ancient Aegean and Greece

Bronze Age Aegean through the Classical and Hellenistic eras. Archaeological sites, artifacts, and monuments of the Mediterranean region impacted by Greek civilization. Classical archaeological methodologies associated with the study, excavation, and interpretation of these cultures.

ANTHR 376

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Anthr 215.
Taught	Winter odd years

Course Outcomes

Course Objectives

-Students will learn the archaeology and cultural contexts of the ancient Aegean and Greek worlds, including Classical Archaeological methodologies and theory.
-Students will analyze the contributions that Greek culture, religion, art, and architecture, have played in the development of world history and society.
-Students will critically analyze previous field methodologies in Aegaean and Greek archaeology through selected of field reports, book chapters, etc. of the major archaeologists and sites in this region of the world.
-Students will improve their research and writing skills through the development of a critical research paper of more than 12 pages in length.
-Students will improve their professional speaking skills through an oral class presentation on an assigned topic.

Archaeology of Roman Civilization

Survey of the most important sites, artifacts, monuments, and methodological approaches associated with the archaeological study of Etruria, Roman Italy, and the Roman Empire. Cultural contexts of the regions impacted by Roman civilization.

ANTHR 377

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Anthr 215.
Taught	Fall even years

Course Outcomes

Archaeology-Roman and Etruscan

-Students will gain a knowledge of the development of Etruscan and Roman societies through a study of Classical archaeological techniques and methodology.
-Heavy emphasis will be placed on students gaining a chronological knowledge of both of these cultures and their impact on the Mediterranean Basin as well as on developments in the medieval worlds of Europe and Islam.
-Students will also gain a knowledge of the major assumptions and methodologies of Classical archaeology and gain experience in writing in the discipline through development of a critical research paper of not less than 12 pages.
-Students will increase their public speaking skills by giving an oral class presentation on an assigned topic.

Top

Near Eastern Archaeology

Peoples and culture history in Mesopotamia, Syria, Palestine, Egypt, 3500--500 B.C. Substantial reading, writing, discussion.

ANTHR 378

Hours	3.0 Credit, 2.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Archaeology in Mesopotamia, Syria, Palestine, & Egypt

Students will gain an introductory level understanding of the archaeology, history, and ancient cultural contexts of the major ancient civilizations of Mesopotamia, Syria, Palestine, and Egypt through readings, research assignments, and discussion.

Critical Thinking, Research, Analysis, and Writing

Students will increase their skill sets with regard to critical thinking, research, analysis of data, and writing through multiple types of course assignments including a final research paper project.

Archaeology of Islam

Pre-Islamic roots through Ottoman period. Sites, artifacts, and monuments of Islam. Focus on religious and cultural contexts. Relevant Islamic texts and archaeological methods for understanding medieval Islamic sites and artifacts.

ANTHR 379

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Anthr 215.
Taught	Winter odd years

Course Outcomes

Islamic Archaeology & Cultural Contexts

-Course topics will give students an introductory understanding of the archaeology of Islam from its Pre-Islamic roots through all major Islamic eras ending with the Mughal and Ottoman periods.
-Students will gain a knowledge of the most important sites, artifacts, and monuments of Islam.
-Students will also gain a deeper understanding of Islamic archaeology through a focus on its religious and cultural contexts through relating relevant Islamic texts to the major archaeological sites and artifacts of numerous Islamic cultures.
-Students will gain a working knowledge of the archaeological methods and theories currently impacting the excavation and interpretation of Islamic sites throughout the Mediterranean Basin, the Near East, India, and Asia Minor.
-Students will improve both their speaking and critical writing and research skills through both an oral in class presentation and a research paper of not less than 12 papers addressing a major research question pertinent to Islamic Archaeology.

Archaeology of Europe

Cultural developments of temperate Europe from prehistory to the Roman expansion; lectures and case studies highlight issues related to environmental change, the introduction of farming, population movement, and the emergence of increasingly complex socio-economic systems.

ANTHR 385

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Archaeology of Europe

-Students will develop a working knowledge of the major periods, developments, and interpretive themes related to prehistoric Europe.
-Students will develop an understanding of the history that has shaped and guided the development of modern Europe.
-Students will gain a greater appreciation of how archaeological evidences can be used in resonstructing this history.
-Students will apply skills and knowledge introduced in foundation courses such as ANTHR 110 and ANTHRO 215 to the archaeological study of Europe.
-Students will further develop skills in critical thinking, research, and argumentative writing.
-Students will improve their abilities to develop and complete indivdiual learning agendas.

Special Topics in Regional Anthropology

Subjects related to a particular area or people.

ANTHR 390R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter
Offered	Offered when unique opportunities or needs arise.

Course Outcomes

Special Topics in Archaeology/Anthropology

ANTHR 390R Provides students the opportunity to gain a more in-depth knowledge in a field specific region of archaeological or socio-cultural interest. The course offers the chance for visiting scholars with special expertise or regional interest to provide an intensive learning experience in anthropology for students interested in the field or the specific region.

Quantitative Methods for Anthropology

Quantitative methods in archaeology and sociocultural anthropology, including methods of organizing, exploring, and presenting data, probability, and statistical inference.

ANTHR 402

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Course Objectives

The main goal of the course is to help students obtain the skills necessary to successfully complete an artifact analysis project similar to what is required in the Anthropology 456 (laboratory analysis) class. This requires the abilities to 1) use various computer applications to manage data, 2) to properly use statistical and graphical methods for data presentation and analysis, and 3) to describe clearly both the data itself and the results of quantitative analyses.

Museum Collections Management

Instruction and practice in aspects of managing museum collections: writing catalogs, processing donations, preserving objects.

ANTHR 412

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ANTHR 311 & ANTHR 314
Taught	Fall

Course Outcomes

Management Skills

Students will be able to apply managemet skills effectively to museum collection management projects.

Museum Standards

Students will be familar with and able to implement professional and legal standards for museum collection projects related to anthropology/archaeology.

Teamwork

Students will learn how to work as leaders and/or team members in a museum setting.

Research and Writing

Students will improve in writing project reports and presenting research findings.

Top

Museum Projects

Supervised experience in a museum working with exhibitions, public programs, or research.

ANTHR 414

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ANTHR 311 & ANTHR 314
Taught	Winter

Course Outcomes

Museum Projects

Students will become familiar with and able to carry out basic museum projects (not related to managing collections) such as education, outreach, exhibits.

Evaluation

Students will be able to apply evaluation skills effectively to ensure the success of projects.

Leadership

Students will learn how to work as leaders and/or team members in a museum setting.

Top

Moral and Ritual Institutions

Anthropological approaches to religion; its content and relation to other social institutions in societies ranging from gatherers to industrialists.

ANTHR 430

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Course Objectives

-Students will be able to discuss the major theorists and theories of religion, the major theories of religion advanced, and the relation to various categories of religious practice.
-Students will be able to use ethnographic data to discuss and illustrate major religious and ritual practices, the significance of these practices as symbols, and the consequences of these practices in society and in the individual.

Top

Kinship and Gender

Kinship theory and analysis, 1920-present. Recent issues in anthropological treatment of gender, marriage, and family structure.

ANTHR 431

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Course Objectives

Students will learn the nature of kinship and the geneological basis of society. Students will also learn the importance of kinship when conducting fieldwork.

Top

Economic and Political Institutions

Connections between wealth and power: political and legal systems in state and nonstate societies; global expansion of capitalism and technology.

ANTHR 432

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Knowledge and Skills

This course is designed to enhance student knowledge and skills as a scholar with relation to critical reading within the discipline, intelligent and informed discussion, and writing about past and current issues in global economics.

Knowledge of Political, Legal, and Economic Anthropology

Students will gain a working knowledge of political, legal, and economic anthropology as a preparation for the senior thesis, graduate programs, and possible careers in anthropological, political, legal, or economic fields.

Emphasis Placed on Writing Coherently and Persuasively in th

Students will expand their capacities to read with increased comprehension and to write coherently and persuasively in the discipline.

Expand Opportunities for Critical Thinking

Students will be given many opportunities to think critically about topics pertinent to the course content and their individual research assignments.

Research Presentation and Course Discussion

Students will present their own individual research assignment in both written form and through the venues of a class presentation and discussion of the central themes and tenets as well as methodologies utilized within their individual research project.

Top

Medical Anthropology

Interactions between culture and health in comparative perspective, emphasizing social, historical, and ecological determinants.

ANTHR 434

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Anthr 247.
Taught	Fall odd years, Winter even years

Course Outcomes

Methods and Theory

Students will gain knowledge of the current soci-cultural practices best suited for applications with relation to medical anthropology as it is utilized in both domestic and international projects and in diverse communities.

Social Theory and Illness

Students will learn how to interpret the social dynamics of medical decision-making and understand the likely social, cultural, political and economic factors influencing helath, illness, and sickness.

Critical Thinking Skills

Students will learn how to think critically on their own experiences of health and inequality in the United States in the light of the concepts and methods introduced in this course.

Symbolic Anthropology

Social use and understanding of semiotics, signs, symbols, and other meaningful forms as critically constitutive of culture.

ANTHR 436

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Understanding Human Cultures

Through course assignments, students will gain a deeper appreciation of the human condition and develop a more penetrating vision of the human experience, an enhanced understanding of human beings and being human.

Symbols and Culture

Through course assignments, students will develop a better understanding of the nature of signs and symbols and of the part they play in perception and experience, of their role in refiguring reality.

Writing and Critical Thinking

Through course assignments, students will develop an increased ability to think soundly, to write clear and insightful entries in an intellectual journal, and to writie an effective final essay.

Top

Psychological Anthropology

Culture/mind relationship. Cross-cultural variation in concepts of person, emotions, and treatment modalities by society. Psychological implications of cultural differences in childrearing.

ANTHR 439

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Theoretical Understanding

1. Through this course students will develop a critique of both the overemphasis on macro-level 'structure' and 'culture' in mainstream anthropology, as well as the overly individualistic emphasis in psychology on micro-processes and the 'psyches' of individuals. Students will gain an appreciation for the extent to which 'mind' and 'culture' co-constitute one another in various dimensions of human experience.

Critical Reasoning

2. Students will learn to critique the philosophical and theoretical assumptions inherent in various approaches to understanding human experience and intersubjectivity.

Psychocultural Analysis

3. Students will learn to analyze cultural and psychological data from a person-centered ethnographic standpoint by engaging with readings and conducting a course project analyzing some psychocultural phenomenon and writing up the results.

Anthropology of Development

Theory, practice, and research methods regarding the anthropological study and resolution of poverty, disease, malnutrition, displacement, and inadequate educational opportunities.

ANTHR 441

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Course objectives

To enable the students to apply anthropological theory and ideas in a practical manner and by so doing to assess how the process of development has traditionally been done, say from 1945 to the present. Has that system worked? What have been its successes and failures, and why? We will study what the difficulties are that impede development, structurally, culturally, and environmentally.
In addition, we will ask whether the cross-cultural analysis and communication perspective that anthropology (supposedly) excels in helps. Does or can the use of anthropological techniques and analysis help make development more successful? Has anthropologically-informed development worked? Where, when, why? And if not, why not?
In a word, can the principles and practices of anthropology be used in development projects to produce something more successful and reliable in the way of development? Can the principles and skills be identified and learned or imparted to a group of students so that new practitioners can be more successful if they enter into some kind of development enterprise or project?
These objectives will be achieved by a] studying class texts; b] undertaking an individual research project; c] preparing and presenting a critique of a development project based on a journal account. Outcomes will be the ability to better understand the role of Anthropology in development work coupled with greater knowledge and skills in carrying out personal development projects. This in turn will contribute to greater confidence; a greater ability to analyze and understand human activity, sociality and thought; a greater awareness of cultural diversity, and an increased ability to communicate both orally and in written work.

Course Objectives

After completing this course students should be able to analyze definitions of 'development' and it's international aspects. Students should be able to analyze and discuss the role of development in the world today, and some of the challenges that arise. Most importantly, students should have a greater understanding of the role Anthropology can have in development.

Top

Ethnographic Research Design and Methods

Methods and philosophy of social science research design. Rationale, limitations, ethical issues, and practices of participant observation, interviewing, quantitative measurement, and other methods. Developing complete research proposal for EthnographicField Project (Anthr 495). Securing IRB approval. Local fieldwork exercises.

ANTHR 442

Hours	3.0 Credit, 2.0 Lecture, Arr Lab
Prerequisites	ANTHR 101
Recommended	300-level regionally relevant courses in the geographic area of interest.
Taught	Fall, Winter

Course Outcomes

Research Design and Methods

Through this course, students will learn principles of good research design, and will be trained in a variety of methods for social science research. By the end of this course, students will have used this training to develop a proosal for a theoretically innovative research project, including laying out valid and reliable methods for answering the research question. By the end of this course, students will have developed the ability to effectivey critique research designs and assess the relative validity and reliability of other research projects. This includes the skills to critically assess the connections between evidence and theoretical claims in social science research.

Ethnographic Data Analysis

Systematic text analysis of interview data, audio, video, and survey data. Grounded theory and content analysis. Coding methods and codebook development/management. Developing an empirically grounded analysis of qualitative or mixed-methods data. Using qualitative data analysis software.

ANTHR 443

Hours	3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	ANTHR 442
Recommended	Anthr 495R.
Note	For sociocultural anthropology majors, Anthr 495R is most appropriate after thesis fieldwork is complete and data is ready for analysis.
Taught	Fall

Course Outcomes

Methods and Practicum

In this course, students will learn the techniques and skills necessary to analyze and form theoretical arguments based on various forms of ethnographic data. These include, but are not limited to, interview data (both transcripts and digital audio), audio and video recordings of natural discourse or events, ethnographic archival data, websites, photos, etc.

Methods and Theory

Students will gain mastery in at least one qualitative data analysis software package (i.e., QSR Nvivo, MaxQDA, Dedoose), strategies, conduct cultural discourse analysis, apply traits an demographics to relevant sources, and learn to query coded datasets in order to build theoretical models from such data.

Thesis Project

The skills students gain in this course will be applied to each student's corpus of data to develop a complete analysis that will (in most instances) form the basis of a thesis project.

Field School Preparation

Topics and training related to preparation for archaeological field school assignments and on-site excavation required for Anthr 455.

ANTHR 454

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Major status.
Taught	Winter

Course Outcomes

Field School Preparation Skills

-Students will prepare for their excavation training and experience at a BYU-sponsored dig through course assignments which will include:
1. Course readings that give students a general introduction to the history, cultural contexts, and archaeological research related to the site of the Department's Field School.
2. Through class discussion, students will be prepared to live compatably with the host culture and nation in which the archaeological site under excavation resides.
3. Course exercises and readings that will prepare each student to recognize the various strata-graphic levels of the cultural deposits they will be excavating in Field School.
4. Course discussion, exercises, and readings will give each student a working knowledge of the major archaeological methodologies and theories that will be employed in the Field School projects.
5 Students will gain a basic knowledge of how to research, plan, and prepare a major archaeological excavation field project.

Field School Skills and Knowledge

Students who are enrolled for the required Spring capstone Field School in either the American Southwest/Great Basin or in Petra, Jordan will gain critical skills necessary for archaeological field work, analysis, and cultural immersion.

Field School of Archaeology

Training and experience in excavation at a BYU-sponsored dig.

ANTHR 455

Hours	6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	ANTHR 215 & ANTHR 454
Taught	Spring, Summer

Course Outcomes

Experience

Students will receive training and experience in excavation at a BYU-sponsored dig

Course Objectives

-This course is designed to provide students with an intensive exposure to archaeological field methods in the context of an ongoing research project.
-Students will receive both training and experience in field methods. The course involves working a full schedule five days a week, spending approximately 8 hours a day working in the field. Students will also take turns one day a week doing lab work.
-Students will learn field methods including excavation, mapping, note taking, survey, reading topographic maps, and photography.
-There also will be reading and writing assignments to be completed including a personal field journal that will be graded on a regular basis.

Top

Lab Skills for Anthropology

Analytical and laboratory techniques as part of a BYU-sponsored archaeological project.

ANTHR 456

Hours	3.0 Credit, 1.0 Lecture, Arr Lab
Prerequisites	ANTHR 402 & ANTHR 455
Taught	Fall

Course Outcomes

Lab Skills in Anthropology/Archaeology

-Students will gain hands-on laboratory skills in artifact analysis through the study of data sets obtained in the previous Archaeology Field School held in the Spring of the same year in either the American Southwest or Petra, Jordan.
-Students will learn the correct methods for handing and analyzing field data sets in order to develop a research question as well as critically evaluating the methodologies and theories necessary for answering this question.
-Students learn how to chose correct analysis methodolgies and will also integrate statistical analysis into the evaluation of their data set.
-Students will develop the research question that will become their Senior Thesis capstone project from the processes of this course.

Practical Applications in Contract Archaeology

Working with professionals and graduate students on contract and research projects; learning archaeological field/laboratory methods; applying training to actual research projects, artifact analyses, site documentation, and report writing.

ANTHR 460

Hours	3.0 Credit, 1.0 Lecture, 9.0 Lab
Prerequisites	ANTHR 215
Recommended	Anthr 454, 455, 456.
Taught	Winter

Course Outcomes

Contract Archealogy

Students will work with professionals and graduate students on a contract or research project. Students will apply their training to actual research projects, artifact analyses, site documentation, and report writing.

Top

Special Topics in Theory and System

Subjects related to anthropological theory or the operation of social systems.

ANTHR 490R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department
Offered	Offered when unique opportunities or needs arise.

Course Outcomes

Ritual and Social Interaction

- Students will develop an enhanced understanding of social interaction, of what it means to be in the presence of others, and ultimately of being human and interacting with other human beings.
- Students will prepare to do effective fieldwork and deskwork, to eventually produce accurate, useful, and insightful interpretations of various interactional practices.
- Students will learn to describe the positions, ideas, and methods that will most help make sense of various interactional practices, of particular social institutions, activities, events, roles, places, and objects.
- Students will demonstrate the ability to think soundly, to communicate effectively, and to write a clear and convincing essay.

Ethnographic Field Project

Conduct field work. Maintain, code, and index field notes, interview transcripts, and other data sources in preparation for Anthr 499 thesis write-up.

ANTHR 495R

Hours	3.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	ANTHR 203 & ANTHR 442
Note	IRB approval and instructor's consent required before departure to field. No class meetings.
Taught	Spring, Summer

Course Outcomes

Course Objectives

Students will conduct independent field work and log field notes. Students will follow their own research plan developed in Anthr 442.

Top

Academic Internship: Research

Field or library research.

ANTHR 496R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Supervising instructor's consent.
Taught	

Course Outcomes

Internship

-Students will complete a supervised internship in an employment setting or agency related to Anthropology.
-Students will link academic learning with these professional experiences.
-Students will complete a minimum of 45 hands-on hours per credit.

Top

Directed Readings

Reading 2,500 pages on a stated topic.

ANTHR 497

Hours	3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Major status; Supervising instructor's consent.
Taught	

Course Outcomes

Department Learning Outcome

Under the direction of a mentoring professor, students will critically examine, investigate, and integrate the literature for a topic of interest in anthropology.

Top

Senior Thesis

Supervised analysis and write-up of data generated during field project. Refinement for publication.

ANTHR 499

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ANTHR 442 & ANTHR 495R; or ANTHR 455 & ANTHR 456
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Course Objectives

Students will analyze data and field notes collected for Anthr 495 to produce publishable journal article, a large-size poster, and a conference presentation.

History of Archaeology

Historical approach to development of archaeological knowledge, method, and theory, emphasizing North America and individual contributions.

ANTHR 500

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into the graduate program.
Taught	Winter

Course Outcomes

Methods and Theory

Students will gain a comprehensive knowledge of the historic development of Archaeology as a discipline through the study of the most critical archaeological sites and fromative personalities within the discipline.

Archaeological Theory and Practice

Course assignments will allow students to become familiar with the use of archaeological theory and its practical applications.

Methods and Theory Via Data

Course assignments will allow students to achieve a better understanding of the relationship between data, theory, and methods and to critically evaluate theory and methods utilized in archaeological publications. Students will also be ablet to acquire the skills necessary to identify and apply particular theories and methods to their own research.

Top

Current Archaeological Method and Theory

Major developments in archaeological method and theory, emphasizing current perspectives.

ANTHR 501

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into the graduate program.
Recommended	Anthr 500.
Taught	Fall

Course Outcomes

Methods and Theory

Through the study of the most up-to-date applications of methodologies and theory in anthropology, graduate level students will gain needed scholastic tools to apply to their required Masters Thesis. These tools will include developing a better understanding of the relationship between data, theory, and method.

Quantitative Methods for Anthropology

Methods of organizing, exploring, and presenting data. Probability and statistical inference.

ANTHR 502

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Quantitative Methods

Students will gain hands-on experience in applying differing types of quantitative analysis methods to artifacts and other materials recovered from the BYU Summer Field School in Archaeology. The strengths and weaknesses of each methodology will be emphasized as well as discerning which form of analysis best suits the research questions to be addressed.

Quantitative Methods

Students will learn to intelligently integrate appropriate forms of quantative methods to their senior thesis capstone project and demonstrate their abilities to utilize such methodologies as a professional in archaeology.

Top

Museums and Cultures

Museums in society. Cultural foundations of museum content and sociology of museum use. Analyzing museum studies literature. Visits to and critiques of area museums. Final projects in real museums in the region.

ANTHR 511

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Introduction to Roles of Museums as Cultural Entities

To introduce students to the unique and important roles that differing types of museums play in world cultures as well as how diverse cultures view museums and collective memory.

Hands-On Learning Experiences with Museum Methodologies

Students will be provided hands-on, real-life experiences with museum collections related to the issues and methodologies introduced by the course.

Hands-on Experiences in Research, Analysis, Writing

Students will have hands-on experiences in research, analysis, and writing related to the anthropology of museums both nationally and internationally.

Introduction to Major Museum Fields and Careers

Students will be introduced to the major museum fields, their sub-fields,and their professional assumptions and opportunities, thus also helping students identify their own career interests in, and aptitudes for, the various museum disciplines.

Team Work Approach

Student projects will introduce students to the team approach to museum work. Assignments will assist students in learning how to give professional and persuasive presentations of their written research in group settings.

Student Work with Museum Professionals

Students will be provided opportunities to work closely with professionals in the field and visit diverse museum types thus expanding their knowledge of the museum profession and practices.

Counseling in Museum Fields Provided to Students

Students will be provided individual counseling in how to prepare for a career in the museum fields.

Top

Heritage Resource Management

Legal and ethical issues for practicing archaeologists. Preservation law, collections law, public archaeology, Native American issues, and careers in archaeology and museums.

ANTHR 512

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admittance into graduate program in archaeology or certificate program in museum practices.
Taught	Fall

Course Outcomes

Foundational Knowledge

Students will learn the history of cultural resource management and laws relevant to its inception and current state.

Value

Students are to understand the inherent value in cultural resource preservation.

Practical Methods

This course will instruct students in the basic methods necessary in carrying out compliance for the Section 106 review process.

Practical Methods

This course will instruct students in the basic methods necessary in carrying out compliance for the Section 106 review process.

Current Issues

Students will learn the current fundamental issues relative to CRM in the U.S. and will discuss ways in which certain aspects of the field can be improved.

Current Issues

Students will learn the current fundamental issues relative to CRM in the U.S. and will discuss ways in which certain aspects of the field can be improved.

Top

Museum Practices and Technologies

Core museum disciplines: collections management, curation, education, exhibition, and conservation. Supporting technologies: database, digital photography, Web design, etc. Career paths.

ANTHR 522

Hours	3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Technology

Students will have competency in a variety of computer software and technologies upon which museum practices are dependent.

Leadership

Students will learn how to work as leaders and/or team members in a museum setting.

Project Management

Students will be able to apply museum technologies effectively to ensure the success of various museum projects.

Career Preparation

Students will be familiar with career options in the museum field and understand what skills they need to develop to succeed.

Top

Museology: Curation and Writing

Professional practices supporting the educational, research, and reporting functions of museums, emphasizing museum writing leading to publication, cataloguing, policy writing, exhibition conceptualization, etc.

ANTHR 524

Hours	3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	Admission to certificate in museum practices program.
Taught	Fall even years

Course Outcomes

Museum Curation and Writing

Students will have hands-on experiences through class assignments in all aspects of writing associated with museum functions and curation including condition reports, registration documents and databases, exhibition research and panels, and educational materials.

Museum Curation and Writing

Students will also learn how to research and write a grant for a museum project or exhibition.

Museum Curation and Writing

Students will learn hands-on skills by developing, researching, and writing all materials necessary for a new exhibition at the Museum of Peoples and Cultures. This experience will also require students to work directly with collections held at the Museum or in other storage facilities.

Top

Museum Registration and Collections Management

Managing anthropological collections: object-handling, object-tracking, accessioning, deaccessioning, collections databases, loans, valuating collections, conservation environments, ethics, and NAGPRA and other laws relating to museums.

ANTHR 525

Hours	3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Required Museum Professional Skills

Students will be introduced to the registration, collections management, and collection care disciplines including both professional and ethical standards.

Hands-On Skills and Practices

Students will have hands-on, real-life experience with museum collections related to registration issues and practices and thus be able to apply theory to professional museum venues.

Technical Museum Writing

Through the course assignments, students will gain experience in technical research and writing for museums including object description, condition reporting, collections research related to origins of objects and clear title, accessioning, databasing, and deaccessioning, collections planning and proposal writing with relation to legal and ethical strategies related to holdings within a museum.

Career Development

Students will be provided the opportunity to identify their interests in and aptitudes for the registration/collections management/collection care disciplines. Students will receive counseling in how to prepare for a career in the collection management fields.

Team Work

Due to the fact that most museum projects are team efforts, this course will provide students experience in team driven project results and projects through course assignments and assessments.

Professional Development

Students will be provided the opportunities to work closely with professionals in the museum fields and visit diverse museum settings through course assignments.

Museum Theory and Methodologies

Students will gain an appreciation of museums and their important roles in local, national, and global contexts.

Museum Exhibitions and Programming

Instruction and practica in all aspects of exhibition development. Current thought and literature in museum education with practica for application.

ANTHR 526

Hours	3.0 Credit, 1.0 Lecture, 8.0 Lab
Prerequisites	ANTHR 524
Taught	Winter odd years

Course Outcomes

Exhibition Skill Assessment

Through course assignments, students will be able to identify their interests and aptitudes for developing museum exhibitions.

Exhibition and Program Skills

Students will be provided projects that require professional practices in developing an exhibition and associated programming products.

Familiarity with Museum Education

Through course assignments, students will acquire training in museum education theory. These assignments will involve hands-on practices in developing a real exhibition.

Mentoring and Professional Development

Through course assignments, students will be provided opportunities to work closely with museum professionals in order to develop a complete exhibition.

Top

Great Basin Archaeology

Overview of ethnography, history of research, and prehistory of the Great Basin culture area. Current issues in archaeological research emphasized.

ANTHR 530

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Anthr 350 or equivalent.
Taught	Winter even years

Course Outcomes

Great Basin Archaeology

Students will gain archaeological and cultural knowledge of the major native peoples of the Great Basin Region from pre-history through European contact through a study of their archaeologial remains and ethnographic studies.

Great Basin Archaeology

Students will have hands-on experiences with the collections of the Museum of Peoples and Cultures that are representative of the cultures of the Great Basin Region.

Southwest Seminar

Overview of ethnography and prehistory of American Southwest. Current issues in archaeological research emphasized.

ANTHR 535

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Anthr 350 or equivalent.
Taught	Winter odd years

Course Outcomes

General Understanding

At the completion of the course, students will have a general understanding of the braod outlines of Southwestern prehistory, which will provide the context necessary to understand the current status and historical development of research in Southwestern archaeology.

Current Research in Southwestern Archaeology

Students will become familiar with current research in Southwestern archaeology, including knowledge of how theoretical approaches are applied by Southwestern archaeologists, and how theoretical perspectives affect decisions about fieldwork and laboratory analysis strategies.

History of Southwest Archaeology

The course will familiarize students with some of the most important historical figures and research projects in Southwestern archaeology, and how current research depends on the historic development of Southwestern archaeology.

Effective Communication

Students will gain experience in effective communication by completing writing assignments, making oral presentations, and participating in classroom discussions.

Top

Formative Mesoamerica

Topics and issues concerning beginnings and development of Mesoamerican civilizations. Mexican and Mayan antecedents of classic Mayan civilization and culture.

ANTHR 562

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Mesoamerica

Students will examine issues related to the beginnings and development of Mesoamerican civilization.
Students will investigate Mexican and Mayan antecedents of classic Mayan civilization and culture.

Classic Mayan Civilization

Topics and issues concerning archaeological and cultural aspects of classic Mayan civilization and society.

ANTHR 564

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Development of the Mayan Civilization

Students will gain an in-depth knowledge of the development and accomplishments of the Classic Mayan Civilization at a graduate level as well as learn the conceptual framework which scholars have developed to reconstruct the culture history, processual changes, and cultural content of ancient Maya Lowland culture. Students will learn the developmental history of various sites and regions within the Lowlands and what is known about the relations between them.

Critical Thinking and Writing

Students will expand their abilities to critically problem solve and write effectively in the discipline through class assignments including readings, class discussion, and research paper assignments. Students will research in detail a Maya archaeological site or small region, and report on it both in writing and orally.

Knowledge of Mayan Material Culture

Students will gain a graduate level knowledge of Classic Mayan material culture through class readings, discussions, writing assignments, and the study of actual material artifacts including but not limited to pottery samples. Through these learning opportunities, students will become familiar with some of the central life ways of the Classic Maya and how these were integrated into the cultural system.

Archaeological Methodologies with Relation to Mayan Sites

Students will gain a graduate level knowledge of archaeological field methodologies that are pertinent to the excavation of Mayan sites and become familiar with the varying veiws of the nature of Classic Maya civilization and the data upon which such views are based.

Top

Mayan Ceramic Analysis

Current approaches to classification and analysis of archaeological ceramics, particularly Maya Lowland pottery. Laboratory study of pottery collections from the Maya area.

ANTHR 565

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter even years

Course Outcomes

Ceramic Analysis

Students will gain a practical familiarity with Maya Lowland ceramics and how they are classified and utllized in archaeological interpretation. By the end of this course, students will be able to identify important ceramic types and modes.

Writing Skills

Through course assignments, students will learn how to prepare written ceramic descriptions and illustrations, as well as how to determine the ceramic characteristics of sherds through hands-on pottery analysis of Mayan collections.

Mayan Ethnohistory

Topics and issues of cultural change, colonization, and documentation of change processes in the Mayan region, from postclassic period and independence from Spain.

ANTHR 566

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall odd years

Course Outcomes

Ethnohistorical approaches to archaeology

Students will gain an understanding of the nature and structure of Maya societies, as well as how they adapted to the changes introduced by European contact and conquest through an intensive study of ethnohistorical sources (both native and European).

Research Skills and Writing

Through course assignments, students will gain the ability to synthesize quantities of information, discuss these sources critically and analytically, and present their findings via both an oral presentation and a written analysis paper.

Near East Seminar

Current issues in Near Eastern archaeological research.

ANTHR 580

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Undergraduates may enroll if they have completed 30 hours in anthropology coursework.
Taught	Fall odd years

Course Outcomes

Intensive Graduate Level Near Eastern Seminar

Topics vary according to the instructor's research interests. However, each graduate seminar must provide students an intensive mentored research experience in the archaeology of the Near East. Often the seminars are organized by topic. Example: The Archaeology of Mortuary Practices Applied to the Archaeological Data Set of the Near East. Each Seminar must increase the students' research, critical thinking, analysis, and writing skills in the discipline.

Top

Special Topics

Special topics in archaeology or museum studies.

ANTHR 590R

Hours	3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Mentored Investigation of Special Topics

Under the direction of a mentoring professor, students will critically examine, investigate, and integrate the literature for a topic of interest in Anothropology studies.

Regional Specialization

Students will increase their scholastic knowledge concerning a specific archaeological region of the world through guided in-depth study mentored by a faculty member of the department. Assignments will include in-depth readings and discussion as well as methodological approaches to solving archaeological or socio-cultural research questions.

Museum Projects

One or more supervised museum projects, such as producing an exhibition, developing educational materials, conducting inventory, or accessioning collections.

ANTHR 596

Hours	3.0 Credit, 0.0 Lecture, 8.0 Lab
Prerequisites	ANTHR 524 & ANTHR 526
Taught	Spring odd years

Course Outcomes

Mentored Student Experience

Through this course, students will learn all aspects of museum project planning, implementation, and reporting related to a significant hands-on museum project.

Professional Development via Mentored Experience

Through this course, each student will have a significant focused experience directly related to the museum interests of the student which results in professional level writing samples related to reprot writing and project planning.

Museum Management Skills

Students will have a hands-on experience managing a project and be able to direct its financial, personnel, and time resources.

Top

Academic Internship: Federal Agency on Museum/Collections Repository

Earning credit while employed in federal agency archaeology (BLM, U.S. Forest Service, etc.); or 320 hours in collections-holding institution (sixteen weeks half-time; eight weeks full-time).

ANTHR 599R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Prior approval; completion of all course work for certificate in museum practices (may be taken concurrently with Anthr 596).
Taught	

Course Outcomes

Professional Development via Mentored Experience

Through course assignments, students will gain familiarity with job opportunities and responsibilities in the federal government or museums/collections-holding institutions. These assignments will include significant work experiences to enhance students' resumes and job-obtaining potential.

Museum Networking

Through course assignments, students will establish a foundational professional network for students outside of academia in the world of museums and collections.

Documentation Systems

Through course assignments, students will gain real-world experiences working with archaeological and other cultural resources documentation systems, their use and interpretation.

Museum Planning

Through course assignments, students will gain experience in participating in planned real-world work projects related to anthropology and learn the professional standards and ethics required by such projects both nationally and internationally.

Top

Introduction to Arabic

Beginning Arabic

ARAB 100R

Hours	0.5 - 1.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Offered at the Jerusalem Center for Near Eastern Studies only.

Course Outcomes

Social Interaction

Demonstrate ability to socially interact with Arabs appropriately (control basic "God wishes," gender/status sensitive).

Written and Audio/Video Texts

Comprehend simple written and audio/video texts on familiar topics.

Basic Conversation Tasks

Converse simply but successfully with native speakers of Arabic about self and family; order a meal, ask/give simple directions, and accomplish other basic tasks.

Top

First-Year Arabic

Basic skills of spoken and written Arabic.

ARAB 101

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Suggested first class for students learning Arabic.
Taught	Fall, Winter, Spring

Course Outcomes

Social Interaction

Demonstrate ability to socially interact with Arabs appropriately (control basic "God wishes," gender/status sensitive).

Basic Conversation Tasks

Converse simply but successfully with native speakers of Arabic about self and family; order a meal, ask/give simple directions, and accomplish other basic tasks.

Arabic Sounds

Distinguish and pronounce all Arabic sounds.

Written and Audio/Video Texts

Comprehend simple written and audio/video texts on familiar topics.

Composing Simple Personal Letters

Compose a simple personal letter.

Differences in Formal and Vernacular Arabic

Recognize and employ some of the differences between formal and vernacular Arabic.

Foundational Structures

Control foundational structures (iDaafa, noun/adjective phrase, basic sentence types, etc.).

Language Learning and Communicative Strategies

Employ key language learning and communicative strategies (e.g. use context and what one knows to infer themeaning of what one does not know).

First-Year Arabic

Second-semester Arabic. Basic language skills, both spoken and written.

ARAB 102

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter, Spring, Summer

Course Outcomes

Social Interaction with Arabs

Demonstrate expanding ability to socially interact with Arabs appropriately.

Conversation Tasks

Converse successfully with native speakers of Arabic about likes/dislikes, home/school, health, schedule, plans, and accomplish basic tasks such as shopping.

Comprehension of Written Tasks

Comprehend simple but longer written and audio/video texts on an expanded range of familiar topics.

Writing Descriptive Prose and Narrative Events

Write descriptive prose and narrate events occuring in the past, present and future.

Formal and Vernacular Arabic

Demonstrate increasing ability to appropriately employ formal and vernacular Arabic.

Foundational Structures

Significantly increase control of foundational structures (verb conjugations, complex sentence types).

Language Learning and Communication Strategies

Employ expanded range of language learning and communication strategies (knowledge of root and pattern system, circumlocution).

Top

Second-Year Arabic

Significantly expanding proficiency in Modern Standard Arabic and increasing conversational repertoire.

ARAB 201

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Arab 102 or equivalent experience.
Taught	Fall, Spring

Course Outcomes

Speaking

Speak Colloquial Arabic at the ACTFL intermediate low level. Show an elementary ability to distinguish between Colloquial and Standard Arabic in word choice and pronunciation.

Reading

Read and understand simple written Standard Arabic texts at the ACTFL intermediate low level.

Listening

Understand spoken conversations and dialogues in Standard and Colloquial Arabic at the ACTFL intermediate low level.

Foundational Structures

Show a mastery of basic verb conjugations, idaafa, and other basic structures, with some familiarity with more advanced structures (passive, active and passive participles, relative clauses, diptotes and other vowelling issues).

Intermediate Arabic

Continuation of Arab 201.

ARAB 202

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Arab 201 or equivalent experience.
Note	This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Winter, Summer

Course Outcomes

Speaking

Speak Colloquial Arabic at the ACTFL intermediate mid level. Show a developing ability to distinguish between Colloquial and Standard Arabic in word choice and pronunciation.

Reading

Read and understand simple written Standard Arabic texts at the ACTFL intermediate mid level. Show a developing ability to understand front page news articles on familiar topics.

Listening

Understand spoken conversations and dialogues in Standard and Colloquial Arabic at the ACTFL intermediate mid level.

Writing

Write short essays, journal entries and notes at the ACTFL novice high level.

Foundational Structures

Show a mastery of verb conjugations (including defective verbs), passive, and other basic structures, and a developing familiarity with advanced Arabic grammatical constructions like cognate accusative, false idaafa, tamyiiz, and haal. Demonstrate an ability to vowel simple texts accurately, and a developing ability to vowel more complicated texts.

Vocabulary Mastery

Demonstrate a mastery of basic Arabic vocabulary, both colloquial and standard (2500 words).

Top

Second-Year Conversation

Intermediate spoken Arabic.

ARAB 211R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Arab 202.
Taught	Fall
Offered	Study Abroad only.

Course Outcomes

Speaking

Speak Colloquial Arabic at the ACTFL beginning hi level. Show an ability to distinguish between Colloquial and Standard Arabic in word choice and pronunciation.

Vocabulary Mastery

Demonstrate a mastery of the vocabulary used to describe, narrate and express basic daily functions and interactions

Top

Standard Arabic Tutorial

Readings, listening and writing activities, and discussion in Arabic designed to maintain vocabulary and fluency while waiting for study abroad.

ARAB 221R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Spring

Course Outcomes

Language maintenance for study abroad

Maintain the level of Arabic achieved in Arabic 201/202 during the Spring/Summer terms while waiting for the intensive Arabic study abroad program, in terms of vocabulary mastery, and reading and speaking fluency.

Top

Spoken Arabic Tutorial

Conversation with a native speaker; movies, plays, and other written sources of colloquial Arabic.

ARAB 222R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Summer

Course Outcomes

Language Maintenance for Study Abroad

Maintain the level of spoken Arabic achieved in Arabic 201/202 during the Spring/Summer terms while waiting for the intensive Arabic study abroad program, in terms of vocabulary mastery and speaking fluency.

Arabic Grammar Review

Tutorial review of first- and second-year Arabic grammar, with readings and other activities that illustrate the principles discussed.

ARAB 223R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Language Maintenance for Study Abroad

Maintain the level of Arabic achieved in Arabic 201/202 during the Spring/Summer terms while waiting for the intensive Arabic study abroad program, in terms of vocabulary mastery, the verbal system, and the grammatical structures of Arabic including *tamyiiz*, *haal*, *cognate accusative* and the like.

Top

Advanced Modern Standard Arabic

Advanced work in reading, writing, listening, speaking.

ARAB 300

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	ARAB 202
Taught	Fall
Offered	Study Abroad only.

Course Outcomes

Reading

Read and understand written Standard Arabic texts at the ACTFL Advanced Lo level. Demonstrate an ability to read and comprehend front page news articles fluently with little recourse to a dictionary.

Writing

Write short essays, journal entries and notes at the ACTFL intermediate mid level.

Top

Newspaper Arabic

Extensive reading of Arabic newspapers and magazines, with appropriate vocabulary building.

ARAB 302

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	ARAB 202
Taught	Fall
Offered	Study Abroad only.

Course Outcomes

Reading

Read and understand written Standard Arabic texts at the ACTFL Advanced Lo level. Demonstrate an ability to read and comprehend front page news articles fluently with little recourse to a dictionary.

Writing

Write short essays, journal entries and notes at the ACTFL intermediate mid level.

Top

Third-Year Conversation

Advanced conversation skills.

ARAB 311R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	ARAB 202
Taught	Fall
Offered	Study Abroad only.

Course Outcomes

Speaking

Speak Colloquial Arabic at the ACTFL intermediate hi level. Show an ability to distinguish between Colloquial and Standard Arabic in word choice and pronunciation.

Vocabulary Mastery

Demonstrate a mastery of the vocabulary used to describe, narrate and express opinions about current events.

Spoken Arabic

Intensive study of the spoken language.

ARAB 331

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	ARAB 202
Taught	Fall
Offered	Study Abroad only.

Course Outcomes

Speaking

Speak Colloquial Arabic at the ACTFL intermediate hi level. Show an ability to distinguish between Colloquial and Standard Arabic in word choice and pronunciation.

Vocabulary

Demonstrate a mastery of the vocabulary necessary to narrate, describe and express opinion on a variety of topics.

Basic Structures

Demonstrate a command of the basic rules of grammatical spoken Arabic: agreement, verb conjugation, word order, etc., and an increasing command of native-like expression, word choice and idiomatic expression.

Top

Introduction to Modern Arabic Literature in Translation

Reading and discussion of representative sample of modern Arabic short stories, novels, plays, and poetry. All readings in English.

ARAB 361

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Translation

Students will deepen their understanding of modern Arab literature in translation.

Demonstrate translation knowledge

Students will demonstrate knowledge in modern Arab literature in translation.

Introduction to Medieval Arabic Literature in Translation

Reading and discussion of representative sample of medieval Arabic literature. All readings in English.

ARAB 362

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Translation

Students will deepen their understanding of medival Arab literature in translation.

Demonstrate Knowledge

Students will demonstrate knowledge in medival Arab literature in translation.

Top

Arabic Language Teaching Methods

Language acquisition theories and instructional practices specific to Arabic language classrooms at various levels. Lectures, demonstrations, microteaching.

ARAB 377

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Basic Concepts

thoughtfully articulate what it means to know, learn, and teach a foreign language

Methods Evaluation

critically evaluate methods in foreign language pedagogy

Curriculum Development

develop effective curricula, syllabi, and lesson plans

Lesson Plan Development

effectively implement lesson plans

Top

Advanced Formal Arabic Conversation and Rhetorical Skills

Advanced conversation and rhetorical skills based on point/counterpoint debates.

ARAB 411R

Hours	1.0 - 3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	ARAB 311R
Recommended	Arab 422R.
Taught	Winter, Spring, Summer

Course Outcomes

Advanced Arabic Conversation and Rhetorical Skills

Through debates and other activities, students will demonstrate proficiency in advanced conversational skills and rhetorical skills appropriate in Arabic-speaking cultures.

Top

Fourth-Year Arabic Writing Tutorial

Essay and letter writing in Arabic.

ARAB 421R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Writing

Write short essays, journal entries and notes at the ACTFL intermediate high level.

Top

Advanced Spoken Arabic

Movies, plays, and other texts in spoken Arabic.

ARAB 422R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Media and rhetorical skills

Students will engage and analyze advanced point/counterpoint media events from a rhetorical viewpoint; they will participate in similar events themselves, with increasing accuracy in displaying prominent features of Arabic rhetorical style; the linguistic accuracy and fluency of their speaking performance will also improve.

Top

Current Events in Arabic

Current events from online oral and written news sources, including high-level discussions of causes and context with written analyses and oral presentations.

ARAB 423R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Speaking and Writing

Demonstrate an ability to speak and write fluently in Arabic about current events in the Middle East, expressing and supporting opinion, and giving detailed descriptions and analyses of the events.

Top

Modern Arabic Literature

Readings in modern Arabic literature.

ARAB 424R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Key Works

Students will demonstrate their knowledge and understanding of major works and genres in verbal and written forms.

Issues

Students will demonstrate their understanding of the major issues of Modern Arabic Literature.

Linguistic Content

Students will demonstrate an ability to understand and analyze the linguistic features of important Arabic literary texts.

Classical Arabic Texts

Quran, Hadith, Sira, Adab.

ARAB 425R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Human Experience

Students will demonstrate their understanding of the human aspects of premodern literature.

Key Works

Students will demonstrate their knowledge and understanding of major works and genres.

Comparative

Students will be able to analyze and discuss the influence of the pre-modern language on present-day Arabic.

Top

Advanced Arabic Grammar

The morphology and syntax of modern Arabic, including advanced vocabulary study.

ARAB 426R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Difficult Texts

Demonstrate in increased ability to understand very difficult Arabic texts, by relying on a firm grasp of the vocabulary and grammar of the language, as well as techniques for figuring out difficult structures that present themselves.

Independent Readings

Independent readings of Arabic materials.

ARAB 490R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Reading

Read selected texts at the advanced lo level.

Context

Demonstrate an understanding of the place of those texts in the world of Arabic writing.

Top

Directed Studies in Arabic

Individual tutorial in topic of student choice; lexical development; major oral and written report in Arabic.

ARAB 495R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	ARAB 302
Recommended	Arab 424, 425, 426.
Taught	Winter, Spring, Summer

Course Outcomes

Reporting and Presenting in Advanced Arabic

Mastery of all of the vocabulary needed for superior level conversation/presentation/writing on the broad topic chosen by the student; advanced to superior level fluency and accuracy in conversation on this topic; professional level oral Arabic report presented to peers and community; accompanying written Arabic report; both reports included in program portfolio (video and paper).

Top

Advanced Topics in Arabic

Advanced studies in Arabic language and literature.

ARAB 531R

Hours	0.5 - 3.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Demonstrate Knowledge

Students will demonstrate knowledge in advance study in Arab topics.

Introduction to Art and Drawing for Non-Majors

Readings, aesthetic topics, basic drawing techniques and concepts.

ART 101

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skill Development

Students will exhibit fundamental knowledge and skills in drawing in a variety of media
.

Aesthetic Sensibilities

Students will develop perceptive and inventive skills using drawing media as a means to developing a personal voice

Historical and Contemporary Context

Students will become familiar with the work of artists both past and present who implement the use of drawing in art making

Top

Introduction to Sculpture for Non-Majors

Basic sculpture processes and concepts, including lecture, demonstrations, lab time, slide lectures, some art historical material.

ART 104

Hours	3.0 Credit, 4.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Fee.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Context

Students will develop an understanding of conceptual and formal trends in contemporary sculpture through lectures, images and other means.

Skill Development

Students will learn the sculptural basics of carving, casting and fabrication in relation to original art work.

Evaluate

Students will learn to evaluate their own sculptural works and that of others through regularly scheduled critiques. Work will be compared to contemporary and traditional standards of thought and practice applied to 3 dimensional art.

Introduction to Ceramics for Non-Majors

Basic throwing, hand-building skills, vocabulary, and technique for non-art majors, including lecture, demonstrations, lab time, slide lectures, some art historical material.

ART 105

Hours	3.0 Credit, 4.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Fee.
Taught	Fall, Winter

Course Outcomes

Context

- Students will explore examples of historical and contemporary ceramic art and process though lectures, images and other means.
-
-

Clay Properties, Vocabulary, and Surface

Students will demonstrate a grasp of the fundamental properties of clay and glaze process. Students will learn applicable vocabulary to discuss surface options and issues they encounter in the formation of ceramic art.

Composition and Design

Students will learn the basics of ceramic forming techniques and design considerations.

Evaluate

Students will learn to evaluate their own sculptural works and that of others through regularly scheduled critiques. Work will be compared to contemporary and traditional standards of thought and practice applied to 3 dimensional art.

Painting for Non-Majors

Introduction to painting.

ART 110

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Painting Production

Students will increase their confidence as painters through the production of a significant body of paintings.

History & Context

Students will gain a basic understanding of the history of painting and trends in contemporary painting.

Painting Materials

Students will gain a basic understanding of the materials, techniques and terminology of oil painting.

Color

Students will gain an understanding of color theory and color mixing as they related to painting.

Top

Drawing

Observational and conceptual drawing using a variety of media and methods.

ART 114

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Pre-studio, pre-art education or art minor status.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

Two-Dimensional Design

Formal and conceptual elements of design, color, and composition, using a variety of media.

ART 115

Hours	1.5 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Pre-studio, pre-art education or art minor status.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

Watercolor for Non-Majors

Introduction to aqueous media.

ART 120

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Painting Production

Students will increase their confidence as painters through the production of a significant body of paintings.

History & Context

Students will gain a basic understanding of the history of watercolor painting and trends in contemporary watercolor painting.

Painting Materials

Students will gain a basic understanding of the materials, techniques and terminology of watercolor painting.

Color

Students will gain an understanding of color theory and color mixing as they related to watercolor painting.

Printmaking for Non-Majors

Introduction to the basic materials, techniques, process, history, and aesthetics of intaglio, lithography, and relief printmaking processes.

ART 122

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	ART 101; or ART 114; or VA 114
Taught	Fall, Winter

Course Outcomes

Printmaking Concepts, Theories, and History

Students will Demonstrate an understanding of the basic concepts, theories, and history of intaglio, relief and lithographic printmaking.

Printmaking Techniques and Process

Students will demonstrate an understanding of the basic techniques and processes of intaglio, relief and lithographic printmaking as introduced in class.

Application of Skills and Techniques

Students will appropriately apply basic printmaking skills and techniques as introduced in class to make intaglio, relief and lithographic prints.

Print Evaluation

Students will be able to evaluate prints based on professional criteria and standards introduced in class.

Aesthetic Awareness and Sensibilities

Students will demonstrate increased aesthetic awareness and sensibilities, particularly as they relate to printmaking, and successfully apply these in their art making.

Three-Dimensional Design

Three-dimensional concepts, theories, and issues using a variety of media and processes. Readings, writings, and participation in course work exhibitions required.

ART 133

Hours	1.5 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	Pre-studio, pre-art education or art minor status.
Note	Fee.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Spatial Skills

Students will demonstrate ability to generate, organize and communicate ideas in full, three-dimensional space.

Technical Skills

Students will demonstrate awareness of principles of structure, function and content.

Aesthetic Sensibilties

Students will demonstrate an increased Art/Design vocabulary.

Technical Skills

Students will demonstrate heightened construction abilities and craftsmanship.

Ability to Articulate

Increased ability in the articulation of three-dimensional form, space, and visual dynamics.

Development of Awareness

- Increased visual sensitivity, creativity, and a critical awareness of 3D issues.
- Awareness of contextual issues in art & design.
- Knowledge of contemporary practice in 3 dimensional genres.

Top

Stained Glass

Methods and processes using leaded glass, copper, foil, and faceted glass.

ART 155

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Fee.
Taught	Fall, Winter

Course Outcomes

Design

Students will expand their understanding of stained glass as it relates to the elements and principles of design.
Link to Program Outcomes: Visual Arts History, Concepts, and Processes , Aesthetic Development

Traditional process

Students will learn traditional glass forming processes.

Contemporary Art

Students will examine contemporary examples of stained glass art and methods.

Personal Voice

Students will be encouraged to make original adaptationas and contibutions to the tradition of stained glass.

Top

Studio Techniques for Art History

Introduction to art techniques, materials, and practices directed toward art history majors.

ART 200

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Note	Fee.
Taught	

Course Outcomes

Effective Communication

Students will become able to describe these processes and techniques, verbally and in writing.

Western Art History and Techniques

Students will become familiar with processes and techniques historically used in the Western tradition. These include drawing, oil painting, watercolor, fresco, tempera, addative and subtractive scupture, casting, ceramics and printmaking.

New Genres and Interdisciplinary Projects

Developing an artistic voice while exploring new genres of art making including installation, digital, time-based, performance, sound, and technology-based work. Includes an introduction to hybridized, collaborative, and cross-disciplinary art projects.

ART 210

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	Acceptance to a Department of Art degree program.
Taught	Fall, Winter

Course Outcomes

New Genre Art Practices

Students will develop a basic understanding of New Genre art practices and their origins, including relevant themes and concerns.

Production

Students will produce a body of work demonstrating a developing understanding and engagement with the themes and concepts explored in class.

Non-Traditional Approaches

Students will expand their art practice by engaging in a variety of non-traditional approaches to art production, while incorporating a conceptual framework in their exploration.

Top

Painting Fundamentals

Fundamentals in oil painting and aqueous media.

ART 215

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Acceptance to a Department of Art degree program.
Taught	Fall, Winter

Course Outcomes

Painting Production

Students will increase their confidence as painters through the production of a significant body of paintings.

Painting Materials

Students will gain a basic understanding of the materials of painting.

Contemporary Painting and Painting History

Students will expand their knowledge of contemporary painting and the history of painting.

Top

Ceramics Fundamentals

Foundation ceramics.

ART 216

Hours	1.5 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Acceptance to a Department of Art degree program.
Note	Fee.
Taught	

Course Outcomes

Clay Properties, Challenges, and Glazing

Students will demonstrate a grasp of the fundamental properties of clay, explore glazing options, and encounter the challenges of the medium.

Visual Imagery and Ceramics

Students will find and explore visual imagery and gain a sense of historical and contemporary ceramics.

Craft and Creative Issues

Students will read and discuss a variety of related issues, including writings on contemporary arts and crafts and personal creative sources.

Sculpture Fundamentals

Foundation sculpture.

ART 217

Hours	1.5 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Acceptance to a Department of Art degree program.
Note	Fee.
Taught	

Course Outcomes

Aesthetic Understanding and Sensibility

Students will demonstrate a basic aesthetic understanding and sensibility in their work.

Sculptural Skills and Processes

Students will demonstrate basic skills in sculptural processes.

Contemporary Sculpture

Students will expand their knowledge of contemporary sculpture on a fundamental level.

Introduction to Drawing and Figure Drawing

Perceptive and inventive drawing and fundamental study of the figure using a variety of media and methods.

ART 220

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Acceptance to a Department of Art degree program.
Taught	

Course Outcomes

Figure Drawing Skills

Students will exhibit fundamental knowledge and skills in drawing the human figure.

Figure Drawing History

Students will become familiar with the work of artists both past and present who implement the use of the human figure in art making.

Drawing Materials and Tools

Students will exhibit fundamental skills in using a variety of art making tools.

Intuition in Drawing

Students will strengthen perceptive and inventive drawing skills.

Printmaking Fundamentals

Introduction to the basic materials, techniques, history, and aesthetics of intaglio, lithography, and other printmaking processes.

ART 225

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	Acceptance to a Department of Art degree program.
Taught	Fall, Winter

Course Outcomes

Printmaking Concepts, Theories, and History

Students will Demonstrate an understanding of the basic concepts, theories, and history of intaglio, relief and lithographic printmaking.

Printmaking Techniques and Process

Students will demonstrate an understanding of the basic techniques and processes of intaglio, relief and lithographic printmaking as introduced in class.

Application of Skills and Techniques

Students will appropriately apply basic printmaking skills and techniques as introduced in class to make intaglio, relief and lithographic prints.

Print Evaluation

Students will be able to evaluate prints based on professional criteria and standards introduced in class.

Aesthetic Awareness and Sensibilities

Students will demonstrate increased aesthetic awareness and sensibilities, particularly as they relate to printmaking, and successfully apply these in their art making.

Top

Theory, Methodology and Contemporary Practice

A broad theoretical and historical framework for the production and understanding of contemporary creative practices, including those that are interdisciplinary. Content integrated with and applied in other core and advanced studio courses.

ART 226

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Pre-studio, pre-art education or art minor status.
Recommended	Concurrent enrollment in at least one of the following: ART 114, 115, 133.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Installation

Developing an artistic voice while exploring various installation art practices.

ART 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ART 210
Taught	Fall, Winter

Course Outcomes

Background of New Genre

Students will develop an in-depth understanding of New Genre art practices and their origins, including a familiarity with prominent artists, key works, significant movements and relevant themes.

Develop a Body of Work

Students will produce a body of work demonstrating an active engagement with the themes and concepts explored in class, while also reflecting their personal voice.

Conceptual Articulation

Students will develop the ability to successfully discuss their ideas and artistic intentions in both academic and non-academic settings.

New Genre Fundamentals

Students will develop an in-depth understanding of New Genre art practices and their origins, including a familiarity with prominent artists, key works, significant movements and relevant themes.

Production

Students will produce a body of work demonstrating an active engagement with the themes and concepts explored in class, while also reflecting their personal voice.

Effective Writing and Communication

Students will develop the ability to successfully discuss their ideas and artistic intentions in both academic and non-academic settings.

Top

20th Century Art and Theory

Survey of modernism and postmodernism with their varied theories and methodologies as related to visual culture and art.

ART 320

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 201 & ARTHC 202 & ART 226; or ARTHC 201 & ARTHC 202 & VA 111
Taught	Fall, Winter

Course Outcomes

Comprehension

Demonstrate a comprehension of modernism and postmodernism with their wide-ranging theories as related to visual culture and art.

Spiritual and Ethical

Examine the spiritual and ethical implications of the varied artistic and cultural theories of the 20th Century.

Strategies and Methodologies

Evaluate significant strategies and methodologies for art production during the 20th Century

Drawing

Drawing as a graphic form of self-expression, emphasizing personal statement in response to various experiences and concepts.

ART 321

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	ART 220
Taught	

Course Outcomes

Drawing Past and Present

Students will become familiar with drawing work by artists both past and present.

Perceptive and Inventive Drawing

Students will exhibit fundamental knowledge and skill in perceptive and inventive drawing.

Research and Idea Development

Students will develop ideas and conceptual content of work through research and related art production.

Top

Figure Drawing

Drawing from the human figure, emphasizing structure and anatomy.

ART 322R

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	ART 220
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

Materials of Painting

Introduction to the techniques and history of producing painting materials, exploring traditional supports, grounds, mediums, and paint production. Most of the course will be spent making painting materials.

ART 324

Hours	1.5 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	ART 215; Acceptance into major.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

Art Preparation and Presentation

Introduction to the basic techniques, history, and aesthetics of art preparation and presentation, including the preparation of supports, frames, and other exhibition materials.

ART 325

Hours	1.5 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into major.
Taught	Fall, Winter

Course Outcomes

Painting Support Construction

Students will demonstrate the ability to construct basic panels, strainer bars, and stretcher bars.

Exhibition Preparation

Students will understand and produce basic frames and related exhibition materials.

Exhibition History, Preparation, and Installation

Students will show an increased awareness of and sensitivity to the process of curating and installing an exhibition.

Woodworking Shop

Students will demonstrate a basic understanding of woodworking and shop safety.

Top

Current Art Practice

Current issues in art.

ART 326

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	ART 226 & ART 320 & acceptance to the Art program; or VA 111 & ART 320 & acceptance to the ART program.
Taught	Fall, Winter

Course Outcomes

Awareness

Students will develop a greater awareness of significant contemporary art and exhibitions.

Contextualization

Students will contextualize their own art in relation to contemporary art and practice through research, readings, writing, and presentations.

Critical Thinking

Students will critically examine spiritual values and ethical issues relevant to contemporary art and their own artistic practice.

Painting

Fundamental concepts and techniques of oil painting.

ART 327

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	ART 215
Taught	

Course Outcomes

Production

Students will produce a significant body of paintings based in personal interests and areas of focus

Past and Present Art Context

Students will gain a contextual understanding of art both past and present as related to their own artistic production

Painting Methods and Materials

Students will develop an in-depth understanding of the methods and materials of painting

Top

Figure Painting

Fundamentals of figure painting.

ART 328R

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	ART 215 & ART 322R & ART 327
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Bookbinding

Traditional approaches to hand bookbinding.

ART 330

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Fee.
Taught	Fall, Winter

Course Outcomes

Non-Traditional Book Structures

Students will discuss and explore the construction of non-traditional book forms, using both traditional and non-traditional bookmaking materials.
Old: Through exposure to many examples of artists' books, students will discuss and identify new ideas of what constitutes a Book and how non-traditional and re-purposed materials may successfully be used to create a book structure.

Expression and Creativity

Students will incorporate self-expression and creativity in their bookbinding projects.

Bookbinding Skills & Techniques

Students will demonstrate proficiency in the use of basic bookbinding techniques, tools and equipment.

Historical Bookbinding Types

Students will be able to identify the historic roots and time periods of various book forms from both western and eastern history.

Top

Book Arts

Exploring the construction of non-traditional book forms, using both traditional and non-traditional bookmaking materials.

ART 332

Hours	1.5 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into major.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Painting-Mixed Media

Exploring multiple aqueous media and painting mediums and processes as they relate to problem solving, idea development, and art-making.

ART 333

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	ART 215
Taught	Fall, Winter

Course Outcomes

Exploration of the Medium

Students will explore a variety of painting mediums and methods.

Development and Execution of Ideas

Students will gain proficiency in developing ideas and executing their ideas through the appropriate application of painting and 2D mediums and processes.

Production

Students will produce a significant body of paintings based in personal interests and areas of focus.

Context in History

Students will gain a contextual understanding of art both past and present as related to their own artistic production.

Top

Application of Creative and Critical Thinking

The business of being an artist, exploring career options, alternative applications, interdisciplinary/trans-disciplinary opportunities, and requisite preparation for each option.

ART 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into major.
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Printmaking: Intaglio

Intaglio printmaking, based on traditional and contemporary techniques.

ART 350

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	ART 225
Note	Fee.
Taught	Fall

Course Outcomes

Personal Direction

Students will strengthen the level of personal direction in their work.

Advanced Printmaking Skills

Students will develop advanced intaglio printmaking skills.

Aesthetic Awareness and Sensibilities

Students will demonstrate an increased sensitivity to the aesthetics of intaglio printmaking and monotype.

Advanced Intaglio Theory and Process

Student will expand their knowledge and understanding of the theories, history, and processes of intaglio printmaking.

Top

Printmaking: Lithography

Lithography printmaking, based on traditional and contemporary techniques.

ART 351

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	ART 225
Note	Fee.
Taught	Winter

Course Outcomes

History, Theories and Processes of Lithographic printmaking

Students will expand their knowledge and understanding of the history, theories and processes of lithographic printmaking.

Advanced Lithography Skills

Students will develop advanced lithography skills.

Printmaking Aesthetics and Personal Direction

Students will demonstrate an increased sensitivity to the aesthetics of printmaking and develop a personal direction in their work.

Time-Based Art

Exploring sound-based, video and performance art practices.

ART 353

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	ART 210
Taught	Fall, Winter

Course Outcomes

Digital Art History and Practices

Students will develop a working knowledge of digital art practices, including an understanding of the theoretical implications of art in a digital age.

General Practices

Students will develop a working knowledge of digital art practices, including an understanding of the theoretical implications of art in a digital age.

Production

Students will produce a body of work demonstrating a comprehension and engagement with the themes and concepts explored in class.

Development of Digital Art Practices

Students will develop the skills and resources necessary to realize a wide variety of digitally-based projects.

Project

Students will produce a body of work demonstrating a comprehension and engagement with the themes and concepts explored in class.

Skills

Students will develop the skills and resources necessary to realize a wide variety of digitally-based projects.

Top

Spatial Relationships in Sculpture

Investigation of spatial relatiionships in installation art, earth works, sculptural performance, and new genres.

ART 354

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	ART 133 & ART 217
Recommended	Art 356.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Interdisciplinary Projects

Research-driven, interdisciplinary art projects covering relational aesthetics, social practice, and spatial thinking. Course designed to encourage innovation, interaction, and collaboration, expanding students' engagement with art and taking it beyond the private studio.

ART 355

Hours	3.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	ART 210
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Figure Sculpture

Modeling the human figure in clay.

ART 356R

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	ART 217
Note	Fee.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Sculpture

Traditional and nontraditional approaches to sculpture.

ART 358

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	ART 217
Note	Fee.
Taught	

Course Outcomes

Historic and Contemporary Sculpture

Students will examine the place of sculpture both historically and in our contemporary culture and locate themselves within this larger context.

Fundamental Sculptural Skills

Students will expound upon their fundamental knowledge and skills and will develop towards proficiency in sculpture, 3D media, and new genres.

Spirituality and Ethics

Students will critically examine spiritual values and ethical issues relevant to 3 dimensional art and their own work.

Museum and Gallery Practices

Students will gain an awareness of museum and gallery practices and of professional opportunities within sculpture and 3D art.

Top

Ceramics

Designing, throwing, hand forming, decorating, glazing, and firing techniques.

ART 359R

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	ART 216
Note	Fee.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Special Problems in Art

ART 394R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

Studio Seminar

Selected contemporary issues involving visiting artists, guest lecturers, video documentaries, discussions, and program information.

ART 395R

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	ART 226; or VA 111
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Advanced Studio

Individual development of art issues in advanced studio environment. Writing a proposal accompanied by a readings list.

ART 480R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	At least two 300-level art studio courses, one of which is in the area of the proposed project.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

BA Exit Portfolio

Preparation and submission of all required materials for BA exit portfolio. Perparation for continued art practice after graduation.

ART 490

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Art major status.
Taught	Fall, Winter

Course Outcomes

Selection and Organization

Students will collect artifacts from their course work and campus experience and create a digital portfolio

Assessment

Students will develop an ability to assess their portfolio both in form of over-all presentation and in content and meaning.

Top

Academic Internship: Professional Internship

ART 496R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Art major status.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

BFA Final Project and Exit Portfolio

Final exhibition and project report; completed travel requirement account; submit all required materials for BFA exit portfolio.

ART 497

Hours	1.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Studio BFA major status.
Taught	

Course Outcomes

Materials Preparation

Students will prepare all required materials for final exhibition, including written documents, artwork, and any framing, hanging, and/or installation materials needed for final exhibition.

Final Exhibition

Students will complete and install exhibition of final project.

Exit Interview

Students will complete exit interview with advisory committee.

Exit Portfolio

Students will prepare and submit all required materials for exit portfolio.

Top

Introduction to Art Education and Exploration of Teaching

Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

ARTED 276

Hours	1.0 - 5.0 Credit, 4.0 Lecture, 3.0 Lab
Prerequisites	ART 114 & ART 115; or TMA 112 & TMA 114 & TMA 185; or VA 114 & VA 115; FBI fingerprinting and background clearance. Pre-art education major/minor status.
Note	This course requires 45 hours of class observation and teaching in K-12 classrooms. These visits generally take place on Fridays.
Taught	Fall, Winter

Course Outcomes

Professional Organization Participation

Join the National Art Education Association as a student member. Participate as an active and contributing member of the BYU NAEA Student Chapter. Participate in local and regional organizations and structures, such as SWAP, Evening for Educators, Utah Art Education Association, museum and community art education events and activities.

Observe & Analyze Diverse Teaching Sites

Participate in a visit to a charter school, a school for children with physical and mental challenges, and an alternative school. Participate in visits to schools (elementary specialist, middle level, high school, and 2 schools of the student's choice), prepare observations in each setting, teach an art lesson at assigned settings, conduct peer evaluations, and complete journal entries with reflective entries.

Construct Relevant Curricular Materials

Create an instructional resource file. Create a presentation on an art education method and create a guide sheet. Create school newsletter, bulletin board display and an instructional resource aid. Generate lesson plans in relation to observations, school cultures, district and state mandates, and contemporary educational theory.

Analyze Teaching and Learning in Context

Evaluate a variety of learning styles and how those relate to your own curricular understandings and the observations obtained in school sites. Video record one lesson to view and analyze and review with peers. Conduct an interview with a child regarding their perceptions of art and create a summary analysis of the data collected. Analyze case study incidences regarding the moral dimensions of teaching.

Secondary Education Admission

Complete admission requirements to be admitted into the secondary education program.

Top

Art for Elementary Teachers

Preservice preparation designed to help elementary classroom teachers understand the visual arts and develop skills necessary for implementing a discipline-based approach for art education.

ARTED 326

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Artistic Literacy: Making Artworks

Grounded in an understanding of its underlying principles of the visual arts, students will become direct participants and makers of art. Students will gain artistic confidence grounded in their own experiences working in artistic media.

Artistic Literacy: Viewing Artworks

Through their study, description, interpretation, and aesthetic evaluations of artwork, students will develop skills in critical analysis, aesthetic judgment, and an appreciation of the importance of historical and cultural context in studying art.

Artistic Literacy: The Spiritual Dimensions of Art

Students will explore the complexity of human perception and expression in the visual arts and experience the redemptive power and profound humanizing growth that accompanies engagement with art. They will have significant aesthetic experiences that will change they way they see the world and transform their teaching.

Art and Teaching: Curriculum

Art Curricula: Students will design elementary arts integrated curricula that is sensitive to diverse cultures and special needs children that are developmentally appropriate for the elementary age child. They will gain an understanding of the artistic potential of children and will gain insights into effective teaching methods that utilize a variety of different artistic methods and media.

Art and Teaching: Advocacy

Students will articulate why art education is important through clear and concise writing. They will recognize the need to teach art to children and realize they do not need to be master artists to provide students with the opportunities and direction they need to create art.

Art and Teaching: Visual Arts Resources

Students will use available arts resources, including art museums as a part of their curriculum and

teaching. They will be inspired to deepen their artistic knowledge and skills and continue to study art throughout their lives.

Top

Computer Application in Art Education

Basic program applications for developing instructional materials in art education.

ARTED 339

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	ARTED 276
Taught	Fall, Winter, Spring

Course Outcomes

Curriculum Planning with New and Social Media

Construct curricular plans to use new and social media in pedagogical sites (classrooms, online learning, communities beyond the schoolroom, etc).

New Media and Technology

Investigate artists and educators who utilize new media and technology in their practices.

New and Social Media Use

Utilize new and social media in your own artistic creation.

Course Design

Design professional and elegant course materials and learning opportunities after reviewing a variety of open source and commercial software options.

Top

Classroom Management and Community Arts Practicum

Classroom management and teaching within a variety of contexts, including community arts, museums, after school programs, and summer art workshops. The course includes 15 K-12 practicum hours.

ARTED 378

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTED 276
Taught	Fall, Winter, Summer

Course Outcomes

Teacher Observations

Experience observing and teaching in elementary and secondary school settings prior to the student teaching semester.

Student Teacher Preparation

Participate in BYU McKay School of Ed Secondary Education transition and student teacher preparation by using INTASC standards, PIBS self-assessment and LiveTEXT enrollment.

National, State, and Local Requirements

Consider the National Standards in Art Education and state and local core requirements in art as foundations for research content, instructional design, production and presentation.

Classroom Management

Investigate and implement a variety of classroom management practices particular to art education classes in schools (art supply management, art classroom safety and legal considerations will be included.)

Curriculum Planning

Create curricula and documents such as the two lesson plans for teaching in schools, Classroom Management Handbook and the TWS contextual factors, Professional Portfolio with Vitae and Rationale for teaching art to use for implementation in student teaching and lifelong education service.

Diversity in Learning Environments

Respect diversity in the schools and value the establishment of learning environments where future artstudents can actively learn and create to their fullest potential.

Top

Museum Art Education

The museum as a learning environment; current exhibitions; learning and teaching strategies for collaboration with museum and classroom educator.

ARTED 380

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Art HC 111 or 201; Art HC 202 or Hum 201 or 202.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Issues in Contemporary Art, Aesthetics, and Criticism

Overview of issues in contemporary art, aesthetics, and art criticism.

ARTED 397

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Spirituality

Critically reflect on the student's own creative works in relation to various researched audiences, publics and discourses, balancing the interrelationships among the individual, others, and Deity. They will gain insight into how to judge artwork in the context of gospel principles and develop inner richness, a sanctuary of the mind, and spiritual insight.

Literacy

Investigate a variety of practices and methodologies used by contemporary artists, pedagogues, and critics to discover multiple meanings, and to evaluate, critically appreciate, and respond to works of contemporary art.

Lively Engagement

The student will apply contemporary practices and conversations to the student's own artistic investigations, engagements, and works in a sophisticated and professional manner, in relation to various discourses and feedback (from the teacher, literature, classmates' interpretations, etc).

Personal Appreciation and Aesthetics

Students will broaden their personal aesthetic perspectives and develop a deep appreciation of the myriad aspects of contemporary art.

Contemporary Art Critique and Writing

Students will learn about the works of many contemporary artists, write critical responses to a number of artworks, share responses with fellow students, and discuss and defend their written work. They will develop critical thinking and writing skills, including description, analysis, interpretation, and explication of form, meaning, and value with respect to works of art.

Top

Advanced Studio Teaching Methods for Art Educators

Exploring contemporary art and how to connect artistic practice to pedagogical methods for K-12 classrooms. Includes both art making and curriculum design.

ARTED 450

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	ARTED 276
Taught	Fall

Course Outcomes

Spiritual Dimensions of Art and Education

Students will gain insight into the spiritual dimension of the artist and teacher.

Curriculum Design, Standards, and Current Practices in Art Education

Students will become familiar with current issues in art education including educational standards and make decisions about how their own curriculum and teaching will work within the constraints of standards, current practices and social issues. Students will apply their study and experiences in the course to constructing art curricula that reflect current theory and practice in the field and the requirements of the *Teaching Work Sample*.

Curricula and Artistry in the context of Contemporary Art

Students will become familiar with a few influential contemporary artists and determine how these artists might inform their own artistry and teaching practice.

Studio Practice and Art Education

Each student will gain greater confidence in their own artistic voice and how their personal artistry can inform their teaching and stimulate the learning of their students. They will gain experience in mediums they are not familiar with that might be required in schools or that might inform their own teaching practice.

Educator Preparation Program Outcomes

Students will fulfill licensure requirements for secondary methods of art education. This course is part of your preparation for licensure in a major or minor that is part of the BYU Educator Preparation Program (EPP). This course will help you fulfill the EPP Outcomes required for accreditation. Advisors in Education Student Services (350 MCKB/801-422-3426) can answer questions you have about the licensure requirements for your teaching major or minor.

Teaching in a Variety of Contexts

Students will demonstrate sound teaching practices in various contexts.

Top

Art Secondary and Elementary Student Teaching

Capstone, field-based, semester-long experience in teaching elementary and secondary students; demonstrating proficiency in all program standards. Seminar required.

ARTED 476R

Hours	1.0 - 12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Prior application; requires a major GPA of 3.00, at least a C grade in all major and minor courses; FBI fingerprint background clearance.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Art Curriculum Theory and Methods

Curriculum theory, development, and assessment in art education.

ARTED 478

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTED 276; a minimum C grade in ARTED 377 and 397.
Taught	Fall, Winter

Course Outcomes

Curriculum Theory and Practice

Investigate and respond to historic and contemporary definitions, theories, and practices of curriculum through reading, reflection, discussion, and development.

Social Justice and Ecological Beliefs

Scrutinize personal beliefs and practices regarding social justice and ecological concerns in art education in relation to one's mentors and peers.

Curriculum and Personal Beliefs and Practices

Analyze how these personal beliefs and practices relate to conceptualizations in contemporary curriculum discourse.

Curriculum Planning

Construct curricular materials and resources that reflect contemporary practice among artists, researchers, teacher, and learners.

Self-Evaluation

Self-evaluate behavior, in relation to art education faculty observations, using the Professional Disposition Instrument (PDI) and Professional and Interpersonal Behavior Rating Scale (PIBS).

Educator Preparation Program Outcomes

This course is part of your preparation for licensure in a major or minor that is part of the BYU Educator Preparation Program (EPP). This course will help you fulfill the EPP Outcomes required for accreditation. Advisors in Education Student Services (350 MCKB/801-422-3426) can answer questions you have about the licensure requirements for your teaching major or minor. This includes becoming familiar with the UETS and TWS so as to be able to pass with at least a basic

competency level in each criteria.

Top

Academic Internship: Secondary Education

Capstone, field-based, year-long experience in teaching elementary or secondary students; demonstrating proficiency in all program standards. Seminar required.

ARTED 496R

Hours	12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Prior application; requires a major GPA of 3.00, at least a C grade in all major and minor courses; FBI fingerprint background clearance.

Honors Introduction to Art History

Topical approach to art history and appreciation.

ARTHC 111

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Discuss Style, Cultural Context, and Meaning

Students will be able to discuss--verbally and in writing--the style, cultural context, and meaning of key works of art.

Familiarity with Periods and Cultures of Western Art

Students will become familiar with the periods and cultures of Western art from Prehistory through the present day.

Connoisseurship

Students will develop connoisseurship, the ability to identify the stylistic influences of a work of art or architecture.

Introduction to Art History

Topical approach to art history and appreciation.

ARTHC 111

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Honors also.

Course Outcomes

Discuss Style, Cultural Context, and Meaning

Students will be able to discuss--verbally and in writing--the style, cultural context, and meaning of key works of art.

Familiarity with Periods and Cultures of Western Art

Students will become familiar with the periods and cultures of Western art from Prehistory through the present day.

Connoisseurship

Students will develop connoisseurship, the ability to identify the stylistic influences of a work of art or architecture.

Top

World Civilization to 1500

Survey of Western civilization emphasizing the visual arts from ancient Greece to the Gothic period.

ARTHC 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Art Discussion

Students will be able to discuss--verbally and in writing--the style, cultural context, and meaning of key works of art.

Western Art: Prehistory to Medieval

Students will become familiar with the periods and cultures of Western art from Prehistory through Medieval Europe.

Stylistic Influences in Art and Architecture

Students will develop connoisseurship, the ability to identify the stylstic influences of a work of art or architecture.

World Civilization Since 1500

Survey of Western civilization emphasizing the visual arts from the Renaissance to the twentieth century.

ARTHC 202

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Western Art: Renaissance to Present

Students will survey the terrain of western (primarily European) culture from the beginnings of the Renaissance to the present. A particular emphasis will be placed upon the visual arts as objects that are influenced by cultural values and conventions, and as forces which generate or determine future cultural practice.

Cultural Traditions in the Modern World

Students will become familiar with a broad array of the literary, philosophical, religious and aesthetic traditions that have informed the modern world.

Intellectual Periods and Movements

Students will aquire a big-picture knowledge of intellectual periods and movements that will inform their future encounters with literature, art, architecture and all other manifestations of creative expression.

Top

Survey of Oriental Art and Architecture

Art and architecture of China, Korea, Japan, Southeast Asia, and India, considering social, religious, and environmental context of various cultures.

ARTHC 203

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	

Course Outcomes

Application

Students will gain a deep understanding of oriental art and architechture.

Top

Survey of Western Art 1

Art and architecture of the Western world from primitive through medieval.

ARTHC 211

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Independent Study only.

Course Outcomes

Knowledge

Students will survey topics in Western Art.

Top

Survey of Western Art 2

Art and architecture of the Western world from Renaissance to contemporary.

ARTHC 212

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Independent Study only.

Course Outcomes

Knowledge

Students will survey topics in Western Art.

Top

Theory, Methodology, and Historiography of Art History

Historical foundations of the discipline; key theories and approaches informing current art historical practice.

ARTHC 300

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 201 & ARTHC 202
Taught	

Course Outcomes

Western Art Historiography

Students will become familiar with the historiography of western art history.

Art Theory

Students will become acquainted with the major theoretical approaches used in art history.

Critical Thinking

Students will acquire an enhanced ability to think critically about the arts.

Effective Communication

Students will become capable of refined oral expression and presentational abilities.

Writing About the Arts

Students will master several art historical modes of writing, including abstracts, practicums, and annotated bibliographies.

Art History in Contemporary Society

Students will gain an appreciation for the meaningfulness and relevancy of the discipline of art history in contemporary society.

Top

Women in Art

History of women artists, critics, and patrons, along with women in representation in Western art. Consideration of theories and methodologies of feminist art history.

ARTHC 301

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 201 & ARTHC 202
Taught	

Course Outcomes

Women as Artists, Critics, Patrons, and Viewers

Students will acquire a foundation in women's artistic production and consumption in the modern era

Feminist Art History

Students will become familiar with key scholars in the field of feminist art history and will obtain a firm grasp of the central issues and debates related to this field

Critical Reading and Writing

Students ability to read, teach, and write critically about the arts as they relate to women wil be enhanced.

Contemporary Visual Culture

Student will recognize the relevancy of gender issues as they relate to contemporary visual culture.

Top

Greek Art

History and appreciation of Greek art, with consideration of formative cultures.

ARTHC 304

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 201
Taught	Fall

Course Outcomes

Greek History of Art and Architecture

Students will gain a general understanding of the history of Greek art and architecture from its beginnings in the third millennium B.C. through the first century BC. The class will cover the evolution of ideas about art and architecture, the use of art as an expression of religious, political and social ideas, the advances in technology that made new forms possible, and key monuments. Students will demonstrate their understanding of these ideas through class discussion, examinations, and research papers.

Observation, Appreciation and Analysis

Students will develop abilities to observe, appreciate, and analyze aspects of art and architecture as cultural artifacts, including style, function, structure, historical influences, symbolism, and unity of expression.

Art Historical Research and Writing

Students will gain experience and skill in art historical research and writing.

Term Paper

Students will gain experience and skill in art historical research and writing.

Roman Art

Art and architecture of the Etruscans and Romans.

ARTHC 306

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 201
Taught	Winter

Course Outcomes

General Understanding of History

Students will gain a general understanding of the history of Roman art and architecture from its beginnings in the early part of the first millennium BC through the collapse of the Roman Empire in AD 476. The class will cover the evolution of ideas about art and architecture, the use of art as an expression of religious, political and social ideas, the advances in technology that made new forms possible, and key monuments. Students will demonstrate their understanding of these ideas through class discussion, examinations, and research papers.

Observation, Appreciation, and Analysis

Students will develop abilities to observe, appreciate, and analyze aspects of art and architecture as cultural artifacts, including style, function, structure, historical influences, symbolism, and unity of expression.

Art Historical Research and Writing

Students will gain experience and skill in art historical research and writing.

Term Paper

Students will acquire deeper knowledge of specific topics in Roman art and architecture through research and writing a term paper.

Top

Early Christian and Byzantine Art

Survey of Christian art in the Roman and Byzantine Empire from ca. 200 to 1453.

ARTHC 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 201
Taught	Fall

Course Outcomes

Understanding of History

Students will gain a general understanding of the history of Early Christian and Byzantine art and architecture from its beginnings in the third century through the collapse of the Byzantine Empire in 1453. The class will cover the evolution of ideas about art and architecture, the use of art as an expression of religious, political and social ideas, the advances in technology that made new forms possible, and key monuments. Students will demonstrate their understanding of these ideas through class discussion, examinations, and research papers.

Art and Architecture

Students will develop abilities to observe, appreciate, and analyze aspects of art and architecture as cultural artifacts, including style, function, structure, historical influences, symbolism, and unity of expression.

Historical Research and Writing

Students will gain experience and skill in art historical research and writing.

Term Paper

Students will acquire deeper knowledge of specific topics in Early Christian and Byzantine art and architecture through research and writing a term paper.

Art of the Medieval West

Art in western Europe from 400 AD to 1400.

ARTHC 316

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 201
Taught	Winter

Course Outcomes

Western European History: 5th to 16th Century

Students will gain a general understanding of the history of medieval western Europe from the fifth century through the sixteenth century. The class will cover the evolution of ideas about art and architecture, the use of art as an expression of religious, political and social ideas, the advances in technology that made new forms possible, and key monuments. Students will demonstrate their understanding of these ideas through class discussion, examinations, and research papers.

Art Appreciation and Analysis

Students will develop abilities to observe, appreciate, and analyze aspects of art and architecture as cultural artifacts, including style, function, structure, historical influences, symbolism, and unity of expression.

Art Historical Research and Writing

Students will gain experience and skill in art historical research and writing.

Research and Writing

Students will acquire deeper knowledge of specific topics in the art of the medieval West art and architecture through research and writing a term paper.

Italian Renaissance

Art and architecture in Italy from 1200 to 1580.

ARTHC 320

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 202
Taught	Fall

Course Outcomes

Research and Writing

Students will develop art historical research skills by conducting advanced research focused on a single work of art produced in Italy during the Renaissance period. Students will apply methodological approaches acquired in ARTHC 300 to their topic. Students will situate their informed, original ideas within the best art historical publications on their subject. Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported by the HBLL Art History research guides. Students will apply the formatting of an acceptable style guide with exactness to the completed research paper.

Italian History: 1400 to 1600

Students will acquire a solid foundation in the historical context of the art of Italy from ca. 1400 to ca. 1600. Students will be able to articulate the characteristics of the styles, processes, ideologies, and philosophies of key artists working in Italy during the Renaissance era. Students will become conversant with select works of art in terms of style, patronage, reception, and meaning. They will also be able to evaluate the effects of cultural, political, economic, religious, and social factors on Italian Renaissance art.

Northern Renaissance Art

Fifteenth- and sixteenth-century art in northern Europe.

ARTHC 325

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 202
Taught	Fall

Course Outcomes

Northern European History: 1400 to 1600

Students will acquire a solid foundation in the historical context of the art of northern Europe from ca. 1400 to ca. 1600. Students will be able to articulate the characteristics of the styles, processes, ideologies, and philosophies of key artists working in France, the Netherlands, and Germany during the Renaissance era. Students will become conversant with select works of art in terms of style, patronage, reception, and meaning. They will also be able to evaluate the effects of cultural, political, economic, religious, and social factors on northern Renaissance art.

Art Research and Writing Skills

Students will develop art historical research skills by conducting advanced research focused on a single work of art produced in the north of Europe during the Renaissance period. Students will apply methodological approaches acquired in ARTHC 300 to their topic. Students will situate their informed, original ideas within the best art historical publications on their subject. Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported by the HBLL Art History research guides. Students will apply the formatting of an acceptable style guide with exactness to the completed research paper.

Top

Renaissance and Baroque Architecture

History of architecture in Italy, Spain, France, Germany, Austria, and England, 1400?1700.

ARTHC 329

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 202
Taught	

Course Outcomes

Scope

Students will acquire a basic understanding of the development of Renaissance and Baroque architecture in Western Europe.

Original Research

Students will acquire a more detailed knowledge of a particular monument and/or architect and/or architectural theory of the period, through the research and writing of a term paper.

Architects

Students will become familiar with the contributions of individual architects of the period.

Research Skills

Students will improve research, writing and analytical skills in architectural history.

Southern Baroque Art

History of baroque painting, sculpture, and architecture in Italy, Spain, and France.

ARTHC 330

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 202
Taught	Winter

Course Outcomes

Southern European History: 1600 to 1700

Students will acquire a solid foundation in the historical context of the art of southern Europe from ca. 1600 to ca. 1700. Students will be able to articulate the characteristics of the styles, processes, ideologies, and philosophies of key artists working in Italy, Spain, and France during the Baroque era. Students will become conversant with select works of art in terms of style, patronage, reception, and meaning. They will also be able to evaluate the effects of cultural, political, economic, religious, and social factors on southern Baroque art.

Art Research and Writing

Students will develop art historical research skills by conducting advanced research focused on a single work of art produced in the south of Europe during the Baroque period. Students will apply methodological approaches acquired in ARTHC 300 to their topic. Students will situate their informed, original ideas within the best art historical publications on their subject. Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported by the HBLL Art History research guides. Students will apply the formatting of an acceptable style guide with exactness to the completed research paper.

Northern Baroque Art

Baroque painting in Flanders and Holland.

ARTHC 335

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 202
Taught	Winter

Course Outcomes

Northern European History: 1600 to 1700

Students will acquire a solid foundation in the historical context of the art of northern Europe from ca. 1600 to ca. 1700. Students will be able to articulate the characteristics of the styles, processes, ideologies, and philosophies of key artists working in Flanders and the Dutch Republic during the Baroque era. Students will become conversant with select works of art in terms of style, patronage, reception, and meaning. They will also be able to evaluate the effects of cultural, political, economic, religious, and social factors on northern Baroque art.

Art Research and Writing

Students will develop art historical research skills by conducting advanced research focused on a single work of art produced in the north of Europe during the Baroque period. Students will apply methodological approaches acquired in ARTHC 300 to their topic. Students will situate their informed, original ideas within the best art historical publications on their subject. Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported by the HBLL Art History research guides. Students will apply the formatting of an acceptable style guide with exactness to the completed research paper.

Top

Eighteenth-Century European Art and Architecture

An advanced survey of the culture and context of the production of art, architecture, and garden design in the European 18th century.

ARTHC 337

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 202
Taught	

Course Outcomes

Movements

Students will be able to articulate the characteristics of the styles, processes, and ideologies and philosophies of key artists and movements, including Late Baroque, Neo-Palladianism, Rococo, Enlightenment and moralizing themes, and the naturalism that predicts the beginnings of Romanticism and Neoclassicism.

Contribution

Students will situate their informed, original ideas within the best art historical publications on their subject.

Precedent and Influence

Students will become conversant with selected works of art in terms of style, patronage, reception, and meaning of individual works of art and the artists or movements that spawned them. They will be able to trace the trajectory of future influence of key works of art from this period.

Research

Students will develop art historical research skills by conducting advanced research focused on a single work of art within eighteenth-century Europe including Britain, France, the Empire, the Low Countries, Spain, Italy, Scandinavia and Russia.

Scope: 1700-1789

1. Students will acquire a solid foundation in the historical context of the art and architecture of Europe from ca. 1700-1789.

Theory

Students will apply methodological approaches acquired in ArtHC 300 to their topic.

Research

Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported the HBLL Art History research guides. Students will apply the formatting of an acceptable style guide with exactness to the completed research paper.

Top

Nineteenth-Century European Art

Nineteenth-century art in Europe.

ARTHC 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 202
Taught	

Course Outcomes

European History: 1780 to 1900

Students will acquire a solid foundation in the historical context of the art of Europe from c.1780 until 1900. Students will be able to articulate the characteristics of the styles, processes, and ideologies and philiosophies of key artists and movements, including Neoclassicism, Romanticism, Realism, Impressionism and Post-Impressionism, Symbolism, and other modernist movements in France, Italy, Britain, Switzerland, Austria, and Germany. Students will become conversant with selected works of art in terms of style, patronage, reception, and meaning of individual works of art and the artists or movements that spawned them. They will be able to trace the trajectory of future influence of key works of art from this period.

Art Research and Writing

Students will develop art historical research skills by conducting advanced research focused on a single work of art within long nineteenth century. Students will apply methodological approaches acquired in ARTHC 300 to their topic. Students will situate their informed, original ideas within the best art historical publications on their subject. Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported the HBLL Art History research guides. Students will apply the formatting of an acceptable style guide with exactness to the completed research paper.

American Art

American painting and sculpture from colonial through modern times.

ARTHC 345

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 202
Taught	Fall

Course Outcomes

Art Research and Writing

Students will develop art historical research skills by conducting advanced research focused on a single work of art, artist, or historical concept within this period. Students will apply methodological approaches acquired in ArtHC 300 to their topic. Students will situate their informed, original ideas within the best art historical publications on their subject. Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported the HBLL Art History research guides. Students will apply the formatting of an acceptable style guide with exactness to the completed research paper.

American Art History: Prehistoric to 1876

Students will acquire a solid foundation in the historical context of the art and architecture of the United States of America from the prehistoric cultures on the North American Continent (Mississippian, Anasazi . . .) to 1876. Through a socio-historical approach, students will gain an understanding of the ways in which events like the arrival of Columbus, the American Revolution, the expansion of the West, and the Civil War, shaped and were shaped by the visual arts of the new nation. Students will also be able to articulate the characteristics of the styles, processes, ideologies, and philosophies of key artists and movements, including Rococo, Neo-Classicism, and Romanticism as they pertain to American art. Students will become conversant with selected works of art in terms of style, patronage, reception, and meaning of individual works of art and the artists or movements that spawned them. They will be able to trace the trajectory of future influence of key works of art from this period.

Term Paper

Students will gain experience and skill in art historical research and writing.

Top

Modern Art

Modern European art and theory, 1900--1945.

ARTHC 350

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 202
Taught	Fall, Winter

Course Outcomes

European Art and Architecture: 1900 to 1945

Students will acquire a solid foundation in the historical context of the art and architecture of Western and Eastern Europe from ca. 1900 until the end of World War II. Students will be able to articulate the characteristics of the styles, processes, and ideologies and philiosophies of key artists and movements, including Fauvism, German Expressionism, Cubism and other modernist movements in France, Italy, Britain, Russia, the Netherlands, Germany, Switzerland, and East Europe. Students will become conversant with selected works of art in terms of style, patronage, reception, and meaning of individual works of art and the artists or movements that spawned them. They will be able to trace the trajectory of future influence of key works of art from this period.

Art Research and Writing

Students will develop art historical research skills by conducting advanced research focused on a single work of art within the Modern period. Students will apply methodological approaches acquired in ArtHC 300 to their topic. Students will situate their informed, original ideas within the best art historical publications on their subject. Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported the HBLL Art History research guides. Students will apply the formatting of an acceptable style guide with exactness to the completed research paper.

Term Paper

Students will gain experience and skill in art historical research and writing.

Survey of American painting and sculpture from 1876-1950.

ARTHC 353

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 202
Taught	Winter

Course Outcomes

American Art and Architecture: 1876 to 1960

Students will acquire a solid foundation in the historical context of the art and architecture of the United States of America from 1876 to ca. 1960. Through a socio-historical approach students will gain an understanding of the ways in which events like the growth of American industry and culture, the rise of Socialism and Communism, WWI and American Isolationism, Regionalism, and WWII shaped and were shaped by the visual arts. Students will also be able to articulate the characteristics of the styles, processes, ideologies, and philosophies of key artists and movements, including Realism, Aestheticism, Pictorialism, Dada, Regionalism (including the Harlem Renaissance), Abstract Expressionism, and Pop Art as they pertain to American art. Students will become conversant with selected works of art in terms of style, patronage, reception, and meaning of individual works of art and the artists or movements that spawned them. They will be able to trace the trajectory of future influence of key works of art from this period.

Original Research

Students will acquire a more detailed knowledge of a particular monument and/or architect and/or architectural theory of the period, through the research and writing of a term paper.

Art Research and Writing

Students will develop art historical research skills by conducting advanced research focused on a single work of art, artist, or historical concept within this period. Students will apply methodological approaches acquired in ArtHC 300 to their topic. Students will situate their informed, original ideas within the best art historical publications on their subject. Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported the HBLL Art History research guides. Students will apply the formatting of an acceptable style guide with exactness to the completed research paper.

Architects

Students will become familiar with the contributions of individual architects of the period.

Colonial to Civil War

Students will acquire a basic understanding of the development of American architecture from the

seventeenth century to the mid-nineteenth century.

Analysis

Students will improve research, writing and analytical skills in architectural history.

Contemporary Art

Critical evaluation of trends in art since 1945.

ARTHC 355

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 202
Taught	Fall, Winter

Course Outcomes

Art History: 1945 to Present

Students will acquire a solid foundation in the historical context of the art world from 1945 to the present. Students will be able to articulate the characteristics of the styles, processes, and ideologies and philiosophies of key artists and movements, in Europe and America with particular emphasis on the New York School.

Art Criticism

Students will become conversant with the criticism of Clement Greenberg, the response of the Minimalists, Pop artists and others, and the role of criticism up to the twenty-first century.

Research Paper

Students will demonstrate sophisticated research skills in an original paper addressing an artist who has come to prominence in the last twenty years.

Top

Introduction to Museum and Curatorial Studies

Duties of museum professionals while applying museum theory to the practical development of a museum exhibit.

ARTHC 360

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 201 & ARTHC 202
Taught	Fall

Course Outcomes

Museum Professions

Students will engage with museum staff from various areas within the art museum including: curatorial, registration, education, design, fabrication, marketing, security and management.

Exhibition Planning

Students will work as teams to create an exhibition proposal, object list, gallery design, and educational materials.

American Architecture

Major figures, monuments, and movements in American architecture from colonial period through "Gilded Age."

ARTHC 365

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 202
Taught	

Course Outcomes

Colonial to Civil War

Students will acquire a basic understanding of the development of American architecture from the seventeenth century to the mid-nineteenth century.

Analysis

Students will improve research, writing and analytical skills in architectural history.

Original Research

Students will acquire a more detailed knowledge of a particular monument and/or architect and/or architectural theory of the period, through the research and writing of a term paper.

Architects

Students will become familiar with the contributions of individual architects of the period.

Modern Architecture

Critical review of roots and evolution of modern architecture.

ARTHC 367

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 202
Taught	

Course Outcomes

World Architecture: 1851 to Present

Students will acquire a solid foundation in the historical context of world architecture from 1851 to the present. Students will be able to articulate the characteristics of the styles, processes, ideologies, and philosophies of key architects and movements.

Research and Writing

Students will develop art historical research skills by conducting advanced research focused on a specific building or complex. Students will apply methodological approaches acquired in ARTHC 300 to their topic. Students will situate their informed, original ideas within the best architectural history publications on their subject. Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported by the HBLL Art History research guides. Students will apply the formatting of an acceptable style guide with exactness to the completed research paper.

Japanese Art and Architecture

Japanese art and architecture from its neolithic origins through the dawn of the modern age. Literary, social, and religious contexts considered.

ARTHC 375

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 201 & ARTHC 202
Taught	

Course Outcomes

Scope

Students will acquire a basic understanding of the development of Japanese architecture from 1100 AD to the present.

Art and Architecture

Students will become familiar with the contributions of individual Japanese artists and architects.

Analysis

Students will improve research, writing and analytical skills of Japanese art and architecture.

Research project

Students will acquire a more detailed knowledge of a particular work of Japanese art, monument and/or architect and/or architectural theory through the research and writing of a term paper.

Top

History of Photography

The general history of the photographic medium from its inception to the present day. The evolution of the medium, its various uses, primary figures, basic technologies, and artistic trends.

ARTHC 379

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 202
Taught	

Course Outcomes

Scope

Students will acquire a solid foundation in the historical context of the history of photography from the nineteenth-century to the present.

Style

Students will be able to articulate the characteristics of the period styles, processes, techniques, cultural uses and the philiosophies of key photographers in Europe and the Western Hemisphere. Students will become conversant with important photographs and collections in terms of style, patronage, reception, and meaning.

Research Skills

Students will develop art historical research skills by conducting advanced research on a single photographer or photograph.

Theory

Students will apply methodological approaches acquired in ArtHC 300 and other methods to their topic.

State of the Research

Students will situate their informed, original ideas within the best publications and reviews of period photography.

Sources

Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported the HBLL Art History and Photography research guides. Students will be required to correctly use style guides.

Northern Mesoamerican Art

Survey of art and architecture of Mexico from antiquity to present.

ARTHC 380

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 201 & ARTHC 202
Taught	

Course Outcomes

Scope

Students will acquire a foundation in Northern Mesoamerican art, culture, production and consumption.

Scholarship

Student will become familiar with the key scholars in the field.

Top

Southern Mesoamerican Art

Survey of art and architecture of southern Mexico and central America from antiquity to present.

ARTHC 382

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 201 & ARTHC 202
Taught	

Course Outcomes

Research and Writing

Students will develop art historical research skills by conducting advanced research focused on a single work of art produced in southern Mexico and Central America. Students will apply methodological approaches acquired in ARTHC 300 to their topic. Students will situate their informed, original ideas within the best art historical publications on their subject. Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported by the HBLL Art History research guides. Special Topics and Readings in Art History

Topics of specific student interest, centered on strengths of visiting faculty, BYU Study Abroad Program, or other significant art history projects.

ARTHC 490R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Art in Cultural Context

an enhanced understanding of the cultural contexts which affected the creation and reception of this art.

Islamic Visual Culture

This course provides an introduction to Islamic Visual Culture from its beginnings in the 7thcentury to the early modern period. More importantly it will attempt explain Islamic Visual Culture as the product of the social and cultural context of Islamic society and philosophy.
Students will gain an overview of the development and diaspora of Islamic Visual Culture, from its pre-Islamic roots in the Arabian peninsula, its synthesis from Late Antique and Sassanian traditions, its development in the classical period where the Dar Al-Islam, or House of Islam, spread from the Iberian peninsula to Indonesia, and eventually to its flourishing during the early modern empires of the Mughals, Safavids and the Ottomans.
Students will acquire an understanding of the religious and theological foundations of Islamic thought and philosophy and how this impacted Islamic ideas about visual representation.
Students will become familiarized with the salient issues regarding Islamic Visual Culture including the concepts of aniconism in religious art, the impact of Mystic Sufism on trade and decorative arts, Islamic optical and aesthetic theory, as pioneered by Ibn al-Haytham, as well as contsact with and assimilation of other visual traditions.
Students will be required to write and think critically about how Islamic cultures and art are viewed from both within and outside of their own traditions, especially how the Dar Al-Islam interacts with the Western World. We will comment specifically on how the topics of Orientalism and Colonialism have impacted views of Islamic Visual Arts.

French and Art-Historical Feminist Theory

Students will become acquainted with the various interpretive issues and theoretical approaches in the fields of French and art-historical feminist theory.

Historical Issues in Contemporary Society

Students will gain an appreciation for the meaningfulness and relevancy of historical issues in contemporary society.

Humanities Communications

Students will acquire an enhanced ability to think, write, and speak critically about the humanities.

Special Art History Studies On Site

Considering works of art and monuments of significance in major collections throughout the world and in original locations, emphasizing cultural context and site specificity.

ARTHC 492R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 201 & ARTHC 202
Taught	

Course Outcomes

Application

Students will use knowledge and skills from their program in a professional session.

Student will deliver a written report and a public presentation on the experience.

Off-Campus Museum/Auction House Internship

An art museum or auction house internship at a national or international institution providing training in administrative practice, curatorship, and connoisseurship. Establishing a network of connections to future employment and professional opportunities.

ARTHC 496R

Hours	3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Reporting

Student will deliver a writen report and a public presentation on the experience.

Top

Art History Business Capstone

Professional fields associated with Art History. Topics include the museum, the commercial gallery, conservation and technical art history, art law, ethics, connoisseurship, government organizations, art organizations and auction houses, and challenges and opportunities within the field. Requires at least one intensive learning experience beyond the classroom.

ARTHC 497

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 300; Senior standing.
Recommended	ArtHC 350, ArtHC 355.
Taught	Fall

Course Outcomes

Art History Business Capstone

The purpose of this course will be to provide a firm understanding of the various professional fields associated with the discipline of Art History. Topics of discussion will include, but are not limited to, the museum, the commercial gallery, conservation and technical art history, art law, ethics, connoisseurship, government organizations, auction houses, etc.
This course serves the Art History Business Track (Professional Track) along with ACC 200, BUS M 201, and BUS M 241. To complete the Track students need to take three of the four courses listed above.

Senior Thesis/Capstone Experiences

Capstone project including a professional quality research paper and a public presentation of this paper. Participation in at least one intensive learning environment beyond the classroom, i.e., a BYU Art History Study Abroad program; an art museum, auction house or gallery internship; or two art history field trips.

ARTHC 498

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ARTHC 300; senior standing.
Note	Internships at major art institutions usually require an internship at a regional or university art museum as a prerequisite.
Taught	Fall, Winter

Course Outcomes

Preparing Research Papers for Publication

Student will refine a previously researched paper according to the publication standards of a specific art history journal.

Art History Theory

Students will be able to articulate and employ sophisticated theoretical models used by art historians.

Professional Presentation

Students will develop a professional style of public presentation.

Top

Honors Thesis

ARTHC 499R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Additional Honors Requirements

Students will achieve the same learning outcomes listed in ArtHC 498 in addition to the requirements of the Honors Program.

Top

Art in Theory: Spectatorship

Review and critique of major theoretical approaches in art history, emphasizing the philosophical relationship between viewer and object.

ARTHC 500

Hours	3.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Graduate status.
Taught	Fall

Course Outcomes

Historical Research

Students will develop art historical research skills by conducting advanced research focused on theoretical approaches to a single work of art. They will develop an enhanced ability to think and write critically about theoretical applications in art history. Students will acquire professional presentation skills as they learn to clearly organize information, draw meaningful conclusions, and effectively use visual materials. Students will also develop persuasive oral skills through the practice of classroom presentations.

Art Criticism

ARTHC 500
Students will acquire a solid grasp of the major writers and theories on spectatorship in the arts, and they will gain an increased awareness of the complexities of visual representation. Students will develop an expanded confidence in their ability to identify issues related to spectatorship when confronting a work of art. They will also develop an appreciation for the meaningfulness and relevancy of the arts and art criticism in contemporary society.

Art in Theory: Language

Review and critique of major theoretical approaches in art history, emphasizing the recent interest in language and semiotics.

ARTHC 505

Hours	3.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Graduate status.
Taught	Winter

Course Outcomes

Theoretical Applications

Students develop an enhanced ability to think and write critically about theoretical applications in art history. This will be accomplished in part by the students studying the intellectual career of a single theory-driven art historian.

Application of Literary Theory

Students will acquire a solid grasp of application of literary theory to art history beginning the Semiotics of de Saussure and concluding with Derrida's Deconstruction. Students will also develop an appreciation for the relevance of the arts and art criticism in contemporary society.

Studies in Ancient Art

Selected topics in Egyptian, Greek, and Roman art.

ARTHC 520R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Advanced knowledge

Students will be able to demonstrate an advanced level of knowledge about specialized topics in Greek or Roman art through lectures, presentations and readings.

Research

Students will acquire a familiarity with, and employ, advanced research resources, strategies and techniques in the area of ancient art.

Presentation

Students will demonstrate the ability to analyze works of art, formulate thesis statements, organize and present their research in both an oral presentation and a written paper.

Studies in Medieval Art

Selected topics in early Christian, Byzantine, Romanesque, and Gothic art.

ARTHC 530R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Advanced knowledge

Students will be able to demonstrate an advanced level of knowledge about specialized topics in medieval art through lectures, presentations and readings.

Research

Students will acquire a familiarity with, and employ, advanced research resources, strategies and techniques in the area of ancient art.

Presentation

Students will demonstrate the ability to analyze works of art, formulate thesis statements, organize and present their research in both an oral presentation and a written paper.

Studies in Renaissance Art

Selected topics in Northern and Southern Renaissance art.

ARTHC 540R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Advanced knowledge

Students will be able to demonstrate an advanced level of knowledge about specialized topics in Renaissance art through lectures, presentations, and readings.

Original research

Students will acquire a familiarity with, and employ, advanced research resources, strategies, and techniques in the area of Renaissance art.

Presentation

Students will demonstrate the ability to analyze works of art, formulate thesis statements, organize and present their research in both oral and written form.

Studies in Baroque Art

Selected topics in northern and southern baroque art.

ARTHC 550R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Advanced Knowledge

Students will be able to demonstrate an advanced level of knowledge about specialized topics in Baroque art through lectures, presentations, and readings.

Original research

Students will acquire a familiarity with, and employ, advanced research resources, strategies, and techniques in the area of Baroque art.

Presentation

Students will demonstrate the ability to analyze works of art, formulate thesis statements, organize and present their research in both oral and written form.

Studies in Eighteenth- and Nineteenth-Century Art

Selected topics in eighteenth- and nineteenth-century art of Europe and America.

ARTHC 560R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

State of the Research

Students will acquire a state-of-the research knowledge of an artist, art movement or related movements, genre, thematic topic, culture, theory or practice from the designated period of the seminar (18th and 19th centuries).

Original Research

Students will develop their own original research project related to the umbrella topic of the seminar.

Presentation

Students will demonstrate the ability to analyze works of art, formulate thesis statements, organize and present their research in both an oral presentation and a written paper.

Studies in Modern and Contemporary Art

Selected topics in modern and contemporary art of Europe and America.

ARTHC 570R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

State of the Research

Students will acquire a state-of-the-research overview of an artist, art movement or related movements, genre of subject matter, thematic topic, culture, or practice from the designated period of the seminar (19th through 21st centuries).

Original Research

Students will develop their own original research project related to the umbrella topic of the seminar.

Presentation

Students will become increasingly articulate through intense discussions of readings, theoretical models, lectures, and peer research presentations.

Studies in Architecture

Selected topics in architecture of Europe and America.

ARTHC 580R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Scope

Students will acquire a state-of-the-research overview of an architect, school or movement, culture, or practice in the history of Western architecture.

Research

Students will develop their own original research project related to the umbrella topic of the seminar.

Presentation

Students will become increasingly articulate through intense discussions of readings, theoretical models, lectures, and peer research presentations.

Studies in Curatorship

Selected topics in curation and the museum.

ARTHC 590R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Scope

tudents will achieve state-of-the-research conversancy with scholarship related to the curatorial topic of the seminar.

Exhibition

Students will develop a thesis for, and multi-stage plan to execute, an exhibition.

Top

Foreign Language Readings for Art Historians

Special instruction in reading French or German scholarly texts.

ARTHC 595R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Spring, Summer

Course Outcomes

Research skills

Students will learn the basic grammar and art history-specific vocabulary of the target language sufficient to comprehend or translate exhibition catalogue entries and other publications or archival sources.

Application

Students will translate (from target language to English) a scholarly article of their own choice.

Top

French Readings for Art Historians

Special instruction in reading French scholarly texts.

ARTHC 595R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

German Readings for Art Historians

Special instruction in reading German scholarly texts.

ARTHC 595R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Academic Internship

Professional museum experience with a curatorial mentor.

ARTHC 599R

Hours	1.0 - 8.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	ArtHC graduate student status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Experience

Students will fulfill the contact of a graduate-level internship with the sponsoring museum, gallery, archive, or auction house.

Reporting

Students will deliver a written report and a public presentation on the experience.

Top

Introduction to Asian Studies: Methods and Materials

Sources, materials, and methods of research and writing; critical analysis of research project.

ASIAN 200

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Required of all Asian Studies majors early in the program.
Taught	Fall, Winter

Course Outcomes

Factual Knowledge

The student can identify countries and major geographic features of Asia on a map. The student can relate basic facts about the history, economics, politics, society and cultures of the countries of Asia.

Effective Research and Writing

The student will be able to apply effective search strategies to locate and to evaluate information on Asia in all formats (print, electronic, microform, video, DVD) and of all types (books, articles, reference materials, etc.). The student will be able to employ proper research skills to carry out research on a topic related to Asia and present results in oral and written academic reports.

Top

Asian Studies Abroad

Preparatory course approved for Asian Seminar (Study Abroad).

ASIAN 330R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Area Knowledge

Students will enhance their knowledge of the language, culture, and society through a study abroad experience.

Top

Asian Literary Traditions

Comparative analysis of Asian literary works spanning several traditions.

ASIAN 342

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Comparative Literary Analysis

Apply basic concepts of comparative literary analysis to course texts.

Asian Literary Traditions

Gain familiarity with Asian literary traditions, particularly India, China, and Japan.

Critical Analysis and Writing

Demonstrate strong critical reading, writing, and analytical skills across linguistic and national traditions.

Senior Seminar

Learning research and writing skills necessary to prepare and present major senior research paper.

ASIAN 495

Hours	1.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Senior status or program coordinator's consent.
Note	Most all major requirements should be completed before registering for this course.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Effective Research, Analysis and Writing

In this course, you will learn how to complete a significant research project using appropriate methods of research, analysis, and a professional standard of writing. In doing so, you will draw heavily from your knowledge from previous courses.

Factual Knowledge

You will do this by studying a specialized topic in Asian Studies under the guidance of a professor. Thus, you will deepen your familiarity with a sub-field within Asian Studies and Asian Studies more broadly.

Effective Oral Communication

You will also learn how to present your findings in a high-quality oral presentation, and how to give and receive appropriate feedback within a community of scholars.

Top

Intensive Introduction to Asian Studies for Teachers and Prospective Teachers

Readings, lectures, individual study, and curriculum development; integration for school teachers of Asian Studies into the curriculum of social studies, world history, and geography.

ASIAN 501R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Area Knowledge

Students will enhance their knowledge of Asia with an emphasis on knowledge direclty applicable to classroom situations.

First-Year American Sign Language, Part 1

First in a series of courses which focuses on acquiring basic ASL skills, both receptive and expressive. An introduction to the Deaf community and culture will be provided.

ASL 101

Hours	4.0 Credit, 4.0 Lecture, 1.0 Lab
Prerequisites	None
Note	Intended for students with little or no experience in ASL.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Exchange Information

Exchange information about self and family with others.

Describe

Describe basic daily activities and preferences.

ASL Storytelling

Introduce basic aspects of ASL storytelling.

Deaf culture

Identify general characteristics of Deaf culture.

Deaf history

Recall important events in American Deaf history.

Top

First-Year American Sign Language, Part 2

Second in a series of courses which focuses on acquiring basic ASL skills, both receptive and expressive. An introduction to the Deaf community and culture will be provided.

ASL 102

Hours	4.0 Credit, 4.0 Lecture, 1.0 Lab
Prerequisites	ASL 101
Note	Teacher may waive prerequisite based on prior experience.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Converse

Be able to converse naturally using selected vocabulary.

Daily routines

Explain daily routines and time concepts.

Classifiers

Be able to develop and use appropriate classifiers.

Describe appearance

Describe appearance of others using classifiers.

Requests

Make basic person requests.

Structure

Be able to develop and use appropriate ASL structure.

Occupations

Discusss various occupations of family members.

Culture Rules

Be able to identify and explain selected culture rules.

Films

able to answer questions about selected films.

Deaf culture

Compare and contrast Deaf and hearing cultures.

American Sign Language Fingerspelling

Improve ability to comprehend and communicate using various ASL fingerspelling styles.

ASL 111

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	ASL 102
Note	Teacher may waive prerequisite based on prior experience.
Taught	Fall, Winter

Course Outcomes

Smoothness

Fingerspell smoothly.

Use styles

Identify and use various fingerspelling styles.

Read styles

Read fingerspelling of various styles.

Lexicalization

Identify the characteristics of lexicalization.

American Sign Language Numbering

Improve ability to comprehend and communicate using various ASL numbering styles.

ASL 112

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	ASL 102
Note	Teacher may waive prerequisite based on prior experience.
Taught	Fall, Winter

Course Outcomes

Smoothness

Sign numbers smoothly.

Use styles

Identify and use various numbering styles.

Read styles

Read fingerspelling of various styles.

Parameters

Sign numbers with correct sign parameters.

Second-Year American Sign Language, Part 1

Third in a series of courses which focuses on developing intermediate ASL skills, both receptive and expressive. Increased focus on the role that ASL plays in the lives of the Deaf community.

ASL 201

Hours	4.0 Credit, 4.0 Lecture, 1.0 Lab
Prerequisites	ASL 102
Note	Teacher may waive prerequisite based on prior experience.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Narration

Narrate various life experiences and events.

Classifiers

Increase use and understanding of classifiers.

Suggestions and requests

Make suggestions and requests.

Deaf history and culture

Discuss several aspects of Deaf history and culture.

Second-Year American Sign Language, Part 2

Fourth in a series of courses which focuses on developing intermediate ASL skills, both receptive and expressive. Increased focus on the role that ASL plays in the lives of the Deaf community.

ASL 202

Hours	4.0 Credit, 4.0 Lecture, 1.0 Lab
Prerequisites	ASL 201; Teacher may waive prerequisite based on prior experience.
Note	Culminating course for GE Languages of Learning requirement. Required course for obtaining language credit by examination.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Narrate

Narrate unforgettable moments.

Illustrate

Illustrate interesting facts.

Rules and customes

Explain rules and cultural customs.

Describe

Describe accidents and embarrassing situations.

History and culture

Discuss in American Sign Language selected aspects of Deaf history and culture.

Top

Advanced American Sign Language and Culture

Fifth in a series of five courses which aims to increase interpersonal, receptive, and presentational ASL skills in the context of society and culture of the Deaf community.

ASL 301

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	ASL 202
Note	Teacher may waive prerequisite based on prior experience.
Taught	Fall, Winter

Course Outcomes

Define

Be able to discuss the nature of culture and definitions of Deaf culture, Deaf community, and Deaf-World.

Values

Be able to identify the basic values and beliefs of the Deaf culture.

Issues

Be able to discuss various educational and social issues affecting the Deaf community.

Characteristics

Be able to identify general characteristics of Deaf culture.

Practices

Be able to identify specific practices of Deaf people.

Roles of ASL and English

Be able to discuss the role of ASL and English in the community and in individual's identity development.

Impact of Deafness

Begin to understand the impact of deafness on various lives.

Deaf History

Become familiar with the basics of American Deaf history.

Deaf Literature

Various genres of Deaf literature. Introduction to analysis of ASL literary works.

ASL 302

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ASL 301
Note	Teacher may waive prerequisite based on prior experience.
Taught	Winter

Course Outcomes

Literature

Be able to discuss the literature of the Deaf community including both original ASL works and those translated from English.

Forms

Be able to discuss the number of literary forms including sign play, poems, stories, short stories, plays and Deaf folklore.

Transition

Be able to discuss the transition of ASL literary forms as well as selected creators and performers.

Literary Works

Become familiar with and be able to discuss in ASL specific literary works.

Values

Be able to accurately discuss how Deaf literature reflects and reinforces Deaf-World values, beliefs and traditions.

Interpreting 1

Building basic interpreting skills. Code of Ethics, interpreting protocol, and interpreting issues.

ASL 431

Hours	4.0 Credit, 4.0 Lecture, 1.0 Lab
Prerequisites	ASL 301
Recommended	ASL 302 or concurrent enrollment.
Note	Teacher may waive prerequisite based on prior experience.
Taught	Fall Contact Department

Course Outcomes

History

Be able to summarize the history of the interpreting profession in the U.S.

Contact Varieties

Be able to name and identify the different contact varieties in Sign Language Communication.

Role of Interpreter

Be able to explain the role of the interpreter in a variety of settings.

Code of Conduct

Be able to recite the Code of Professional Conduct apply it to make appropriate ethical decisions.

Laws

Be able to identify and explain the impact of certain major federal and state laws on the field of ASL interpreting.

Process and Register

Be able to explain the communication process and different registers in communication, and how they affect the work of an interpreter.

Introduction to American Sign Language Linguistics

Designed for students who have acquired a good mastery of ASL. This course explores the dynamics of ASL linguistics, including basic simillarities between ASL and other languages.

ASL 431

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ASL 301 or equivalent.
Recommended	ASL 302 or concurrent enrollment.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

History

Be able to summarize the history of the interpreting profession in the U.S.

Contact Varieties

Be able to name and identify the different contact varieties in Sign Language Communication.

Role of Interpreter

Be able to explain the role of the interpreter in a variety of settings.

Code of Conduct

Be able to recite the Code of Professional Conduct apply it to make appropriate ethical decisions.

Laws

Be able to identify and explain the impact of certain major federal and state laws on the field of ASL interpreting.

Process and Register

Be able to explain the communication process and different registers in communication, and how they affect the work of an interpreter.

Introduction to American Sign Language Interpreting

An introduction to the profession of interpreting, the Code of Professional Conduct, interpreting protocol, and interpreting issues.

ASL 432

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	ASL 431
Note	Teacher may waive prerequisite based on prior experience.
Taught	Winter Contact Department

Course Outcomes

Models

Demonstrate a knowledge of various interpreting models.

Process

Demonstrate an understanding of the interpreting process.

Skills

Develop basic knowledge and understanding as well as demonstrate skills related to interpreting and the interpreting process at an appropriate level for the course.

Honors Principles of Biology

Introductory course for general education students.

BIO 100

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Biology Literacy

Students will acquire basic literacy in the language of science and biology as evidenced by their ability to: Explain the foundational assumptions underlying science and evaluate the strengths and limitations of science as a human endeavor. Describe basic principles and concepts of biology using appropriate vocabulary. Describe data represented textually, numerically, and graphically, and infer a conclusion from the data. Plan and perform a simple experiment, actual or simulated; draw conclusions, and; communicate the results.

Scientific Reasoning

Students will exercise sound scientific reasoning as evidenced by their ability to: Evaluate scientific evidence and claims at the level of a well-informed layperson in order to make rational decisions on public-policy science issues. Develop intellectual abilities and character traits of sound judgment and effective communication.

Personal Responsibility

Students will accept responsibility for personal and public stewardship as evidenced by their ability to: Integrate sound scientific reasoning with reasoning and methods from other disciplines to address real-world biology-related issues and concerns. Reflect on how literacy in biology and sound scientific reasoning combine with reasoning and methods from other disciplines to increase their ability to act responsibly as stewards and citizens in their own families, communities and the world.

Top

Principles of Biology

Introductory course for general education students.

BIO 100

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Honors also.

Course Outcomes

Top

Biology

General biology course with laboratory for biology majors. Introduction to disciplines in the life sciences including methods for scientific inquiry, biochemical dynamics, cell structure and function, evolutionary theory, bioenergetics, and ecological interactions.

BIO 130

Hours	4.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Scientific Literacy

Students will demonstrate basic literacy in the language of science and an understanding of the foundational theories of biology (i.e., be able to formulate appropriate hypotheses and predictions to test specific biological phenomena and use appropriate vocabulary to do so) o Atomic Molecular Theory
o Cell Theory
o Theories of Photosynthesis, Fermentation, and Cellular Respiration
o Cell Division and Meiotic Theories
o Chromosomal and Mendelian Theories of Inheritance
o Watson and Crick's Theory of DNA Structure and Replication
o Protein Synthesis Theory
o Darwin's Theory of Natural Selection
o Hardy-Weinberg Theory
o Ecosystem Theory
o Population Growth Theory
o Competitive Exclusion and Behavioral Theory

Scientific Process Skills

Students will demonstrate an understanding of the basic scientific principles which undergird the scientific process, including the strengths and weaknesses of this process.

Scientific Discovery

Students will appreciate the excitement of discovery that has accompanied important scientific developments.

Scientific Applicability

Students will demonstrate how scientific methodology can be used to analyze real-world science-related problems.

Data Evaluation

Students will be able to evaluate scientific data and claims in order to make rational decisions on public-policy science issues that affect their community.

Scientific Expression

Students will be able to express their thoughts (in oral, graphical, and written formats) on scientific topics clearly, including appropriate use of basic scientific vocabulary and effective interpretation of quantitative data.

Science and Religion

Students will be able to reflect rationally upon the interface between science and religion.

Scientific Reasoning

Students will demonstrate sound scientific reasoning ability.

Top

Introduction to Bioinformatics

Introduction to basic concepts in bioinformatics. Standard bioinformatic applications.

BIO 165

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Principles of Biology Laboratory

BIO 175

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	Elementary education or early childhood education pre-major or major status; concurrent enrollment in Bio 100.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Biological Diversity: Animals

Comparative organization and evolutionary significance of morphological, physiological, reproductive, and ecological differences in invertebrates and vertebrates. Laboratory included.

BIO 220

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	PDBIO 120; or BIO 130
Taught	Fall, Winter

Course Outcomes

Clade Animalia Evolution

Students will be able to discuss the broad patterns of the evolution of the clade Animalia, emphasizing the relationships among major sub-clades (phyla), the unique biological attributes that define these clades, and the novel changes in morphology over major transitions (unicellular to multicellular; acoelomate to pseudocoelomate to coelomate body plans, bilaterial vs radial symmetry, origins of exoskeletons, gill slits, notochord, crania & vertebral columns, etc.).

Phylogenetic Systematics

Students will develop the skills necessary to understand the terminology of phylogenetic systematics and methods used to recover the "tree of life", the logic behind the hierarchy (i.e., the only possible outcome of the process of "descent with modification"), and critically apply evolutionary reasoning, including the use of phylogeny and tree-thinking, to formulate and test hypotheses that explain biological diversity.

Intellectual Tools

Students will have the intellectual tools to continue to explore related topics with confidence and understanding throughout their lives, and a deeper appreciation for the diversity of life on earth.

Biological Diversity: Plants

Comparative organization and evolutionary significance of morphological, physiological, reproductive, and ecological differences in fungi, algae, and principal groups of land plants. Laboratory included.

BIO 230

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	PDBIO 120; or BIO 130
Taught	Fall, Winter

Course Outcomes

Discuss Differences

Students will be able to discuss differences between cyanobacteria, algae, bryophytes, non-seed vascular plants, gymnosperms, flowering plants, and fungi with repsect to their lifecycles, characteristic morphologies, and biological roles.

Evolutionary Logic

Students will develop the skills necessary to understand and critically apply evolutionary logic including the use of phylogeny and tree-thinking to formulate and test hypotheses that explain biological diversity

Explore Related Topics

Students will be able to continue to explore related topics with confidence and understanding throughout their lives.

Top

Field Botany

Recognition, characteristics, and uses of common trees and shrubs.

BIO 235

Hours	3.0 Credit, 3.0 Lecture, 6.0 Lab
Prerequisites	None
Taught	Fall, Spring

Course Outcomes

Knowledge of Biology

Students will demonstrate a fundamental knowledge of biology

Discover Skills and Tools

Students will develop the discovery skills and tools used by biologists

Use Biological Knowledge

Students will use biological knowledge to enhance their personal lives

Secure Employement

Students will use their skills and knowledge in biology to secure employment or to advance in higher education in biology-related disciplines

Top

Animal Restraint

Restraint and first aid techniques for pet, laboratory, domestic, and wild animals.

BIO 270

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Safe Restrainment

Know how to safely restrain domestic animals and wildlife species

Basic Animal Restraint Techniques

Understand basic animal restraint techniques for a number of domestic and wildlife species

Certain Restraint Techniques

Understand why certain restraint techniques work with only certain animals and not others

Animal Chemical Restraint Methods

Develop a basic knowledge of animal chemical restraint methods and their indications

Pharmaceutical Agents

Understand why the use of pharmaceutical agents by lay persons is not advocated without a veterinarian's prescription or special knowledge and training of non-veterinarian personnel, such as wildlife biologists

Exploration of Teaching in Biological Sciences

Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

BIO 276

Hours	3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	BIO 220A & BIO 220B & CHEM 105; or BIO 220 & BIO 230 & CHEM 105; major GPA of 2.85 or higher, FBI fingerprint and background clearance; previous application required.
Taught	Fall

Course Outcomes

Lesson Development

Design and develop simple lessons containing the essential components; objectives, procedures, and evaluation.

Effective Teacher Characteristics

Identify and demonstrate the characteristics of effective teachers.

Effective Teaching and Planning

Model both effecive teaching and lesson planning by teaching lessons that exhibit your abilities to use inquiry-based lessons and demonstrate both the hierarchy of learning and strategies for teaching students with diverse learning styles.

Top

Veterinary Medicine Seminar

Preview into veterinary medicine as a profession. Application procedure and preparation for veterinary school.

BIO 291R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Educational Requirements and Preveterinary Medicine Prerequi

Develop a working knowledge of the educational requirements and preveterinary medicine prerequisite coursework required by the majority of USA colleges of veterinary medicine (CVM)

Veterinary Medicine Admission Application Process

Learn how to navigate the application process for admission to colleges of veterinary medicine, understand the different sections of the online veterinary medicine college application service (VMCAS) form, and know what information is needed for supplemental application forms required by individual CVMs

WICHE, State Contract, and Residency Requirements

Knowledge of state contracts, the Western Interstate Commission for Higher Education (WICHE) Professional Student Exchange Program (PSEP), state residency requirements

Cost of a Veterinary Medicine Education

Understand the cost of a veterinary medicine education, and learn how to minimize educational debt with scholarships, grants, research stipends, and military or government programs

Career Alternatives

Career alternatives, general or specialty practices in veterinary medicine

Animal Welfare, Animal Research, and Responsibilities

Understand the issues concerning animal welfare, animal research, and responsibilities as a member of the veterinary profession

Opportunities in Veterinary Medicine

Statistics with data on need (based on demographic or other data), employment placement, salary, employer requirements, market research information, and advanced degrees to enhance

employment opportunities in veterinary medicine

Ecology

Distribution and abundance of organisms and their interactions with the physical and biotic components of the earth.

BIO 350

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PDBIO 120; or BIO 130
Taught	Fall, Winter, Spring

Course Outcomes

Physical Processes

Understand the major physical processes that form and characterize the biosphere, including global scale energy flow, the carbon cycle, climate, and soil formation.

Organizational Processes

Understand the processes that drive major levels of organization of the biotic world, including energetics in the ecosystem, population dynamics, and species interactions.

Writing

Understand the importance of writing as a way of synthesizing and solidifying critical thought.

Environmental Stewardship

Foster and promote environmental stewardship within your realm of influence and your community.

Human Well-Being

Understand the importance of ecology to issues regarding human well-being

Ecology Connectivity

See the connectivity and relevance of ecology to other fields of study

Top

Computational Biology

Computational analysis of DNA data; introduction to bioinformatics databasing using Perl and SQL; configuration of UNIX workstations for bioinformatics analyses.

BIO 365

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	C S 240
Taught	Fall

Course Outcomes

Overall Objective

To provide practical experience in using computational approaches to address biological problems.

General Computational Problems in Biology and the Approaches

Describe general areas of computational problems in biology (alignment, estimation, tree searches, molecular modeling, gene prediction) and learn about existing computational approaches to these general problems.

Computational Tools for Statistical Inference

Learn basic computational tools for statistical inference (Bayesian, Maximum likelihood, Markov Chain Monte Carlo, Hidden Markov Chain)

Alignment Problems

Apply programming skills to alignment problems through the development of novel tools and software for alignment

Tree Searching Problems

Apply programming skills to tree searching problems through the development of novel tools software

Gene Prediction Problems

Apply programming tools to gene prediction problems through the development of novel tools and software

Database Coding

Develop ability to use existing and write new database code to access and manipulate genetic data

Bioethics

In-depth lecture and small group discussion of varied bioethical issues. LDS Church positions emphasized when appropriate.

BIO 370

Hours	2.0 Credit, 1.0 Lecture, 3.0 Lab
Prerequisites	Introductory biology course.
Taught	Fall, Winter

Course Outcomes

Philosophical Underpinnings of Bioethics and Bioethical Issues

Students will understand the ethical and philosophical underpinnings of bioethics and to develop ethical intuitions on bioethical issues.

Terminology, Vocabulary, and Objectives

Students will learn the terminology, vocabulary, and objectives of bioethics.

Bioethical Decisions

Students will understand the tools and approaches needed to make a bioethical decision and to communicate that decision in rationally informed way

Bioethical Primary Literature

Students will understand the bioethical primary literature, to understand how to read case studies, and familiarity with the major issues being discussed in bioethics today.

Teaching Methods and Instruction in Biology

Developing meaningful and engaging instruction for secondary students in biological sciences; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

BIO 377

Hours	3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	BIO 276; concurrent enrollment in Bio 378, 379, Sc Ed 380; major GPA of 2.85 or higher.
Taught	Fall

Course Outcomes

Learning Theories

Students will demonstrate an understanding of key learning theories by explaining how students learn.

Pedagogical Practices

Students will demonstrate proper pedagogical practices in a biological teaching setting.

Lesson Development

Students will develop effective unit and lesson plans to promote science learning.

Top

Practicum in Biology Teaching

Implementing meaningful and engaging instruction for secondary students in biology; developing critical thinking, problem solving, literacy, and democratic character; assessing learner performance.

BIO 378

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Concurrent enrollment in Bio 377, 379, Sc Ed 380.
Taught	Fall

Course Outcomes

Best Teaching Practices

Students will be able to identify best practices in teaching.

Mentoring Involvement

Students will show active involvement with mentor teacher in creating and teaching lessons, grading papers, or any other classroom work.

Teaching Practices

Students will be able to identify practices that they can incorporate into their own teaching.

Classroom Management and Laboratory Safety

Current theory, research, and application in classroom management; creating positive teacher-student and peer relationships; developing optimal learning environments.

BIO 379

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Concurrent enrollment in Bio 377, 378, Sc Ed 380.
Taught	Fall

Course Outcomes

Optimal Learning Environment

Students will integrate current theory, research, and application in classroom management to create an optimal learning environment.

Classroom Management

Students will demonstrate appropriate and effective classroom management strategies.

Laboratory Safety

Students will demonstrate an understanding of proper laboratory safety protocols.

Comparative Animal Physiology and Anatomy

Structure and function of animal organ systems; structural and physiological responses to demands of and changes in environment; evolutionary constraints on anatomy and physiology.

BIO 380

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	Bio 220A or instructor's consent.
Taught	Fall

Course Outcomes

Vertebrate Physiology/Anatomy

Students will demonstrate a fundamental knowledge of comparative vertebrate animal physiology and anatomy.

Critical Thinking

Students will develop critical thinking skills while learning concepts and understanding the tools used by comparative vertebrate animal physiologists and anatomists to study function and structure.

Life Enhancement

Students will use physiological and anatomical knowledge to enhance their personal lives.

Secure Employment

Students will use their skills and knowledge in comparative vertebrate animal physiology and anatomy to secure employment or to advance in higher education in biology-related disciplines.

Isotopic Techniques

Students will develop an understanding of physiologic isotopic techniques utilized to indicate energy sources, trophic levels, body water, and latitudinal and altitudinal animal migration reflected by stable isotopes of carbon, nitrogen, hydrogen and oxygen.

Top

Preveterinary Preceptorship

Supervised on-the-job exposure to veterinary medicine under a clinical setting, supplemented with academic assignments.

BIO 392R

Hours	3.0 Credit, 1.0 Lecture, 5.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Preceptorship Skill Mastery

Skills student should master during the preveterinary medicine preceptorship experience:
Husbandry: feeding, sanitation, handling, breed recognition
Restraint of animals for examination, treatment and radiography
Logging medical data and recording information in patient charts
Grooming for medical reasons
Observe and recognize normal and abnormal body functions and vital signs
Concepts of animal welfare and humane treatment of animals
Introduce methods and explain necessity of animal population control
Obtain knowledge of and competency with routine preventive medicine including vaccination protocols, parasite identification-treatment-prevention, routine physical examination, geriatric health care

Activity Observation and Participation

The student should observe and participate in these activities:
Client-doctor relations and dialogue; demonstration of veterinary ethics and integrity; diagnostic thought process and rationale
Patent examination; administration of medication and therapy; collection of body fluids and specimens
Medical record information entry
Clinical diagnostic laboratory techniques
Developing and interpreting radiographs
Surgical suite protocols:
preparation of instrument packs, drapes, surgical gowns
aseptic technique
anesthesia administration and monitoring
surgical preparation of patient
surgery protocols and surgical assistance
intensive and post-operative nursing care
Euthanasia

Hospital Areas

Areas of hospital student should receive exposure to:
Kennel and quarantine wards
Treatment areas
Surgery and examination rooms
Office procedures
Telephone etiquette
Laboratory and pharmacy
Library search and literature review of clinical case information and current treatments based on veterinary research

Top

Evolutionary Biology

Intensive examination of evolution as the conceptual cornerstone of biology.

BIO 420

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	MMBIO 240 & PWS 340
Recommended	Concurrent enrollment in Bio 421.
Taught	Fall, Winter, Spring

Course Outcomes

History and Development

Students will be able to describe the history and development of evolutionary thought.

Evidence for Evolution

Students will be able to list and describe the evidence for evolution and its required corollaries.

Processes of Evolution

Students will be able to describe the mechanisms by which evolution occurs. Provide detailed explanations of the the processes of evolution by mutation, migration, genetic drift, non-random mating, and natural selection.

Adaptation

Students will be able to explain adaptation, providing examples from several different fields of biology (e.g., cell biology, physiology, conservation biology, bioinformatics, medicine, behavior, etc.).

Life on Earth

Students will be able to describe the history of life on earth. Identify major evolutionary transitions over time, and explain the tools and evidence that support current hypotheses of the history of life.

Top

Evolutionary Biology Laboratory

Hands-on applications and analytical tools of evolutionary biology; emphasizing inference methodology and evidence complementing the theoretical constructs introduced in Bio 520, including comparative anatomy, phylogenetic inference, population genetics, species concepts, and human evolution.

BIO 421

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	MMBIO 240
Note	Concurrent enrollment with Bio 420 is strongly recommended.
Taught	Fall, Winter, Spring

Course Outcomes

Basic Principles

Students will gain a better understanding of the basic principles of evolution within a population including selection, drift, and founder effects by using computer simulations.

Faith and Evolution

Students will have a deeper understanding of the LDS position on evolution.

Patterns of Evolution

Students will learn the details of phylogenetic reconstruction, tree searching, DNA sequence alignment, and other bioinformatics tools for deciphering patterns of evolution.

Species Concepts

Students will learn the details of species concepts and the criteria used for identifying and diagnosing species.

Hands-on Experience

Students will gain hands-on experience with hominid fossils and gain an understanding of the evidence that elucidates the biological history of humans.

Top

Plant Classification and Identification

Principles of plant systematics, taxonomy, and classification, emphasizing family recognition by sight, terminology, and use of identification keys to the temperate flora.

BIO 430

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	Bio 100 or Bio 130 or PDBio 120 or PWS 100 or instructor's consent.
Taught	Fall

Course Outcomes

Vocabulary

Students will apply correct vocabulary for describing plant parts and be able to deduce the meaning of new terms based on knowledge of common roots, prefixes, and suffixes.

Groups of Plants

Students will recognize the major groups of vascular plants, be able to differentiate them by their principal characters, and understand their phylogenetic relationships.

Identify by Sight

Students will identify by sight 40 families of flower plants as well as common families of ferns and gymnosperms, by recognizing differentiating features of each family.

Identifying Unknown Plants

Students will gain proficiency in the use of keys and identification manuals for identifying any unknown plant to species.

Top

Entomology

External morphology, natural history, evolution, distribution, and phylogeny of insects. Insect collection required.

BIO 441

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	Bio 220A or equivalent.
Taught	Fall

Course Outcomes

Application of Basic Principles

Understand basic principles of morphology and systematics and apply these principles to your own knowledge of insects.

Understand Phylogeny

Judge genetic relationships. Be able to recall current hypotheses of insect phylogeny at the ordinal level and have the tools needed to judge validity of new hypotheses of phylogeny that might be proposed. You will also study carefully the modifications associated with phylogenies that led to insect diversification and success.

Knowledge of Morphology and Anatomy

Understand details of insect morphology, and be well versed in both internal and external body structures.

Identify by Sight

Recognize common insect families and be able to quickly identify them on sight.

Wonder, Perspective, and Appreciation

Gain or regain a sense of wonder for the natural world, especially as it relates to insects and other arthropods. Gain perspectives of the diversity and complexity in the insect world. Enhance your appreciation for the natural world we share with them.

Functional relationships

Learn life histories and specific collecting techniques for insects in their own habitats. You will learn how they fit in the natural world.

Identify using keys

Learn the protocols for detailed identificiations. Many insects will be totally new in appearance to

you. You will use identification guides and illustrations to help you decide what the name of an insect is at the Order and Family levels.

Develop personal identification skills

Use a variety of identification techniques to correctly identify insects and other arthropods. Throughout your life you will be asked by employers, friends, and family to answer the question, "What is this?" This course will give you these exact skills. A correct identification is a beginning step to learning more about a species and its relationships to the natural world and its pragmatic relationship to humans.

Top

Advanced Invertebrate Zoology

Functional morphology, cladistics, ecology, behavior, and interrelationships of invertebrates.

BIO 442

Hours	5.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	BIO 220A; or BIO 220
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Understanding

Students will demonstrate an advanced understanding of invertebrate organisms including ecology, behavior, and phylogenetic relationships.

Top

Ichthyology

Fish systematics, evolution, morphology, distribution, and natural history.

BIO 443

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	BIO 220A; or BIO 220
Taught	Fall odd years

Course Outcomes

Respiration

Students will have a general understanding of fish respiration.

Body Structure

Students will have a general understanding of fish body structure.

Food Processing

Students will have a general understanding of fish food processing.

Behavior and Communication

Students will have a general understanding of fish behavior and communication.

Herpetology

Reptile and amphibian evolution, systematics, morphology, distribution, and natural history. Lab emphasizes taxonomy, classification, and distribution of western U.S. species.

BIO 445

Hours	4.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	BIO 220A; or BIO 220
Taught	Winter even years

Course Outcomes

Origins

Each student will gain a deeper understanding of some details of the origin of tetrapods, and the origin of the amniotes.

Phylogenetic Position

Each student will gain a deeper understanding of the phylogenetic position of extinct and extant clades of amphibians & reptiles within the clade Vertebrate.

Evolution and Natural History

Each student will acquire a detailed knowledge of the evolution and natural history (natural history, behavior, etc.) of the major clades of extant amphibians and reptiles .

Lab and Field Experiences

Through lab and field experiences, each student will acquire a detailed knowledge of diagnostic characters, taxonomy & distributions, and some aspects of ecology of native western species.

Species Conservation Status

Each student will acquire some knowledge of the conservation status of selected species in the US and abroad.

Top

(Bio - PWS) Ornithology

Avian systematics, evolution, distribution, identification, and natural history.

BIO 446

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	Bio 100 or Bio 130 or PDBio 120 or PWS 100 or equivalent or instructor's consent.
Note	One three-day field trip required.
Taught	Winter

Course Outcomes

Ornithology

Define ornithology and what it encompasses.

Global Diversity

Discuss the global diversity of birds in both form and function

Bird Evolution

Articulate the current thinking regarding the evolution of birds.

North American Birds

Identify 200 birds common to western North America.

Mammalogy

Mammalian diversity, evolution, distribution, and natural history. Two three-day field trips required.

BIO 447

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	BIO 220A; or BIO 220; or PWS 344
Taught	Fall

Course Outcomes

Utah Mammals

Be able to recognize the more common species of Utah mammals based on external and skull features

Identify Mammal Orders

Be able to recognize and identify most orders of mammals based on features of the skull

Evolutionary History

Understand the evolutionary history of mammals and the modern diversity of mammalian orders

Original Scientific Literature

Enhance skills directed toward understanding and interpreting original scientific literature dealing with mammalian biology

Conservation Biology

Scientific principles of conservation: applying population genetics, and phylogenetic and ecological theory to preservation of biological diversity; developing sustainable ecological systems compatible with human resource use.

BIO 450

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BIO 220A & BIO 350; or BIO 220B & BIO 350
Taught	Fall

Course Outcomes

Conservation in Ecological Processes

Apply an understanding of ecological processes to conservation of populations, species, and ecosystems.

Environmental Stewardship

Foster and promote environmental stewardship within your realm of influence and your community.

Scientific Method and Analytical Thinking

Demonstrate the ability to apply the scientific method and analytical thinking to ecological and conservation issues.

Synthesizing Literature for Conservation Biology

Demonstrate the ability to synthesize literature relevant to a topic in conservation biology

Scientific Term Paper

Demonstrate the ability to write a scientific term paper

Top

Marine Biology

Principles of physical and biological oceanography, biodiversity, and ecology of numerous ocean habitats. Extensive field trips.

BIO 452

Hours	4.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Instructor's consent.
Taught	Spring even years

Course Outcomes

Please contact the individual department for outcome information.

Plant Ecology

Fundamental principles governing interactions among plants and their environments with respect to their success. Students will be able to apply their knowledge to land management, conservation and agriculture.

BIO 455

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BIO 220B; or BIO 230
Recommended	Bio 350.
Taught	Winter

Course Outcomes

Physiological Ecology of Plants

Topics include plant water relations, photosynthesis, energy balance, nutrient uptake strategies, cold tolerance, ecotypic differentiation as they relate to important processes including seed germination, competition, allelopathy, herbivory, symbioses, etc.

Population biology of plants

Topics include self-thinning, reproduction, female investment, intraspecific competition.

Community ecology

Topics include symbiotic nutrient uptake strategies, other symbioses, pollination, inter-specific competition, herbivory, succession.

Global change biology

We discuss the causes and consequences of global climate change.

Agricultural ecology

We discuss the ecology of food production including nutrient fluxes, carbon cycling, and energy use.

Genetics of Human Disease

Examining the application of genetics to understanding and treatment of human disease. Functional consequences of mutations; use of model organisms; linkage and association analysis of complex traits; pharmacogenetics; ethical considerations.

BIO 463

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PWS 340
Taught	Winter

Course Outcomes

Genetic Variants

Understand and explain the different types of genetic variants, how they can be typed and how they can be used to understand the genetic architecture of human disease.

Linkage Disequilibrium

Understand linkage disequilibrium in the human genome and the role it plays in the search for genetic risk factors for human disease

Basic Statistics and Software

Understand and use basic statistics and software for analyzing the correlation between genetic markers and risk for disease.

Model Organisms and the Genetics of Human Disease

Understand and explain how model organisms contribute to our understanding of the genetics of human disease.

Acquiring and Presenting Information about Genetics of a Human

Demonstrate the ability to obtain, aggregate and present information about the current knowledge of the genetics of a human disease.

Bioinformatics

Analyze and interpret large biological data sets. Genome- and transcriptome-based quantitative methods. Data management techniques. Exercises in evaluating research studies and in developing computational methods for research. Semester project.

BIO 465

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BIO 365; or C S 418
Taught	Winter

Course Outcomes

Overall purpose

The overall purpose of this course is to help students develop skills in bioinformatics research techniques, apply these techniques to primary-research questions, and make well-supported scientific conclusions that link basic biology and computational techniques.

Apply bioinformatics tools and techniques

Students will apply modern computational tools and techniques to biological data sets, consisting of genomic, transcriptomic, and ecological data.

Evaluate research

Students will demonstrate proficiency in reading, interpreting, and discussing research studies that use bioinformatics techniques.

Perform research

Students will design and execute an original research study using bioinformatics techniques and place the study in context with previous studies described in the primary literature.

Present research

Students will demonstrate mastery of elementary scientific communication by describing research results and conclusions in written and oral form at a level that would be acceptable for presentation at an academic conference.

Top

(Bio-MMBio-PWS) Genomics

Current analysis of genes and genomes; computational and statistical approaches for analyzing genomic data, including genome sequencing and annotation, gene expression and the transcriptome, proteomics and functional genomics, and genetic variation and SNPs.

BIO 468

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MMBIO 240 & PWS 340
Taught	Fall, Winter

Course Outcomes

Genomic Experiments

Students will complete a series of exercises with data representing genomic experiments (analysis and interpret).

Genome Sequences

Students will describe how genomes are sequenced.

Genomic Features

Students will understand techniques and concepts to assess genomic features such as methylation, gene expression, etc.

Top

History and Philosophy of Biology

Development of fundamental generalizations of biology; nature of science; applications to major philosophical issues of current science.

BIO 470

Hours	3.0 Credit, 1.5 Lecture, 1.5 Lab
Prerequisites	BIO 350
Taught	Fall

Course Outcomes

History of Biology

Students will demonstrate an understanding of the history of biology. This will include an understanding of the major figures and the historical development of modern biology. This will include having read original texts from the periods covered (Aristotle to Current Biology).

Philosophical Issues

Students will also have an understanding of principal philosophical issues confronting modern biology, including major research trends in philosophy of biology. The students will also have a grasp of what 'science' is, how it is practiced, and what expectations for knowledge can be justified using science.

Primary Literature

Students will have the ability to read and write about the primary literature both on the history, and the philosophy, of science. They will have a grasp of the terminology used in philosophy, and how philosophy of biology is currently practiced. Writing will be emphasized.

Top

Plant Developmental Biology

Developmental mechanisms controlling plant development, with particular emphasis on genetic and molecular regulation.

BIO 475

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PWS 340
Recommended	Bio 220B.
Taught	Fall odd years

Course Outcomes

Basic Understanding of Plant Morphology

Students will be able to demonstrate and understanding of both classic morphological and modern molecular approaches to understanding plant development

Evaluate Primary Literature

Students will be able to read and evaluate primary scientific literature

Literature Review

Students will be able to prepare a literature review

Biology Student Teaching

Field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar (Sc Ed 490R) required.

BIO 476

Hours	12.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Completion of all course work or departmental approval; major GPA of 2.85; at least a C in Sc Ed 377.
Taught	Winter

Course Outcomes

INTASC Principles

Students will integrate all ten principles of the Interstate New Teacher Assessment and Support Consortium (INTASC) in the design of an instructional unit.

INTASC Goals

Students will demonstrate the ten goals and standards of the Interstate New Teacher Assessment and Support consortium.

Confidence in Teaching

Students will demonstrate increased competence and confidence in their teaching abilities.

Classroom Management

Students will demonstrate appropriate classroom management techniques in a public school setting.

Top

Aquatic Biology

Independent student research under faculty supervision.

BIO 494R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Supervisor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of aquatic biology.

Top

Bioinformatics

Independent student research under faculty supervision.

BIO 494R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Supervisor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of aquatic biology.

Ecology

Independent student research under faculty supervision.

BIO 494R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Supervisor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of aquatic biology.

Top

Electron Microscopy

Independent student research under faculty supervision.

BIO 494R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Supervisor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of aquatic biology.

Top

Entomology

Independent student research under faculty supervision.

BIO 494R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Supervisor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of aquatic biology.

Top

Evolution

Independent student research under faculty supervision.

BIO 494R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Supervisor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of aquatic biology.

Fungal Biology

Independent student research under faculty supervision.

BIO 494R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Supervisor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Ability to Design and Implement Research

Students will demonstrate an ability to design and implement a research project in a specialized area.

Ability to Interpret, Analyze, and Present Results

Students will effectively interpret, analyze, and present results of experimentation to others.

Top

Marine Biology

Independent student research under faculty supervision.

BIO 494R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Supervisor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of aquatic biology.

Top

Medicinal Botany

Independent student research under faculty supervision.

BIO 494R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Supervisor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of aquatic biology.

Mentored Research

Independent student research under faculty supervision.

BIO 494R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Supervisor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of aquatic biology.

Top

Plant Biochemistry

Independent student research under faculty supervision.

BIO 494R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Supervisor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of aquatic biology.

Top

Plant Biology

Independent student research under faculty supervision.

BIO 494R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Supervisor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of aquatic biology.

Systematics

Independent student research under faculty supervision.

BIO 494R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Supervisor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of aquatic biology.

Veterinary Science

Independent student research under faculty supervision.

BIO 494R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Supervisor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of aquatic biology.

Top

Research Orientation

Introduction to graduate school and research techniques.

BIO 503

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Literature Databases

Create personalized literature databases and use these to correctly cite and format bibliographic information.

Effective CV

Generate an effective CV that targets their next level of employment.

Collaboration

Optimize opportunities available to them at scientific meetings to establish collaborative networks with other students, postdocs and faculty.

Poster and Presentation

Prepare an effective poster and oral presentation.

Grant Proposal

Prepare and submit a competitive grant proposal.

Publication Preperation

Prepare publication quality illustrations, figures, charts & graphs and eventually a manuscript for publication.

Media Communcation

Communicate their ideas effectively and appropriately through electronic media.

Lesson Plans

Devise an active learning lesson plan for effectively teaching a biological principle.

Biological Systematics and Curation

Principles, methods, and tools of taxonomy and systematics as applied to species delimitation, specimen-based research, nomenclatural codes, and the curation of biological specimens.

BIO 510

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Species

Students will be able to discuss species as the fundamental unit of biodiversity and the difference between species definitions and criteria used to delimit species.

Classification

Students will be able to discuss basic philosophies of classification and the relationship between classification, phylogeny, and nomenclature.

Nomenclatural Codes

Students will gain proficiency with nomenclatural codes and their relationship to specimen-based research products such new species descriptions, monographs, floras, and faunas.

Research Tools

Students will gain experience with a variety of specimen-based research tools.

Curation

Students will understand responsibilities of biological collections management and curation.

Lichenology

Classification, morphology, and ecology on lichens. Field trip required.

BIO 511

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research

Research and characterize the nature of the lichen symbiosis.

Working Knowledge

Develop a working knowledge of lichen biology.

Air Quality

Demonstrate an understanding of the role of lichens as biomonitors of air quality.

Basic Skills

Develop basic skills for collecting, processing, and identifying lichens.

Genetic Patterns

Develop basic skills with:
- Thin-layer chromatography – lichen secondary chemistry.
- Molecular techniques – to characterize genetic patterns and relationships at the population level.

Publication Preparation

Prepare research manuscripts for review and publication consideration.

Research Proposal

Present a research proposal for a project using lichens as air quality biomonitors.

Angiosperm Phylogeny

Description, classification, phylogeny, and geographic distribution of flowering plant families.

BIO 512

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Bio 430 or equivalent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Relationships Among Plants

Students will be able to discuss the primary pattern of relationships among flowering plants as supported by contemporary research.

Application

Students will demonstrate proficiency in tree-thinking and the application of phylogenetic terminology in discussing angiosperm relationships.

Knowledge of Diversity

Students will demonstrate knowledge of world-wide flowering plant diversity, including examples of model organisms, convergence, and evolutionary novelties.

Research

Students will be able to discuss contemporary research in flowering plant diversity, including outstanding problems where additional research is needed.

Top

Animal Disease, Biosecurity, and Zoonoses

Animal disease emphasizing prevention, organ systems affected, biosecurity, and zoonotic potential.

BIO 525

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Bio 380 or instructor's consent.
Taught	Winter

Course Outcomes

Comparative Pathophysiology

Comparative pathophysiology will be taught using canine, feline, bovine, ovine, caprine, equine, lab animals, and wildlife examples

Animal Pathophysiology

Understand basic animal pathophysiology of disease on an organ system basis and preventive measures to maintain animal health

Biosecurity Practices

Identify biosecurity practices to prevent animal disease

Avert Health Problems

Differentiate between zoonoses, sapronoses and anthroponoses and understand how to institute preventive measures and management practices to avert these health problems

Design Health Program

Design a herd health program with preventive measures that addresses nutrition, sanitation, housing, ventilation, lighting, and other components for a particular species the student wants to work with as a producer

Management Procedures

Understand how to institute good management procedures that can prevent the occurrence of animal disease

Animal Immunology

Develop a basic knowledge of animal immunology as it pertains to disease induction and prevention, with natural and artificial immunity practices that should be implemented to enhance disease prevention, and nutritional practices to optimize animal immunity

Aquatic Entomology

Morphology, classification, biology, and functional ecology of aquatic insects. Field trips required.

BIO 541

Hours	4.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Bio 441 or equivalent.
Taught	Fall even years

Course Outcomes

Appreciation for Diversity

Develop an appreciation for the diversity of the living aquatic insect world.

Becoming Better Stewards

Learn to become better stewards of the earth and its living inhabitants.

Understanding

Understanding of all aquatic biology.

Top

Evolutionary and Ecological Modeling

Using models in ecology. Practical experience in analytical, simulation, and agent-based models.

BIO 555

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Senior status in bioinformatics program or graduate status; Stat 511, 512, or equivalent; instructor's consent.
Taught	Winter even years

Course Outcomes

Theoretical Understanding of Modeling

Stuents will gain a theoretical understanding of the role of modeling.

Modeling in Evolution and Ecology

Students will understand the role that modeling plays in evolution and ecology

Building Models

Students will be able to build, test, and run models based on their area of research and interest.

Limnology

Lakes, reservoirs; their biota and physical/chemical properties.

BIO 556

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Bio 350, Chem 106; or equivalents.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Physical Processes

Understand the major physical processes that form and characterize lentic habitats.

Chemical Processes

Understand the dominant chemical processes that occur in lake systems.

Adaptation

Understand how organisms adapt to the above physical and chemical constraints.

Teaching Experience

Gain teaching experience through preparing a Powerpoint presenting your study presentation to the class.

Research Topic

Experience pursuing a focused research topic from the initial question to a competed report.

Top

Stream and Wetland Ecology

Stream and wetland ecology; their biota and their physical/chemical properties.

BIO 557

Hours	4.0 Credit, 3.0 Lecture, 4.0 Lab
Prerequisites	Bio 350, Chem 106; or equivalent.
Taught	Fall odd years

Course Outcomes

Streams and Wetlands

Develop an understanding of streams and wetlands within the broader context of ecology and conservation.

Conservation Issues

Become familiar with the major conservation issue in streams and wetlands and the underlying ecological concepts.

Current Literature

Initial exposure to the current literature.

Critical Thinking

Develop skills related to critical thinking. That is, learn how to: a) read critically and summarize information, b) draw conclusions and synthesize information to develop new questions and hypotheses, and c) design experiments or comparative studies. It is important to start early to learn how to think, read, and write critically.

Top

Advanced Ecology

BIO 559R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Ability to Interpret, Analyze, and Present Results

Students will effectively interpret, analyze, and present results of experimentation to others.

Top

Advanced Systematics

BIO 559R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Ability to Interpret, Analyze, and Present Results

Students will effectively interpret, analyze, and present results of experimentation to others.

Top

Advanced Topics in Ecology and Evolution

Current topics in ecology, evolution, and systematics.

BIO 559R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Ability to Interpret, Analyze, and Present Results

Students will effectively interpret, analyze, and present results of experimentation to others.

Top

Biogeography

BIO 559R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Ability to Interpret, Analyze, and Present Results

Students will effectively interpret, analyze, and present results of experimentation to others.

Top

Biological Science Education

Topics include epistemology, pedagogy, innovative curriculum, and scientific education research.

BIO 559R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Ability to Design and Implement Research

Students will demonstrate an ability to design and implement a research project physiological ecology.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of physiological ecology.

Top

Evolutionary Biology

BIO 559R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Understanding of Scientific Inquiry

Students will demonstrate an understanding of the methods of scientific inquiry.

Ability to Interpret, Analyze, and Present Results

Students will effectively interpret, analyze, and present results of experimentation to others.

Top

Field Biology

BIO 559R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Ability to Design and Implement Research

Students will demonstrate an ability to design and implement a research project physiological ecology.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of physiological ecology.

Physiological Ecology

BIO 559R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Ability to Design and Implement Research

Students will demonstrate an ability to design and implement a research project physiological ecology.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of physiological ecology.

Top

Tropical Biology

BIO 559R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Ability to Design and Implement Research

Students will demonstrate an ability to design and implement a research project physiological ecology.

Appreciation and Understanding of Content

Students will show an appreciation for and understanding of physiological ecology.

Population Genetics

Basic principles of population genetics applied to natural populations; drift, selection, and nonrandom mating; inferring population subdivision, migration, and gene flow.

BIO 560

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Bio 420 or equivalent.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Introduction

Students will gain a general introduction to the field a population genetics.

Application

Students will experience the broad application of population genetics to diverse fields from ecology to medicine.

Analyze Data

Students will manipulate and analyze population genetic data, especially molecular data.

Top

Scanning Electron Microscopy

Theoretical and practical scanning electron microscopy of biological, physical science, and engineering samples, emphasizing practical applications.

BIO 580

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Prepare Specimens

Students will be able to prepare specimens for the ESEM.

Collect Data

Students will be able to collect publishable data from the ESEM.

Research Presentation

Students will make a presentation of the research they conducted on the ESEM.

Transmission Electron Microscopy

Theoretical and practical transmission electron microscopy of biological, physical science, and engineering samples, emphasizing practical applications.

BIO 581

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Perform Specimen Preparation

Students will be able to perform routine biological specimen preparation.

Operate the TEM

Students will be able to operate the Transmission Electron Microscope to acquire images.

Interpret and Present Data

Students will be able to appropriately interpret and present TEM data.

Understanding of Transmission Electron Microscopy

Students will understand the reasons for various techniques that are used, the major components of the microscope, and the several applications of the technology.

Top

Advanced Science In-Service

In-service course for science teachers. Topics vary.

BIO 589R

Hours	1.0 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Summer

Course Outcomes

Application

Students will use the skill and knowledge they have learning in their program in an Advanced Science In-service project.

Top

Botany Science In-Service

In-service course for science teachers.

BIO 589R

Hours	1.0 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Summer

Course Outcomes

Understanding and Skills

Students will deepen understanding and skills as outlined in individualized contract between student and professor.

Advanced Knowledge

Students will demonstrate an advanced level of knowledge in a chosen specialty area

Focused Knowledge

Students will improve their understanding of a focused topic through mentored inquiry and the completion of related writing or design activity

Top

Ecology Science In-Service

In-service course for science teachers.

BIO 589R

Hours	1.0 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Summer

Course Outcomes

Understanding and Skills

Students will deepen understanding and skills as outlined in individualized contract between student and professor.

Specialty Knowledge

Students will demonstrate an advanced level of knowledge in a chosen specialty area

Focused Topic Knowledge

Students will improve their understanding of a focused topic through mentored inquiry and the completion of related writing or design activity

Top

Evolution Science In-Service

In-service course for science teachers.

BIO 589R

Hours	1.0 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Summer

Course Outcomes

Understanding and Skills

Students will deepen understanding and skills as outlined in individualized contract between student and professor.

Advanced Knowledge

Students will demonstrate an advanced level of knowledge in a chosen specialty area

Focused Knowledge

Students will improve their understanding of a focused topic through mentored inquiry and the completion of related writing or design activity

Top

Genetics Science In-Service

In-service course for science teachers.

BIO 589R

Hours	1.0 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Summer

Course Outcomes

Understanding and Skills

Students will deepen understanding and skills as outlined in individualized contract between student and professor.

Advanced Knowledge

Students will demonstrate an advanced level of knowledge in a chosen specialty area

Focused Knowledge

Students will improve their understanding of a focused topic through mentored inquiry and the completion of related writing or design activity

Top

Meterology Science In-Service

In-service course for science teachers.

BIO 589R

Hours	1.0 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Summer

Course Outcomes

Understanding and Skills

Students will deepen understanding and skills as outlined in individualized contract between student and professor.

Advanced Knowledge

Students will demonstrate an advanced level of knowledge in a chosen specialty area

Students will improve their understanding of a focused topic through mentored inquiry and the completion of related writing or design activity

Top

First-Year Bulgarian

Basic language skills.

BULGN 101

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

First-Year Bulgarian

Basic language skills.

BULGN 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	BULGN 101
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Comprehension

Understand written and spoken target language relating to familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

Second-Year Bulgarian

Grammar review and conversation.

BULGN 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	BULGN 102
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Vocabulary

Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Elaboration

Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Grammar

Review and increase understanding of basic language structures.

Culture

Discuss in the target language common products and practices related to every-day life in the target culture.

Second-Year Conversation

Intermediate listening comprehension and speaking skills.

BULGN 211R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	BULGN 201
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Conversation

Speak comfortably about predictable, familiar topics related to daily activities; this includes the ability to Initiate, maintain, and close simple conversations and to ask and respond to simple questions.

Survival Transactions

Carry out "survival" transactions (shopping, getting directions, ordering meals, etc.)

Pronunciation and Accuracy

Be understood by native speakers accustomed to dealing with non-native speakers.

Cultural History of Bulgaria

Entry course for returned missionaries or others with extensive Bulgarian language experience.

BULGN 330

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Bulgn 201 or foreign residence experience.
Note	Required course for obtaining language credit by examination (Bulgn 101, 102, 201, 211R). Culminating course for Languages of Learning requirement.
Taught	

Course Outcomes

Communication skills

In both written and spoken target language, communicate accurately with well educated members of the target-culture about real-world activities.

Comprehension

Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Cutlural Knowledge

Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

General Education Requirements

Complete language and cultural aspects of General Education "Languages of Learning" and "Global & Cultural Awarness" requirements.

Top

Introduction to Entrepreneurship

Is entrepreneurship for you? Basics of entrepreneurship, its importance to society, opportunities to pursue a startup company, and impact on future careers.

BUS M 170

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Business Career Lecture Series

Lecture series exploring various business career alternatives.

BUS M 180

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Ethical challenges and choices

Recognize and resolve ethical challenges and choices in specific organizational contexts.

Commitment to living principles of gospel

Strengthen one's commitment to living the principles of the restored gospel in all circumstances, personal and professional.

Leadership

Understand how leadership can be practiced at every level in an organization and at every stage of one's life.

Career Alternatives

Understand the important relationship between lifestyle decisions and career decisions.

Top

Academic Internship

Supervised experience for nonbusiness students either in service or business-related work.

BUS M 199R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Consent of internship coordinator.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Demonstrate proficiency in analyzing management problems, developing solutions, and implementing recommendations as assigned by the sponsoring organization.

Professionalism

Demonstrate appropriate managerial professionalism through responsible actions, thorough analysis, and meeting deadlines.

Ethics

Demonstrate ethical behavior in completing assigned tasks and responsibilities.

Top

Financial Management

Financial statement analysis, financial planning, sources of financing, working capital management, risk and return, and valuation.

BUS M 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Acc 200 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Fundamental Analysis

Use fundamental analysis to conduct a firm performance evaluation.

Financial Forecast

Construct a financial forecast for a term.

Time Value of Money

Employ time value of money to solve common financial problems.

Capital Budgeting

Make corporate investment decisions using capital budgeting.

Computing Value

Be able to value firms, bonds, and stocks.

Entrepreneurial and Corporate Finance

Understand how entrepreneurial and corporate finance differ.

Top

Planning for Financial Security at Retirement

Fundamentals of good financial management necessary for successful retirement.

BUS M 205R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Financial Perspective

Understand a point-of-choice orientation to retirement planning and financial storehouse accumulation and maximum sharing opportunities.

Planning Strategies

Utilize personal planning strategies that are behaviorally, spiritually, and financially efficient.

Wealth Accumulation

Focus on wealth accumulation potential of personal resource management.

Technologies

Use state-of-the-art financial technology and information sources.

Analysis

Learn investment tools, theory, and techniques that maximize potential return while minimizing downside risk.

Application

Be able to protect financial assets from creditors and taxes.

Estate Plan

Develop an estate plan that produces legacy that thrives as assets are passed to future generations.

Top

Marketing Management

Marketing's role in society and the firm, marketing opportunities, the consumer market, and management of marketing mix.

BUS M 241

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Independent Study also.

Course Outcomes

Using marketing tools to create value for customers

Understand the fundamental components and tools of marketing and how each relates to creating and sustaining value for customers.

Analyzing marketing strategies

Describe how specific firms (1) select target markets, (2) specify their marketing mix, and (3) attempt to attract and retain the right customers.

Designing a marketing plan

Design a marketing plan for a new venture by applying the appropriate tools and approaches studied

Introduction to Global Supply Chain Management

Introduces global supply chain management: how firms work with other firms, often foreign firms, to deliver value to customers. Also discusses the global production of goods and services, which is operations management. Topics include process design, quality assurance, purchasing, inventory management, and more.

BUS M 260

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	For nonmanagement majors.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Analysis

Analyze management models utilizing tools and technology.

Knowledge

Recognize and explain basic differences between US supply chain processes and philosophies and those used in other countries.

Top

Legal Issues in Entrepreneurship

Legal risks faced by entrepreneurs. How to plan for and avoid legal problems including forming the business, legal liability, and protecting assets.

BUS M 277

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Understanding contracts and obligations

Understand contracts and obligations and how to manage them.

Strategic uses of the law

Use of the law as a strategic tool.

Limiting liability

Identify sources of business liability and how to limit it.

Sustaining ethical values

Develop and sustain a sense of ethical values.

Career Orientation and Preparation

Student orientation and preparation for careers in management.

BUS M 320

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into Marriott School.
Note	Must be taken first semester in Marriott School.
Taught	Fall, Winter

Course Outcomes

Resources Available

Introduce students to the resources, services, and opportunities available in the Marriott School and provide skills that will help them in their job search

Career Plan Development

Create a Career Plan that will direct students to their “first job” and “future career” and research sources to help narrow down their interests into a future career

Academic Alternatives

Explain the various emphases and programs in the Marriott School and the opportunities that each one offers

Job Search

Direct students in creating a resume, refining interviewing skills, and understanding the importance of networking.

Mentor Program

Discussions with outside mentor about career opportunities.

BUS M 321

Hours	0.5 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into Marriott School.
Note	Must be taken first semester in Marriott School.
Taught	Fall, Winter

Course Outcomes

Networking Importance

Understand the importance of networking as they interact with professionals in the student's area of interest as well as learn from the perspective of a business professional.

Networking Skills

Develop the skill of networking and learn the value of mentoring as they interact with the mentor in an interview experience and discuss various topics with the mentor.

Marketing Management

Market segmentation, product service, promotion, channel, pricing strategies. Marketing principles in consumer and industrial markets, profit and nonprofit organizations, domestic and international companies, and small and large firms.

BUS M 341

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into the Marriott School.
Taught	Fall, Winter, Spring

Course Outcomes

Concepts and Terms

Students will learn and understand key marketing concepts and terms.

Market Research

Students will understand the market research process and understand models of market research.

Create a Marketing Plan

Students will create and write a marketing plan for a product or service.

Current Marketing Techniques

Students will study current marketing techniques in the business world.

Operations Management

Examining issues and tools in production and operations management. Specific tools for forecasting, planning, inventory control, and project management presented and developed. Process design and improvement in both manufacturing and service organizations.

BUS M 361

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into the Marriott School.
Taught	Fall, Winter, Summer

Course Outcomes

Management Models

Analyze management models utilizing tools and technology.

International Supply Chain Philosophies

Recognize and explain basic differences between US supply chain processes and philosophies and those used in other countries.

Collaboration

Demonstrate the ability to work in teams.

Supply Chain Ethics

Recognize ethical issues in global supply chain relationships.

Top

Entrepreneurship Lecture Series

Lectures by successful entrepreneurs on subjects significant to entrepreneur-type opportunities.

BUS M 371R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Commitment to living prnciples of gospel

Strengthen one's commitment to living the principles of the restored gospel in all circumstances, personal and professional.

Leadership

Understand how leadership can be practiced at every level in an organization and at every stage of one's life

Ethical challenges and choices

Recognize and resolve ethical challenges and choices in specific organizational contexts.

Marriott School Lecture Series

BUS M 371R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Ethical challenges and choices

Recognize and resolve ethical challenges and choices in specific organizational contexts.

Commitment to living prnciples of gospel

Strengthen one's commitment to living the principles of the restored gospel in all circumstances, personal and professional.

Leadership

Understand how leadership can be practiced at every level in an organization and at every stage of one's life

Women Entrepreneurs

Lectures by successful women entrepreneurs on subjects significant to entrepreneur-type opportunities for women.

BUS M 371R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Commitment to living prnciples of gospel

Strengthen one's commitment to living the principles of the restored gospel in all circumstances, personal and professional.

Leadership

Understand how leadership can be practiced at every level in an organization and at every stage of one's life

Ethical challenges and choices

Recognize and resolve ethical challenges and choices in specific organizational contexts.

Top

Basic Entrepreneurship Skills

Practical aspects of business formation and growth; key skills and principles needed to successfully start up and grow a business.

BUS M 372

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	For non-Marriott School of Management students.
Taught	Fall, Winter, Spring

Course Outcomes

Founding Team

Participate effectively on an entrepreneurial founding team and help create a start-up business.

Start-up Strategies

Formulate strategies to overcome common start-up business challenges.

Entrepreneurial Spirit

Write self-reflective papers on a variety of business topics, articles, and books in order to help them discover their entrepreneurial spirit.

Decision-Making Cases

Understand and apply entrepreneurial terminology, global enterprise issues, and ethical decision-making to business cases.

Top

Social Innovation: Do Good Better

Focuses on the most prominent approaches used in social innovation and entrepreneurship. Students develop skills in analyzing social ventures, including root cause analysis, solution evaluation, and social impact measurement; and leave with the confidence to pursue a life of purpose.

BUS M 375

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Mapping the current environment of social entrepreneurship

Demonstrating a working knowledge of this environment--the issues at stake, the types of social ventures that have recently been created, and the current state of the social-economic ecosystem.

Analyzing a social venture

Show the ability to analyze a social venture you may be interested in working with. Apply relevant tools and concepts gleaned from other course work and personal/professional experience.

Top

Executive Lectures

Lectures by top executives on subjects significant to executive leadership.

BUS M 380

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Ethical Challenges

Recognize and resolve ethical challenges and choices in specific organizational contexts.

Commitment to living gospel principles

Strengthen one's commitment to living the principles of the restored gospel in all circumstances, personal and professional.

Leadership

Understand how leadership can be practiced at every level in an organization and at every stage of one's life.

Financial Services Lecture Series

Lectures by executives on financial services topics.

BUS M 382

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Ethical Challenges

· Recognize and resolve the typical ethical challenges that confront people working in financial services

Spiritual Commitment in work life

Strengthen one's commitment to living the principles of the restored gospel in all circumstances, personal and professional.

Leadership

Understand how leadership can be practiced at every level in an organization and at every stage of one's life.

Career Awareness

Understand the major career pathways that can be pursued with academic training in finance.

Economics of Strategy

Economic tools influencing the success of strategy (creation and appropriation of value) emphasizing application of economic theory to management of practice.

BUS M 387

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major or strategy minor status.
Taught	Fall, Winter

Course Outcomes

Strategic Reasoning

Develop strategic reasoning ability.

Team Skills

Demonstrate team skills through active participation in group discussions and projects and the assumption and exercise of responsibility in a collaborative mode

Economic Analysis

Acquire skill in applying the tools of economic analysis to management problems

Competive Environments

Develop competent understanding of competitive environments, competitive rivalry, cost, entry, and demand & supply

Ethics for Management

Analyzing ethical dilemmas and understanding ethical theories as they apply to decision making in management.

BUS M 390

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Premanagement and Management 1 cores and full acceptance into the Marriott School upper-division major.
Taught	Fall, Winter, Spring

Course Outcomes

Common Ethical Issues

Identify and address common ethical issues that arise for individuals, managers, and organizations.

Resolve Ethical Dilemmas

Use contemporary and classic frameworks to analyze and suggest resolutions to ethical dilemmas.

Influences in Judgement

Recognize how individual differences and cognitive barriers can influence ethical judgment.

Organizational Systems and Ethics

Identify key organizational tools, policies, systems, and laws that apply to managing ethical conduct.

Personal Values

Identify and prioritize personal values and apply those to making ethical decisions.

Top

Introduction to International Business

Complexities confronting U.S. firms and their management in international environments. Emphasizes functional and planning areas, including organization, market research, financial analysis.

BUS M 430

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Summer

Course Outcomes

International Business Patterns

Gain an overview of current international business patterns, with an emphasis on what makes international business different from domestic business.

International Social Systems

Understand the social systems within countries as they affect the conduct of business from one country to another.

Develop Critical Thinking

Learn to develop your critical thinking as a student of international business, create power point presentations and present the content to the class.

Analyze, Apply, Articulate

Analyze cases, apply business principles to international settings, and articulate findings within the classroom.

Top

International Marketing

International market entry strategies, export marketing, joint ventures, and other market entry modes. Regional/National markets; cultural, political, legal environments. Negotiations, trade financing, marketing mix.

BUS M 431

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 241; or BUS M 341; Major status.
Recommended	Bus m 430.
Taught	Fall, Winter

Course Outcomes

Marketing Concepts

Demonstrate verbal/ written case method skills related to international marketing.

Marketing Concepts

Apply relevant marketing concepts in current, cross-cultural and/or global contexts.

Managing Foreign Market

Be prepared to enter and succeed as a manager in a foreign market.

Database Marketing: Mining and Analysis

Key issues in managing and developing online marketing databases for segmenting markets and developing marketing tactics. In-depth development of data mining techniques and advanced statistical analysis

BUS M 440

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 241; Major status.
Taught	Fall

Course Outcomes

Knowledge

Students will deepen their understanding of Supply Chain nand Operations.

Top

Marketing Research

Concepts and methodology for conducting marketing research. Emphasis on solving problems faced by the marketing manager. Consulting research project required.

BUS M 442

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 241; or BUS M 341; Major status.
Taught	Fall, Winter Contact Department

Course Outcomes

Marketing Research Processes

Understand and implement the marketing research process.

Backward Marketing Research

Understand and implement “backward” marketing research.

Researching Techniques

Understand and employ qualitative and quantitative research techniques.

Survey Methodology

Design and implement a survey methodology to maximize response and response accuracy.

Analytic Methods

Understand and implement basic analytic methods.

Research and Recommendations

Formulate answers to research objectives and make meaningful business recommendations.

Job-Hunting Skills

Gain skills and confidence that will separate you from your competitors in a job hunt.

Positive Learning Experience

Have fun and a positive learning experience.

Consumer Behavior

Mental and emotional processes and physical actions that people engage in when selecting, purchasing, using, and discarding products and services to satisfy consumer needs and desires.

BUS M 444

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 241; or BUS M 341; Major status.
Taught	Fall, Winter Contact Department

Course Outcomes

Abstract Consumer Behavior Theories

Students should learn how to apply abstract consumer behavior theories to specific business situations.

Understanding Theories

Students should understand theories in the following consumer behavior realms: fundamental consumer needs, information processing, persuasion, and post-consumption evaluation.

Group Work

Students should learn to work more effectively in groups.

Effective Communication

Students should learn to communicate more effectively (both orally and in writing).

Global Business Negotiations

Developing an effective negotiation framework for cross-national/cultural negotiation techniques relative to business and other life situations.

BUS M 450

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 241; or BUS M 341; Major status.
Taught	Winter

Course Outcomes

Understanding Concepts

Understand and apply concepts of BATNA, ZOPA, etc.

Cultural Factors

Understand and apply cultural factors.

Conduct Negotiations

Conduct a negotiation in a cultural setting other than the US.

Negotiating Strategies

Learn negotiating strategies to strengthen your position.

Integrative Negotiating

Conduct a successful integrative negotiation.

Impromptu Negotiating

Conduct an impromptu negotiation.

Top

Professional Selling and Sales Management

Concepts of professional selling and sales management including personal selling skills; strategic role of personal selling; organizing, directing, controlling, and evaluating the sales force.

BUS M 454

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 241; or BUS M 341; Major status.
Taught	Fall, Winter

Course Outcomes

Professional Selling

To demonstrate a professional orientation toward professional selling.

Develop Communication Skills

To develop communication skills to effectively sell your ideas, products, and services "without making an enemy."

Sales Leadership Skills

To gain sales leadership skills that will influence personal and professional life.

Advertising and Promotion Management

Strategies in promoting business and nonbusiness products, services, and institutions, including the role of advertising, promotion, target selection, media and copy decisions, and marketing research.

BUS M 455

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 241; or BUS M 341; Major status.
Taught	Fall

Course Outcomes

Plan, design, evaluate marketing communications

Students will develop critical professional skills to plan, design, and critically evaluate marketing communications.

Create and communicate a creative brief

Students will effectively create and communicate critical components of a creative brief.

calculate financial Impact of marketing communications and t

Students will become proficient in calculating the financial impact of marketing communications and trade promotions on the firm.

Evaluate legal and ethical issues

Students will understand the social, legal and ethical considerations involved in the promotional planning process.

Top

Retailing Management

Selection, location, and management of retail stores and systems, emphasizing profitability and integration of accounting, finance, and economic concepts and tools.

BUS M 456

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 241; or BUS M 341; Major status.
Taught	Fall

Course Outcomes

Key Retail Concepts

Understand the key concepts and current developments within retailing management.

Problem Solving

Solve common retail problems using the principles of marketing research and other tools used to analyze market opportunities and consumer purchasing.

Channel Strategies

Understand the complexity of retail channels used as alternative routes to market, and evaluate the merits of alternative channel strategies for different types of retail businesses.

Internet Marketing of Products and Services

Integrates product, research, sales, and promotional strategy and concepts into an overall marketing plan for developing an Internet business. Term project developing an Internet business required.

BUS M 457

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 241; or BUS M 341; Major status.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Ecommerce Business Models

Understand the similarities and differences among various ecommerce business models, including online retail, online media, lead generation, and online marketplaces.

Search Engine Optimization

Understand how search engines work. Use this knowledge to make recommendations to a website on how it can improve its organic search rankings – in other words, perform search engine optimization on a website.

Search Engine Marketing

Understand the mechanics of paid search ranking. Create a search engine marketing campaign and evaluate its effectiveness. Recommend changes that will improve the campaign's conversion rates.

Top

Marketing Strategy

Integration of finance, marketing, and case studies in economic concepts and techniques in marketing decision making and planning.

BUS M 459

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 241 & BUS M 442; Major status.
Taught	Fall, Winter

Course Outcomes

Fundamental Marketing Strategies

A demonstrated knowledge of fundamental marketing strategies and tactics as demonstrated via classroom discussion, individual and team assessments, and peer-to-peer training presentations. For example:
Analyzing current and potential markets to determine their market attractiveness
Knowing and applying appropriate marketing strategies based on market attractiveness and relative firm strength
Break-even, Net Marketing Contribution, Marketing ROI, Marketing ROS

Integrating Marketing Training

Integrating previous marketing training into a systematic whole by applying that knowledge to case analysis. For example:
Creating integrated product positioning by carefully combining all four Ps of the marketing mix
Interpreting the results of a conjoint market research study and using those insights to create marketing strategy
Understanding that customers are often different than I am and they need to be understood in their own voice and on their own terms

Effective Team Management

Demonstrating effective team management by producing quality deliverables (case memos, simulation performance, and corporate training presentations) conceived and created through team collaboration.

Develop Effective Tactical Responses

Effectively identifying core problems, create strategic solutions, and implement effective tactical response as demonstrated in case decisions.

Improving Written and Oral Communication

Improving written and oral communication skills through written case assignments and in-class presentations.

Operations Analytics

Methods and tools necessary for analyzing and solving problems associated with global supply chain management.

BUS M 461

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 361; Major status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Using analytic tools effective

Correctly use the chosen analytic tool.

Making recommendations

Explain the quantitative results and present recommendations effectively.

Customer Relationship Management

Methods and principles for effective management of customer relationships within service businesses. Analyzing customer-interactive processes with regard to strategic innovation, performance measurement and improvement, process efficiency, interactive job design, service marketing, and service quality assurance.

BUS M 462

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Services Management

Learn principles that lead to successful services management.

Understand Analytical Frameworks

Understand analytical frameworks that provide rigor to your study of services.

Service Principles and Analytical Frameworks

Apply service principles and analytical frameworks to actual business situations.

Enrichment Project

Complete an enrichment project that demonstrates your ability to use your knowledge in making significant business decisions.

Services Management

Management principles and characteristics of service industries and service aspects of supply chains: sources of strategic advantage; process analysis and tools; quality.

BUS M 462

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 361; Major status.
Taught	Winter

Course Outcomes

Services Management

Learn principles that lead to successful services management.

Understand Analytical Frameworks

Understand analytical frameworks that provide rigor to your study of services.

Service Principles and Analytical Frameworks

Apply service principles and analytical frameworks to actual business situations.

Enrichment Project

Complete an enrichment project that demonstrates your ability to use your knowledge in making significant business decisions.

Top

Quality Management

Concepts of quality management, strategic issues, philosophies, and tools such as Six Sigma and SQC used to control quality.

BUS M 463

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Bus M 361; major status.
Taught	Fall

Course Outcomes

Recommend Solutions

Apply a contingency theoretic approach in recommending solutions to quality problems.

Supply Chain

Understand how to implement quality tools and concepts in a supply chain.

Excel

Develop basic control charts in Excel.

Quality Tools

Apply basic quality tools to specific quality challenges.

Top

Global Supply Chain

The emerging rules of a global marketplace and their influence on key supply chain activities and processes.

BUS M 465

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 361; Major status.
Taught	Fall

Course Outcomes

Purchasing in global supply chain and operations

This course has not been offered for several years, and has been superceded by an update course on this topic.

Purchasing and Supply Management

Focuses on upstream supply chain activities of supplier selection, management, and development. Negotiation, costing, product development, and commodity analysis.

BUS M 466

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Bus M 361; major status.
Taught	Fall

Course Outcomes

Commodity Plan

Be able to create and utilize a commodity plan.

Understanding Costs

Understand direct and indirect costs, fixed, step, and variable costs, target costs, and various ways to perform cost analyses.

Ethical Professional Standards

Describe the ethical and professional standards expected among supply management professionals.

Supply Chain Logistics

Integration of materials management (inbound transportation), physical distribution (outbound transportation), inventory, warehousing, facility location, customer service, packaging, and materials handling.

BUS M 468

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Bus M 361; major status.
Taught	Fall

Course Outcomes

Warehouse and Distribution Management

Be able to discuss the general principles and concerns of Warehouse and Distribution management.

Transportation Management

Be able to discuss the general principles and concerns of Transportation Management.

Shipping Documentation

Be familiar with the documentation required for domestic and international shipping.

Logistics

Be familiar with miscellaneous logistics concepts including, global logistics, humanitarian logistics, and sustainability.

Top

Global Supply Chain Strategy

Integrative and creative problem solving in designing and managing cohesive value-added conversion/transformation systems in a global environment.

BUS M 469

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 361; Major status.
Taught	Fall

Course Outcomes

Teamwork

Demonstrate anxious engagement, as an individual and as a member of a team.

Risk Assessment

Learn how to take good risks.

Communications

Demonstrate persuasive communication skills.

Supply Chain

Increase knowledge of Supply Chain theory, strategy, and practice.

Top

Entrepreneurial Innovation

Finding and validating ideas for innovative new ventures with a focus on customer pain, elegant solutions, and markets.

BUS M 470

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Creating New Ventures

Learning the critical skills to create a successful new venture by validating an initial idea and business model in the field.

BUS M 471

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 470
Taught	Winter

Course Outcomes

Entrepreneurial Founding Team

Participate effectively on an entrepreneurial founding team.

Evaluating Business Ideas

Evaluate business ideas, opportunities, and plans.

Financial Business

Plan the financial aspects of a new business.

Top

Entrepreneurial Marketing

Marketing strategies for start-up companies. Topics include marketing to investors, internal marketing, and how to market products/services without a marketing budget.

BUS M 472

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 341; or BUS M 241; Major status.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Basic Entrpreneurial Skills

Exhibit knowledge of basic entrepreneurial marketing skills—learn how to make "competitive angles" that make competitors irrelevant.

Marketing Tactics

Be able to introduce new products and formulate marketing tactics for startup companies on a limited budget.

Marketing Consultant Skills

Develop the mindset and qualitative and quantitative skills to effectively become a marketing consultant for startup firms.

Managing New Ventures and Family Business

How to operate, grow, and exit new ventures and family-owned businesses following their creation and funding. Consulting project required.

BUS M 474

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Three systems of an Entrepreneurial Firm

Describe the three systems of an entrepreneurial firm: Business, Family, and Governance

Specific Recommendations for Improvement

Recommend specific ways to improve each of the systems of an entrepreneurial firm.

Diagnosing problems.

Each student should be able to diagnose the problems that a family business and/or entrepreneurial firm has concerning the business, governance, and family systems.

Problem Solving Recommendations

Be able to articulate recommendations to solve those problems.

Top

Financing New Ventures

Concepts and skills of entrepreneurship, emphasizing how new and emerging companies are financed. Applying functional tools to case situations.

BUS M 475

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Business management core; major status.
Taught	Fall, Winter

Course Outcomes

Entrepreneurial Perspective

Apply the entrepreneurial perspective to make better decisions in analyzing or creating a business venture.

Effective Management Practices

Apply effective entrepreneurial and general management practices from the perspectives of the founder and vital stakeholders.

Developing Business Opportunities

Analyze business opportunities and develop them into investment grade businesses.

New Venture LaunchPad

Launching actual new ventures. Mentored learning of idea validation, business models, minimum viable products, and financing plans. Good preparations for participating in BYU's entrepreneurial competitions.

BUS M 476

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	Fall, Winter

Course Outcomes

Innovation

Create value through innovation.

Business Plans

Create and write effective business plans.

Communication Skills

Sell an idea and communicate effectively with employees, partners, manufacturers, investors, and Venture Capitalists.

Internet Technology

Utilize internet technology to find opportunities, conduct analysis, create buzz, attract customers, and market new products/services.

Ethical Leadership

Manage ethically and serve as ethical leaders in the business community.

Top

Innovation Practicum

Interdisciplinary perspectives and practice in innovation emphasizing discovering and commercializing new ideas in interdisciplinary teams.

BUS M 478A

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Winter

Course Outcomes

Generating and testing ideas

Demonstrate the ability to collaboratively design and test ideas for a new venture, and limit the options to a single, implementable design.

Applying the innovation process to create prototypes

Apply the innovation process to advance ideas from concepts to customer-validated prototypes

Working in an interdisciplinary team

Demonstrate the ability to work effectively in an interdisciplinary team--working through the phases of both product development, and team development.

Top

Advanced Innovation Practicum

Interdisciplinary perspectives and practice in innovation emphasizing discovering and commercializing new ideas in interdisciplinary teams.

BUS M 478B

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 478A
Taught	Fall

Course Outcomes

Advancing the process

Apply the innovation process as the team's ideas mature and change.

Legal, financial and organizational issues

Reflect an immerging understanding of the legal, financial and organizational issues faced by a new venture.

Top

Strategy 1

Structured problem solving, strategic thinking, and basic strategy concepts to prepare students to analyze and understand the sources of competitive advantage and superior firm performance.

BUS M 480

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	Winter

Course Outcomes

Major Elements of Strategy

Recall, explain, and give examples of the major elements of strategy and the drivers of competitive advantage.

Applying Analytical Models

Apply analytical models to complex business situations and generate strategic recommendations.

Analyzation and Strategy Formulation

Critically analyze the external and internal environments of a business organization and formulate appropriate strategies.

Problem Solving Skills

Demonstrate problem solving skills by developing hypotheses about the effect of data analysis on strategic decisions.

Team Skills

Demonstrate team skills through active participation in group projects and the assumption and exercise of responsibility in a collaborative mode.

Effective Communication

Communicate effectively, both orally and in writing, concerning strategy concepts, models, and analyses.

Strategy 2

Advanced strategy topics such as growth and diversification strategy, pricing strategy, game theory and competitor analysis, strategy as real options, and strategic flexibility and commitment.

BUS M 481

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 480
Taught	Fall

Course Outcomes

Strategic Observation

Appreciate the complexity, nuance, and differences across contexts in strategic situations

Strategic Analysis

Develop creative analytical approaches to test hypotheses in strategic settings

Strategic Knowledge

Understand competitive, especially Schumpetterian and evolutionary, dynamics

Strategic Aptitude

Develop effective strategy for firms through competent analysis and logic

Presentation Skill

Learn to develop "CEO-ready" strategy presentations and effectively express points of view on complex cases

Teamwork

Demonstrate collaborative and participatory skills

Top

Strategy Implementation

Integrative course on strategy formulation and implementation, including a field study. Topics include organizational alignment (structure and processes that fit the stragety), change management, and strategic leadership.

BUS M 482

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 481
Taught	Winter

Course Outcomes

Synthesize a Holistic View.

To provide an opportunity for you to combine the analytical output of several of these tools and ***synthesize*** a holistic view of a larger business problem through a personal paper and an end of semester in-depth project.

Top

Topics in Strategy

Topics and instructors vary.

BUS M 483R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	

Course Outcomes

Applying strategy tools to specific firms

Demonstrate a working knowledge of a core stratetgy tool or concept as it applies to a specific firm or industry.
Conduct and appropriate analysis and formulate a recommendation.

Top

Agribusiness Management 1

Concepts, tools, and approaches to understanding competitive forces and the development of sustainable competitive advantage for firms in the food, fiber, and horticulture industries.

BUS M 488

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ACC 200 & BUS M 201 & ECON 110; or ACC 200 & FIN 201 & ECON 110
Taught	Fall

Course Outcomes

Understand

Understand the concepts and models of strategic management presented in the course.

Appreciate

Appreciate the roles, responsibilities, and potential influence of business leaders.

Develop

Further develop the personal sense of ethics and integrity that guide decision making in business, community, church, and family relationships.

Analyze

Analyze the competitive situation facing a firm using the models of strategic management presented in class.

Apply

Apply the models of strategic management presented in the course to arrive at recommendations that will help organizations achieve and sustain competitive advantage.

Communicate

Persuasively communicate analytical conclusions and recommendations in verbal and written form.

Group Work

Effectively participate in group work.

Agribusiness Management 2

Developing and implementing marketing plans and programs for companies participating in the value chain of agribusiness industries.

BUS M 489

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ACC 200 & BUS M 201 & ECON 110; or ACC 200 & FIN 201 & ECON 110
Taught	Winter

Course Outcomes

Understanding Tools of Marketing

Students will understand the fundamental components and tools of marketing and how each relates to creating and sustaining value for customers in life sciences industries.

Targeting Markets

Describe how life sciences firms (1) select target markets, (2) specify their marketing mix, and (3) attempt to attract and retain the right customers.

Market Research

Students will understand the basics of the market research process.

Current Marketing Techniques

Students will study current marketing techniques in life sciences-based industries.

Applying Moral Values

Students will learn to apply faith-based, moral reasoning and personal integrity in professional life.

Teamwork and Communication

Students will learn to work effectively within a team and to communicate effectively in business environments.

Top

Real Estate Investment Analysis

BUS M 490R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

Topics in Business Management

Current business-related topics varying by semester and section.

BUS M 490R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None

Top

Social Innovation Projects

Direct, practical on-campus (not in the field) and off-campus experience consulting with established and recognized social innovators and their social ventures. Students are accepted to work on specific projects based on their skills. Students apply to be involved in specific projects. Credit offered will depending upon the project's scope and intensity.

BUS M 491R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter

Course Outcomes

Skills

Demonstrate an understanding and appreciation of the social innovation and social entrepreneurship environment and ecosystem.
Demonstrate ability to analyze and contribute to organizational and managerial success as assigned by the consulting organization.

Professionalism

Demonstrate appropriate project, organizational, and managerial professionalism through responsible actions, deadline completion, and final project completion.

Ethics

Demonstrate ethical behavior in team effort and with project provider.

Teamwork

Demonstrate ability to be an effective team member and contribute to overall team success.

Top

On-Campus Experiential Projects

Direct, practical on-campus (not in the field) professional experience consulting with established and startup companies and organizations. Students are accepted to work on specific projects based on their skills, interests, and major emphasis. Students apply to be involved in specific projects.

BUS M 494R

Hours	3.0 Credit, 1.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Skills

Demonstrate proficiency in analyzing management problems, developing solutions, and implementing recommendations as assigned by the sponsoring organization.

Professionalism

Demonstrate appropriate managerial professionalism through responsible actions, thorough analysis, and meeting deadlines.

Ethics

Demonstrate ethical behavior in completing assigned tasks and responsibilities.

Top

E-Business Projects

Consulting/Field studies projects in e-business.

BUS M 495R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Skills

Demonstrate proficiency in analyzing management problems, developing solutions, and implementing recommendations as assigned by the sponsoring organization.

Professionalism

Demonstrate appropriate managerial professionalism through responsible actions, thorough analysis, and meeting deadlines.

Ethics

Demonstrate ethical behavior in completing assigned tasks and responsibilities.

Academic Internship

Supervised experience for business majors either in service or business-related work. Opportunity to link learning with practical field applications.

BUS M 496R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Consent of internship coordinator.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Demonstrate proficiency in analyzing management problems, developing solutions, and implementing recommendations as assigned by the sponsoring organization.

Professionalism

Demonstrate appropriate managerial professionalism through responsible actions, thorough analysis, and meeting deadlines.

Ethics

Demonstrate ethical behavior in completing assigned tasks and responsibilities.

Investment Banking Internship

BUS M 496R

Hours	0.5 - 1.5 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Asset Pricing Theory

Provide students with a rigorous foundation for asset pricing theory.

Matlab Familiarity

Become familiar with Matlab as a tool for solving financial problems.

Dynamic Programming Methods

Gain exposure to dynamic programming methods (numerical as well as analytical).

Generalized Method of Moments

Gain exposure to Generalized Method of Moments.

Financial Literature

Give students an opportunity to study and see important papers in financial literature.

Strategic Management

Concepts, tools, and approaches to understand competitive forces and to systematically and consistently develop sustainable competitive advantages.

BUS M 498

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status; Management Integrated Core.
Taught	Fall, Winter, Spring

Course Outcomes

Strategy Concept Knowledge and Application

Demonstrate knowledge of and ability to apply key strategic management concepts (strategy framework, external analysis [industry, competition, customers], resource & capabilities analysis, and strategies for growth and innovation).

Strategy Formulation (Development and Planning)

Utilize concepts to develop coherent strategic plans and recommendations for a business or organization.

Strategy Implementation & General Management

Demonstrate the ability to implement a coherent strategy by utilizing information from all business areas and functions (strategy, marketing, finance, accounting, operations, and HR) and making decisions in each of those areas.

General Strategic Thinking

Use appropriate analytical, critical thinking, and creative problem solving skills when confronted with a business situation or problem.

Communication

Demonstrate the ability to communicate orally and in writing regarding strategy topics in ways that meet the MCOM 320 criteria.

Collaboration Skills

Work effectively as a part of a team.

Top

Communication in Professional Service Firms

Theory and application of written and oral communication for professional service firms.

BUS M 509

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MAcc or MISM major status.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Your Professional Story

Articulate your professional story: including your convictions, your strengths, and your plans for professional development.

Managing Organizational Messages

Introduce and manage organizational messages so that they positively influence people's perceptions and behavior.

Effective Communication

Communicate effectively, both in speaking and writing.

Top

Operations Management

Examining issues and tools in production and operations management. Specific tools for forecasting, planning, inventory control, and project management presented and developed.

BUS M 530

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MAcc or MISM major status.
Taught	Fall

Course Outcomes

Operations Scope

Understand scope and importance of operating processes and decisions

Skills

Master basic quantitative skills required to analyze operating processes

Quality Management

Understand key constructs in quality management

Operations and Strategy

Understand link between operations and strategic management of the firm

Critical Assessment

Develop the ability to develop a point of view about an operational challenge and argue persuasively for it in a professional setting

Top

Organizational Behavior

Analysis of individual, group, and organizational variables that inhibit or facilitate effective organizational functioning. Topics include motivation, rewards, leadership, conflict, decision making, structure, evaluation, and change.

BUS M 540

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MAcc or MISM major status.
Taught	Fall

Course Outcomes

Person-Organization Fit

Articulate the factors that produce person-organization fit and explain how individual characteristics impact a person's fit with different organizations.

Personal Effectiveness

Demonstrate a nuanced understanding of the behaviors that enhance personal effectiveness in organizations.

Membership and Leadership

Function effectively as a member and leader of a work group.

Conflict Management

Manage conflict by using power appropriately and negotiating effectively.

Effective Organizational Change

Explain the principles of effective organizational change.

Top

Marketing Management

Development of analytical marketing tools and techniques; their utilization in case analysis and decision making in marketing management.

BUS M 550

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MAcc or MISM major status.
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Entrepreneurial Perspective

Developing awareness of and ability to apply existing knowledge about entrepreneurship to make better decisons when starting, growing, and harvesting business ventures.

BUS M 571

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Demonstrate Understanding

Demonstrate an understanding of the major differences between an entrepreneurial career path and career paths in the corporate world. Describe how this path matches your own talents and disposition.

Professional Development

Design a plan for building a "secondary" network that will enhance your professional development as an entrepreneur.

Top

Strategic Management

Top-management approach to problems of determining corporate strategy. Structured for accounting and information systems students.

BUS M 581

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MAcc or MISM major status.
Taught	Fall, Winter

Course Outcomes

Elements of Strategy

Recall, explain, and give examples of the major elements of strategy and the drivers of competitive advantage.

Strategic Recommendations

Apply analytical models to complex business situations and generate strategic recommendations.

Analyzing Business Environments

Critically analyze the external and internal environments of a business organization and formulate appropriate strategies.

Problem Solving Skills

Demonstrate problem solving skills by developing hypotheses about the effect of strategic decisions that lead to sensible conclusions.

Decision Making

Make appropriate decisions when formulating and implementing strategy.

Team Skills

Demonstrate team skills through active participation in group projects and the assumption and exercise of responsibility in a collaborative mode.

Effective Communication

Communicate effectively, both orally and in writing, concerning strategy concepts, models, and analyses.

Top

Managerial Ethics

Introduction to ethical theory and its application to managerial issues.

BUS M 582

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Marriott School of Management graduate school status.
Taught	Fall, Winter, Spring

Course Outcomes

Please contact the individual department for outcome information.

Top

Business Arabic

For experienced speakers of the language being taught. Emphasizes business concepts; practice and case study including conversation, reading,and presenting, while enriching business vocabulary.

BUS M 596R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Business Chinese

For experienced speakers of the language. Emphasizes business concepts; practice and case study including conversing, reading, and presenting, while enriching business vocabulary.

BUS M 596R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Analysis

Analyze and discuss Chinese business environment: Students will demonstrate limited proficiency in analyzing and discussing, in Chinese, important aspects of the business environment in China as compared to that in America.

Demonstrate knowledge

Demonstrate knowledge of specialized vocabulary skills: Use specialized vocabulary in Chinese relating to student's field of interest.

Business English

For experienced speakers of the language being taught. Emphasizes business concepts; practice and case study including conversation, reading,and presenting, while enriching business vocabulary.

BUS M 596R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Analysis

Analyze and discuss in English important aspects of the business environment in America or English speaking countries.

Demonstrate Ability

Demonstrate the ability to apply a specialized vocabulary in English relating to your fields of interest.

Basic Skills

Describe basic issues and themes in your field in a manner coherent to a native speaker of English.

Top

Business French

For experienced speakers of the language being taught. Emphasizes business concepts; practice and case study including conversation, reading,and presenting, while enriching business vocabulary.

BUS M 596R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Business German

For experienced speakers of the language being taught. Emphasizes business concepts; practice and case study including conversation, reading,and presenting, while enriching business vocabulary.

BUS M 596R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Business Italian

For experienced speakers of the language being taught. Emphasizes business concepts; practice and case study including conversation, reading,and presenting, while enriching business vocabulary.

BUS M 596R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Business Japanese

For experienced speakers of the language being taught. Emphasizes business concepts; practice and case study including conversation, reading,and presenting, while enriching business vocabulary.

BUS M 596R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Business Korean

For experienced speakers of the language being taught. Emphasizes business concepts; practice and case study including conversation, reading,and presenting, while enriching business vocabulary.

BUS M 596R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Business Language

For experienced speakers of the language being taught. Emphasizes business concepts; practice and case study including conversation, reading,and presenting, while enriching business vocabulary.

BUS M 596R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Learning Outcomes

1. Analyze and discuss in English important aspects of the business environment in America or English speaking countries.
2. Demonstrate the ability to apply a specialized vocabulary in English relating to your fields of interest.
3. Describe basic issues and themes in your field in a manner coherent to a native speaker of English.

Business Portuguese

For experienced speakers of the language being taught. Emphasizes business concepts; practice and case study including conversation, reading,and presenting, while enriching business vocabulary.

BUS M 596R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Business Russian

For experienced speakers of the language being taught. Emphasizes business concepts; practice and case study including conversation, reading,and presenting, while enriching business vocabulary.

BUS M 596R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Analysis

Analyze and discuss Russian business environment: Students will gain proficiency in analyzing and discussing, in Russian, important aspects of the business environment in Russia as compared to that in America.

Demonstrate Ability

Demonstrate the ability to discuss intelligently, and to apply knowledge of, important aspects of the Russian business environment.

Top

Business Spanish

For experienced speakers of the language being taught. Emphasizes business concepts; practice and case study including conversation, reading,and presenting, while enriching business vocabulary.

BUS M 596R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Fundamentals of Computing and Information

Computing, information structures, programming principles, Internet, World Wide Web, text, spreadsheets, data representations for images, sound and video.

C S 100

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	For nonmajors.
Taught	Fall, Winter

Course Outcomes

Manipulate digital information using algorithms written in a programming language. This includes an ability to understand and write assignment statements, loops, conditionals, and functions.

Describe how digital information is represented and how that representation affects the way information can be manipulated and stored. This includes lists, tables, records, and trees.

Explain how the Internet and web pages work. This includes demonstrating skills in web-content creation.

Explain the purpose of an operating system and the basics of how it carries out its tasks.

Identify computer hardware components, and, describe how those components work and interact.

Introduction to Computer Programming

Introduction to object-oriented program design and development. Principles of algorithm formulation and implementation.

C S 142

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Knowledge of algebra.
Taught	Fall, Winter, Spring

Course Outcomes

Write programs whose complexity reaches a few hundred lines

Use the rudiments of the environment and the resources available to help them program (editors, basic computer architecture, compilers, libraries, reference manuals, on-line help).
Develop programs from an English description.
Write programs on their own, independent of "hand holding" by a TA or an instructor (typically a dozen or so).
Understand and use the basic programming constructs: types (built in types, basic provided types including arrays and strings, type construction), values (constants,variables, assignment statements, and expressions), control structures (sequential flow, conditional statements, and loops), and I/O (basic output to the screen and input from the keyboard, and file I/O).
Understand and use objects (value representation, applicable operations, hidden implementations).
Implement basic recursive algorithms.
Describe and use the basic ideas of some of the more advanced programming constructs,including exceptions, inheritance, and polymorphism.

Understand the importance of the following concepts

- Abstraction
- Debugging and Assurance of Correctness
- Program Development (analysis, specification, design, implementation, testing)

Top

Academic Internship

Internships or cooperative education experiences with organizations outside BYU.

C S 199R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Provide Work Experience

Students will develop familiarity with industrial software development and analysis.

Topics in Computer Science

Undergraduate level subjects as announced before each semester.

C S 201R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter

Course Outcomes

Experimental course

A 201R course is used by a professor who is teaching an experimental course. Learning outcomes will vary for the course, but these outcomes are evaluated during the vetting process (through the department undergraduate curriculum committee) before the professor is allowed to teach the course. At this level, typical learning outcomes involve computing practice and fundamental theory.

Data gathering

Because 201R is an experiment course, data on how well the course accomplished the outcomes will be gathered. This will usually be in the form of surveys, exam scores, and project scores.

Top

Introduction to Computer Systems

How a computer works, from hardware to high-level programming. Logic circuits, computer instructions, assembly language, binary arithmetic, C programming, program translation, data structures, and algorithm analysis.

C S 224

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	C S 142; or instructor's consent.
Taught	Fall, Winter, Summer

Course Outcomes

Binary Computations

Ability to perform simple computations in binary.

Translating C code to Assembly

Ability to describe how a compiler translates C code to assembly.

Boolean Logic

Perform computations using Boolean logic

Translate Boolean

Translate Boolean logic to transistor circuitry

Computer Operation

Ability to describe the operation of a computer at the micro-architectural level

Circuitry

Use combinational and sequential circuitry to implement an instruction set architecture

C Programming

Ability to program in C.

Assembly Programming

Ability to program in assembly.

Computer Architecture

Ability to describe the high level organization and operation of a computer, e.g. the von Neumann model

Top

Data Structures and Algorithms

Fundamental data structures and algorithms of computer science; basic algorithm analysis; recursion; sorting and searching; lists, stacks, queues, trees, hashing; object-oriented data abstraction.

C S 235

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 142
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Data Computing Fundamentals

Use the fundamental data types of computing (lists, stacks, queues, priority queues, sets, maps, trees, etc.).

Implementing Fundamental Data Types

Understand the major techniques for implementing the fundamental data types (linked lists, binary search trees, hashing, heaps, etc.) and implement several of them.

Select Data Structures

Properly use and select data structures from language-provided data-structure libraries.

Analysis

Apply basic algorithm analysis.

Recursion

Understand how recursion works and write programs using recursion to solve problems.

Usage of Algorithms

Make informed decisions about which sorting and searching algorithms to use in specific circumstances.

Program Writing

Write programs that require ~500 lines of code.

Discrete Structures

Introduction to grammars and parsing; predicate and propositional logic; proof techniques; sets, functions, relations, relational data model; graphs and graph algorithms.

C S 236

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 235
Taught	Fall, Winter, Spring

Course Outcomes

Use Mathematical Structures to Solve Programming Problems

- Understand and be conversant with basic discrete mathematical structures (finite state machines, regular expressions, grammars, propositional calculus, proof techniques, predicate calculus, sets, relations, functions, graphs).
- Write complex programs by using mathematical concepts as the basis for solving programming problems (finite state machines for lexical analysis; grammars for parsing; propositional and predicate calculus for logic programming; sets and algebras for relational databases; algebras, graphs, and topological sorting for optimizing datalog query processing).
- Incrementally build sophisticated programs by a systematic design process based on discrete mathematics.
- Design a solution for a programming problem and justify the design as one that is maintainable and extendable by other programmers who understand and are conversant with discrete mathematical structures.

Write Code From Diverse Program Components

Demonstrate ability to build large programs by writing and integrating code from a diverse spectrum of program components.

Advanced Programming Concepts

Advanced software development with an object-oriented focus. Design, implementation, and testing of several large programs in a Java and Linux environment using current technologies.

C S 240

Hours	4.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	C S 236; or instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Apply problem solving techniques to large programs (at least

a. Use coding, testing, and debugging strategies.
b. Follow basic object-oriented design concepts.

Object Oriented Programming Language

Write programs in an Object Oriented programming language using inheritance, polymorphism and class hierarchies.

Execute Using Linux

Use the Linux programming environment to execute basic commands and to run the compiler, linker, debugger, memory checker, and profiler.

Work Hard

Demonstrate the aptitude and work ethic necessary to succeed in computer science.

Top

Introduction to Computational and Probabilistic Models in Computer Science

Computational models: regular grammars, context-free grammars, Turing machines. Complexity theory: big-O and complexity classes P, NP, NP-complete, and f-NP. Probabilistic Models: Introduction to probability theory, random variables, joint distributions, Bayes rules, Bayes networks.

C S 252

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 236 or concurrent enrollment.
Taught	Fall, Winter, Summer

Course Outcomes

Understand Computing Paradigms

Understand the three computing paradigms (DFAs, PDA, Turing Machine) and their language-based equivalents (regular languages,context-free languages, computable algorithms).

Categorize Problems

Categorize problems into one of the existing paradigms.

Understand Paradigms

Understand the difference between and limitations of paradigms.

Decidable and Tractable

Understand the difference between computable (decidable) and practically computable (tractable).

Solutions to Problems

Design and justify solutions to problems of decidability and tractability.

Designing the User Experience

Studio-critique style course on user experience design. Contextual inquiry to identify user needs. Iterative solution design using sketching and storyboards. Human perception and visual design principles. Rapid prototyping and evaluation of proposed solutions.

C S 256

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 142
Taught	Fall

Course Outcomes

Design effective computing experiences for people

Designing effective computing experience for people requires the ability to:

1. Create solutions for real problems that people encounter,
2. design a computing experience that is visually and interactively pleasing,
3. iteratively refine design prototypes.

Topics in Computer Science

Undergraduate-level topics as announced.

C S 301R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Experimental course

A 301R course is used by a professor who is teaching an experimental course. Learning outcomes will vary for the course, but these outcomes are evaluated during the vetting process (through the department undergraduate curriculum committee) before the professor is allowed to teach the course. At this level, typical learning outcomes involve computing practice, critical thinking, and more advanced theory.

Data gathering

Because 301R is an experiment course, data on how well the course accomplished the outcomes will be gathered. This will usually be in the form of surveys, exam scores, and project scores.

Top

Algorithm Design and Analysis

A study of the design and analysis of algorithms as solutions to problems, including dynamic programming, linear programming, greedy algorithms, divide-and-conquer algorithms, graph algorithms, and intelligent search algorithms.

C S 312

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 240 & C S 252; or C S 240 & BIO 365
Taught	Fall, Winter, Spring

Course Outcomes

Fundamental Computer Algorithms

The student understands fundamental computer algorithms that can be organized in the following algorithmic paradigms: dynamic programming, linear programming, greedy algorithms, divide-and-conquer algorithms, graph algorithms, intelligent search algorithms, and --to a lesser degree-- randomized algorithms. As an algorithmic problem solver, the student can formulate novel or unfamiliar problems in mathematical terms so as to elucidate a given problem's relation to known problems, choose a paradigm for solving the problem, and design an algorithm to solve the problem.

Analysis

The student can analyze algorithms belonging to those algorithmic paradigms for their asymptotic worst-case behavior in terms of time and space. Furthermore, the student can analyze algorithms empirically (under simplifying assumptions) and understands the relationship of empirical analysis to average-case behavior. Also, the student can solve LTI difference equations (with geometric forcing functions and change of variable) and can use them to analyze the efficiency of recursive algorithms.

Efficiency

The student can make the distinction between problems and their algorithmic solutions. Moreover, the student can distinguish between efficient and inefficient solutions and can relate these distinctions to the complexity classes of problems, namely P, NP, and NP-Complete learned earlier in the curriculum (CS 252).

Correctness

The student can prove the correctness of a subset of the algorithms considered in the course.

Implementation

The student can independently implement selected algorithms in the context of motivating applications using C# with the Visual Studio IDE.

Top

Concepts of Programming Languages

Principles and concepts characterizing high-level computer programming languages, process and data abstration, encapsulation, inheritance, functional programming, logic programming, scanners, and parsers.

C S 330

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 240
Taught	Fall, Winter

Course Outcomes

Programming Language Familiarity

Learn the vocabulary of programming language design, syntax, and semantics

Program Language Flexibility

Be able to write programs using non-imperative language paradigms.

Software Design and Testing

Principles of software design, design patterns, design representation, refactoring. Principles of software quality assurance and testing. Development and testing tools.

C S 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 240
Taught	Fall, Winter, Summer

Course Outcomes

Software Design Principles

Articulate the principles of effective software design.

Design Judgement

Know when and how to apply various design patterns.

Document and Communicate Designs

Demonstrate how to effectively document and communicate software designs.

Quality Assurance

Understand what quality assurance is, know how to build quality into software using review techniques, and demonstrate quality evaluation through testing.

Software Development Tools

Use a variety of software development tools, including IDEs, automation tools, static analysis tools, source code control systems, unit testing tools, and documentation tools.

Group Work

Work effectively in a group to produce quality software using 1-5 above.

Top

Operating Systems Design

Principles and concepts of operating systems design and the implementation of an operating system.

C S 345

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 224 & C S 240
Taught	Fall, Winter, Summer

Course Outcomes

Operating System Basics

Describe the basic components of an operating system and their role in implementations for general purpose, real-time, and embedded applications.

Basic Concepts

Define the concepts of processes, threads, asynchronous signals and competitive system resource allocation.

Shells

Show how a shell works.

Scheduling Algorithms for Multi-Tasking

Explain what multi-tasking is and *outline* standard scheduling algorithms for multi-tasking.

Mutual Exclusion Principles

Discuss mutual exclusion principles and their *use* in concurrent programming, including semaphore construction and resource allocation.

System Memory Management

Give an overview of system memory management.

Implementing File Systems

Explain how file systems are implemented.

Competing Operating Systems

Discuss the features and strengths of various contemporary operating systems.

Implement an Operating System

Implement a functional, pre-emptive, multi-tasking operating system written in C, including a shell, scheduler, file manager, memory manager, and synchronization components.

Top

Interactive Graphics and Image Processing

Introduces basic concepts of computer graphics, user interfaces and image processing. Includes homogenous coordinate transforms, image transforms, event driven programming and color models. Extends Model-View-Controller architecture.

C S 355

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 240
Taught	Fall, Winter

Course Outcomes

Mathematics and Geometry

Use and implement the fundamental mathematical concepts underlying these areas, including

- Points, vectors, and matrices
- Other basic principles of linear algebra
- Geometric transformations as matrices
- Methods for working with numeric data

Graphical User Interfaces

Use and implement concepts of current graphical user interfaces (which you should have seen before), including

- Model-view-controller architecture
- Event handling
- Screen management

2D Drawing, Viewing, and Selection

Use and implement the following concepts for 2D drawing, viewing, and selection:

- Geometry of simple shapes
- 2D Transformations
- Transformation composition

3D Rendering Geometry

Understand and implement the fundamental geometry involved in 3-D perspective rendering, including

- Use rendering libraries such as OpenGL to do simple rendering
- Implement the geometric transformations used in 3D rendering
- Identify basic techniques for shading and their advantages and limitations

Basic Image Processing

Understand and implement fundamental image processing operations, including

- Point operations (brightness, contrast, etc.)
- Image-Image operations (differencing, alpha blending, etc.)
- Neighborhood operations (noise removal, edge detection, etc.)

Geometric Operations on Images

Understand and implement image warping using a backwards-mapping approach

Color

Understandand use the language and principles of common color models

Internet Programming

Internet application programming, including sockets, threads, CGI, database, e-commerce, Web services.

C S 360

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 240
Taught	Fall, Winter

Course Outcomes

Design Applications

Design and implement a variety of client-server and web applications.

Analyze and Report Server Performance

Analyze the performance of a web server, write convincingly to support your conclusions and give an oral report to describe your findings.

Web Server Implementation

Implement a web server using processes, semaphores, threads, sockets and signals.

Application Implementation

Use a set of web programming languages to implement an application.

Security Measures

Use security to protect their web application.

Top

Topics in Computer Science

Undergraduate level subjects as announced before each semester.

C S 401R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter

Course Outcomes

Special Topics

Students will learn about a topic in Computer Science not covered in the traditional courses.

Ethics and Computers in Society

Societal impact of computer technology, the computer scientist's place in society, ethical issues. Reading, discussion, and writing seminar.

C S 404

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	C S 240 & ENGL 316
Taught	Fall, Winter

Course Outcomes

Connections With Gospel

Articulate connections between the gospel of Jesus Christ and their professional life.

Ethics

Analyze, write about, and discuss issues and ethical problems related to computing and the application of evolving technologies in society.

History of Computing

Appreciate the history of computing as a means for students to sharpen their sense of their own future.

Continuing Education

Students will understand the need for continuing education in their careers.

Top

Creating and Managing a Software Business

Entrepreneurship, idea/opportunity generation, strategic planning, legal organization, product development, marketing/sales, customer support, fund raising, and effective management.

C S 405

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 240 & ENGL 316
Taught	Fall

Course Outcomes

Business Plan

Students will write a business plan for a company they are proposing.

Top

Linear Programming and Convex Optimization

Optimization, problem formulation, and solution algorithms, including simplex and interior point methods. Applications from control, data mining, finance, game theory, learning, network flow, operations research, and statistical estimation.

C S 412

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 312 & MATH 313; or instructor's consent.
Taught	Fall

Course Outcomes

Mathematical Foundations

Develop a fluency in the mathematical foundations needed to pose optimization problems, including an appreciation for the role of convexity in characterizing solvable problems.

Simplex Method

Develop a fluency with the Simplex Method as a solution technique to Linear Programming problems. Understand how it exploits the linear nature of the problem to yield good average-case performance while failing to be efficient in the worst-case.

Duality Theory

Understand the meaning of weak and strong duality and their role in the design and verification of algorithmic solutions to optimization problems.

Sensitivity Analysis

Be able to characterize how to perturb the data of an existing problem so that its solution remains optimal for the new, perturbed problem.

Interior Point Methods

Develop a fluency with interior point methods for solving Linear Programming problems and understand how these solutions may be extended to solve nonlinear, convex optimization problems.

Applications

Explore the role of Linear and Convex Programming in a variety of applications, including 1) Finance,

2) Game Theory, 3) Regression, and 4) Computer Networking.

Bioinformatics

Computational methods for analyzing biological systems. Dynamic programming, Markov models, Neural Networks, and Bayesian analysis are used to predict secondary structure, tertiary structure, and active sites for drug docking given molecular DNA sequence data.

C S 418

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 240
Taught	Winter

Course Outcomes

System Biology Application Development

Graph Theoretical algorithms, Regulatory Inference

Next Generation Sequencing Algorithms

Large Memory Genomic Mapping, SNP calling

Research Development and Communication

Develop new research ideas and communicate them effectively

Top

Software Engineering

Analysis, design, implementation, and testing of significant software systems.

C S 428

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 340
Taught	

Course Outcomes

Group Dynamics

Demonstrate the ability to work in a group on a significant project

Software Engineering Fundamentals

Demonstrate practices that result in quality software

Software Ethics

Demonstrate an understanding of how ethics impact software development

Algorithmic Languages and Compilers

Formal description of algorithmic languages and techniques used in their compilation: semantics, ambiguities, procedures, replication, iteration, recursion.

C S 431

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 340
Taught	

Course Outcomes

Write a compiler

Implement a fully functional compiler for a subset of the Java language that targets an embedded microprocess.

Use interesting data types and algorithms in a large program

Apply patterns and common data structures to compiler constructrion including tree traversal, graph algorithms, and proof systems.

Apply techniques from compiler construction to other problem

Students are able to synthesis algorithms and techniques from compiler constructor to other problem domains.

Mental model of compilation

Students have a sound mental model of how an abstract high level language is systematically transformed into a low-level machine langauge or byte code. Students are able to use that understanding to write better application code.

Top

Introduction to Digital Signal and Image Processing

One- and two-dimensional signal-processing fundamentals, including sampling, noise, transforms, filtering, enhancement, and compression. Hands-on experimentation with speech, music, still images, and full-motion video.

C S 450

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 312 & C S 355 & MATH 313
Recommended	Stat 121 or Stat 201.
Taught	Fall

Course Outcomes

Introduction to Digital Signal and Image Processing

Understand and apply the following:

- Sampling and quantization of image information
- Camera properties and the acquisition of images
- Mathematics of image-space transformations
- Fourier transforms and filtering

Database Modeling Concepts

Database models: relational, deductive, object-oriented. Integrity constraints, query languages, database design.

C S 452

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 240
Taught	Fall

Course Outcomes

Query Languages

Be able to use a variety of commercial query languages (SQL, XQuery, SPARQL), both stand-alone and embeded in high-level programming languages. Know how relational algebra and relational calculus provide a basis for commercial query languages.

Query Optimization

Understand performance issues and optimization strategies. This includes query rewriting, secondary storage characteristics, and access strategies.

Database Design

Be able to design and develop relational database applications. This includes conceptual modeling and normalization theory.

Current Challenges

Be familiar with some of the current challenges facing database professionals.

Fundamentals of Information Retrieval

Concepts and terminology of information retrieval (IR) systems. Design methodologies and issues. Fundamental IR models examined: Boolean, Vector Space, Probabilistic models, and evaluation strategies.

C S 453

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 240
Taught	Spring

Course Outcomes

Understand and evaluate fundamental IR models

- Boolean
- Vector Space
- Probabilistic

Query Processing

Extract, parse, index, and classify source information for query processing

Query Construction

Represent user's information needs, refine user's queries, and construct query results using snippets and categories

Machine Learning

Categorize, cluster, and filter query results using various supervised and unsupervised learning strategies

Analysis

Evaluate the effectiveness, efficiency, and cost of performing searches using search engines

Computer Graphics

Interactive computer graphics systems programming and architecture.

C S 455

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 355 & MATH 313
Taught	Fall

Course Outcomes

Understanding fundamental principles of computer graphics

Students will be proficient in basic computer graphics algorithms such as modeling, trnasformations and rendering.
Students will design and code solutions to several programming problems in graphics using algorithms and data structures.
In addition, sutudents will use these techniques to program a large semester project.

Top

Introduction to User Interface Software

Introduction to software architectures and techniques for graphical user interfaces. Input devices, windowing systems, event-driven programming, interactive geometry.

C S 456

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 256 & C S 355
Taught	Winter

Course Outcomes

Develop Effective User Interfaces

Understand and apply the following:

- Multiple mechanisms for receiving information from people and presenting information to people.
- The geometry of basic shapes and how to use the geometry to solve basic interaction problems.
- Algorithms for user interface layout management.
- Models for specifying and evaluating user input dialogs.

Computer Communications and Networking

Introduction to data communications and computer networking. Communications fundamentals, computer networks, software, architecture, telecommunications, regulation, standards.

C S 460

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 360
Taught	Winter

Course Outcomes

Internet Architecture

Understand the principles of the Internet architecture

Internet Design

Understand how the Internet works, from the transport layer down to the physical layer

Internet Implementation

Gain hands-on experience with implementing and simulating transport, routing, and MAC protocols, leading to a deeper understanding of these critical Internet components

Internet Research

Be capable of reading and understanding research papers in the area of computer networking

Scholarly Communication

Demonstrate the ability to effectively conduct, describe and report on an experimental research project in the area of computer networking

Top

Large-Scale Distributed System Design

Designing and implementing client-server enterprise applications. Web servers, application servers, database connectivity, remote procedure calls, transactions, messaging, directory, naming services, threads, security, data formats.

C S 462

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 340 & C S 360
Taught	Winter

Course Outcomes

Computational Practice

- Students can implement programming projects that display knowledge of a variety of distributed system architectural styles. Some of these assignments represent significant programming projects with wide leeway in design and implementation choices.
- Students will analyze problems, determine solutions within an assigned architectural style, and successfully implement those solutions.
- Students will design and implement projects both individually and as part of a team.
- Students will use cloud-based systems to run and implement assignments
- Students will manage a cloud-based Web server and properly configure it.

Computational Theory

Students will understand the proper use of distributed and decentralized architectures and algorithms including

- RESTful APIs
- Hierarchical vs heterarchical system architectures
- MapReduce
- Distributed Hash Tables
- Event-driven system
- Peer-to-peer architectures including Paxos, gossip protocols, and blockchain

Students will understand theoretical concepts and limitations of distributed systems including

- network practicalities such as latency, bandwidth, topology, cost, heterogeneity, security
- CAP theorem
- distributed transactions
- serialization
- identity and naming

- cryptography
- simultaneity

Critical Thinking and Communication

Students will interact with peers in meaningful discussion, lead discussions in peer groups, prepare written reports, and make oral presentations.

Ethics and Computing

Students will be presented with societal outcomes of technological choices in distributed and decentralized systems, analyze those outcomes, explore possible alternatives from different choices, and present their findings in small groups.

Computer Security

Introduction to computer security fundamentals: confidentiality, integrity, authentication, and access control. Secret key and public key cryptography, network security protocols, viruses, and fire walls.

C S 465

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 360 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Build a system

Implement a cryptographic algorithm from a standards specification.

Break and fix a system

Demonstrate how attackers compromise real-world systems, and then show how to prevent these attacks.

Top

Introduction to Artificial Intelligence

Introduction to core areas of artifical intelligence; intelligent agents, problem solving and search, knowledge-based systems and inference, planning, uncertainty, learning, and perception.

C S 470

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 312 & MATH 313 & STAT 121; or C S 312 & MATH 313 & STAT 201
Taught	Fall, Spring

Course Outcomes

Recognize problems that can use AI methods

from business, medicine, robotics, gaming, and machine learning

Identify the component elements of the problem

Does it require basic control?
Does it involve uncertain reasoning?
Does it have a simple goal, sophisticated utility, or multiple attributes?
Does it require sequential choice or planning?
How may decision makers are involved?

Formalize the problem in a way that is amenable to a solutio

What is the internal representation?
What performance criteria are relevant?
What is the nature of the environment?
What are the actuators?
What are the sensors?
What are the agent's utilities?
How is uncertainty represented?

Be able to analyze, implement, and experiment with several A

Uninformed, informed, constraint-satisfaction, hill-climbing, and stochastic (e.g., genetic algorithms) search
Markov provesses, Bayes rule, Bayes nets, Hidden Markov Models, Grid Filters, and Kalman Filters
Expected utility theory
Multi-attribute utility theory
Sequential choice under uncertainty: value and policy iteration

Minimax solutions from game theory: alpha-beta pruning

Analyze and communicate solution quality

Determine whether your solution is correct
Express the quality of your solution
Value the need to communicate your solution to others

Tools for Machine Learning and Data Mining

Machine learning and data mining models and other mechanisms allowing computers to learn and find knowledge from data.

C S 478

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 312 & MATH 313 & STAT 121; or C S 312 & MATH 313 & STAT 201
Taught	Winter

Course Outcomes

Use Effective Machine Learning Techniques

You will learn the basic theory and models used in machine learning

Recognize

You will be able to recognize when machine learning and data mining tools are applicable.

Execute

You will be able to plan and execute successful machine learning and data mining projects, including selecting an adequate process for your specific task and avoiding the main machine learning pitfalls.

Top

Natural Language Processing

Introduction to natural language processing (NLP). Relevant problems include web search, speech recognition, machine translation, spam filtering, text classification, question answering, spell checking. Building real tools, understanding human language, applying techniques beyond NLP.

C S 479

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 312 & STAT 121; or C S 312 & STAT 201
Recommended	Ling 330.
Taught	Winter

Course Outcomes

Mathematical Models

The student will grow in confidence in their mathematical and statistical abilities. In particular, the student will understand the models, methods, and algorithms of statistical Natural Language Processing (NLP) for common NLP tasks, such as speech recognition, machine translation, spam filtering, text classification, and spell checking.
The student will implement probabilistic models in code, estimate parameters for such models, and run meaningful experiments to validate such models.

Algorithms

The student will apply core computer science concepts and algorithms, such as dynamic programming.

Linguistics

The student will gain understanding of linguistic phenomena and will explore the linguistic features relevant to each NLP task.

Generalization

The student will apply the methods to new NLP problems and will be able to apply the methods to problems outside NLP.

Analysis

The student will be familiar with some of the NLP literature and will read and suggest improvements to published work. The student will see where opportunities for research await and prepare to conduct research in NLP or related fields.
The student will also analyze experimental results and write reports for each course project to develop scientific writing skills.

Top

Parallel Processing

Theoretical and practical study of parallel processing including multi-core, fine-grained, and clustered architectures, parallel programming languages, and parallel algorithms.

C S 484

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 360
Taught	

Course Outcomes

Design parallel applications

Use multiple processors to solve a problem faster

Metrics

Understand the metrics that are used to evaluate effective applications.

Top

Verification and Validation

Foundational topics in verification and validation; the application of logic to building correct systems. Covers logics to formally specify properties of systems, verifications of basic systems, and advanced topics in formal verification for complex systems.

C S 486

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 312
Taught	Winter

Course Outcomes

Formally reason about concurrent systems and executions

Formally reason about concurrent systems and executions

Define correctness in concurrent systems

Define basic correctness principles of concurrent systems including deadlock, live-lock, safety, and general liveness.

Analyze concurrent objects for correctness

Use tools to analyze concurrent objects for correctness and performance

Learn best-practices for spin locks and monitors

Learn best-practices for spin locks and monitors

Discuss wait-free versus lock-free implementations

Compare and contrast wait-free and lock-free properties in concurrent objects

Understand and use concurrent data structures

Understand and use concurrent data structures

Correctly use barriers and fences

Correctly use barriers and fences

Have working knowledge of tools and techniques for testing c

Have working knowledge of tools and techniques for testing concurrent programs

Be familiar to libraries to support concurrent programming i

Be familiar to libraries to support concurrent programming in C, C , C#, and Java

Describe future trends in multi-processor programming

Describe future trends in multi-processor programming

Top

Undergraduate Special Projects

Students identify an interesting problem in computer science and solve it with the aid of faculty members.

C S 498R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	C S 240
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Capstone Experience in a Special Topic

Students will propose, execute, and report a capstone project in an area that they choose in consultation with a professor. Each project is approved by the Undergraduate Curriculum Committee.

Top

(C S-Chem-Geol-Math-MthEd-Phscs-Stat) Business Career Essentials in Science and Math

Introduction for science, math, and statistics majors to careers in industry. Project planning, oral and written business presentations, business accounting, and technology readiness.

C S 500

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Project Management

Learn the basics of project management and understand why this is important to business success

Business Skills

Demonstrate knowledge of business skills necessary to function as a scientist working in industry. Be able to explain how corporate politics can affect your career.

Effective Communication

Learn how to present concepts and ideas in a clear and effective manner in both oral and written form.

Business Finance

Learn how to read and understand a business financial accounting statement (both internal and external)

Business Projects and Finances

Learn to read and understand corporate accounting statements and data and understand the basic ideas of project and portfolio management.
Learn the steps to moving an idea from concept to completion in a business setting.

Technology Readiness

Understand the different levels of technology readiness and the process of moving a project through these levels to completion

Business Presentations and Writing

Learn the basics of effective business presentations and writing

Top

Advanced Topics in Computer Science

Advanced undergraduate- and graduate-level subjects as announced before each semester.

C S 501R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Advanced topic in Computer Science

Students will learn a topic in Computer Science not covered by the regular curriculum.

Robust Control

Introduction to the analysis and design of feedback systems guaranteed to perform well in spite of model uncertainty.

C S 513

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 313 or equivalent.
Recommended	C S 312 and 412; Math 334; or equivalents.
Taught	Fall

Course Outcomes

Systems Concepts

Understand system concepts of stability, controllability, observability, minimality, behavior, and structure.

Representation

Understand various mathematical representations of systems.

Four Basic Problems

Understand the four basic problems: Model Reduction (i.e. Approximation), System Identification (i.e. Learning), Control (i.e. Decision Making), and Verification/Validation, and how they impact each other.

Hankel Singular Values

Understand Hankel singular values and their role in balanced truncation as an approximation to optimal model reduction.

LMIs

Understand Linear Matrix Inequalities and their role in various identification and control problems.

Small Gain

Understand the role of the Small Gain Theorem and Passivity in providing guarantees of algorithm correctness in spite of model uncertainty.

Computer-Aided Geometric Design

Free-form curves and surfaces; mathematical theory and algorithms. Bezier and B-spline curves and surfaces, subdivision surfaces, T-splines, free-form deformation, and intersection algorithms. Several programming projects.

C S 557

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 240, Math 343; or equivalents.
Taught	Fall

Course Outcomes

Bezier Curves

Understand the theory, properties, and algorithms for Bezier curves: de Casteljau algorithm, degree elevation, hodographs, curve intersection algorithms, convex hull property, variationa diminishing property, rational Bezier curves, explicit Bezier curves.

B-Spline Curves

Understand polar form, the de Boor algorithm, the Boehm algorithm, knot intervals.

Tensor product surfaces

Understand tensor product Bezier and B-Spline surfaces, including the de Casteljau algorithm, partial derivatives, parametric continuity, tesselation.

Top

First-Year Cantonese

Basic language skills.

CANT 101

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Chinese Culture and Communication

Demonstrate a basic understanding of a variety of Chinese cultural practices and communicative conventions. (See Chinese major learning outcome 3)

Writing Short Paragraphs, Notes, and Similar Texts

Write short paragraphs, notes, and similar texts in standard Chinese at the ACTFL novice low level. (See Chinese major learning outcome 2)

Listening to Conversations, Dialogs, and Live Interaction

Listen to conversations, dialogs, and live interaction in Cantonese at the ACTFL novice mid level. (See Chinese major learning outcome 1)

Speaking and Understanding Cantonese

Speak and understand Cantonese at the ACTFL novice mid level. (See Chinese major learning outcome 1)

Top

First-Year Cantonese

Basic language skills.

CANT 102

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Speak and Understand Cantonese

Speak and understand Cantonese at the ACTFL novice high level. (See Chinese major learning outcome 1)

Writing in Standard Chinese

Write short paragraphs, notes, and similar texts in Standard Chinese at the ACTFL novice mid level. (See Chinese major learning outcome 2)

Listening to Conversations, Dialogs, and Live Interaction

Listen to conversations, dialogs, and live interaction in Cantonese at the ACTFL novice high level. (See Chinese major learning outcome 1)

Chinese Culture and Communicative Conventions

Demonstrate a basic understanding of a variety of Chinese cultural practices communicative conventions. (See Chinese major learning outcome 3)

Second-Year Cantonese

Grammatical patterns and vocabulary of spoken and written Cantonese.

CANT 201

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Cant 102 or foreign residence experience.
Taught	Fall

Course Outcomes

Speak and Understand Cantonese

Speak and understand Cantonese at the ACTFL intermediate low level. (See Chinese major learning outcome 1)

Understand Chinese Cultural Practices

Demonstrate an introductory level understanding of a variety of Chinese cultural practices. (See Chinese major learning outcome 3)

Listen to Converstations and Dialogs

Listen to conversations and dialogs in Cantonese at the ACTFL intermediate low level. (See Chinese major learning outcome 1)

Write Short Essays, Journal Entries and Notes

Write short essays, journal entries, and notes in standard Cantonese at the ACTFL novice high level. (See Chinese major learning outcome 2)

Top

Second-Year Cantonese

Intermediate to advanced skills in reading, writing, listening, and speaking.

CANT 202

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Cant 201 or equivalent.
Note	This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Winter

Course Outcomes

Speaking and Understanding Cantonese

Speak and understand Cantonese at the ACTFL intermediate mid level. (See Chinese major learning outcome 1)

Listening to Conversations and Dialogs

Listen to conversations and dialogs in Cantonese at the ACTFL intermediate mid level. (See Chinese major learning outcome 1)

Write Short Essays, Journal Entries, and Notes

Write short essays, journal entries, and notes in standard Chinese at the ACTFL novice high level. (See Chinese major learning outcome 2)

Understanding Chinese Social Practices

Demonstrate a fundamental understanding of Chinese social practices as well as linguistically and culturally appropriate behavior. (See Chinese major learning outcome 3)

Top

Second-Year Conversation

Intermediate listening comprehension and speaking skills.

CANT 211R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Cant 201 or foreign residence experience.
Taught	Winter

Course Outcomes

Knowledge

Students will demonstrate knowledge in conversation.

Civil and Environmental Engineering Seminar

Activities of civil engineering; principles and methods involved in solving civil engineering problems.

CE EN 100A

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Note	College Lecture attendance required.
Taught	Fall

Course Outcomes

Professional Engineer

1(i) Begin to understand the process required to become a professional engineer

Lifelong Learning

2(i) Begin to understand the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers

Teams

Begin to learn how to work in teams on civil engineering related projects that benefit the community.

Ethical Behavior

4(f) Begin to understand ethical behavior in civil engineering and be able to cite examples of good ethical behavior.

Career

5(j) Begin to understand contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

Civil and Environmental Engineering Seminar

Activities of civil engineering; principles and methods involved in solving civil engineering problems.

CE EN 100B

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Note	College Lecture attendance required.
Taught	Winter

Course Outcomes

Professional Engineer

5(j) Begin to understand contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

Lifelong Learning

2(i) Begin to understand the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers

Teams

3(d) Begin to learn how to work in teams in civil engineering related projects that benefit the community

Ethical Behavior

4(f) Begin to understand ethical behavior in civil engineering and be able to cite examples of good ethical behavior.

Career

5(j) Begin to understand contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

Top

Introduction to Civil and Environmental Engineering

Introduction to what civil and environmental engineering is all about. Careers in the profession. Courses and curriculum of the major. Freshman projects and teamwork.

CE EN 101

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Teamwork

1(d) Participate on a student team to complete assigned tasks.

Information Discovery

2(i) Discover and digest information from the internet, the literature, and interviews about assigned civil engineering subjects.

Top

Engineering Mechanics--Statics

Concepts of mechanics: force systems in equilibrium, resultants, friction, centroids, utilization of vector algebra, simple trusses, shear and bending moment diagrams, moments of inertia.

CE EN 103

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 112; or MATH 111 & MATH 119; or concurrent enrollment.
Taught	Fall, Winter, Spring

Course Outcomes

1 (e) Units

Be able to manipulate basic engineering units in both the International and US Customary Systems of Units in engineering analysis and be able to convert between the two.

2 (a) Vector Notation

Be able to perform basic vector operations using standard vector notation.

3 (a) Free-Body Diagrams

Be able to conceptualize and draw a conventional free-body diagram which identifies and applies all known and unknown forces.

4 (a) Forces

Understand the nature of forces(s) and their manipulation in engineering analysis, including moments, couples, transmissibility and resultants.

5 (a) Equilibrium

Understand the conditions for equilibrium for both a particle and a rigid body.

6 (e) Axial Forces

Be able to determine the axial forces in the members of a statically determinant truss.

7 (e) Center of Gravity

Be able to calculate the center of gravity for 2 and 3 dimensional rigid bodies.

8 (e) Shear Force and Bending Moment Diagrams

Be able to both calculate and draw diagrams for the internal shear forces and bending moments in straight, statically determinant beams.

9 (a) Friction

Understand the nature of friction and be able to solve problems involving friction and shear on horizontal and inclined planes.

10 (a) Centroids

Be able to use calculus to compute centroids of lines, areas and volumes.

11 (e) Analysis

Demonstrate competence in basic engineering analysis.

Top

Engineering Drafting with CAD Applications

Structural and component drafting, emphasizing computer-automated (CAD) systems. Concepts include applied and descriptive geometry, multiview representation, sectional views, dimensional practices, and axonometric sketching.

CE EN 112

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Civil engineering or technology education major status
Taught	Fall, Winter

Course Outcomes

CAD-based drafting

An understanding of CAD-based drafting techniques

Fundamental drafting concepts

An understanding of fundamental drafting concepts and manual drafting techniques

AutoCAD skill building

An ability and skills for preparing technical drawings manually and by using AutoCAD

Teamwork based term project

An ability to work in a team to complete a term project and produce a technical report

Preparation of an oral presentation

An ability to communicate with team members and produce an effective, well organized oral presentation

BIM concept and application

An understanding of Building Information Modeling (BIM) and its application in engineering

Structural model building and analysis with BIM

An ability to use BIM software to develop structural models for analysis

Structural data preparation with BIM

An ability to present structural data in a collaborative environment

Top

Engineering Measurements

Measurement of horizontal and vertical distances and angles to locate engineering projects including profiles, plane and topographical mapping, site layout, and earthwork. Introduction to GIS and mapping for surveying projects.

CE EN 113

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Recommended	Math 111 or knowledge of trigonometry.
Taught	Fall, Spring

Course Outcomes

Estimates

Make order of magnitude estimates, assess reasonableness of solutions, and report appropriate levels of numerical accuracy

Coordinate Geometry

Understand basic coordinate geometry functions and how they are used in surveying to reduce field measurements to useable quantities for design and analysis

Distance Measurements

Make accurate horizontal and vertical angle and horizontal and vertical distance measurements

Total Station

Operate a total station and make plans for their use in engineering projects

Traverse Computations

Close a horizontal traverse by computing distances, azimuths, bearings, accuracy, latitudes and departures and their accompanying adjustments to produce accurate coordinate locations

GPS

Operate Global Positioning System (GPS) devices for mapping purposes

Coordinate Systems

Understand the concepts between geographic and projected coordinate systems and the relationship of locally surveyed information to these global systems

GIS

Use basic functions of a Geographic Information System (GIS) to develop appropriately scaled and referenced maps of their surveyed data

Topographic Maps

Take measurements for and develop a topographic map

Highway Curves

Design and layout horizontal and vertical alignments of highways

Academic Internship

Work experience evaluated by supervisor and posted on student's transcript.

CE EN 199R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Professional Experiences

Student acquires professional experiences in the discipline.

Professional Communication

Student demonstrates professional communication skills (report).

Conversion of Experience into Understanding

Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

Civil and Environmental Engineering Seminar

Activities of civil engineering; principles and methods involved in solving civil engineering problems.

CE EN 200A

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	CE EN 100A & CE EN 100B & CE EN 101
Note	College Lecture attendance required.
Taught	Fall, Winter

Course Outcomes

Professional Engineer

1(i) Continue developing an understanding of the process required to become a professional engineer

Lifelong Learning

2(i) Continue developing an understanding of the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers

Teams

3(d) Work in and begin leanring how to lead teams in civil engineering related projects that benefit the community

Ethical Behavior

4(f) Continue developing an understanding of ethical behavior in civil engineering and be able to cite examples of good ethical behavior.

Career

5(j) Continue developing an understanding of contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

Civil and Environmental Engineering Seminar

Activities of civil engineering; principles and methods involved in solving civil engineering problems.

CE EN 200B

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	CE EN 100A & CE EN 100B & CE EN 101
Note	College Lecture attendance required.
Taught	Fall, Winter

Course Outcomes

Professional Engineering

1(i) Continue developing an understanding of the process required to become a professional engineer

Lifelong Learning

2(i) Continue developing an understanding of the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers

Teams

3(d) Work in and begin learning how to lead teams in civil engineering related projects that benefit the community

Ethical Behavior

4(f) Continue developing an understanding of the ethical behavior in civil engineering and be able to cite examples of good ethical behavior.

Career

5(j) Continue developing an understanding of contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

Engineering Mechanics--Mechanics of Materials

Fundamental concepts of elastic stress and strain, including transformations and stress-strain relations; beam/column theories (axial, flexure, torsion, and shear loads and deformations); shear and bending moment relationships; column stability; and cylindrical and spherical pressure vessels.

CE EN 203

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 103; or ME EN 101
Taught	Fall, Winter, Spring

Course Outcomes

LO 1. Stresses

- Students will be able to calculate and transform axial stress (e.g., Mohr's Circle), shear stress, bearing stress, thermal stress, bending stress, and combined stress.

LO 2. Strains

- Students will be able to calculate strain, transform strain (e.g., Mohr's Circle), apply stress-strain relations (e.g., Hooke's Law), and solve statically indeterminate problems.

LO 3. Deflections

- Students will be able to analyze deflections due to axial, torsion, bending, and shear loads, and manipulate relations between shear and bending moment.

LO 4. Beam/Column Design

- Students will be able to design beams and columns to carry specified axial, flexure, and shear loads, and predict their deformation and elastic stability (i.e., buckling).

LO 5. Pressure Vessels

- Students will be able to predict stresses in pressure vessels.

Engineering Mechanic--Dynamics

Concepts of dynamics applied to particles, systems of particles, rigid bodies, vibration systems, and nonrigid particles systems.

CE EN 204

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 103; or ME EN 101
Taught	Fall, Winter, Summer

Course Outcomes

Kinematics

1 (a) Understand the kinematics of particles and be able to perform rectilinear and curvilinear analysis of particle motion described in appropriate coordinate systems.

Laws of Motion

2 (a) Understand Newton's Laws of Motion and be able to write and solve the equations of motion for particles and systems of particles in appropriate coordinate systems.

Work and Energy

3 (e) Understand the principles of Work and Energy and Impulse and Momentum as they apply to particles and systems of particles and be able to solve problems appropriate thereto.

Motion of Rigid Bodies

4 (e) Be able to determine the motion of rigid bodies in translation and rotation about a fixed axis and to understand the principles associate with general plane motion.

Problem Solving

5 (e) Be able to apply the principles of Force and Acceleration, Work and Energy, and Impulse and Momentum to rigid bodies and to solve problems appropriate thereto.

Vibration

6 (e) Understand the basic concepts of one-degree-of-freedom vibration and to solve simiple problems related to such motion.

Top

Computational Methods

Computational techniques for solving civil engineering problems.

CE EN 270

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 113; or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

01-compsci

Be able to utilize computer science concepts such as how information is stored in a computer in a digital format to calculate data size and data transfer rates.

02-caedm

Be able to utilize the full range of IT resources available to students in the BYU College of Engineering and Technology.

03-html

Be able to design and edit web pages in HTML format.

04-ppt

Be able to create sophisticated and professsional Microsoft Powerpoint presentations, including use of themes and animation.

05-word

Be able to use Microsoft Word to develop complex, lengthy technical documents, utilizing advanced features such as cross referencing and auto-generated tables of contents and figures.

06-excel

Be able to use the basic and advanced features in Microsoft Excel including formulas, relative vs. absolute referencing, naming cells, vlookup, IF function, validation, custom formatting, array formulas, charts, goal seek, and the Solver add-on to solve civil engineering problems.

07-macros

Be able to record and use macros to automate frequently-used tasks in Excel or to explore what VB code is associated with the task.

07-ranges

Be able to reference cells and ranges in VB to either extract information from cells or write information to cells.

08-controls

Be able to add controls to a spreadsheet and associate those controls with VB code.

09-msgbox

Be able to use the MsgBox and InputBox objects in VB to present information to users or to prompt for input.

10-objects

Be able to use objects in VB programming, including properties and methods and be able to explore and research new object classes when necessary.

11-ifthen

Be able to use IF statements and conditional expressions to control the flow of logic in VB code.

12-loops

Be able to use each of the looping strategies in VB to encode iterative programming logic.

13-arrays

Be able to allocate and use arrays in visual basic to process vectors, matrices, tables, and lists of data.

14-debug

Be able to use the debugging utilities in VB to identify and correct logical errors in your code.

15-functions

Be able to design and code custom functions in VB that can be called from Excel formulas or from other places in your VB code.

16-subs

Be able to develop custom subs to perform specific tasks in VB or modify subs created by recorded macros to make the macros powerful or applicable in a variety of applications.

17-events

Be able to trap on a variety of different types of events and execute VB code in response to those events.

18-strings

Be able to utilize the VB string functions in order to manipulate text.

19-forms

Be able to create custom forms and associate those forms with an excel workbook.

Civil and Environmental Engineering Seminar

Technical and professional activities in civil engineering.

CE EN 300A

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	CE EN 200A & CE EN 200B
Note	College Lecture attendance required.
Taught	Fall

Course Outcomes

Professional Engineer

(i) Continue developing an understanding of the process required to become a professional engineer

Lifelong Learning

2(i) Continue developing an understanding of the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers

Teams

3(d) Work in and continue learning how to lead teams in civil engineering related projects that benefit the community

Ethical Behavior

4(f) Continue developing an understanding of the ethical behavior in civil engineering and be able to cite examples of good ethical behavior.

Career

5(j) Continue developing an understanding of contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

Civil and Environmental Engineering Seminar

Technical and professional activities in civil engineering.

CE EN 300B

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	CE EN 200A & CE EN 200B
Note	College Lecture attendance required.
Taught	Winter

Course Outcomes

Professional Engineer

1(i) Continue developing an understanding of the process required to become a professional engineer

Lifelong Learning

2(i) Continue developing an understanding of the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers

Teams

3(d) Work in and continue learning how to lead teams in civil engineering related projects that benefit the community

Ethical Behavior

4(f) Continue developing an understanding of the ethical behavior in civil engineering and be able to cite examples of good ethical behavior.

Career

5(j) Continue developing an understanding of contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

Top

Civil Engineering Materials: Metals, Woods, and Composites

Molecular basis and mechanical behavior of civil engineering structural materials; failure theories; laboratory testing.

CE EN 304

Hours	1.5 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	CE EN 203 & CE EN 270 & STAT 201
Taught	Fall Term 1, Winter Term 1

Course Outcomes

Wood and Steel

Be able to extract basic material properties of wood, aluminum and steel from simple mechanical tests.

Failure Mechanisms

Observe and understand the failure mechanisms of isotropic and orthotropic materials.

Communication

Develop an ability to communicate effectively.

Experimentation and Data Interpretation

Develop an ability to design and conduct civil engineering experiments, as well as to analyze and interpret data.

Application

Develop an ability to apply knowledge of structural engineering.

Composites

Understand basic characteristics of fiber-reinforced plastic composite materials.

Failure Theories

Be able to apply the maximum normal stress, maximum shear stress, and octahedral shear stress failure theories.

Top

Civil Engineering Materials: Concrete, Masonry, and Asphalt

Composition, engineering behavior, and construction of concrete, masonry, and asphalt; laboratory testing.

CE EN 306

Hours	1.5 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	CE EN 203 & CE EN 270 & STAT 201; Eng T 231 or concurrent enrollment.
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Aggregates

Understand properties, behavior, and use of aggregates.

Communication

Develop an ability to communicate effectively.

Portland Cement

Understand manufacturing, properties, behavior, and use of portland cement.

Experimentation and Data Interpretation

Develop an ability to design and conduct civil engineering experiements, as well as to analyze and interpret data.

Portland Cement Concrete

Understand production, properties, placement, behavior, and use of portland cement concrete.

Geotechnical Application

Develop an ability to apply knowledge of geotechnical engineering.

Masonry

Understand production, properties, placement, behavior, and use of masonry units.

Transportation Application

Develop an ability to apply knowledge of transportation engineering.

Asphalt Cement

Understand manufacturing, properties, behavior, and use of asphalt cement.

Asphalt Concrete

Understand production, properties, placement, behavior, and use of asphalt concrete.

Laboratory Testing

Be able to perform selected laboratory test procedures on aggregate-based materials.

Data Analysis

Be able to analyze and interpret experimental laboratory test data.

Report Preparation

Be able to prepare professional technical reports documenting laboratory investigations of material properties.

Top

Structural Analysis

Methods of statics. Influence line diagrams. Method of virtual work. Plastic hinge analysis. Flexibility (force) method, stiffness (displacement) method, and moment distribution method for analysis of indeterminate beams, trusses, and frames. Introduction to computer structural analysis.

CE EN 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 203 & CE EN 270; or concurrent enrollment.
Taught	Fall, Spring

Course Outcomes

Force Equilibrium

1(a) Apply Newton's Laws of force equilibrium to determine axial forces, shear forces, and bending moments in statically determinate beams, trusses, frames, arches, and cables.

Virtual Work

2(a) Apply calculus and the principle of virtual work to determine displacements in statically determinate beams, trusses, and frames.

Approximate and Plastic Analysis

3(e) Use appropriate assumptions to perform approximate analysis and plastic hinge analysis of statically indeterminate beams and frames.

Influence Line Diagrams

4(e) Critically place live loads on beams, trusses, and frames using influence line diagrams.

Symmetry, DOI's, and DOF's

5(e) Identify symmetry, antisymmetry, degrees of indeterminacy, and degrees of freedom in beams, trusses, and frames.

Structural Terminology

6(n) Define basic structural engineering terminology.

Flexibility Method

7(n) Analyze statically indeterminate beams, trusses, and frames by the flexibility method.

Stiffness Method

8(n) Analyze beams, trusses, and frames by the stiffness method.

Moment Distribution

9(n) Analyze beams and frames by moment distribution.

Commercial Software

10(n) Analyze beams, trusses, and frames with commercial structural analysis software.

Top

Hydraulics and Fluid Flow Theory

Fluid properties, fluid statics and dynamics, viscous flow, boundary layers, concepts of pipe and open-channel flow.

CE EN 332

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	CE EN 204 & CE EN 270 & ENG T 231; or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Experiments

1(p) Be able to setup, perform, evaluate and report on several elementary hydraulic experiments, including: static pressure force, impulse forces from a fluid jet, energy losses in pipe flow, minor energy losses in pipe systems, and flow over weirs in open channels.

Calculations

2(a) Be able to perform basic calculations for static pressures and forces in fluids.

Fundamental equations

3(a) Understand conservation of mass, energy, and momentum principles as applied to fluid flow situations, and be able to apply them to flow analysis problems.

Drag and Lift

4(e) Understand the concepts of drag and lift and be able to apply both to solve introductory problems of forces and dynamics.

Pressure pipes

5(e) Understand alternate standard approaches and formulas, and be able to analyze and design pressure pipe systems.

Water Resources Engineering

6(p) Understand standard approach and formulas, and be able to analyze and design open-channel flow systems.

Pumps

7(p) Understand the basic elements of pump and turbine flow, and be able to analyze and select the pump needed for situations involving fluid pumping.

Top

Elementary Soil Mechanics

Determination of stresses in soils, soil strength, consolidation, and settlement. Applications in fluid flow, lateral earth pressure, bearing pressure, and slope stability.

CE EN 341

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	CE EN 203 & CE EN 270; CE En 332 or concurrent enrollment. Geol 330 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Experimentation and Data Interpretation

1. (b) Perform basic laboratory tests on soils including seive analysi, Atterberg limits, compaction, direct shear, triaxial shear and consolidation. Be able to perform the basic calculations associated wtih laboratory tests on soils.

Communicate Geotech Test Results Effectively

2. (g) Communicate results of geotechnical tests effectively and explain their meaning in a clear and concise manner.

Soil classification/Soil Mineralogy

3. (m) Perform fundamental calculations and analyses including weight-volumen relationships and soil classification. Understand influence of soi structure and mineralogy on soil behavior.

Fluid flow in Soil

4. (m) Understand basic principles of flow through porous media including Darcy's law, the equation of continuity, seepage forces and flow nets.

Stress analysis in soil

5. (m) Understand how stresses are transferred through soils. Compute both geostatic stress (total stress, effective stress, and pore pressures) and induced stresses due to point, line and area loads.

Consolidation theory

6. (m) Understand basic consolidation theory. Compute the amoun of settlement and the time required for settlement under a given load.

Shear strength of soil

7. (m) Understand shear strength principles including Mohr-Coloumb failure criterion. Perform basic

caluclations related to shear strength analyis.

Lateral earth pressures

8. (m) Analyze lateral earth pressures under at-rest, active and passive conditions.

Bearing capacity

9. (m) Perform bearing capacity analysis for spread footings of various shapes. Understand how bearing capacity equations are used in foundation design.

Top

Environmental Engineering

Environmental concerns, problems, and evaluation methodology; pollution control and engineering management approaches; material balance and separations; reactor design.

CE EN 351

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Chem 105.
Taught	Fall, Winter

Course Outcomes

Materials Balance Calculations

Be able to setup and solve material balance calculations for environmental engineering problems.

Reactions

Understand zero, first, and second order reactions equations and be able to solve simple problems using these concepts. Understand half-life and doubling time and how it applies to reactor design.

Reactors: Mixing Models and Reactor Models

Understand and solve problems using mixed-batch, plug-flow, and completely mixed mixing models. Solve simple design problems for mix-batch, plug-flow, and completly mixed flow reactors.

Energy Balance

Understand and solve simple problems of energy balance. This will include units of meausre, conversion, energy equivalance, and power production.

Ecosystems

Understand the concept of an ecosystem. This includes material and energy flows.

Water Quality

Understand basic water quality measures: dissolved oxygen, oxygen demand, solids, nitrogen, and bacteria measurements. Be introduced to water quality standards for drinking water, effluents, and surface waters.

Water Treatment

Understand and solve basic engineering problems related to water treatment processes including softening, coagulation and floculation, settling, filtration, and disinfection.

Waste Water Treatment

Understand and solve basic engineering problems related to waste water treatment. This will include understanding the basic unit operations: preliminary and primary treatment, secondary treatment, tertiary treatment, and sludge treatment and disposal. Understand and be able to solve basic engineering problems related to activated sludge systems, including reactor design and solids separation.

Air Quality

Understand the basic processes and issues related to air quality, this includes major air pollutants, sources of air pollution, and air quality standards.

Hazardous Waste

Understand the basic issues and regulations related to hazardous and radioactive waste. This includes legal definitions and approaches.

Top

Introduction to Transportation Engineering

Transportation system characteristics, traffic engineering and operaton, transportation planning, geometric design, pavement design, transportation safety, freight, public transport, sustainable transportation.

CE EN 361

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 113 & CE EN 270; Eng T 231, Stat 201; or concurrent enrollment.
Taught	Fall, Spring

Course Outcomes

History

1(o) Understand the history of the development of transportation in the United States and how transportation modes and networks available in a community significantly influence the way the community develops.

Systems Perspective

2(h) Approach transportation problems, especially traffic congestion on highways, from a systems point of view, as an interaction between land use and transportation systems, not just as the problem related to highways. This competency is all inclusive, including public transportation, freight, and sustainability.

Traffic Stream Characteristics

3(b) Conduct activities to measure traffic stream characteristics (volume, speed, and density) and analyze field data to estimate values for traffic stream parameters, including hypothesis tests.

Traffic Flow Model

4(b) Analyze a standard traffic flow model (i.e., Greenshields Model) for observed traffic data and understand the randomness of traffic flow characteristics.

Level of Service

5(b) Understand the concept of level of service (LOS) and capacity and evaluate the performance of basic roadway segments using standard procedures based on this concept.

Planning

6(o) Understand the four steps in the traditional travel demand modeling process, the two-way relationship between land use and transportation, and how the travel demand modeling fits into the transportation-planning process.

Safety Evaluation

7(b) Understand the highway safety improvement program and standard safety evaluation parameters.

Safety in Design

8(b) Understand the dynamic interaction of the driver, roadway, and vehicle, and evaluate and design roadway sections for safe stopping sight distance.

Geometric Design

9(b) Determine key dimensions of horizontal and vertical alignments of roadway sections using safe stopping sight distance and superelevation.

Intersection Design

10(c) Determine when an intersection warrants the installation of a traffic signal, design signal settings for intersections so that drivers will not face a dilemma zone, and understand that congestion and associated delays are societal costs.

Pavement Design

11(c) Understand pavement structures and their characteristics and design bituminous pavements using the AASHTO method that requires knowledge of traffic engineering, pavement material characteristics, and economics.

Public Mass Transportation

12(o) Understand rail transit service in a corridor with respect to station spacing and vehicle capabilities, calculate changes in transit ridership in response to changes in fare or service (elasticity), and measure and compare the performance of public transportation operations.

Freight

13(o) Understand the role of freight movement in the economy and why certain commodities tend to move on specific transport modes.

Sustainability

14(h) Describe what sustainable transportation is, how it can be supported, and the impacts of traffic congestion on a corridor or in a community.

Transportation Communication

15(d) Lead and function on multidisciplinary teams and (g) Communicate in a team environment to compose professional documents in a clear, concise, and effective manner.

Civil and Environmental Engineering Seminar

Technical and professional activities in civil engineering.

CE EN 400A

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	CE EN 300A & CE EN 300B
Note	College Lecture attendance required.
Taught	Fall

Course Outcomes

Professional Engineer

1(i) Understand the process required to become a professional engineer

Lifelong Learning

2(i) Understand the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers

Teams

3(d) Work in and lead teams in civil engineering related projects that benefit the community

Ethical Behavior

4(f) Understand ethical behavior in civil engineering and be able to cite examples of good ethical behavior.

Career

5(j) Understand contemporary issues in civil engineering as illustrated by projects presented by practicing engineers

Civil and Environmental Engineering Seminar

Technical and professional activities in civil engineering.

CE EN 400B

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	CE EN 300A & CE EN 300B
Note	College Lecture attendance required.
Taught	Winter

Course Outcomes

Professional Engineer

1(i) Understand the process required to become a professional engineer

Lifelong Learning

2(i) Understand the importance of lifelong learning and know how to obtain learning experiences that will benefit their future careers

Teams

3(d) Work in and lead teams in civil engineering related projects that benefit the community

Ethics

4(f) Understand ethical behavior in civil engineering and be able to cite examples of good ethical behavior.

Career

5(j) Understand contemporary issues in civil engineering as illustrated by projects presented by practicing engineers.

Civil and Environmental Engineering Online Seminar

Technical and professional activities in civil engineering. Available online.

CE EN 400C

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Note	College Lecture attendance required.
Taught	Fall, Winter

Course Outcomes

Teamwork Leadership

Develop an ability to lead and function on multidisciplinary teams.

Responsibility Related to Faith

Develop an understanding of professional and ethical responsibility, and their relationship with faith.

Responsibility Related to Faith

Develop an understanding of professional and ethical responsibility, and their relationship with faith.

Teamwork Leadership

Develop an ability to lead and function on multidisciplinary teams.

Life-Long Learning, Licensure, and Service

Develop a recognition of the need for, and an ability to engage in life-long learning, professional licensure, and service.

Life-Long Learning, Licensure, and Service

Develop a recognition of the need for, and an ability to engage in life-long learning, professional licensure, and service.

Engineering Applications of GIS

Introduction to GIS concepts. Data acquisition and GIS database formulation. Applications of GIS to civil engineering.

CE EN 414

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Senior status.
Taught	Fall

Course Outcomes

Synthesis and Integration

Integrate topics from various civil engineering disciplines to solve realistic problems

Database Management

Obtain and evaluate appropriate input information from databases, handbooks, correlation, experiments and literature

Locating Geographic Data

Know where to locate, and how to prepare geographic datasets for use in a GIS

GIS Spatial Analysis

Use GIS tools for spatial analysis, understanding and design of engineering systems

Map Generation

Produce professional maps and technical reports from geographic data for use in written and oral presentations

GIS Customization

Customize, or use customized scripts to solve engineering-specific problems with GIS

Professional Communication

Compose professional documents in a clear, concise, and effective manner

Structural Steel Design

Compression and tension of steel members, beams, and beam-columns. Elastic and inelastic lateral-torsional buckling. Structural fasteners. Emphasizes LFRD.

CE EN 421

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 304 & CE EN 321
Taught	Winter

Course Outcomes

AISC Specification

1(n) Students will understand the theory behind, and have a working familiarity of, the AISC specification.

Tension Members

2(c) Students will be able to design steel tension members.

Compression Members

3(c) Students will be able to design steel compression members.

Beams

4(n) Students will be able to design steel beams and composite beams.

Beam-Columns

5(n) Students will be able to design steel beam-columns.

Connections

6(n) Students will be able to design concentrically loaded bolted and welded connections.

Management

7(l) Students will be able to explain some concepts in business management and public policy.

Reinforced Concrete Design

Theory and design of reinforced concrete, including columns, beams, slabs, and footings; elastic and ultimate-strength methods of analysis.

CE EN 424

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 304 & CE EN 306 & CE EN 321
Taught	Fall, Spring even years

Course Outcomes

Beams - Transverse Loading

424.1 (n) - Be able to design reinforced concrete beams subjected to transverse loading.

One Way Slab - Transverse Loading

424.2 (n) - Be able to design reinforced concrete one way slabs subjected to transverse loading.

Short Columns - Axial and Flexural Loadings

424.3 (n) - Be able to design reinforced concrete short columns subjected to axial and flexural loading.

Footings - Axial Loading

424.4 (n) - Be able to design reinforced concrete spread square footings subjected to axial loadings.

Structural System

424.5 (c) - Be able to design a simple reinforced concrete structural system.

ACI Code

424.6 (c) - Have a working familiarity with the ACI code.

Team Environment

424.7 (I) - Be able to communicate in a team environment.

International Megastructures

Skyscraper analysis and design. Introduction to analysis and design of suspension, cable-stayed, arch, and prestressed girder bridges. Economic, social, and environmental design criteria for megastructures. International experience to study megastructures in China or elsewhere. Interaction with professionals.

CE EN 427

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 321 & CE EN 471B; instructor's consent.
Taught	Spring

Course Outcomes

Megastructure Presentation

1(g) Identify and present innovative ideas in the design/construction/use of remarkable megastructures.

Design Spreadsheets

2(c) Design preliminary member sizes for a skyscraper and megabridges with realistic loads and constraints.

Tall Building Competition

3(h) Propose and model a sustainable design for a tall building to be built at a particular site.

Team Evaluation

4(d) Participate on a student design team and interact with design professionals.

China

5(j) Experience the culture, land, and megastructures of China.

Hydrology

Waters of the earth, their occurrence, circulation, and distribution. Relationships among precipitation, evaporation, infiltration, transpiration, groundwater, and stream runoff.

CE EN 431

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	CE EN 332
Taught	Winter, Spring

Course Outcomes

1(p) Hydrologic Cycle

1(p). Understand and apply climatological principles relating to the hydrologic cycle and its occurrence and interaction with the biosphere of the earth.

2(p) Precipitation & Runoff

2(p). Understand and solve problems for precipitation/runoff situations; including generation of the flow rates at desired points in a watershed.

3(c) Design & Hydrographs

3(c). Design and make calculations of flowrate hydrographs, reservoir storage, and water demand relationships in a stream.

4(p) Groundwater

4(p). Understand and be able to make calculations related to groundwater flow, well flow analysis and design, and drainage of saturated soils.

5(l) Statistical Methods

5(l). Design and apply statistical methods to generate hydrologic intensity and frequency distributions.

Hydraulic Engineering

Application of fluid mechanics principles to analysis and design of hydraulic structures and systems.

CE EN 433

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 332
Taught	Fall, Spring

Course Outcomes

1(p) Energy & Momentum

1(p). Apply energy and momentum principles to fluid flow situations, and be able to solve problems for forces in static and moving fluids.

2(p) Pipe Systems

2(p). Apply standard energy approaches and formulas, and be able to solve for and design pressure pipe systems.

3(p) Open Channels

3(p). Apply standard aproaches and formulas, and be able to solve for and design open-channel flow systems.

4(l) Pumps and Turbines

4(l). Understand the basic elements of pump and turbine flow, and be able to analyze and select the pump needed for pressurizing situations.

5(c) Design common facilities

5(c). Generate and apply the analytical and design approaches to common water facilities such as culverts, spillways, pipe networks, sewer systems, canals, and scour and sediment transport.

Top

Water Resources Study Abroad

BYU students team with engineers and engineering students from other countries to work on water resources projects of consequence. Collaboration with international teams occurs electronically through the semester with a 1-3 week visit to the country assigned.

CE EN 439

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE En 431 or 433; CE En 471B or concurrent enrollment; instructor's consent.
Taught	Winter

Course Outcomes

International Engineering

Exposure to engineering practice in an international setting (Mexico)

Making a Difference

Develop a broader vision of how engineering makes a difference in the world

Direct Application

Direct application of your education

Sharing Knowledge

Confidence in sharing your knowledge and expertise

Teamwork and Collaboration

Learn to work and collaborate as an international, multi-cultural team

Spanish Language Skills

Learn Spanish in the engineering profession

Communication in International Environment

Broaden communication and presentation skills in an international environment

Top

Foundation Engineering

Soil investigation, bearing capacity and settlement, design of spread footings, combined footings, mat foundations, pile foundations, and drilled shafts.

CE EN 442

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 341; or equivalent.
Taught	Fall, Spring even years

Course Outcomes

Settlement Magnitude

1. Estimate the settlement within a compressible soil layer due to applied loads from fill, embankent and buildings

Time Rate of Settlement

2. Estimate the time-settlement relationships for soils due to applied loads. Use design approaches for accelerating consolidation rate (e.g. wick drains and surcharging)

Soil Bearing Pressure

3. Determine the allowable soil bearing pressure for spread footings on saturated clays and sand giving consideration to shear failure and settlement

Design Spread Footings

4. Design square and rectangular reinforced concrete footings

Design Combined Footings

5. Design combined reinforced concrete foundatiosn using both conventional approaches and elastic methods (beam on an elastic foundation).

Design Mat Foundations

6. Design reinforced concrete mat foundations using both the conventional method and elastic methods (e.g. finite element models)

Pile capacity

7. Estimate the single pile capacity and group pile capacity for piles in sand and clay

Pile Group Settlement

8. Estimate the settlement of a pile group in saturated clay

Drilled Shaft Capacity

9. Compute the capacity of drilled shafts in clay and sand. Understand critical components of construction that influence capacity.

Select Suitable Foundation

10. Characterize a subsurface profile using insitu techniques and determine the most suitable foundation type to support a given structure.

Top

Geometric Design of Highways

Designing visual aspects of highways: highway classification, design controls and criteria, design elements, vertical and horizontal alignment, cross section, intersections, interchanges, capacity analysis.

CE EN 461

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 113 & CE EN 361
Taught	Winter

Course Outcomes

Components of the traffic system

1 (o) An ability to apply to highway geometric design the knowledge that critical components of the traffic system – drivers, vehicles, roads and highways, physical environment, and traffic control devises – interact to form traffic streams.

Capacity and Level of Service Evaluation for Design

2 (e) An ability to apply the concept of capacity and level of service to performance evaluation, design, and planning of freeways, two-lane two-way highways, urban streets, and intersections.

Familiarity with HCM Models

3 (k) An ability to reason and use mathematical models for highway capacity and level of service estimation included in the Highway Capacity Manual.

Familiarity with the HCS Software

4 (k) An ability to use the Highway Capacity Software for performance evaluation, designing, and planning of freeways, two-lane two-way highways, urban streets, and intersections.

Concepts behind Highway Geometric Design

5 (k) An ability to apply the concepts behind highway geometric design to the highway geometric design of a location assigned for the term project.

Familiarity with the AASHTO Greenbook

6 (k) An ability to use proper tables and figures in A Policy on Geometric Design of Highways and Streets in Geometric Design of Highways and Streets to assignment problems, exams, and a term project design.

Use of Autodesk Civil 3D for CAD-based Design

7 (k) An ability to use Autodesk Civil 3D to design a highway and an intersection for the location assigned in the term project, including importing digital design data, triangulating the terrain data, creating profile, designing vertical and horizontal alignments, preparing a cross section assembly, and creating a corridor and an intersection.

Writing a Technical Report

8 (g) An ability to prepare a technical report summarizing the tasks that the team members have done in the design of a highway and an intersection assigned for the term project.

Preparing a Technical Presentation

9 (g) An ability to prepare a presentation file summarizing the tasks the team members have done in the design a highway and an intersection assigned for the term project AND present it as a team.

Familiarity with Highway Geometric Design Terms

10 (o) An ability to use professionally terms pertaining to highway geometric design in assignments, exams, and a term project.

International Megacities

Transportation planning and analysis of public transportation, airports, high-speed rail, pedestrians, water transportation, freight, and highway systems of international megacities achieved through international experience, research, professional interactions, and an evaluation of safety, policy, and sustainability.

CE EN 467

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 361 & CE EN 471B; and instructor's consent.
Taught	Spring odd years

Course Outcomes

Global Awareness

Develop an awareness of the culture, politics, and economics of international megacities, while identifying the social (people), environmental (planet), and economic (profit) impacts of transportation within megacities (ABET H: sustainability).

Communication

Communicate and interact with fellow students, professors, and engineers in the understanding of international megacities (ABET G: communication).

Experience

Learn by experience through a collection of unforgettable and influential experiences that increase retention, create passion, and develop perspective (ABET I: life-long learning and service).

Leadership

Function on and lead student transportation engineering project teams (ABET D: teamwork).

Technical Innovation

Research, study, and present innovative practices and ideas in the area of planning and analysis of: public transportation, airports, high-speed rail, pedestrians, water transportation, freight, and highway systems of international megacities (ABET O: transportation engineering).

Civil Engineering Practice

Cash-flow diagrams. Present worth and annual payments comparison of engineering alternatives. Sustainability of engineering projects in terms of environmental, social, and economic impact (triple-bottom-line). Teamwork and leadership development. Response to a request for proposal (RFP) to develop a culminating design project.

CE EN 471A

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	12 credit hours from CE En 304, 306, 321, 332, 341, 351, 361; or concurrent enrollment.
Taught	Fall

Course Outcomes

Experience

Students will improve their skills through real-life, hands-on experience in an off campus industry setting.

Civil Engineering Practice

Cash-flow diagrams. Present worth and annual payments comparison of engineering alternatives. Sustainability of engineering projects in terms of environmental, social, and economic impact (triple-bottom-line). Teamwork and leadership development. Economic, political, and cultural impact of globalization on civil engineering in the USA and other countries. Research and triple-bottom-line evaluation of specific civil engineering projects throughout the world.

CE EN 471B

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	12 credit hours from CE En 304, 306, 321, 332, 341, 351, 361; or concurrent enrollment.
Taught	Winter

Course Outcomes

Triple Bottom Line

1(h) Perform a triple bottom line analysis of a civil engineering project by evaluating social, environmental, and economic impact.

Information Discovery

2(i) Learn about an existing civil engineering project by gathering and organizing information from published literature and the internet.

Global World

3(j) Understand the changing roles of the USA and another country in the modern world in both contemporary society and civil engineering.

Engineering Economics

4(l) Explain the time value of money, construct cash-flow diagrams, and perform present worth or annual payments analysis of alternatives.

Top

Civil Engineering Design

Civil engineering culminating design experience based on the knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints.

CE EN 472

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 471A
Taught	Winter

Course Outcomes

1(c) Design and Constraints

1(c). Understand and apply conception, formulation, analysis and search for solutions to civil engineering design problems. Be able to integrate topics from various civil engineering disciplines to solve problems with multiple realistic constraints.

2(d) Work in Teams

2(d). Be able to communicate in a team environment. Be able work effectively in groups through presentations and written documents.

3(g) Interviewing, Writing and Presenting

3(g). Understand basic principles of personal communication including conversational and interviewing skills. Be able to compose effective professional documents and make well-organized oral presentations.

4(h) Environment and Economics

4(h). Understand how civil engineering problems may be affected by cultural, societal, political and environmental concerns. Understand basic concepts of engineering economic analyses.

Civil and Environmental Engineering Practicum

CE EN 493R

Hours	1.0 - 18.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Problem Solving

An ability to identify, formulate, and solve engineering problems

Engineering Tools

An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Top

Directed Studies in Civil and Environmental Engineering

CE EN 498R

Hours	1.0 - 18.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Problem Solving

An ability to identify, formulate, and solve engineering problems

Engineering Tools

An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

(CE En-Me En) Design and Materials Applications

Applied and residual stress; materials selection; static, impact, and fatigue strength; fatigue damage; surface treatments; elastic deflection and stability--all as applied to mechanical design.

CE EN 500

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ME EN 372; or CE EN 321; or equivalent.
Taught	Fall

Course Outcomes

Materials Properties and Selection

Understand how materials selection in design can be based on a variety of materials properties.

Structure and Properties Effects on Design

Understand effects of materials structure and properties on design and choices for static, impact, fatigue, elastic, and anelastic behavior.

Property Modification Techniques

Be familiar with important techniques used to modify engineering properties of a broad range of materials, such as metals, polymers, ceramics, composites, and biomaterials.

Analysis Techniques to Design for Failure Mechanisms

Understand the necessary analysis techniques to design for various material failure mechanisms.

Top

(CE En-MeEn) Stress Analysis and Design of Mechanical Structures

Stress analysis and deflection of structures; general bending and torsion with computer applications to mechanical and aerospace structure design.

CE EN 501

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 321; or ME EN 372; or equivalent.
Taught	Spring

Course Outcomes

Multi-Material Beams

1. Calculate the deflections of and stress in multi-material beams under force, moment, or temperature loads.

Three-Dimensional Structures

2. Understand the principles of stress and strain, including principal stress and strain, in general three-dimensional structures.

Torsion Bars

3. Calculate the deflections and stress in torsion bars of arbitrary cross section.

Beams in Unsymmetric Bending

4. Calculate the deflections and stress in beams in unsymmetric bending.

Top

(CE En-Me En) Plasticity and Fracture

Tensor algebra; stress and deformation tensors; relationships between dislocation slip, yielding, plastic constitutive behavior, and microstructure development; cracks and linear elastic fracture mechanics.

CE EN 503

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 203 & ME EN 250 & MATH 303; Senior standing or instructor's consent.
Taught	Winter

Course Outcomes

Crystal Structure and Material Defects

Identify and describe the influence of crystal structure and material defects on tensile and fracture properties.

Stress Concentration

Describe the effects of a stress concentration as well as its influence on the fracture and fatigue life of a structural member.

Griffith Crack Criteria

Describe the principles of the Griffith Crack Criteria and its application to brittle materials, and its extension to ductile materials.

Failure Design Philosophy

Describe the Failure Design Philosophy and apply it to materials selection in an engineering application.

Member Life Prediction

Predict the life of a structural member of known material properties given the loading conditions and a known flaw size.

Impact of Microstructure Features

Describe the impact of various microstructure features on tensile, fracture and fatigue properties.

Class Selection

Select an appropriate material class given functional requirements, fatigue and fracture.

Top

(CE En-Me En) Computer Structural Analysis and Optimization

Matrix stiffness method for 1D, 2D, and 3D skeletal structure classes. Implementing the matrix stiffness method as a computer program. Nonlinear second-order structural analysis. Structural optimization techniques including stress-ratio method, gradient-based methods, and genetic algorithms.

CE EN 504

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 321; or ME EN 372; or equivalent; linear algebra.
Taught	Fall

Course Outcomes

Member Stiffness and Force

Construct global and local member stiffness matrices and force vectors for any skeletal class and any distributed loading.

Structure Stiffness and Force

Construct structure matrices and vectors for both force and support displacement loads exploiting symmetry/antisymmetry and deformation assumptions.

Member Results

Construct member displacement vectors and free-body diagrams for any skeletal class.

Analysis Program Organization

Write down the basic organization and calling structure of a structural analysis program, and complete the pseudo-code for structure level routines.

Second Order Analysis

Derive first/second order equilibrium/compatibility equations, buckling loads/displacements, and structure elastic/geometric stiffness matrices for small trusses and single-member frames.

Matrix Vector Operations

Determine the number of FLOPS and perform the calculations for matrix-vector operations including triangularization, backsubstitution, Newton-Raphson iteration, and inverse iteration.

Stress Ratio and Exhaustive Search

Determine the number of FLOPS and perform the calculations for stress ratio optimization and exhaustive search, and construct design space plots if possible.

Optimality Criteria Algorithms

Determine the number of FLOPS and perform the calculations for finite difference / virtual work sensitivity analysis, Kuhn-Tucker condition evaluation, and optimality criteria algorithm.

Genetic Algorithms

Determine the number of FLOPS and perform the calculations for genetic algorithms with penalty/segregation fitness, tournament/roulette selection, point/uniform/blend crossover, dynamic mutation, and ranking/scoring/maximin fitness.

Execute Structural Software

Prepare input for linear analysis, nonlinear pushover analysis, gradient-based size optimization, and genetic-based size/shape/topology optimization programs for plane frames.

Portland Cement Concrete Mixture Design and Analysis

Properties and testing of freshly mixed and hardened concrete and constituent materials; concrete mixture design and analysis; concrete construction practices; laboratory experimentation.

CE EN 505

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	CE EN 306; or equivalent.
Taught	Winter

Course Outcomes

Properties

Characterize properties of concrete materials.

Mix Design

Design concrete mixtures.

Fresh Concrete

Measure properties of fresh concrete.

Hardened Concrete

Measure properties of hardened concrete.

Construction Practices

Understand proper concrete construction practices.

Concrete Deterioration

Understand mechanisms of concrete deterioration.

Top

(CE En-Me En) Linear Finite Element Methods

Linear static finite element analysis of elastic solids; problem formulation, finite element discretization, and equation solving; stability, interpolation theory, and error estimates. Introduction to underlying continuum mechanics principles. Isogeometric analysis as a generalization of classical finite element analysis; basic principles of analysis-suitable computational geometry.

CE EN 507

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 321; or ME EN 372
Taught	Fall

Course Outcomes

Linear Finite Element Methods

By the end of this course students will be able to correctly apply linear finite element methods in their engineering profession.

(CE En-Me En) Structural Vibrations

Dynamic analysis of single degree-of-freedom, discrete multi-degree-of-freedom, and continuous systems. Applications include aerospace, civil structures, and mechanical components.

CE EN 508

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 321; or ME EN 372; or equivalent.
Taught	Fall

Course Outcomes

SDOF Systems

Students will be able to determine the response of single degree-of-freedom (SDOF) systems in free and forced vibration, with and without damping.

MDOF Systems

Students will be able to determine the response of multi degree-of-freedom (MDOF) and continuous systems in free and forced vibration, with and without damping.

Application

Students will be able to apply the theory of structural vibrations to problems in civil or mechanical engineering.

Top

Seismic-Resistant Steel Buildings

Background and development of UBC seismic provisions; design of ductile braced frames and steel moment resisting frames; design of diaphragms and collectors.

CE EN 521

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 421; or equivalent.
Taught	Fall

Course Outcomes

Lateral Load Paths

1. Students will understand lateral load paths in buildings and be able to compute forces in diaphragms, collectors, and frames.

Theory and Design

2. Students will understand the theory behind modern seismic provisions for buildings.

Frame Design

3. Students will be able to appropriately size and detail members in special moment resisting frames (SMRFs), special concentrically braced frames (SCBFs), and buckling-restrained braced frames (BRBFs).

Analysis Tools

4. Students will know how to use modern analysis tools to analyze buildings under earthquake loading.

(CE En-Me En) Aircraft Structures

Requirements, objectives, loads, materials, and tools for design of airframe structures; static behavior of thin-wall structures; durability and damage tolerance; certification and testing. Airframe component team design project.

CE EN 523

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE En 304 or Me En 250 or equivalent. CE En 321 or Me En 372 or equivalent.
Taught	Winter

Course Outcomes

Aircraft Design Approaches

Students will understand and be able to apply industry philosophies and critical criteria that drive the design and govern the certification of aircraft structures.

Analysis of Aircraft Structural Elements

Students will be able to analyze the in-plane (compression, shear, stability) and out-of-plane (bending, torsion, transverse shear) behavior (stresses, deflections, margins of safety) of structural elements (beams, columns, thin plates, open and closed sections, etc.) prevalent in aircraft.

Certification of Aircraft Structures

Students will understand important issues required for certification of aircraft structures (regulations, loads, fatigue, damage tolerance).

Top

Bridge Structures

Design of composite, continuous beam, and girder bridges, including piers, abutments, floor systems, and bearings; field trips to observe bridge construction and fabrication.

CE EN 525

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 421 & CE EN 424; or equivalent.
Taught	Fall

Course Outcomes

History

Explain the world's history of bridges.

Surface Transportation

Explain the USA's surface transportation law.

Federal Code

Explain the USA's Code of Federal Regulations applicability to bridges.

Design Philosophy

Explain the USA's bridge design philosophy.

Design Specification

Explain the USA's bridge design specifications.

Load Distribution

Explain the loads that a bridge sustains and how they are distributed.

Bridge Elements

Explain the elements of a bridge and how they are constructed.

Innovation

Explain current innovation in bridge design and construction.

Contract Documents

Read and understand bridge project contract documents including plans, specifications, and

estimates.

Structure Design

Design a bridge's structure type, width, span, and vertical clearance.

Deck Design

Design a bridge's reinforced concrete deck.

Prestressed Concrete Girder Design

Design a bridge's prestressed conrete girders.

Steel Plate Girder Design

Design a bridge's welded-steel plate girders.

Masonry Design

Introduction to analysis, design, and construction of masonry structures. Compressive, tensile, flexural, and shear behavior of masonry structural components.

CE EN 528

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 424; or equivalent.
Taught	Winter even years

Course Outcomes

LO 1. Beams

- Be able to design masonry beams subjected to transverse loading

LO 2. Columns, Piers, and Walls

- Be able to design masonry columns, piers, and walls for axial and flexural loading

LO 3. Connections

- Be able to specify anchorage requirements and design bolt connections

LO 4. TMS 402 & TMS 602

- Have a working familiarity with the building code requirements (TMS 402) and specifications (TMS 602) for masonry structures

Top

Timber Design

Timber species, composition, and grades; design of beams, straight and tapered glue-lam girders, columns, connections, trusses, shear walls, and structural systems.

CE EN 529

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 304 & CE EN 321 & CE EN 421; or equivalents.
Taught	Winter even years

Course Outcomes

Beams

Be able to design timber beams subjected to transverse loading

Beams

Be able to design timber beams subjected to transverse loading

Tension and Compression Members

Be able to design timber tension and compression members subjected to axial and flexural loading

Tension and Compression Members

Be able to design timber tension and compression members subjected to axial and flexural loading

Diaphragms

Be able to design vertical and horizontal diaphragms subjected to in plane and out of plane loading

Diaphragms

Be able to design vertical and horizontal diaphragms subjected to in plane and out of plane loading

Connections

Be able to design simple connections with nails, staples, bolts, and lag screws

Connections

Be able to design simple connections with nails, staples, bolts, and lag screws

NDS

Have a working familiarity with the National Design Specification for Wood Construction

NDS

Have a working familiarity with the National Design Specification for Wood Construction

Principles of Hydrologic Modeling

Advanced hydrologic and hydraulic principles with an emphasis on modeling for the purpose of planning and designing draining, flood control, and other water resource facilities.

CE EN 531

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	CE EN 431; or equivalent.
Taught	Fall

Course Outcomes

Applied Hydrology

Apply fundamental principles of hydrology in hydrologic and hydraulic models

Model Formulation

Know how to apply different hydrologic modeling formulation to solve design and analysis problems

Data Resources

Know where to find digital and other data resources required for hydrologic model development

Modeling Limitations

Understand the limitations and uses of traditional lumped parameter models as well as more advanced physics based models

Communicating Model Results

Interpret and describe hydrologic modeling results in written reports

Teamwork

Work together with teammates to develop hydrologic models

Modern Hydrologic Modeling Tools

Learn modern engineering software tools like the Watershed Modeling System (WMS) that process digital data and prepare model inputs

Hydraulic Design of Channels and Control Structures

Design of water conveyance channels and control structures, including siphons, chutes, weirs, flumes, dams, spillways, and outlet works.

CE EN 535

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	CE EN 433; or equivalent.
Taught	Winter

Course Outcomes

Problem Solving

Students will be able to solve problems requiring fundamental and more advanced mathematical theories.

Project Planning

Students will be able to design basic hydraulic structures including cost estimates and environmental impacts.

Articulating Results

Students will prepare professional-level quality reports.

Top

Geo-Environmental Engineering

Hazardous waste statutes and regulations; introduction to hazardous waste treatment, storage, disposal, and monitoring techniques. Geotechnical aspects of environmental engineering. Topics include municipal and hazardous solid waste landfill design and characterization and remediation techniques for contaminated soil and groundwater.

CE EN 540

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 341 & CE EN 351; or equivalents. CE En 471A or 471 B or concurrent enrollment or instructor's consent.
Taught	Fall

Course Outcomes

Design

Be able to produce a preliminary design of a landfill. This inlcudes understanding regulations, chemical fate and transport, geotechnical design methods, and project planning issues.

Communication

Be able to communicate the design and design decisions to a non-specialist but technical audiance. This will include communicating the reasons for basic assumptions and why they were made.

Top

Seepage and Slope Stability Analysis

Seepage and slope stability analysis of earth dams, levees, excavations, embankments, and natural slopes; construction dewatering, numerical methods, shear strength of soils, limit equilibrium method.

CE EN 544

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 341; or equivalent.
Taught	Winter

Course Outcomes

Darcy's Law

Be able to apply Darcy's law to solve basic problems related to flow through porous media.

Groundwater Flow

Understand the governing equations for 2D and 3D groundwater flow, including what simplifying assumptions are used in the derivation of the equations.

Flow Nets

Be able to create and interpret graphical solutions (flow nets) to the governing equations.

Well Equations

Be able to apply analytical solutions to the governing equations, including well equations.

Construction Dewatering

Be able to apply analytical solutions to construction dewatering problems.

Finite Difference Analysis

Understand the finite difference solution and be able to create finite difference solutions in Excel.

Finite Element Equations

Understand how the finite element method works and how the finite element equations are formulated.

Software Application

Be able to apply finite element software to solve complex seepage analysis problems.

Limit Equilibrium Method

Understand the basic concepts of the limit equilibrium method of slope stability.

Slope Stability Application

Be able to apply slope stability charts for simple problems.

Slope Stability Software Application

Be able to apply slope stability software (such as UTEXAS) for common slope stablility problems.

Special Case Analysis

Be able to solve special cases of slope stability including, reinforced slopes, rapid drawdown, and seismic conditions.

Top

Geotechnical Analysis of Earthquake Phenomena

Earthquake magnitude and intensity; design ground motions, elementary dynamics of structures; response spectra; building code provisions; liquefaction and ground failure.

CE EN 545

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 321 & CE EN 341; or equivalents.
Taught	Winter

Course Outcomes

Understand Earthquakes

1. Understand the origin of earthquakes and the nature of seismic waves; characterize faults and seismic sources; quantify the "size" of an earthquake in terms of magnitude and intensity; quantify earthquake ground motions in terms of engineering parameters.

Attenuation Relationships

2. Use attenuation relationships to predict ground motions; perform deterministic and probabilistic seismic hazard analyses

Dynamic Response SDOF Structures

3. Determine the dynamic response of single-degree-of-freedom structures subject to base shaking; understand, develop and apply response spectra

Site Response Analysis

4. Perform site response analyses; understand the effect of different soil types on ground response and damping

Seismic Codes

5. Understand the philosophy and general seismic design provisions found in design codes developed/distributed as part of the National Earthquake Hazard Reduction Program (NEHRP) and the International Building Code (IBC)

Liquefaction and Ground Failure

6. Understand the mechanism associated with liquefaction and ground failure; perform liquefaction triggering, lateral spread, and settlement analyses.

Seismic Slope Stability

7. Evaluate seismic slope stability and deformation; estimate seismic earth pressures

Top

Groundwater Modeling

Computer simulation of groundwater flow systems; modeling theory, numerical methods, data management, boundary conditions, calibration, and stochastic analysis.

CE EN 547

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 341; or equivalent.
Taught	

Course Outcomes

Darcy's Law

Be able to apply Darcy's law to solve basic problems related to flow through porous media.

Groundwater Flow Equations

Understand the governing equations for 2D and 3D groundwater flow, including what simplifying assumptions are used in the derivation of the equations.

Conceptual Modeling

Be able to develop conceptual models of groundwater flow systems, including properly formulated boundary conditions.

MODFLOW Background

Understand the basic structure and organization of the MODFLOW model.

MODFLOW Input

Be able to select the appropriate MODFLOW packages for a particular problem and develop the package input.

MODFLOW Problem Solving

Understand issues related to MODFLOW solvers and be able to solve common instability issues.

MODFLOW GIS Application

Be able to apply GIS data to develop regional groundwater simulations with MODFLOW.

Model Calibration

Be able to calibrate groundwater models using both manual approaches and automated tools such as the PEST code.

Flow Direction Analysis

Be able to analyze flow directions using particle tracking.

Stochastic Simulation

Be able to perform stochastic simulations and analyze uncertainty.

Transient Simulation

Be able to perform transient simulations.

Groundwater in ArcGIS

Be able to do basic groundwater analysis tasks in ArcGIS.

Top

Water Treatment Facilities Design

Evaluation, selection, and design of water treatment facilities.

CE EN 551

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	CE EN 351; or equivalent.
Taught	Fall

Course Outcomes

Understand

Understand the concepts and theories governing water treatment unit operation and process design and operation

Design

Design water treatment unit operations and processes

Experiments

Setup, perform, and evaluate experiments necessary to design water treatment processes

Communicate

Communicate effectively through the preparation of reports and technical papers.

Read

Read and understand water treatment related technical literature

Environmental Chemistry

Chemical theory and calculation supporting analysis of major organic and inorganic constituents in environmental engineering, focusing on theoretical understanding of the chemical processes.

CE EN 555

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	CE EN 351; or equivalent.
Taught	Fall

Course Outcomes

Phyical Chemistry

Understand and solve basic physical chemistry problems involving ReDox, Gas Law, and actvity.

Equilibrium

Be able to setup and solve the mathmatical formulations of equilibrium concepts for dilute aquatic systems

Computer Programs

Understand the basic concepts and be able to setup problems to use standard chemical speciation programs for dilute aquatic solutions.

Field Sampling and Analysis

Be exposed to and experiance field sampling and analysis methods. Be able to communicate the results and analysis.

Top

Traffic Engineering: Characteristics and Operations

Traffic stream characteristics, traffic flow theory, traffic control devices, capacity and level of service, warrants, signal timing and optimization, signal coordination.

CE EN 562

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 361; or equivalent.
Taught	Fall

Course Outcomes

Introduction to Traffic Control Devices

1 (o) An understanding of types of traffic control devices and their meanings and the importance of communication between traffic engineer and driver.

Traffic Stream Characteristics

2 (o) An understanding three fundamental traffic flow characteristics (speed, density and flow rate) and the relationships among them.

Statistical Applications in Traffic Engineering

3 (b) An ability to conduct descriptive statistics on traffic flow characteristics data and to conduct a means test on two samples or conduct a chi-square test to evaluate a hypothesis on an underlying distribution.

Traffic Date Collection and Reduction

4 (o) An ability to measure in the field, or at a remote station, and reduce raw traffic flow characteristics data for subsequent statistical analyses or modeling.

Volume Studies and Characteristics

5 (b) An ability to conduct different types of volume studies and analyze their characteristics such as peaking and seasonal changes and an ability to estimate demand for and capacity of the facility under study.

Speed, Travel Time, and Delay Studies

6 (b) An understanding of the difference between space mean speed and time mean speed and ability to conduct speed, travel time, and signalized intersection delay studies study.

Highway Traffic Safety Studies and Analysis

7 (o) An understanding of the importance of safety on highways and of the way highway crash data are collected and stored for statistical analyses and an ability to analyze crash data to identify statistically “hot spots” that require further evaluations and to conduct statistical analyses to evaluate the effectiveness of crash countermeasures on reduction of crashes.

Fundamental Concepts for Uninterrupted Flow

8 (c) An understanding of basic concepts of capacity and level of service used for analyzing the performance of uninterrupted flow highway facilities.

Basic Freeway Segments and Multilane Highways

9 (c) An ability to conduct capacity and level of service analysis for basic freeway and multilane highways, both manually and using the Highway Capacity Software and to evaluate the performance of such segments and determine possible improvements required for maintaining or improving the conditions of such segments.

Weaving, Merging, and Diverging Facilities

10 (c) An understanding of the concepts of capacity and level of service for complex ramp area traffic flow and an ability to conduct capacity and level of service analysis for such facilities both manually and using the Highway Capacity Software.

Signing and Marking for Highways

11 (o) An understanding of the functions of signing and marking and their use on freeways and rural highways.

Hierarchy of Intersection Control

12 (c) An understanding of the hierarchy of intersection control (Basic rules of the road, Yield and stop control, and Signals) and an ability to perform a signal warrant analysis using the method found in the MUTCD.

Basic Principles of Intersection Sginalization

13 (c) An understanding of basic principles of intersection signalization including: Discharge headways, saturation flow rates, and lost times; Allocation of time and the critical-lane concept; The concept of left-turn equivalency; and Delay as a measure of service quality, and an ability to determine these values given data of prevailing conditions.

Fundamental of Signal Timing and Design: Fixed-Time Signals

14 (c) An understanding of the key steps involved in signal design and timing including: Development of a safe and effective phase plan and sequence; Determination of vehicular signal needs; and Determination of pedestrian signal needs, and an ability to going through these steps to design and timing of pretimed signals.

Fundamentals of Signal Timing: Actuated Signals

15 (c) An understanding of the fundamental concept of actuated signals and the mechanism of changing green time allocation to all approaches depending on approach traffic demand and an ability to design phase sequences and timing signal indications manually and using signal timing software programs.

Analysis of Sginalized Intersections

16 (c) An understanding of the concept of analyzing capacity and level of service using the models presented in the Highway Capacity Manual 2010 and an ability to carry out the computations presented in the HCM manually and using the Highway Capacity Software 2010.

Signal Coordination for Arterials and Networks: Unsaturated

17 (h) An understanding of the concept of coordinating multiple signals on arterials and in a network by manipulating offsets of signals and an ability to determine optimal offsets, optimal phase sequence, and optimal green time allocation and an ability to coordinate multiple signals on arterials manually (simples systems) and using a signal optimization software program.

Communication

18 (g) An ability to express technical ideas in a written format and an ability to compose professional documents in a clear, concise, and effective manner

Top

Pavement Design

Design, construction, evaluation, maintenance, and rehabilitation of flexible and rigid pavements; influence of traffic and environmental factors; mechanistic analysis of pavement structures using computer software.

CE EN 563

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 306 & CE EN 341 & CE EN 361
Taught	Fall

Course Outcomes

Pavement Performance

Understand concepts of pavement performance

Traffic Loads

Characterize traffic loads for pavement design and analysis

Strength and Durability

Characterize strength and durability of pavement materials

Climate Factors

Understand and account for climatic factors in pavement design and analysis

Construction Procedures

Understand pavement construction procedures

Standard Design

Design flexible and rigid pavements using standard methods

Pavement Deterioration

Understand mechanisms of pavement deterioration and identify distress types

Pavement Condition Assessment

Provide pavement condition assessments

Pavement Preservation

Recommend pavement preservation techniques

Mechanistic Analysis

Conduct mechanistic analyses of pavement structures using computer software

Urban Transportation Planning

Urban transportation planning and decision making, intermodal transportation, land-use transportation interrelationships, transportation demand modeling, site impact analysis, sustainable transportation; livable cities.

CE EN 565

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CE EN 361; or instructor's consent.
Taught	Fall

Course Outcomes

Transportation Demand Forecasting

Understand the four steps of urban transportation demand forecasting including: 1) trip generation, 2) trip distribution, 3) mode choice, and 4) trip assignment.

Planning

Understand the difference between "urban transportation planning" and "site planning."

Travel Demand Management

Be familiar with travel demand management (TDM) measures.

Livability

Read *Transportation for Livable Cities* and become familiar with issues affecting the direction of our transportation facilities.

Communication

Communicate transportation planning ideas effectively and write a technical paper on a transportation planning topic.

Modeling

Learn the demand forecasting process using QRSII and GNE software.

(CE En-Me En) Computer-Aided Engineering Software Development

Programming methods for the development of engineering software. Data structures, architecture, libraries, and graphical user interfaces, with applications to CAD systems.

CE EN 570

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Me En 373 or C programming.
Taught	Fall

Course Outcomes

Complex Algorithms

Ability to develop complex algorithms.

Algorithm Conversion

Ability to convert algorithms into a commonly used computer language.

Scientific Visualizations

Ability to create interactive scientific visualizations of complex data.

Graphical User Interfaces

Ability to create graphical user interfaces that facilitate ease of use.

Top

Computer-Aided Geometric Design

Mathematical theory of free-form curves and surfaces and solid geometric modeling. Bezier and B-spline curve and surface theory, parametric and implicit forms, intersection algorithms, topics in computer algebra, and free-form deformation. Several programming projects.

CE EN 572

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Proficiency in C programming.
Taught	Fall

Course Outcomes

Bezier Curves

Understand the theory, properties, and algorithms for Bezier curves: de Casteljau algorithm, degree elevation, hodographs, curve intersection algorithms, convex hull property, variationa diminishing property, rational Bezier curves, explicit Bezier curves.

Bezier Curves

Understand the theory, properties, and algorithms for Bezier curves: de Casteljau algorithm, degree elevation, hodographs, curve intersection algorithms, convex hull property, variationa diminishing property, rational Bezier curves, explicit Bezier curves.

Bezier Curves

Understand the theory, properties, and algorithms for Bezier curves: de Casteljau algorithm, degree elevation, hodographs, curve intersection algorithms, convex hull property, variationa diminishing property, rational Bezier curves, explicit Bezier curves.

B-Spline Curves

Understand polar form, the de Boor algorithm, the Boehm algorithm, knot intervals.

B-Spline Curves

Understand polar form, the de Boor algorithm, the Boehm algorithm, knot intervals.

B-Spline Curves

Understand polar form, the de Boor algorithm, the Boehm algorithm, knot intervals.

Tensor Product Surfaces

Understand tensor product Bezier and B-Spline surfaces, including the de Casteljau algorithm, partial derivatives, parametric continuity, tesselation.

Tensor Product Surfaces

Understand tensor product Bezier and B-Spline surfaces, including the de Casteljau algorithm, partial derivatives, parametric continuity, tesselation.

Top

(CE En-Me En) Optimization Techniques in Engineering

Application of computer optimization techniques to constrained engineering design. Theory and application of unconstrained and constrained nonlinear algorithms. Genetic algorithms. Robust design methods.

CE EN 575

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 302; or MATH 313; C, C++, or similar computer language.
Taught	Winter

Course Outcomes

Define and Use Optimization Terminology and Concepts

Define and use optimization terminology and concepts, and understand how to classify an optimization problem.

Application of Optimization Methods to Engineering Problems

Apply optimization methods to engineering problems, including developing a model, defining an optimization problem, applying optimization methods, exploring the solution, and interpreting results. Students will demonstrate the ability to choose and justify optimization techniques that are appropriate for solving realistic engineering problems.

Unconstrained Optimization Theory for Continuous Problems

Understand and apply unconstrained optimization theory for continuous problems, including the necessary and sufficient optimality conditions and algorithms such as: steepest descent, Newton's method, conjugate gradient, and quasi-Newton methods.

Computing Derivatives for Gradient-based Optimization

Understand and apply methods for computing derivatives such as: finite differencing, symbolic differentiation, complex step, algorithmic differentiation, and analytic methods (direct and adjoint).

Gradient-free and Discrete Optimization Algorithms

Understand and apply gradient-free and discrete optimization algorithms such as: genetic algorithms, particle swarm optimization, branch and bound, exhaustive search, and simulated annealing.

Constrained Optimization Theory for Continuous Problems

Understand and apply constrained optimization theory for continuous problems, including the Karush-Kuhn-Tucker conditions and algorithms such as: generalized reduced gradient, sequential quadratic programming, and interior-point methods.

Determining a Robust Design

Apply optimization techniques to determine a robust design.

Optimization Software

Be able to implement basic optimization algorithms in a computational setting and apply existing optimization software packages to solve engineering problems.

Top

Selected Problems in Civil and Environmental Engineering

CE EN 594R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Introduction to Construction and Facilities Management

Introduction to construction and facilities management including BIM, estimating, scheduling, and construction calculation methods.

CFM 105

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Fee.
Taught	Fall, Winter

Course Outcomes

Know the Major

Understand the scope of the Construction and Facilities Management major.

Understanding Documents

Ability to read and understand construction documents (Plans and specs).

Modeling

Understand Building Information Modeling.

Mathematics

Ability to perform basic construction math.

Construction Projects

Understand the process of design, estimating, scheduling and site selection of a project.

Assessment

The assessments for the above course outcomes are performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

Top

Fundamentals of Facility and Property Management

Overview of the profession of facility and property managaement, including space regulations, finance, project management, and other current practices.

CFM 110

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

FPM 110: Fundamentals of Facility and Property Management.

Description: Overview of the profession of facility and property management, including space regulations, finance, project management, and other current practices.
Learning Outcomes of the course:
At the conclusion of the course the student will:

- Understand the basic competencies of facility and property management
- Demonstrate the ability to perform space planning
- Understand the 15 basic professional practices of the FPM discipline
  - Personal FPM Skills
  - FPM Industry Competencies and Certifications
  - Space Planning and Programming
  - Construction Project Management
  - Building Systems and Infrastructure
  - Operations and Maintenance
  - Energy Management
  - Sustainability
  - Safety, Security and Disaster Recovery
  - Regulatory Compliance
  - Leadership and Administration
  - Finance and Funding
  - Real Estate and Property
  - Event Marketing and Management
  - FPM Technologies
- Demonstrate the practical applications of basic FPM competencies.

Assessment of the above learning outcomes is performed through instructor analysis of

homework, labs, exams, classroom observations, student feedback, and course evaluations.

Construction Modeling

Developing architectural plans using Building Information Modeling; floor, foundation, plot, elevations, sections, and details. Renderings and other advanced modeling techniques.

CFM 155

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	CFM 105
Note	Fee.
Taught	Fall, Winter

Course Outcomes

BIM

Understand the dynamics of Building Information Modeling (BIM).

Building Life Cycle

Understand the building life cycle and construction terminology, processes, and methods.

Differentiate areas of Construction Management

Differentiate among various aspects of construction management, including estimating, scheduling, project management, and A/E relationships and responsibilities.

Assessment

Evaluated in Homework, Testing, Lab Exercises, Group Projects, Instructor Review and Feedback.

New Construction and Facilities Management Student Seminar

A seminar for new students in the Construction and Facilities Management major. Construction and Facilities Management lecture series; learning how to join a competition team, clubs, and find employment while an undergraduate.

CFM 191

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Required first or second semester for students in the construction and facilities management program. Attendance required.
Taught	Fall, Winter

Course Outcomes

Experience

Complete related technical on-the-job work experience.

Problem Solving

Understand the basics of solving real-life technological issues in the specific field(s) of work.

Technical Internship

Cooperative education and related technical on-the-job work experience.

CFM 199R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Professional Experiences

Student acquires professional experiences in construction management or construction relates on-the job work experience.

Professional Communication

Student demonstrates professional communication skills (report)

Applying Experience to Understanding

Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

Light Structural Systems

Light structural construction using wood and metal framing systems.

CFM 210

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Note	Fee.
Taught	Fall, Winter

Course Outcomes

Structural Systems

Understand fundamentals of structural systems.

Communication

Develop the ability to communicate orally and graphically.

Terminology

Understand terminology, installation procedures for steel, concrete and wood structural framing members.

Codes and Requirements for Framing Systems

Ability to identify applicable building codes and requirements as they pertain to structural framing systems.

Construction Documents

Understand structural construction drawings, notes, schedules, specifications and details.

Assessment

Evaluated in Homework, Testing, Lab Exercises, Group Projects, Instructor Review and Feedback.

Concrete and Job-Site Layout

Managing the quality, methods, and safety aspects of concrete and masonry construction.

CFM 217

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Building Layout & Calculations

Ability to layout a building and perform the elevation calculations.

Concrete & Mansonry on Projects

Understand how to manage concrete and masonry operations on a project site.

Quality

Understand the process and placement to achieve high quality.

Concrete & Mix Design

Understand the properties of concrete and mix design.

Masonry Constructions

Understand the properties of masonry construction.

Weather and Concrete

Understand weather considerations for concrete and masonry operations.

Assessment

Evaluated in Homework, Testing, Lab Exercises, Group Projects, Instructor Review and Feedback.

Electrical Systems in Construction

Developing a basic understanding of electrical construction and associated codes to effectively communicate and problem solve with electrical contractors and inspect their work.

CFM 241

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Electrical Construction

Understand electrical construction and components to effectively manage the work force, and lead coordination with other trades.

Electrical Components

Ability to identify electrical components.

National Electrical Code

A basic understanding of the National Electrical Code, standards, and safety practices of the industry.

Quality

Ability to install and understand the process of quality electrical and control systems.

Assessment

Assessment of the above stated learning outcomes will be performed through instructor analysis of exams, quizzes, assignments, student feedback, and course evaluations.

Top

Undergraduate Seminar

CFM 291R

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Required each semester for undergraduate majors who are not enrolled in 491R. School lecture series attendance required.
Taught	Fall, Winter

Course Outcomes

Options of Construction Management

Help students evaluate the skills needed and opportunities available in different disciplines of the construction industry.

Student Camaraderie

Involve students in Construction Management program activities and increase camaraderie.

Responsibilites

Develop an understanding of the students' responsibilities to family, church and community.

Assessment

Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

Structures and Strength of Materials Fundamentals

Structural mechanics and strength of materials for soils, woods, concrete, and steel applied to practical construction situations.

CFM 302

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	PHSCS 105
Taught	Fall, Winter

Course Outcomes

Safety & Structural Principles

Understand structural principles such that construction activities are safely performed.

Material Properties

Understand general properties of materials used in structures' design and construction.

Problem Solving

Analyze and solve problems associated with structural systems.

Technical Terminology

Understand the technical terminology inherent with structural design and construction.

Loading Conditions

Understand general loading conditions that are inherent in structures.

Failure Mechanisms

Understanding failure mechanisms associated with structural beams, columns and connections.

Top

Estimating Processes and Spreadsheets

Compiling, organizing, and analyzing all the items that influence and contribute to total cost of construction projects emphasizing managing quality control procedures and inspection of finish work. Maximizing estimating effectiveness and efficiency through computer integration.

CFM 311

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	CFM 210
Taught	Fall, Winter

Course Outcomes

Estimating

Understand the estimating processes and methods of quantity take-offs.

Materials & Processes

Become more familiar with the materials and processes of construction.

Detail

Understand the importance of accuracy, organization, and attention to detail.

Drawings & Specifications

Understand construction drawings and specifications as they pertain to quantity take-offs and specifically to construction finishes.

Quality

Understand and recognize quality work in construction finishes.

Surveys

Ability to perform and document quantity surveys and price them accurately and quickly.

Spreadsheets

Apply computerized spreadsheet applications to estimating.

Assessment

Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

Capstone 2 - Competition

Final preparations for student competitions.

CFM 317R

Hours	1.0 Credit, 0.0 Lecture, 1.0 Lab
Prerequisites	CFM 105
Taught	Winter

Course Outcomes

Problem Solving

Identify problems in "real-world" construction scenarios.

Presentation Skills

Apply presentation skills.

Competition Preparation

Preparing for specific competitions.

Top

Capstone 2 - International

The culmination and application of core construction management curriculum. Project teams design, analyze, manage, and construct an international project.

CFM 318R

Hours	1.0 Credit, 0.0 Lecture, 1.0 Lab
Prerequisites	CFM 105
Taught	Winter Term 1

Course Outcomes

Analysis

Analysis of construction practices in labor-intensive markets.

International Cooperation

Present US construction practices in an international audience.

Research and Knowledge

Research and adding to body of knowlege for both universities and people.

Top

Mechanical Systems

Basic plumbing and HVAC principles, materials; installation and application methods. Systems sizing and design, heat loss/gain calculations, and payback analysis. Managing the plumbing and HVAC trades.

CFM 320

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Mechanical Systems

Understand codes, regulations, and management of mechanical systems.

Plumbing Materials

Understand plumbing materials.

Drainage

Understand the design of sanitary, drainage, vent, and storm-water drainage systems.

Piping

Understand the design of water supply piping.

Fixtures

Understand plumbing fixtures.

Testing & Inspecting

Understand testing & inspecting plumbing systems.

HVAC

Understand HVAC materials and system design.

Heating & Cooling

Understand forced air and hydronic heating and cooling system.

Control Systems

Understand control systems.

Assessment

Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

Top

Advanced Mechanical, Electrical, and Plumbing Systems

Understanding and managing large MEP systems; utility infrastructure planning and development, performing system assessments; performing energy, sustainability, and retro-commissioning cost-benefit analysis; understanding system outputs, metering, and costs; code compliance and problem solving.

CFM 330

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	CFM 241 & CFM 320
Taught	Fall

Course Outcomes

MEP Systems

Understand the uniqueness of managing large MEP systems

Utility Infrastructure

Be able to identify components and functions of large MEP systems

System Assessments

Be able to describe MEP system outputs, metering and costs

Cost Analysis

Perform large MEP retro-commissioning cost-benefit analysis

Utility Infrastructure

Be able to plan and develop utility infrastructure

Condition System Assessment

Be able to perform condition system assessments

Problem Solving

Be able to solve MEP problems at the management level

Safety

Understand code compliance

Top

Construction Equipment and Soils Mechanics

Basic soil mechanics and subsurface construction theory and practice for foundations of building and engineered facilities. Underpinning, piling, dry and wet excavating, dewatering, cofferdams, caissons, and spread and strip foundations. Lecture, field trips.

CFM 335

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Soil

Understand basic soil properties, behavior and testing.

Earthwork Construction

Ability to determine quantity and costs associated with earthwork construction.

Equipment

Understand the various types and uses of construction equipment.

Productivity

Ability to develop the productivity rates and costs of equipment.

History & Ethics

Understand the history and ethics of civil construction.

Civil Construction

Understand and manage civil construction.

Assessment

Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

Top

Operations and Maintenance

Acquisition, operation, maintenance, and disposal of building systems, structures, permanent interiors, furniture, and equipment; grounds and other exterior elements.

CFM 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CFM 330
Taught	Winter

Course Outcomes

Operations & Maintenance

- Gain a comprehension of:
  - energy management
  - maintaining building interior a exterior structures and systems
  - maintaining grounds
  - facility management of communication systems
  - establishing and implementing standards, practices, policies and procedures
  - custodial services, waste management and recycling.
- Apply and analyze knowledge in:
  - maintenance management
  - cost control
  - diagnostics, performance and needs assessment

Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

Construction Safety Management

Safety requirements and responsibilities in construction; cost and impact of accidents; accident investigation; safety inspection; hazards analysis; substance abuse; record keeping.

CFM 345

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Safety

Understand how to create and manage an effective safety program in a construction company.

OSHA

Ability to navigate OSHA's 1926 document.

Safety Risks

Ability to identify safety risks on jobsites.

EMR & Insurance

Understand experience modification rates (EMR) and worker's compensation insurance premiums.

Assessment

Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

International Construction Practices

Interacting with international construction professional, including construction terminology, plan reading, metric measurements, estimating, scheduling, and project management practices.

CFM 350

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CFM 105
Taught	Fall

Course Outcomes

Ethics

Enhance ethical construction management skills.

International Codes

Understand the importance of and be able to apply proper building codes in an international setting.

International Construction Methods

Understand international construction methods, materials, and challenges.

International Drawings & Specifications

Ability to work with international structural drawings and specifications.

Safety in an International Setting

Understand and implement safety principles and practices in an international setting.

Assessment

Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

Top

Construction Contracts and Law

Contractual obligations defined, including agency, contract interpretation, performance and liability issues, breach and termination, judicial remedy, and arbitration as applied to the construction industry. Overview of municipal zoning ordinances and codes.

CFM 385

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Respect for the Legal System

Understand and gain respect for legal systems in the United States.

Differences in Law

Recognize differences between statutory and common law.

Legal Pitfalls

Recognize, in advance, common legal pitfalls of the construction industry and become familiar with how to avoid them.

Municipalities

Understand how local municipalities are organized and how they regulate development and construction activities through codes and ordinances.

Contracts

Become familiar with construction contracts and responsibilities of contracting parties.

Construction Law

Identify legal issues in construction based on common law and statutory law and understand construction contractions.

Assessment

Assessment of these learning outcomes is completed by having students read selected materials, including cases and texts; by having students attend courtroom proceedings and municipal meetings; by having students complete several research papers; and by having students evaluated throughout the semester with quizzes and exams.

Top

Capstone Internship

Cooperative education and related facility and property management on-the-job work experience. Project report required for IFMA Facility Management Professional (FMP) designation.

CFM 399R

Hours	1.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	CFM 110; instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Differences in Law

Apply computerized spreadsheet applications to estimating.

Top

Managing High Performance Buildings

Evolving technologies, energy performance, codes, safety, and financial expectations for high performance buildings. Prepare capital and operating budgets with a focus on Total Cost of Ownership financial modeling.

CFM 400

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ACC 200 & CFM 320
Taught	Fall, Winter

Course Outcomes

Management

By the end of this course students will have developed and improved their ability to manage high performance buildings.

Pre-Construction Services

Managing preconstruction services including: Building Information Modeling (BIM), competitive bidding strategies, bid analysis, document management, site work, quantity takeoff, and cost estimation.

CFM 411

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	CFM 155
Taught	Fall, Winter

Course Outcomes

Pre-Construction

Ability to influence a project's design based upon cost, constructability, and sequencing of processes.

Technology

Ability to use cutting-edge technologies in the preconstruction process.

Quantity Takeoffs

Ability to perform accurate quantity takeoffs using construction drawings and specifications.

Analyze

Ability to analyze subcontractor bids and understand the scopes of work.

Ethics

Understand ethical issues in estimating.

Estimating

Ability to estimate from building information model.

Assessment

Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

Top

Construction Scheduling and Cost Control

Planning, scheduling, and monitoring construction projects, including development of critical path networks (CPM and PERT), Gannt bar charts, construction cost control, and reporting practices.

CFM 412

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	CFM 311
Taught	Fall, Winter

Course Outcomes

Scheduling

Ability to schedule and control residential, commercial, industrial, manufacturing, or engineering projects.

Critical Path Scheduling

Understand the critical path method of scheduling.

Create Correct Documents

Ability to create check sheets; linear or line of balance schedules; bar charts; short interval schedules; critical path networks.

Floats

Ability to identify types of float, and the use of float to manage projects.

Manpower & Cost Loading

Ability to correlate manpower and cost loading to schedule.

S Curves & Histograms

Ability to control and accurately report project progress using progress S curves and histograms.

Computers

Ability to use computers in scheduling construction projects.

Ethics

Understand ethical issues relating to construction scheduling.

Assessment

Assessment of the above stated learning outcomes will be performed through instructor analysis of exams, quizzes, assignments, student feedback, and course evaluations.

Top

Construction Project Management and Control

Managing and controlling construction projects. Planning, startup procedures, inspections, progress measurements, field reports, change order and submittal processing, equipment management, and project closeout.

CFM 415

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CFM 311
Taught	Fall, Winter

Course Outcomes

Time & Planning Management

Ability to manage planning and time on a project.

Cost Flows

Understand basic cost flows and project budget.

Leadership

Understand principles of effective leadership.

Delivery Methods

Understand different project delivery methods.

Team Dynamics

Understand project team dynamics and appraisals.

Subcontracts

Understand how to properly manage subcontracts and subcontractor relationships.

Purchasing & Buyout

Understand purchasing and buyout processes.

Labor Issues

Understand labor relation issues.

Computers & Software

Ability to use computerized project management software for communication and record keeping.

Reading & Interpreting Documents

Ability to read and interpret construction documents and specifications.

Ethics

Understand ethics of project management.

Assessment

Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

Top

Capstone

Culminating capstone experience which takes a project from inception to facility operation.

CFM 416R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CFM 411, CFM 412, CFM 415; or concurrently enrolled.
Taught	Fall

Course Outcomes

Problem Identification

Concepts of problem identification.

Management Triangle

Concepts Implementation of the management triangle.

Presentation Skills

Concepts of presentation skills.

Question Analysis

Concepts of question analysis.

Commercial Real Estate Management

Fundamentals of commercial real estate investment, understanding market influences, contracts and property portfolio management.

CFM 420

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CFM 110 & CFM 426
Taught	Fall Term 1

Course Outcomes

Mangement

- Obtain a knowledge of:
  - tenancy cycles
  - phases of real estate
  - types of real estate management
  - financial approaches in commercial real estate
  - successful real estate development projects
  - property management essentials
  - effective investment principles
  - lease types
  - due diligence studies
  - valuing property
- Analyze residential and commercial developments
- Knowledge of current introduction information on the commercial real estate management profession
- Know the role of a manager to create value for the property owner(s)

Assessment of the above learning outcomes is performed through instructor analysis of homework, labs, exams, classroom observations, property visits and tours, student feedback, and course evaluations.

Construction Accounting

Cost and managerial accounting topics for construction companies, including break-even analysis, ratio analysis, capital budgeting, job cost systems, master budgets pricing and decision-making, allocating costs.

CFM 425

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ACC 200
Taught	Fall

Course Outcomes

Basic Financial Knowledge

Understand basic financial statements and double-entry accounting theory in the construction industry.

Payroll

Understand payroll management and labor burden issues in the construction industry.

Accounting

Understand managerial accounting theory, including how to interpret financial statements using ratio analysis, break-even analysis, trend analysis, etc.

Accounting Controls

Understand internal accounting controls in construction companies.

Computers & Accounting

Ability to use a computer-accounting program, understand the relationship between the different accounting modules, and generate managerial financial reports.

Revenue Recognition

Understand revenue recognition options for construction companies.

Real Estate Principles and Development

Principles of real estate investments, emphasizing mortgage instruments and development of property from raw land to residential and commercial properties.

CFM 426

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	ACC 200 & CFM 311
Taught	Fall, Winter

Course Outcomes

Real Estate Finance

Understand the principles of real estate finance and rate-of-return concepts in order to evaluate real estate investment opportunities.

Real Estate Investments

Understand market research, entitlement processes and the acquisition of land and development of real estate projects. Students will also be able to analyze and evaluate the risk of real estate investments.

Real Estate Practices

Understand the fundamental vocabulary, principles and concepts of modern real estate practice, including agency relationships, brokerage, forms of ownership, legal interests in real estate, title records, property management, land-use controls, fair housing issues, environmental issues, and other critical issues affecting modern real estate.

Assessment

Assessment of these learning outcomes will be completed by having students read selected materials, including professional journals and real estate texts; by having students work together in groups to solve development problems; by having students complete several writing assignments; and by having students evaluated throughout the semester with quizzes and exams.

Top

Construction Company Operations and Management

Organizing, controlling, and directing operations of construction companies; financial management, budgeting, cash-flow analysis, purchasing and cost control, and business planning.

CFM 445

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	ACC 200 & CFM 311
Taught	Fall, Winter

Course Outcomes

Human Resources

Ability to manage human resources.

Risk Management

Understand the principles of controlling and managing risk.

Insurance & Bonding

Understand the different types of insurance and bonding.

Reports

Ability to prepare and interpret company management reports.

Business Organization

Understand different forms of business organization.

Accounting

Apply the principles of accounting.

Customer Service

Understand customer needs and how to manage expectations.

Leadership

Understand the principles of effective leadership in construction companies.

Assessment

Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

Sustainability and Regulatory Building Solutions

Regulatory occupancy codes, safety, security planning and managing and analyzing sustainable building practices.

CFM 460

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	CFM 311 & CFM 320
Taught	Winter

Course Outcomes

Comprehension

- Be aware of: various building codes, building sustainability factors, current affairs affecting building codes and regulations.
- Gain a comprehension of human factors; ergonomics, ADAG, Life Safety Measures; environmental protection and impact issues; regulatory issues; emergency preparedness.
- Be able to apply and analyze knowledge in:
  - Demonstrate the ability to perform a comprehensive emergency operations and safety plan;
  - Understand environmental regulations affecting building system design and occupancy health and safety;
  - Comprehensive knowledge of compliance with regulatory laws;
  - Demonstrate the ability to create an effective facility environmental sustainability program including a LEED practicum.

Top

Senior Seminar

Developing best employment opportunities and strategy; interviewing, sales negotiations, resume and letter writing, and salary negotiations. Report on 300 hours of construction-related work experience.

CFM 491

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Note	College Lecture attendance required.
Taught	Fall, Winter

Course Outcomes

Graduation Requirements

Understand what is required for graduation.

Resume Building

Write a great resume.

Interviewing

Ability to interview well.

Business Etiquette

Understand business etiquette and the written and unwritten rules in the workplace.

Contract Negotiations

Understand the offer and negotiate a contract.

Work Experience

Verify work experience.

Tenure

Understand what behavior or actions will keep you hired or fired.

Assessment

Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

Top

Special Problems in Construction and Facilities Management

CFM 494R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter

Course Outcomes

Special Topics

Students in the course will learn topics outside the standard curriculum that allows the student to broad their education as it relates to Construction Management.

Construction Company Financial Management

An in-depth review of management concepts and financial strategies needed to successfully grow and enhance profitability of a construction company. Topics include business entities, budgeting and cash management, finance and investments, accounting, financial statements, cost controls (variance and earned value analysis), real estate investing, taxation, break even analysis and capital budgeting.

CFM 555

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CFM 425 & CFM 445
Taught	Fall

Course Outcomes

Construction company financial management

Understand and apply management concepts and financial strategies needed to successfully grow and enhance profitability of a construction company.

Assessment:

Assessment of the above learning outcomes is performed through instructor analysis of homework, exams, classroom observations, student feedback, and course evaluations.

Top

Introduction to Chemical Engineering

Introduction to fundamental principles of chemical engineering and development of problem-solving skills through in-class activities, laboratory experiments, and a hands-on design project.

CH EN 170

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Chem 105 or Chem 111.
Note	The prerequisites may be taken concurrent with the course. Check with the department.
Taught	Fall, Winter

Course Outcomes

Basic Chemical Principles

Students will be introduced to chemical processes, units, and corresponding equipment.

Field

Students will gain a familiarity with the chemical engineering field, career options, and potential job functions, and be aware of contemporary issues that may have an impact on professional activities, through lectures and solving homework problems.

Course Materials

Students will gain a knowledge of the major through the course material.

Relation to Other Disciplines

Students will gain appreciation and respect for other disciplines and a knowledge of how chemical engineering relates to other disciplines through faculty lectures and homework problems.

Basic Engineering Units and Systems

Students will be able to use basic engineering units in both SI and AES systems in solving problems, and be able to convert between unit systems.

Basics of Solutions

Students will be introduced to the solution of steady-state, overall, material and energy balances.

Mechanical Energy Balance Equation

Students will be introduced to the mechanical energy balance equation to solve fluid flow

problems both with and without friction.

Physical Processes

Students will be introduced to conduction, forced and free convection, and radiation.

Basics of Kinetics

Students will be introduced to the fundamentals of kinetics including definitions of rate and forms of rate expressions.

Systems of Thermodynamics

Students will be introduced to the first law of thermodynamics for closed and open systems.

Process and Feed Control

Students will be introduced to process control terminology and feed-back and feed-forward control systems.

Graph Interpretations

Students will be introduced to the effective interpretation of graphical data.

Spreadsheets

Students will be introduced to a spreadsheet package to perform engineering calculations.

Problems and Solutions

Students will be introduced to engineering problems and their solutions.

Problem-Solving

Students will be introduced to a problem solving strategy to define and solve engineering problems.

Critical and Creative Thinking

Students will be introduced to critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Rationalizing, Ordering, and Assessing

Students will be introduced to the notions of rationalizing units, making order of magnitude estimates, assessing reasonableness of solutions, and selecting appropriate levels of solution sophistication.

Environmental Considerations

Students will be introduced to how environmental considerations are incorporated into engineering problem solving.

Impact of Engineering in Differing Contexts

Students will understand the impact of engineering solutions, including environmental and economic impacts, in a global context (across cultures and societies) AND in a societal context (within a society).

Teamwork

Students will practice good teamwork principles.

Teamwork Experience

Students will demonstrate experience working together in teams.

Performance Calculations using CSTR

Students will be introduced to performance calculations on CSTR reactors.

Calculations on Shell-and-Tube Heat Exchangers

Students will be introduced to preliminary size and performance calculations on shell-and-tube heat exchangers.

Basics of Heat Exchangers

Students will be introduced to practical considerations of heat exchangers including types of heat exchangers, materials of construction, and fouling.

Flow System Design

Students will be introduced to the design of flow systems involving pumps for Newtonian fluids.

Process Synthesis Constraints

Students will be introduced to environmental, social, political, ethical, health and safety, manufacturability, and sustainability constraints in process synthesis.

Capital Venture Costs

Students will be introduced to costs in capital ventures (e.g., capital vs operating costs, salvage value, equipment costing).

Professional Community Through Teamwork

Students will develop a sense of professional community with students by working in teams.

Technical Reading

Students will be introduced to the effective reading of technical material.

Top

Preprofessional Seminar

Presentations by faculty, advisors, and industrial representatives.

CH EN 191

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Note	College Lecture attendance required.
Taught	Fall, Winter

Course Outcomes

Disciplined Study Habits

Students will learn to take responsibility for their own learning experience at BYU by maintaining disciplined study habits.

Major & Required Curriculum

Students will gain a knowledge of the major and required curriculum through lectures.

Field

Students will gain a familiarity with the chemical engineering field, career options, and potential job functions, and be aware of contemporary issues that may have an impact on professional activities, through presentations by faculty and guest lecturers.

Life-long Learning

Students will demonstrate a sense of the importance of life-long learning.

Resume

Students will understand the importance of a well-written resume in obtaining professional employment.

Academic Internship

Work experience evaluated by supervisor and posted on student's transcript.

CH EN 199R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Consent of department internship coordinator.
Taught	

Course Outcomes

Professional Experiences

Student acquires professional experiences in the discipline.

Professional Communication

Student demonstrates professional communication skills (report).

Converting Experience into Understanding

Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

Top

Computational Tools for Chemical Engineers

Use of spreadsheets, advanced equation-solving packages, and structured languages to solve engineering problems. Introduction to chemical process principles.

CH EN 263

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	CH EN 170 & MATH 113; or concurrent enrollment.
Note	College Lecture attendance required.
Taught	Fall, Spring

Course Outcomes

Math Fundamentals

Students will demonstrate an understanding of fundamental mathematics (including calculus, linear and nonlinear simultaneous equation solving, etc.) by using computer tools to solve problems.

Engineering Units in SI and AES systems

Students will be able to use basic engineering units in both SI and AES systems in solving problems, and be able to convert between unit systems while using an equation solver like Mathcad.

Spreadsheets

Students will be able to use a spreadsheet package to perform engineering calculations which include some of the following: economic analysis, processing and analysis of data, graphical analysis and presentation, etc.

Mathematics Software

Students will be able to solve numerical and symbolic problems using advanced math software (e.g. Mathcad).

Write and Understand Program Structures

Students will be able to write program structures, and understand when programming is most appropriate.

Problem-Solving

Students will demonstrate an ability to solve engineering problems.

Problem-Solving into Algorithms for Procedures

Students will be able to convert problem solving strategies to procedural algorithms.

Estimations, Assessments, and Selections

Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Top

Chemical Process Principles

Material and energy balances.

CH EN 273

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 106 & CH EN 263; or CHEM 112 & CH EN 263; or concurrent enrollment.
Note	College Lecture attendance required.
Taught	Winter, Spring

Course Outcomes

Basic Concepts

Students will learn about chemical processes, units, and corresponding equipment

Unit Systems

Students will be able to use basic engineering units in both SI and AES systems in solving problems, and be able to convert between unit systems both by hand and with an equation solver.

System Balances

Students will be able to solve steady-state, overall, material and energy balances for systems which include one or more of the following: recycle, multiple units, chemical reactions.

Material Balances

Students will be able to set up and solve simple transient material balances.

Approach to Balances

Students will be able to use a degree-of-freedom approach to assist in the solution of material and energy balances.

Reading & Constructing Diagrams

Students will be able to read pure component and mixture phase diagrams (e.g. psychrometric chart, solid solubility, liquid-liquid, VLE) and construct mass balances from them using the lever rule, tie lines, etc.

Relating Variables to Phase Behavior

Students will understand the phase behavior of pure substances in relationship to the variables T, P, and density (including vapor pressure, critical point, freezing line, triple point, etc.).

Mechanical Energy Balance Equation

Students will be able to use the mechanical energy balance equation to solve fluid flow problems both with and without friction.

Fluid Statics

Students will be able to solve simple fluid statics problems (e.g., manometers, fluid head, etc.)

Thermodynamics

Students will be introduced to the first law of thermodynamics for closed and open systems.

Raoult's Law

Students will be able to apply Raoult's law to solve VLE problems including bubble point, dew point, and flash calculations.

Extent of Reactions

Students will understand and be able to use the extent of reaction in material balances

State Equations and Correlations

Students will be introduced to equations of state and corresponding states correlations.

Heat Concepts

Students will be introduced to the concepts of heat capacity, latent heat, heat of reaction, heat of combustion, and heat of formation.

Process Variables and Measurement

Students will be introduced to process variables (e.g., P, T, flow rate, conc.) and their measurement.

Interpreting Graphics

Students will demonstrate effective interpretation of graphical data.

Math Software

Students will be able to solve numerical and symbolic problems using advanced math software (e.g. Mathcad).

Information Applications and Tools

Students will be introduced to the use of appropriate information skills, standard office applications, and tools (e.g. WWW, electronic and reference book library searches, modern property databases) to assist in problem solving.

Problem-Solving

Students will demonstrate an ability to solve engineering problems.

Problem-Solving Strategies

Students will be able to use a problem solving strategy to define and solve engineering problems.

Critical and Creative Thinking

Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Interpreting Information

Students will be able to obtain and evaluate appropriate input information/data from databases, handbooks, correlations, experiments, literature, etc.

Rationalizations, Estimates, and Solutions

Students will be introduced to the notions of rationalizing units, making order of magnitude estimates, assessing reasonableness of solutions, and selecting appropriate levels of solution sophistication.

Safety

Students will be introduced to how safety considerations are incorporated into engineering problem solving.

Environment

Students will be introduced to how environmental considerations are incorporated into engineering problem solving.

Teamwork

Students will practice good teamwork principles.

Teamwork Experience

Students will demonstrate experience working together in teams.

Machinery Calculations

Students will be introduced to calculations involving work in turbines, compressors, and pumps.

Ethics

Students will be introduced to the AIChE code of ethics.

Reading Comprehension

Students will demonstrate effective reading of technical material.

Top

Chemical Engineering and Society

Responsibility of chemical engineers in society relative to ethics, leadership, safety, environment, and energy.

CH EN 311

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 273 & ENG T 231
Taught	Fall

Course Outcomes

Students will demonstrate effective interpretation of graphical data.

Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Students will be able to make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Students will pass the HAZCOM test.

Students will be dedicated to safe engineering practices; demonstrate knowledge of pertinent safety laws and regulations; understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.

Students will be dedicated to environmentally responsible engineering; demonstrate knowledge of pertinent environmental laws and regulations; understand and have a basic knowledge of how environmental considerations, including green engineering strategies, are incorporated into engineering problem solving.

Students will understand the impact of engineering solutions, including environmental and economic impacts, in a global context (across cultures and societies) AND in a societal context (within a society).

Students will understand teamwork principles including: recognition of team members' strengths and weaknesses; importance of effective communication skills; recognition of unique contributions of team members; and the need to facilitate team members' development.

Students will demonstrate experience working together in teams.

Students will understand safety constraints and be able to use hazard evaluation tools (e.g., HAZOP, fault-tree).

Students will understand and commit to practice gospel standards as a basis for sound ethical behavior.

Students will understand and commit to practice the AIChE code and other professional codes of

ethics.

Students will incorporate an engineering and a gospel-centered problem solving approach to the resolution of ethical dilemmas.

Students will develop a sense of professional community with students by working in teams.

Students will understand and strive to develop the qualities of a good leader whose public and private lives are consistent.

Students will demonstrate effective reading of technical material.

Top

Chemical Engineering Thermodynamics

First and second laws of thermodynamics as applied to behavior of real fluids; physical and chemical equilibrium.

CH EN 373

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 273 & CHEM 467
Recommended	Chem 461.
Note	College Lecture attendance required.
Taught	Winter

Course Outcomes

Balances

Students will be able to solve steady-state, overall, material and energy balances for systems which include one or more of the following: recycle, multiple units, chemical reactions.

Phase Diagrams

Students will be able to read mixture phase diagrams (liquid-liquid and VLE) and construct mass balances from them using the lever rule, tie lines, etc.

Balances

Students will be able to set up and solve simple transient energy balances.

Solution Thermodynamics

Students will be able to apply solution thermodynamics fundamentals to solve VLE, LLE, SLE, and GLE problems including bubble point, dew point and flash calculations.

Problem Solving

Students will demonstrate an ability to solve engineering problems.

Graphical Data

Students will demonstrate effective interpretation of graphical data.

Equations of State

Students will be able to use equations of state and corresponding states correlations in the determination of properties.

Creative Thinking Skills

Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Energy Conversion Calculations

Students will be able to perform energy conversion calculations for Rankine power and compression refrigeration cycles.

Single-stage Flash Calculations

Students will be able to set up and solve single-stage flash calculations.

Phase Behavior

Students will understand the phase behavior of pure substances in relationship to the variables T, P, and density (including vapor pressure, critical point, freezing line, triple point, etc.)

Entropy

Students will understand the concept of entropy and the second law of thermodynamics and be able to apply the second law to closed and open systems.

Chemical Reaction Equilibria

Students will understand the fundamental principles of chemical reaction equilibria including extent of reaction, equilibrium constant and its temperature-dependence, equilibrium conversion.

Modern Property Databases

Students will be able to use modern property databases to assist in problem solving.

Closed and Open Systems

Students will be able to apply the first law of thermodynamics to closed and open systems (including energy, work, and heat transformations in process units such as tanks, turbines, compressors, valves, etc.).

Design Calculations

Students will be able to perform design (sizing) calculations for turbines and compressors (e.g., involving delta H, delta S, work, heat, efficiencies).

Understanding Solution Thermodynamics

Students will understand the fundamental concepts of solution thermodynamics including chemical potential, fugacity, activity, partial molar properties, ideal solutions, and excess properties.

Environmental Considerations

Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.

Rationalize Units

Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Technical Material

Students will demonstrate effective reading of technical material.

Safety

Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.

Heat Concepts

Students will understand and be able to apply the concepts of heat capacity, latent heat, heat of reaction, heat of combustion, and heat of formation.

Top

Fluid Mechanics

Basic mass, momentum, and energy relations of fluid flow; design of fluid-handling systems and equipment.

CH EN 374

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 273 & CH EN 311 & MATH 302; or CH EN 273 & CH EN 311 & MATH 314; or concurrent enrollment; admission to professional program.
Note	College Lecture attendance required.
Taught	Fall

Course Outcomes

Mechanical Behavior of Materials in Fluid Flow

Students will understand mechanical behavior of materials including elastic, viscous, surface, and stress phenomena as it pertains to fluid flow applications.

Balance Equation

Students will be able to use the mechanical energy balance equation to solve fluid flow problems both with and without friction.

Knowledge of Dimensionless Quantities

Students will understand and be able to describe the physical significance of key dimensionless quantities including Re and f.

Problem-Solving

Students will be able to solve simple fluid statics problems.

Determining Velocities

Students will be able to determine velocity profiles for steady-state, laminar flow in simple geometries for Newtonian and power-law fluids.

Balances in One Dimension

Students will understand the significance of steady-state, integral and differential mass, energy, and momentum balances in one dimension.

Advanced Fluid Mechanical Concepts

Students will understand and be able to use advanced fluid mechanical concepts including boundary-layer theory, creeping flow, non-Newtonian flow, rheology, and turbulent flow.

Eternal Flow and Velocity Calculations

Students will understand qualitatively how external flow around objects affects drag and will be able to calculate drag forces and terminal velocities.

Basic Flow Principles

Students will understand basic concepts relating to compressible flow, including Mach numbers, shock waves, and choked flow.

Graphical Interpretations

Students will demonstrate effective interpretation of graphical data.

Problem-Solving

Students will demonstrate an ability to solve engineering problems.

Thinking Skills

Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Rationalization, Estimation, Reasonability, and Sophisticati

Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Safety

Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.

Environmental Concerns

Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.

Flow System Design

Students will be able to design flow systems involving pipes, valves, fittings, and pumps for Newtonian fluids.

Selecting Pumps, Turbines, and Valves

Students will be able to select, based on performance characteristics and operational constraints, the appropriate kind of pumps (positive displacement, radial, axial, etc.), turbines (impulse, Francis, Kaplan, etc), and valves for a given application.

Desgining Flow Systems

Students will be able to design flow systems involving pipes and pumps for power-law fluids.

Students will be familiar with the use of computational fluid dynamics as a tool for solving fluid flow in complex geometries.

Technical Reading

Students will demonstrate effective reading of technical material.

Top

Heat and Mass Transfer

Heat and mass transfer, including conduction, convection, radiation, diffusion; steady and unsteady state systems; transport analogies; design applications.

CH EN 376

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 374
Taught	Winter

Course Outcomes

Mass Transfer Coefficients

Students will be able to estimate mass transfer coefficients and use them to determine mass transfer rates for both external and internal flows and across phase boundaries.

Radiative Heat Transfer

Students will understand radiative heat transfer including blackbody radiation and Kirchoff?s law, and be able to solve radiative problems involving view factors and radiative exchange between surfaces.

Heat & Mass Transfer

Students will learn about chemical processes, units, and corresponding equipment related to heat and mass transfer

Qualitatively Conduction

Students will understand qualitatively conduction, forced and free convection, and radiation.

Transient Heat & Mass

Students will be able to solve simple transient heat and mass transfer problems with methods such as lumped capacitance, Heisler charts, 1st term approximation, exact numerical solutions, etc.

Fick's Law

Students will understand and be able to use Fick's Law.

Differential Energy Balances

Students will be able to formulate and solve differential energy balances for conduction within a single phase.

Analogies

Students will understand heat/mass transfer analogies including their limitations.

Convective Heat Transfer

Students will understand convective heat transfer and use of heat transfer coefficients for laminar and turbulent flows, internal and external flows, fully developed flow, flow with entry effects, and forced and free convection.

System Analyzation

Students will be able to analyze systems containing multiple resistances to heat transfer.

LMTD Method

Students will be able to do preliminary size calculations on shell-and-tube heat exchangers using the log-mean-temperature-difference (LMTD) method.

Engineering Problems

Students will demonstrate an ability to solve engineering problems.

Technical Material

Students will demonstrate effective reading of technical material.

Creative Thinking Skills

Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Effectiveness-NTU method

Students will be able to do preliminary size calculations on shell-and-tube heat exchangers using the effectiveness-NTU method.

Safety

Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.

Graphical Data

Students will demonstrate effective interpretation of graphical data.

Coupled H & M Transfer

Students will be able to solve simple problems where heat and mass transfer are coupled.

System Analyzation

Students will be able to analyze systems containing multiple resistances to heat transfer.

LMTD Method

Students will be able to do preliminary size calculations on shell-and-tube heat exchangers using the log-mean-temperature-difference (LMTD) method.

Technical Material

Students will demonstrate effective reading of technical material.

Creative Thinking Skills

Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Safety

Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.

Graphical Data

Students will demonstrate effective interpretation of graphical data.

Coupled H & M Transfer

Students will be able to solve simple problems where heat and mass transfer are coupled.

Environment

Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.

Heat Exchanger Design

Students will be able to calculate and use overall heat transfer coefficients in designing heat exchangers.

Heat Exchanger Practical Considerations

Students will understand practical considerations of heat exchangers including types of heat exchangers, materials of construction, and fouling.

Solution Sophistication

Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Engineering Problems

Students will demonstrate an ability to solve engineering problems.

Effectiveness-NTU method

Students will be able to do preliminary size calculations on shell-and-tube heat exchangers using the effectiveness-NTU method.

Top

Science of Engineering Materials

Fundamental principles of solid materials and their properties and behavior in engineering applications of metals, polymers, ceramics, and glasses.

CH EN 378

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 351
Taught	Fall, Spring

Course Outcomes

Mixture Phase Diagrams Comprehension

Students will be able to read liquid-solid mixture phase diagrams involving liquid-solid and solid-solid equilibria and solid solubility and construct mass balances from them using the lever rule, tie lines, etc.

Molecular Interactions

Students will understand the relationship of molecular interactions, including potential energy and intermolecular forces, to the properties and behaviors of materials.

Crystal Structure

Students will understand crystal structure including nomenclature, packing, and defects.

Mechanical Behavior of Materials

Students will understand mechanical behavior of materials including elastic, plastic, viscous, glass, surface, and stress/strain phenomena and how they are affected by molecular structure and/or microstructure.

Mechanical Behavior of Materials

Students will understand mechanical behavior of materials including elastic, plastic, viscous, glass, surface, and stress/strain phenomena and how they are affected by molecular structure and/or microstructure.

Material Behaviors

Students will understand the physical/chemical behaviors of metals, ceramics, and polymers including effects of molecular weight, crystallinity, crystallite size defects, surface energy, heat-treating, and corrosion.

Electronic Material Behaviors

Students will understand the electronic behaviors of metals, semiconductors, and insulators.

Matching Characteristics vs. Conditions

Students will be able to match the physical and chemical characteristics of a material to process conditions/variables in order to evaluate its suitability for use with the process.

Graphical Data Interpretation

Students will demonstrate effective interpretation of graphical data.

Problem-Solving

Students will demonstrate an ability to solve engineering problems.

Thinking Skills

Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Solution Rationalizations, Estimations, and Assessments

Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Reading Comprehension

Students will demonstrate effective reading of technical material.

Top

Chemical Reaction Engineering

Fundamental principles and equations of chemical kinetics and reactor design.

CH EN 386

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 373 & MATH 303; or CH EN 373 & MATH 334; or concurrent enrollment.
Taught	Winter

Course Outcomes

Heterogeneous Catalytic Systems

Students will be exposed to the fundamentals of heterogeneous catalytic, and non-catalytic systems including potentially limiting mass-transfer and reaction resistances.

Analyzing Reactor Data

Students will be able to determine rate expressions by analyzing reactor data including integral and differential analysis on constant- and variable-volume systems.

Forward & Reverse Rates

Students will understand the relationship between forward and reverse rates and chemical equilibrium.

Environment

Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.

Creative Thinking

Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Problem Solving

Students will demonstrate an ability to solve engineering problems.

Competing Reactions

Students will understand the kinetics of competing reactions and their influence on product yield and selectivity.

Multiple Isothermal Reactors

Students will be able to design systems of multiple isothermal reactors.

Rate Expressions

Students will be able to develop rate expressions from elementary step mechanisms using steady-state and quasi-equilibrium approximations.

Advanced Math Software

Students will be able to solve numerical problems using advanced math software.

Parallel Systems

Students will be able to select and size isothermal reactors for series and/or parallel systems of reactions.

Performance Calculations

Students will be able to size and do performance calculations on single, isothermal plug-flow, CSTR, and batch reactors for a single homogeneous or heterogeneous reaction given either rate data or a rate expression.

Kinetics

Students will understand fundamentals of kinetics including definitions of rate and forms of rate expressions and relationships between moles, concentration, extent of reaction and conversion.

Graphical Data

Students will demonstrate effective interpretation of graphical data.

Pore Diffusion

Students will understand the effects of mass and heat transfer, particularly pore diffusion, on heterogeneous catalytic systems.

Reactor Design Practical Considerations

Students will understand practical considerations of reactor design including materials of construction, mixing, heat transfer, and economics.

Technical Material

Students will demonstrate effective reading of technical material.

Solution Sophistication

Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Safety

Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.

Performance Equations

Students will be able to derive batch, CSTR, and PFR performance equations from general material

balances.

Non-Isothermal Reactors

Students will be able to select and size non-isothermal reactors.

Heat Capacity

Students will understand and be able to apply the concepts of heat capacity, latent heat, heat of reaction, heat of combustion, and heat of formation.

Top

Career Skills

Professional, communication, and lifelong learning skills. Field trip to chemical process facility.

CH EN 391

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Admission to professional program.
Taught	Fall, Winter

Course Outcomes

Writing Resume

Students will be able to write an effective personal resume.

Problem Solving

Students will be able to use appropriate information skills, standard office applications, and tools (e.g. WWW, electronic and reference book library searches, modern property databases) to assist in problem solving.

Importance of Well-Written Resume

Students will understand the importance of a well-written resume in obtaining professional employment.

Oral Presentations

Students will be able to give effective, well organized oral presentations of technical material in both business and engineering formats including the handling of questions and the use of appropriate visual aids.

Lifelong Learning

Students will be dedicated to and prepared for a life time of learning.

Professional Community

Students will develop a sense of professional community with students, faculty, and others.

Speakers & Field Trip

Students will learn about chemical processes, units, and corresponding equipment through industrial speakers and a field trip.

Interviewing Skills

Students will demonstrate experience and ability in interviewing skills.

Technical Material

Students will demonstrate effective reading of technical material.

Student Presentations

Students will gain a familiarity with the chemical engineering field, career options, and potential job functions, and be aware of contemporary issues that may have an impact on professional activities, through student presentations and a field trip

Top

Creative Skills in Chemical Engineering

Applications in creativity and technical knowledge from prior course work to solution of relevant, open-ended problems.

CH EN 400

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Principles of Reservoir Engineering

Reservoir engineering principles including a review of rock and fluid properties, material balance in oil and gas reservoirs, fluid flow in porous media, and hydrocarbon production.

CH EN 410

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 373 & CH EN 374
Taught	Winter Contact Department

Course Outcomes

Oil & Gas Values

Calculate values of initial oil and gas in place

Reservoir Displacement

Understand the displacement processes in reservoirs

Primary Production

Estimate future production from oil and gas reservoirs under primary production

Fluid Flow Equations

Use fluid flow equations to calculate pressure drops and flow rates of oil and gas in porous media

Production Rates

Perform a history match on actual production data and predict future production rates

Oil Recovery

Screen reservoirs for enhanced oil recovery processes

Introductory Nuclear Engineering

Principles and application of nuclear reactor design.

CH EN 412

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 106 & MATH 303; or CHEM 112 & MATH 303; or equivalent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Nuclear Physics

At the end of this course, each student should have competent and well-supported command of the following:
I. Nuclear physics
a. Particle and Atom Physics
b. Mass and Energy
c. Radioactive Decay Processes
d. Interactions of Particles and Radiation with Matter

Reactor Design & Safety

Reactor Design and Safety
a. Fundamentals of Fission Reactions and Fuels
b. Generation I-IV designs, with distinguishing safety and security features
c. Reactor Types (fast, breeder, thermal, other)
d. Quantitative Approximations for Temperature and Heat Release
e. Reactor Control

Fuel and Waste Management

Fuel and waste management
a. Regulations
b. Fuel and Waste Processing
c. Accident Histories and Root Causes
IV. Career Opportunities in Nuclear Engineering

Top

Energy Engineering

Science and engineering of energy production including fossil fuels, nuclear, and renewable. Meeting the challenges of future energy needs of the U.S. and the world.

CH EN 433

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 311
Taught	Winter

Course Outcomes

Energy Use

Explain the history of energy use and past energy supply issues.
Explore current and probable future issues with energy use.

Sources & Cost of Energy

Describe current, conventional sources of energy, their availability, and current costs.

Alternate Energy Sources

Describe alternate sources of energy, their technical feasibility, and relative cost.

Principals of Energy Processing

Explain the technical working principles of major energy processing systems (gas and wind turbines, boilers, heat engines, solar cells, bioenergy, gasification, wave and tidal power and energy storage).

Role of Energy

Appreciate of the role of energy in society, and how energy affects life styles and political and economic stability.

Energy Use Patterns

Evaluate personal, household, and industrial energy use patterns, and understand ways to minimize the environmental and societal impacts of energy usage, including criteria pollutant management, options and implications for managing climate change, and energy resource issues.

Energy Career Opportunities

Understand current and potential future energy career opportunities.

Top

Process Control and Dynamics

Process systems, associated control systems, and instrumentation. Use of Laplace transforms and complex variables.

CH EN 436

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 376 & CH EN 386
Taught	Fall

Course Outcomes

Process Control Basics

Students will learn about chemical processes, units, and corresponding equipment related to process control.

Transient Material Balances

Students will be able to set up and solve simple transient material balances.

Transient Energy Balances

Students will be able to set up and solve simple transient energy balances.

Process Control Terminology

Students will demonstrate familiarity with process control terminology and understand the following control strategies: feed-back control, feed-forward control, and cascade control; as well as the difference between linear and nonlinear systems.

ODE's

Students will be able to write and solve ODE's that describe the transient behavior of simple systems.

Fitting Data to Models

Students will be able to fit data from step or pulse tests to linear models.

Transfer Functions

Students will understand the concept of a transfer function in classical control and be able to use transfer functions (Laplace domain) to approximate the behavior of control loops and their components.

Predicting Closed-Loop Behavior

Students will be able to predict the closed-loop behavior and evaluate the stability of simple control loops.

PID controller Relationships

Students will understand and be able to use tuning relationships for PID controllers.

Block Diagrams to Determine Response

Students will be able to use block diagrams to help determine system response characteristics.

Process Variable Measurement Equipment

Demonstrate familiarity with equipment for measurement and control of process variables.

Applying Process Control Principles (Industrial System)

Students will demonstrate familiarity and experience with the application of process control principles on an industrial control system.

Process Control Equipment

Students will demonstrate familiarity and experience with process control equipment.

Interpret Graphical Data

Students will demonstrate effective interpretation of graphical data.

Using a Process Simulator

Students will be able to use a process simulator to conduct process control.

Problem-Solving

Students will demonstrate an ability to solve engineering problems.

Thinking Skills

Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Rationalization, Ordering, Assessment, and Selection

Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.

Environmental Considerations

Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.

Control Valve Selection

Students will understand the principles involved in selecting a control valve.

Tuning Control Loops

Students will be able to tune a single feedback control loop.

Students will be able to design a simple feedback loop to control process equipment.

Designing Feedback Loops

Students will be able to perform preliminary valve sizing and understand the interaction of the valve with other process components.

Basic Concepts of Multiple Single Loops

Students will understand the concepts involved in multiple single loops in applications like simple distillation column control.

Reading Comprehension

Students will demonstrate effective reading of technical material.

Top

Chemical Engineering Plant Design and Process Synthesis

Design of chemical engineering machinery; plants and/or processes requiring application of unit operations; chemical process principles; economic analysis. Synthesis and optimization of chemical processes.

CH EN 451

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	CH EN 391 & CH EN 436 & CH EN 476
Note	College Lecture attendance required.
Taught	Winter

Course Outcomes

Basic Principles (Capstone)

Students will perform a capstone design and demonstrate their familiarity with chemical processes, units, and corresponding equipment.

Relating Chemical Engineering to Other Disciplines (Capstone

Students will gain appreciation and respect for other disciplines and a knowledge of how chemical engineering relates to other disciplines through the capstone design problem.

Solving Balances

Students will be able to solve steady-state, overall, material and energy balances for systems which include one or more of the following: recycle, multiple units, chemical reactions.

Solution Thermodynamics Applications

Students will be able to apply solution thermodynamics fundamentals to solve VLE, LLE, SLE, and GLE problems including bubble point, dew point and flash calculations.

Interpreting Graphical Data

Students will demonstrate effective interpretation of graphical data.

Use Process Simulators to Develop Diagrams

Students will be able to use a process simulator to develop process flow diagrams.

Commercial Process Simulation Software

Students will be able to use commercial process simulation software for process development.

Using Information for Problem Solving

Students will be able to use appropriate information skills, standard office applications, and tools (e.g. WWW, electronic and reference book library searches, modern property databases) to assist in problem solving.

Basic Problem-Solving

Students will demonstrate an ability to solve engineering problems.

Topic Integration for Problem Solving

Students will be able to integrate topics from various Chemical Engineering courses to solve realistic problems.

Thinking Skills

Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Appropriately Using Information

Students will be able to obtain and evaluate appropriate input information/data from databases, handbooks, correlations, experiments, literature, etc.

Rationalizations, Estimates, and Assessments

Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Safety

Students will be dedicated to safe engineering practices; demonstrate knowledge of pertinent safety laws and regulations; understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.

Application of Safety Principles (Capstone)

Students will incorporate applicable safety and environmental considerations as part of a capstone design project.

Environmental Considerations

Students will be dedicated to environmentally responsible engineering; demonstrate knowledge of pertinent environmental laws and regulations; understand and have a basic knowledge of how environmental considerations, including green engineering strategies, are incorporated into engineering problem solving.

Impact of Solutions

Students will understand the impact of engineering solutions, including environmental and economic impacts, in a global context (across cultures and societies) AND in a societal context (within a society).

Presentations

Students will be able to give effective, well organized oral presentations of technical material in both business and engineering formats including the handling of questions and the use of appropriate visual aids.

Reports

Students will be able to write effective, well organized technical reports, including formal engineering reports and short letter reports.

Teamwork

Students will practice good teamwork principles.

Teamwork Experience

Students will demonstrate experience working together in teams.

Reactor Selection

Students will be able to select and size isothermal reactors for series and/or parallel systems of reactions.

Basic Reactor Principles

Students will understand practical considerations of reactor design including materials of construction, mixing, heat transfer, and economics.

Cost Estimation for Heat Exchangers

Students will be able to size and estimate the capital costs of heat exchangers.

Selecting Tools

Students will be able to select pumps, turbines, and valves for a specific application.

Selecting Tools

Students will be able to select pumps, turbines, and valves for a specific application.

Column Design

Students will be able to design tray-type columns (e.g., number of trays, tray efficiency, column height, column diameter, product specs) and/or packed columns (e.g., height of column, packing material, column diameter, flooding velocity).

Nonideal Phase Behavior

Students will understand the implications of nonideal phase behavior and the practical constraints of pressure, temperature, and available utilities on distillation column design.

Valves

Students will understand the interaction of valves with other process components.

Design Calculations for Turbines/Compressors

Students will be able to perform design (sizing) calculations for turbines and compressors (e.g., involving delta H, delta S, work, heat, efficiencies).

Hierarchies

Students will understand design hierarchy rationale and be able to apply it to the design of a process.

Understand Safety in Accordance with HAZOPS

Students will understand safety constraints and be able to use HAZOPS and fault-tree analyses in process design.

Process Synthesis Constraints

Students will understand environmental, social, political, ethical, health and safety, manufacturability, and sustainability constraints and be able to incorporate these into process synthesis.

Multiple-Unit Processes

Students will be able to design multiple unit processes and be able to optimize them with respect to energy efficiency and economics.

Top

Unit Operations Laboratory 1

Experimental verification of unit operations design principles; data collection and reduction; report preparation.

CH EN 475

Hours	2.0 Credit, 1.0 Lecture, 6.0 Lab
Prerequisites	CH EN 376 & CH EN 391 & ENGL 316
Recommended	Stat 201.
Taught	Fall, Spring

Course Outcomes

Hands-on Lab Experiments

Students will gain hands on experience with chemical processes, units, and corresponding equipment through lab experiments

Key Dimensionless Quantities

Students will understand and be able to describe the physical significance of key dimensionless quantities including Re.

Modes Experience

Students will understand qualitatively conduction, forced and free convection, and radiation and have experience with one or more modes during experiments.

System Analyzation

Students will be able to analyze systems containing multiple resistances to heat transfer during laboratory experiments.

UO Lab Experiments

Students will understand convective heat transfer and be able to use heat transfer coefficients as they relate to the UO Laboratory experiments.

Process Variables

Students will demonstrate familiarity and experience with the measurement of process variables (e.g., P, T, flow rate, conc.) using manual and/or electronic devices and computers.

Lab Techniques

Students will demonstrate knowledge of basic laboratory techniques.

Scientific Method Strategies

Students will be able to use the scientific method and problem solving strategies, as well as statistical methods, to design, carry out, and analyze experiments in order to solve engineering problems.

Process Control Principles

Students will demonstrate familiarity and experience with the application of process control principles on an industrial control system.

Chemical Process Equipment

Students will demonstrate familiarity and experience with chemical process equipment.

Engineering Statistics

Students will demonstrate an understanding of basic engineering statistics in their laboratory reports

Graphical Data

Students will demonstrate effective interpretation of graphical data.

Problem Solving

Students will demonstrate an ability to solve engineering problems.

Ch En Topic Integration

Students will be able to integrate topics from various Chemical Engineering courses to solve realistic problems in the areas of heat transfer, fluid flow, and thermodynamics.

Creative Thinking

Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Input Data Evaluation

Students will be able to obtain and evaluate appropriate input information/data from databases, handbooks, correlations, experiments, literature, etc.

Solution Sophistication

Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Lab Safety

Students will understand and practice safe laboratory and chemicals-handling principles.

Oral Presentations

Students will be able to give effective, well organized oral presentations including the handling of questions and the use of appropriate visual aids.

Technical Report Writing

Students will be able to write effective, well organized technical reports, including formal

engineering reports and short letter reports.

Teamwork

Students will practice good teamwork principles.

Performance Calculations

Students will be able to do performance calculations on heat exchangers from experimental data and demonstrate abilities or understanding in one or more of the following aspects: heat exchanger sizing, heat exchanger design, fouling, utilization of overall heat transfer coefficients, types of heat exchangers, and materials of construction.

Flow System Design

Students will be able to design or analyze flow systems involving one or more of the following aspects: pipes, valves, fittings, pumps, flow meters, Newtonian fluids, non-Newtonian fluids, laminar flow, and turbulent flow.

Technical Material

Students will demonstrate effective reading of technical material.

Top

Separations

Stage operations, distillation, extraction, and absorption; design applications.

CH EN 476

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 373 & CH EN 376
Note	College Lecture attendance required.
Taught	Fall

Course Outcomes

Operating Lines

Students will be able to solve steady-state material and energy balances as they relate to operating lines and multi-stage separation units.

Mixture Phase Diagrams

Students will be able to read mixture phase diagrams (solid solubility, liquid-liquid, VLE) and construct mass balances from them using the lever rule, tie lines, etc.

Mass Transfer Coefficients

Students will be able to estimate mass transfer coefficients and use them to determine mass transfer rates across phase boundaries.

Phase Equilibrium

Students will be able to apply solution thermodynamics fundamentals to solve VLE, LLE, SLE, and GLE problems including bubble point, dew point and flash calculations.

Solution Thermodynamics Basics

Students will understand the fundamental concepts of solution thermodynamics including chemical potential, fugacity, activity, partial molar properties, ideal solutions, and excess properties.

Graphical Data

Students will demonstrate effective interpretation of graphical data.

Process Simulator

Students will be able to use a process simulator to design separation columns.

Solve Engineering Problems

Students will demonstrate an ability to solve engineering problems.

Solve Engineering Problems

Students will be able to integrate topics from various Chemical Engineering courses to solve realistic problems.

Critical Thinking

Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Engineering Intuition

Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Safety

Students will understand and have a basic knowledge of how safety considerations are incorporated into engineering problem solving.

Environment

Students will understand and have a basic knowledge of how environmental considerations are incorporated into engineering problem solving.

Basic Separation Techniques

Students will have an overall understanding of basic separation techniques used in industry, the principles upon which they are based, and their limitations and assets.

Flash Calculations

Students will be able to set up and solve single-stage flash calculations.

Tray-type Columns

Students will be able to design tray-type columns (e.g., number of trays, tray efficiency, column height, column diameter, product specs) and packed columns (e.g., height of column, packing material, column diameter, flooding velocity).

Liquid-Liquid Extraction

Students will be able to find the number of stages required for liquid-liquid extraction from ternary phase diagrams.

Batch Distillation

Students will be able to solve binary batch distillation design problems with and without rectifying stages.

Non-ideal Phase Behavior

Students should understand the implications of non-ideal phase behavior (e.g., azeotropes and partial miscibility) and the practical constraints of pressure, temperature, and available utilities on distillation column design.

Technical Material

Students will demonstrate effective reading of technical material.

Top

Unit Operations Laboratory 2

Experimental verification of unit operations design principles; data collection and reduction; report preparation.

CH EN 477

Hours	2.0 Credit, 1.0 Lecture, 6.0 Lab
Prerequisites	CH EN 386 & CH EN 475 & CH EN 476
Taught	Winter, Spring

Course Outcomes

Hands-on Lab Experiments

Students will gain hands on experience with chemical processes, units, and corresponding equipment through lab experiments

Mass Transfer Coefficients

Students will be able to estimate mass transfer coefficients and use them to determine mass transfer rates for both external and internal flows and across phase boundaries.

Kinetics Fundamentals

Students will understand fundamentals of kinetics including definitions of rate and forms of rate expressions during laboratory experiments.

Measurement of Process Variables

Students will demonstrate familiarity and experience with the measurement of process variables (e.g., P, T, flow rate, conc.) using manual and/or electronic devices and computers.

Lab Techniques

Students will demonstrate knowledge of basic laboratory techniques.

Scientific Method Strategies

Students will be able to use the scientific method and problem solving strategies, as well as statistical methods, to design, carry out, and analyze experiments in order to solve engineering problems.

Chemical Process Equipment

Students will demonstrate familiarity and experience with chemical process equipment.

Engineering Statistics

Students will demonstrate an understanding of basic engineering statistics in their laboratory reports

Rate Expressions

Students will be able to determine rate expressions by analyzing reactor data including integral and differential analysis on constant- and/or variable-volume systems in laboratory experiments.

Graphical Data

Students will demonstrate effective interpretation of graphical data.

Problem Solving

Students will demonstrate an ability to solve engineering problems.

Ch En Topic Integration

Students will be able to integrate topics from various Chemical Engineering courses to solve realistic problems in the areas of kinetics and separations.

Creative Thinking

Students will exhibit critical and creative thinking skills for analysis and evaluation of problems and cause-effect relationships.

Obtain & Evaluate Data

Students will be able to obtain and evaluate appropriate informational/data from databases, hand books, correlations, experiments, literature, etc.

Solution Sophistication

Students will be able to rationalize units, make order of magnitude estimates, assess reasonableness of solutions, and select appropriate levels of solution sophistication.

Lab Safety

Students will understand and practice safe laboratory and chemicals-handling principles.

Oral Presentations

Students will be able to give effective, well organized oral presentations including the handling of questions and the use of appropriate visual aids.

Technical Report Writing

Students will be able to write effective, well organized technical reports, including formal engineering reports and short letter reports.

Teamwork

Students will practice good teamwork principles.

Performance Calculations

Students will be able to size and do performance calculations on single, isothermal plug-flow, CSTR, or batch reactors for a single homogeneous or heterogeneous reaction from experimental

data.

Column Design

Students will be able to design tray-type columns (e.g., number of trays, tray efficiency, column height, column diameter, product specs) and/or packed columns (e.g., height of column, packing material, column diameter, flooding velocity).

Technical Material

Students will demonstrate effective reading of technical material.

Top

Special Topics--Undergraduate

Classroom study based on student and faculty interest.

CH EN 493R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Broad Education

Students will gain a broad understanding of engineering fundamentals and practices.

Top

Undergraduate Research

Final report required; 2 hours maximum allowed for degree credit.

CH EN 498R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Research Experience

Students will perform fundamental research on specialized topics in a mentored learing enviroment.

Top

Molecular Modeling

Fundamentals of quantum mechanics, statistical mechanics, and molecular-level modeling. Basics of computational chemistry and simulations using deterministic and stochastic methods (molecular dynamics and Monte Carlo) to calculate thermodynamic and transport properties of fluids and fluid mixtures.

CH EN 513

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 373; or CHEM 463; or concurrent enrollment.
Taught	Winter odd years

Course Outcomes

Basics of Molecular Modeling

Understand and be conversant with the basic principles of molecular modeling. These include simple stochastic and deterministic simulations, the fundamental equations of statistical mechanics, computational chemistry, and molecular simulation Understand and be conversant with the basic principles of molecular modeling. These include simple stochastic and deterministic simulations, the fundamental equations of statistical mechanics, computational chemistry, and molecular simulation

Relating Molecular Concepts to Observables

Develop an intuitive thinking pattern that relates observable phenomena to molecular concepts

Calculate Thermophysical Properties

Be able to calculate a wide variety of thermophysical properties from fundamental molecular concepts using QSPR correlations, computational chemistry, molecular simulation, and statistical mechanics

Real Fluid Properties from Simulations

Understand the fundamental relations of statistical mechanics and how to apply them (analytically) to ideal gases and how to use them to evaluate real-fluid properties from molecular simulations

Developing, Running, and Interpreting Molecular Simulations

Be able to put together, run, and interpret the results of Monte Carlo and molecular dynamics simulations to study phenomena and/or properties

Obtaining Molecular Properties from Quantum Chemistry Calculations

Be able to use modern quantum chemical software to optimize molecular geometries and obtain molecular properties and descriptors using a model chemistry

Top

Biomedical Engineering Principles

Application of chemical engineering principles to model physiologic systems and to solve medical problems.

CH EN 518

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 374 & CH EN 376; or equivalent.
Taught	Winter

Course Outcomes

Total-body Mass Balances

Students will be able to formulate total-body mass balances including the major incoming and outgoing components for the human body.

Transport Characterisitics

Students will be able to discuss the transport characteristics of biological membranes in terms of permeability and to estimate the ion flux, electrochemical potential, or chemical species concentrations associated with a particular environment.

Neuroprosthetic Device

Students will be able to discuss the factors important to the effectiveness of a neuroprosthetic device.

Man-made Flow Systems

Students will be able to describe and to numerically predict major aspects of the humancirculatory system and the behavior of blood in physiologic and man-made flow systems.

Mechanical Behavior

Students will be able to analyze the mechanical behavior of physiological tissue and biomaterials in terms of stress-strain behavior, viscoelasticity, and motion.

Biomaterials

Students will be able to describe the general classes of biomaterials and how they address requirements in various biomedical applications.

Tissue Engineering Processes

Students will be able to describe the basic processes of tissue engineering and the associated cell growth and transport issues.

Medical Imaging

Students will be able to describe the major types of medical imaging and the advantages and disadvantages of each.

Biosensors

Students will be able to describe several common strategies used in biosensors and to explain the need for such sensors.

Time Behavior of Chemical Species

Students will be able to formulate the equations to describe the time behavior of a chemical species for given physiological model, transport, and reaction assumptions.

Drug Delivery Systems

Students will be able to describe several medical circumstances for which drug delivery systems would be advantageous and to formulate the equations to describe the release of a drug into a patient under such circumstances.

Hemodialysis

Students will be able to describe the clinical requirements for hemodialysis and to mathematically estimate the rate of removal of metabolic products by normal kidneys and during hemodialysis.

Oxygen & Carbon Dioxide Transfer

Students will be able to mathematically estimate the transfer of oxygen and carbon dioxide in the lungs and in artificial oxygenators.

Bioethics

Students will be able to discuss the foundational principles of bioethics and the legal and sociological factors that affect their implementation.

Biochemical Engineering

Applying chemical engineering principles to biochemical systems.

CH EN 519

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 374 & CH EN 386; or concurrent enrollment.
Taught	Winter even years

Course Outcomes

Biotechnology Applications

Identify, recognize, and appreciate engineering contributions in biotechnology applications.

Tools of Biochemical Engineering

Be familiar with the tools of biochemical engineering (PCR, rDNA technology, protein engineering, protein display, fermentation, etc.).

Protein Drugs

Understand how protein drugs are discovered, produced, and purified.

Enzyme and Metabolic Engineering

Understand the role of enzyme and metabolic engineering in synthetic biology.

Bioreactors

Utilize material balances to evaluate and optimize cell growth and substrate/product utilization in bioreactors.

Recovery and Purification

Apply engineering principles to recover and purification techniques of bioprocess.

Literature

Read and understand primary literature articles

Industrial Catalytic Processes

Fundamentals of catalytic chemistry and materials; applications to important industrial catalytic processes. Includes catalyst materials and preparation, catalyst characterization, fixed-bed reactor design, and catalyst deactivation.

CH EN 528

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	CH EN 386
Taught	Spring Contact Department

Course Outcomes

Key Industrial Catalytic Processes

Students will learn about key industrial catalytic processes in the production of chemicals, refining of petroleum, and control of the environment.

Process Chemistry

Students will learn the key aspects of the process chemistry, kinetics, mechanisms, catalyst deactivation, reactor design and process design of 13 globally-significant catalytic processes.

Catalysis Principles

Students will apply principles of catalysis to derivation of rate expressions and reactor design calculations for a few processes.

Top

Thermodynamics of Multicomponent Systems

Fundamental concepts and applications in first and second laws, equilibrium and stability, phase equilibrium, and homogeneous and heterogeneous chemical equilibrium.

CH EN 531

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 373; or CHEM 463; or concurrent enrollment.
Taught	Fall

Course Outcomes

Open Systems & Pure Fluids

Perform 1st & 2nd analysis of heat and work interactions for open systems.Calculate process variables for pure fluids using equations of state, departure functions, and corresponding states.

Pure-Fluid Calculations & Relationships

Calculate properties of pure fluids (e.g., vapor pressure, molar volumes, etc.) using correlations and equations of state. Calculate the properties of mixtures using ideal mixing properties and excess properties. Show relationships between pure-fluid properties (e.g., Clapeyron Equation) and determine partial molar enthalpies, volumes, and entropies from experimental data and from equations for excess Gibbs energy.

Open Systems & Pure Fluids

Perform 1st & 2nd analysis of heat and work interactions for open systems.Calculate process variables for pure fluids using equations of state, departure functions, and corresponding states.

Phase Equilibrium

Write down the basic equations for vapor-liquid equilibrium using the gamma and phi methods. Find vapor-liquid equilibrium phase compositions, dew points, and bubble points for binary systems with ideal gas phase using the method. Calculate, at a given temperature, pressure, and feed composition, liquid and vapor compositions and amounts vaporized using the gamma and phi methods. Calculate liquid-liquid compositions using excess Gibbs energy equations. Calculate solid-liquid solubilities.

Pure-Fluid Calculations & Relationships

Calculate properties of pure fluids (e.g., vapor pressure, molar volumes, etc.) using correlations and equations of state. Calculate the properties of mixtures using ideal mixing properties and excess

properties. Show relationships between pure-fluid properties (e.g., Clapeyron Equation) and determine partial molar enthalpies, volumes, and entropies from experimental data and from equations for excess Gibbs energy.

Chemical Equilibrium

Know and use the relationship among heats of formation, absolute entropy and Gibbs energy of formation. Know and use the relationship between Gibbs energy of formation and the equilibrium constant. Calculate the equilibrium distribution of reacting ideal gas mixtures. Calculate equilibrium compositions and temperature for a given heat interaction (e.g., adiabatic, isothermal, or given heat leak) for a given feed compostion, pressure, and initial temperature and real fluids. Find the equilibrium distribution for complex reactions.

Phase Equilibrium

Write down the basic equations for vapor-liquid equilibrium using the gamma and phi methods. Find vapor-liquid equilibrium phase compositions, dew points, and bubble points for binary systems with ideal gas phase using the method. Calculate, at a given temperature, pressure, and feed composition, liquid and vapor compositions and amounts vaporized using the gamma and phi methods. Calculate liquid-liquid compositions using excess Gibbs energy equations. Calculate solid-liquid solubilities.

Top

Transport Phenomena

Transport mechanisms and coefficients and fundamental field equations for momentum, heat, and mass transport, with application to system design.

CH EN 533

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 376 & MATH 303; or CH EN 376 & MATH 447; ChEn 476 or concurrent enrollment.
Recommended	Math 447.
Taught	Fall

Course Outcomes

Conservation Laws

Derive the equations of change from conservation principles for a one-dimensional system.Derive the equations of change from conservation principles for an arbitrary curvilinear coordinate system.

Dimensional Analysis

Apply the principles of dimensional analysis to the equations of change to generate terms containing dimensionless parameters such as Re, Pr, Sc, Gr, and Pe.For a given engineering problem, determine which terms in the equations of change are most significant in controlling the velocity, temperature, and concentration distributions.

Vector Notation

Mathematically interpret transport equations that are expressed using vector and tensor notation.Manipulate and generate solutions to equations using vector and tensor notation

Solutions to the Equations of Change

Generate analytic solutions to the equations of change when there is one independent variable, including unidirectional flow of an incompressible fluid with combined convection and diffusion.Demonstrate the principles for solving the equations of change for an incompressible fluid with two independent variables (two spatial, or time and one spatial).

Interfacial Transport

Solve simple interfacial transport problems with either heat, mass, or momentum transfer, including the use of Cf, Nu, and Sh.Solve interfacial transport problems with combined heat, mass, and momentum transfer; make "blowing factor" corrections to heat and mass transfer when the net-mass-transfer rate is high.

Transport Properties

Estimate viscosity, thermal conductivity, and mutual diffusivity from simple theories such as corresponding states and Chapman-Enskog.Explain the molecular origins of observed transport

properties and predict qualitatively the transport performance of newly encountered materials.

Turbulence

Qualitatively explain the origins and nature of turbulence.

Multicomponent Mass Transfer

Describe the rationale and use of the Stefan-Maxwell equation for multicomponent mass transfer.

Innovation

Analyze the viability of proposed solutions to engineering problems in terms of transport processes.Apply knowledge of transport processes to generate new solutions to engineering problems.

Top

Kinetics and Catalysis

Theories and principles of chemical kinetics, including heterogeneous catalysis and reactor design.

CH EN 535

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 386
Taught	Fall

Course Outcomes

Definitions, Rate Functions and Stoichiometry

Define reaction rate; use extent of reaction for defining species concentrations.(a) General properties of rate function & five empirical rules; and (b) purposes of studying kinetics.

Theory of Chemical Kinetics

(a) Define elementary step and its rate. (b) Estimate pre-exponential factors from transition-state theory for homogeneous reactions.(a) collision and transition-state theories; and (b) BEBO theory; properties and calculations of partition functions. Estimate pre-exponential factors from TST for surface-phase species.

Kinetic Tools

Derive a rate expression from a sequence of elementary steps for a homogeneous chain reaction or a heterogeneous catalytic reaction.(a) Applicability and limitations of kinetic tools, including SSA, LCA, RDS, and MASI; open/closed sequences.

Adsorption/Surface Properties

(a) Derive Langmuir adsorption isotherms; (b) calculate BET surface area from N2 adsorption in a solid; (c) calculate dispersion of supported metal catalysts from uptake data.(a) Molecular processes involved in adsorption/desorption of molecules on a solid surface; (b) information available from a full-range isotherm.

Kinetics of Surface Reactions

(a) Derive rate expressions for Langmuir-Hinshelwood, Eley-Rideal, and two-site mechanisms of surface reactions; (b) fit rate data to a LH rate expression to determine values of the kinetic constants and specify acceptable statistical measures of the goodness of fit.(a) Principles and guidelines for experimental design and collecting rate data; (b) methods for fitting rate data to empirical and theoretically based rate models; (c) the microkinetics approach to modeling reaction kinetics.

Heat & Mass Transfer in Solid Catalysts

Calculate concentration and temperature gradients in film and pellet, % resistances for heat/mass transport and reaction, combined and effective diffusivities, and isothermal/-nonisothermal effectiveness factors.(a) Mechanisms of and fundamental equations for heat/mass transport processes during reaction in a solid, porous catalyst; (b) criteria for heat/mass transfer and pore-diffusional disguises.

Reactor Design Essentials

Set-up and solve energy, mass, and momentum balances for a 1D adiabatic or heat-exchange packed-bed reactor, incorporating film mass transfer and pore diffusional resistances and effects of gaseous expansion, to obtain catalyst requirements, axial temperature profile, and pressure drop.3D, unsteady-state equations for conservation of mass, energy, and momentum and simplification to 1D, steady-state reaction.

Computer Design Methods

Computer-aided design and numerical methods of chemical engineering processes.

CH EN 541

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 376 & MATH 303; or CH EN 376 & MATH 334; or equivalent.
Taught	

Course Outcomes

Computational Techniques

Students will apply computational techniques to solve a wide range of numerical problems arising in Chemical Engineering

Numerical Computer Programming

Students will become proficient in numerical computer programming.

Numerical Methods

Students will learn theory, algorithms, implementation, and analysis of output for numerical methods including the following:

- Round off and truncation errors
- Stability and convergence criteria
- Direct and iterative solution of linear systems of equations
- Solution of nonlinear algebraic systems of equations
- Solution of linear and nonlinear systems of initial and boundary value ordinary differential equations
- Classification and characteristics of partial differential equations
- Solution of elliptic, parabolic, and hyperbolic partial differential equations using finite difference and finite volume methods
- Numerical integration and interpolation of functions

Top

Polymer Science and Engineering

Foundation science and theory of polymer chemistry and physics and their implications in engineering applications. Topics include polymerization chemistry, structure-property relationships, polymer physics, and transport properties.

CH EN 578

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CH EN 378; or equivalent.
Taught	Winter even years, Spring odd years

Course Outcomes

Polymer & Monomer Identification

Students can name polymers and identify the monomers from which the polymers are built.

Polymer Configuration & Conformation

Students recognize the roles that polymer configuration and conformation have upon polymer physical and chemical properties.

Chain Polymerizations

Students can describe the mechanisms of chain polymerizations, and can predict reaction rates and polymer chain lengths.

Step Polymerizations

Students can describle the mechanisms of step polymerizations, and can predict reaction rates and polymer chain lengths.

Polymer Design

Based on tabulated mechanical properties, students can design polymer structures to sustain engineering loads, and can predict deformations under load.

Manufacturing Processes

Students can name various manufacturing processes and can do simple formulation of manufacturing processes to build things from polymers.

Polymer Recycling

Students recognize the principles of polymer recycling and can select appropriate recycle or reuse methods to balance economics and environmental responsibility.

Industrial Scale Polymerization Processes

Students can analyze industrial scale polymerization processes and evaluate the advantages and disadvantages of various processes.

Polymer Scenario or Application

For a given scenario or application, students can propose various polymers that meet the requirements, identify the monomers required to make the polymers, and design the industrial polymerization and manufacturing processes to produce the desired object for the application.

Top

Special Topics - Intermediate

Special topics for advanced undergraduate students and for graduate students.

CH EN 593R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Non-curricular Knowledge

Students will develop knowledge and skills about topics addressed at the appropriate level but not regularly taught as part of the department curriculum

Top

Elementary College Chemistry

Structure of matter and the chemical consequences of that structure.

CHEM 100

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	PhyS 100 or equivalent.
Note	For nonscience and nonmedical majors.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Chemistry principles

Students will be able to view the world around them in chemical terms. Students will use the concepts of atoms, molecules, and their properties to understand a variety of phenomena.

Problem solving

Students will be able to make basic quantitative calculations regarding a number of chemical concepts in preparation for more rigorous, college-level chemistry courses.

Top

Introductory General Chemistry

Atomic and molecular structure, periodic relationships, states of matter, chemical reactions and stoichiometry, acids and bases.

CHEM 101

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 97 or equivalent.
Note	Primarily for nonscience majors who require a broad introduction to general chemistry.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Big Picture

Students will be able to view the world around them in chemical terms. Students will use the concepts of atoms, molecules, and their properties to understand a variety of phenomena.

Problem Solving

Students will be able to make qualitative and/or quantitative predictions regarding a number of chemical concepts including chemical reactions and stoichiometry, calorimetry, osmosis, gases, acid/base chemistry, chemical equilibria, and radioactivity.

Concepts of Chemistry

The chemical nature of the world and the process of scientific inquiry. Application to critical scientific issues facing society.

CHEM 102

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Chemistry principles

Students will be able to view the world around them in chemical terms. Students will use the concepts of atoms, molecules, and their properties to understand a variety of phenomena.

Critical thinking about scientific claims

Students will demonstrate the ability to distinguish between reliable and questionable scientific claims as related to current, relevant issues facing society.

Science and religion

Students will discuss intelligently the relationship between modern science and religious belief.

General College Chemistry

Atomic and molecular structure including bonding and periodic properties of the elements; reaction energetics, electrochemistry, acids and bases, inorganic and organic chemistry.

CHEM 105

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Math 110 (or equivalent) or concurrent enrollment.
Note	Primarily for students in engineering and biological sciences. Three lectures and two recitation sections per week.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Chemistry fundamentals

Students will demonstrate a familiarity with the basic vocabulary and concepts of chemistry.

Quantitative laws

Students will demonstrate a qualitative and basic quantitative understanding of the fundamental chemical laws which govern the material substances in our universe and which express how one variable in nature depends on another.

Problem solving

Students will demonstrate the ability to manipulate quantitative descriptors of natural phenomena expressed both in the form of equations and of proportionalities, and solve chemistry problems using these skills.

Chemical Phenomenon

A successful Chemistry 105 students describes chemical phenomenon by first focusing on properties of the elements at the atomic level. Chemistry 105 students will gain a knowledge base of reactivity patterns of elements and compounds.

Field of Study

Chemistry 105 students will be able to use their chemistry experience, knowledge, and skills to better understand and work in their own field of study.

General College Chemistry

Continuation of Chem 105 but covering most of the topics in a more quantitative way. Detailed treatment of thermodynamics and equilibria.

CHEM 106

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	CHEM 105; or CHEM 111
Note	Three lectures and one recitation section per week.
Taught	Fall, Winter, Summer

Course Outcomes

Mastery of Chemistry Fundamentals

Students will demonstrate an expanded mastery of the concepts that were learned in Chemistry 105 including: kinetics, chemical equilibrium, acids and bases, solubility and complexation equilibrium, electrochemistry, thermodynamics, organic, biochemistry, and nuclear chemistry.

Problem Solving

Students will demonstrate the ability to solve mathematical problems, typically using algebra, in kinetics, chemical equilibrium, acids and bases, solubility and complexation equilibrium, electrochemistry, and thermodynamics.

General College Chemistry Laboratory

Chemical properties, chemical reactions, collection and interpretation of data, preparation of reports.

CHEM 107

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Chem 106 or Chem 112 or concurrent enrollment.
Note	Required for most students needing one year of general chemistry.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Scientific Instrumentation

Through laboratory experiments, students will demonstrate that they can use precise scientific instrumentation to find quantitative answers to significant problems within the total precision allowed by the equipment.

Experimental procedures

Students will demonstrate that they can perform simple experiments, observe the outcomes accurately, then make reasoned, accurate decisions about the meanings of the results.

Principles of Chemistry

Stoichiometry, kinetic-molecular theory, thermodynamics, states of matter, solutions and equilibria, electrochemistry, structure and bonding, chemical reactions, kinetics.

CHEM 111

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	Math 110 or equivalent.
Recommended	High school chemistry, physics, and introductory calculus or concurrent enrollment in Math 112.
Note	Tutorial included.
Taught	Fall

Course Outcomes

Molecular Models

Students will demonstrate the ability to use valence shell and molecular orbital models of bonding to predict molecular shapes, reactivity, and spectroscopic properties.

Application of Kinetic Theory of Gases

Students will be able to apply the kinetic theory of gases, including properties of ideal gases and interactions that lead to non-ideal behavior, to predict gas behavior with varied temperature, pressure and volume.

Application of Chemical Thermodynamics

Students will demonstrate the ability to use core concepts of chemical thermodynamics, with emphasis on the first and second laws, to predict physical changes and reaction outcomes based on Gibbs energies.

Application of Quantum Mechanics to Atomic Theory

Students will be able to apply concepts of the quantum mechanical nature of light and matter to explain observations that originally led to the development of atomic theory.

Principles of Chemistry

Continuation of Chem 111.

CHEM 112

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	Chem 111 or Chem 105 or equivalent.
Note	Tutorial included.
Taught	Winter

Course Outcomes

Applying Thermodynamics to Equilibria and Entropy

Students will be able to use thermodynamic principles and their application to physical and chemical equilibria to calculate entropic and enthalpic contributions to physical changes and reactions and predict equilibria given entropic and enthalpic changes.

Applying Acid-Base Theory

Students will be able to apply acid-base theory, including interactions of strong and weak acids and bases, to determination of pH values of solutions, calculating buffering capacity and performance of acid-base titrations. They will be able to use structural features of molecules to estimate acid and base strength.

Electrochemistry

Students will demonstrate an understanding of electrochemistry in designing simple electrodes and will use reduction/oxidation potentials to characterize electrodes.

Applying Transition State Theory to Reactions

Students will be able to apply transition state theory to reaction kinetics. Students will be able to model mathematically rates of multiple reaction types.

Periodic Table Principles

Students will be able to apply the periodic nature of the elements to classify elements and identify the compositions of inorganic salts.

Introductory General Chemistry Laboratory

Principles and techniques of chemical measurements. Concepts introduced in general chemistry lecture courses reinforced.

CHEM 113

Hours	2.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	Chem 112 or Chem 106 or concurrent enrollment (preferred). Chem 201 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Precise Quantitative Measurements

Perform precise quantitative measurements using volumetric glassware, analytical balances, and electrochemical and spectrophotometric instrumentation.

Application of Chem 111 and Chem 112 to Laboratory Measureme

Apply concepts of quantum mechanics, kinetics, equilibrium and thermodynamics taught in Chem 111 and Chem 112 to laboratory measurements.

Separation and Classification of Inorganic Cations and Anion

Apply a basic understanding of descriptive chemistry introduced in Chem 112 to the separation and classification of inorganic cations and anions.

Record Laboratory Procedures

Record laboratory procedures and results neatly and concisely in a laboratory notebook

Report Experimental Results

Report experimental results in a manner that gives proper attention to sources of experimental error.

Freshman Seminar

Impact of chemistry and biochemistry on science and society. Overview of areas of chemistry and undergraduate research. Benefits of a chemistry or biochemistry degree for jobs, graduate or professional school.

CHEM 195

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Societal Impact

Students will appreciate the impact of chemistry and biochemistry on society.

Areas

Students will understand the distinctions between the main areas of chemistry and biochemistry.

Value of Degree

Students will recognize the value of a chemistry and biochemistry degree and the range of opportunities for degree holders.

Research options

Students will be aware of options to do undergraduate research.

Top

Chemical Handling and Safe Laboratory Practices

Safe handling of chemicals and safe practices in chemistry laboratories.

CHEM 201

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Regulations

Discuss regulations that govern a chemists activities: OSHO, EPA, DOT, CDC, NRC, and state agencies and specifically, the OSHA Laboratory Standard CFR 29 1910.1450 and EPA RCRA regulations (CFR 40) requiring "cradle to grave" responsibility

Chemical hazards

Identify chemical hazard classes and follow administrative guidelines to work safely in a laboratory environment and properly store and dispose of chemicals. These guidelines include regulated exposure limits PEL, STEL, IDLH, Ceiling and other measurable standards, such as the TLV, LD50, LC50, SADT, and guidelines for use of compressed gases and cryogenic materials.

Protective equipment

Demonstrate usage of protective equipment available for chemical exposure.

Accidents

Respond to laboratory accidents, such as spills, fires, and cuts, and clean up a mercury spill.

Fire safety

Recognize fire hazards and put out a fire using an ABC fire extinguisher.

Biological and radiological safety

Discuss biological and radiological safety, including biosafety levels, management of biological waste, lasers, and radionuclides.

Quantitative and Qualitative Analysis

Principles of chemical equilibrium, quantitative chemical measurements, and qualitative detection of selected chemical species.

CHEM 223

Hours	4.0 Credit, 2.0 Lecture, 6.0 Lab
Prerequisites	CHEM 107; or CHEM 113
Note	Primarily for majors in molecular biology and the life sciences.
Taught	Fall, Spring

Course Outcomes

Course Objectives

The course is designed to develop research skills. The labwork will have a somewhat bioanalytical focus, e.g. the chemical analysis of biological molecules or biologically related ions and the use of biomolecules in assays. We will work to develop good laboratory practice, both conceptually and practically, and consider how to do good science. The combined lecture/lab approach will be used to help you understand quantitative approaches to analysis, sources of error, and the utility but also limitations of laboratory measurements. You will be asked to apply a portion of this knowledge to your own laboratory determinations. We will also discuss more advanced analytical methods involving chemical separations and instrumental analyses. This course fills one of the requirements for a minor in chemistry.

Top

Principles of Chemical Analysis

Principles of quantitative analysis, introductory instrumental methods, and computer applications to chemical analysis.

CHEM 227

Hours	4.0 Credit, 2.0 Lecture, 6.0 Lab
Prerequisites	CHEM 113
Taught	Fall, Spring

Course Outcomes

Laboratory Operations

Demonstrate skill in performing precise, careful, basic laboratory operations such as sample preparation, calibration techniques, spectrophotometry, electrochemical analysis, titrimetric and chromatographic methods

Basic Measurement

Explain basic measurement methods and devices

Reporting Scientific Results

Show proficiency in reporting scientific results in numerical, graphical, and written formats, and be able to explain the ethical standards for such reports

Data Analysis Computer Programs

Show proficiency in using computer programs for data analysis

Apply Basic Statistics to Data Analysis

Apply basic statistics to data analysis including, confidence intervals, t-test, linear regression, propagation of error, sampling statistics and signal-noise enhancement

Evaluate Experiments and Data

Critically evaluate experiments and data with respect to theory and models

Application of Knowledge to New Problems

Apply knowledge to new problems, including the design and validation of new analytical methods

Introductory Bio-organic Chemistry

Principles of organic chemistry and biochemistry relating to biomolecule structure and function.

CHEM 285

Hours	4.0 Credit, 4.0 Lecture, 1.0 Lab
Prerequisites	Chem 101 or equivalent.
Taught	Fall, Winter, Spring

Course Outcomes

Metabolism of Carbohydrates, Lipids and Proteins

Students will understand the metabolism of carbohydrates, lipids, and proteins in humans. They will be able to describe in structures and words the metabolism of sugars through the pathways of glycolysis, the citric acid cycle, and the electron transport chain.

Organic Functional Groups

Students will understand the structure and reactivity of organic functional groups, such as alcohols, aldehydes, carboxylic acids, and amides. For example, students will learn that aldehydes and ketones typically undergo addition reactions.

Biomolecules

Students will understand the structure and reactivity of the biomolecules that have those functional groups. For example, students will be able to demonstrate that carbohydrates are aldehydes and ketones that undergo addition reactions to form hemiacetals and polysaccharides with acetal linkages.

Top

Research Training Experience

Developing competence in methods of research, safe practices, and application of classroom knowledge to research problems leading to confidence and independence in research work.

CHEM 297R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Term 2, Winter Term 2, Spring, Summer

Course Outcomes

Research skills

The student will develop the fundamental skills necessary to participate in mentored research in future semesters with a specific research group under the tutelage of a faculty member.

Top

Guided Learning for Chemistry Instruction

Methods for guiding the learning of high school chemistry students, including modeling of instruction and practice in preparing and conducting demonstrations.

CHEM 331

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 107; or CHEM 113
Recommended	Chem 201.
Taught	Winter

Course Outcomes

Pedagogy and Teaching Chemistry

Develop and broaden an understanding of the explanations of natural phenomena with chemistry principles to encourage student interest in the world around them.

Chemistry Fundamentals

Enrich and supplement the chemical principles and concepts learned in university chemistry courses to fully understand basic chemical principles.

Laboratory and Problem Solving Skills

Develop and refine a variety of laboratory and problem solving strategies: dimensional analysis, microscale chemistry, Virtual ChemLab, and inquiry methods.

Top

Organic Chemistry

Chemical bonds and molecular structure, conformation and configuration, functional classes, reactions and mechanisms, syntheses.

CHEM 351

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	CHEM 105; or CHEM 111
Note	Primarily for majors in chemical engineering and the biological sciences.
Taught	Fall, Winter, Spring

Course Outcomes

Recognizing and Naming Classes

Recognize functional group classes commonly encountered in organic chemistry and name representative molecules from each class using IUPAC rules for organic nomenclature.

Structure and Reactivity Prediction

Predict structure and reactivity of alkanes, alkenes, alkynes, aromatic hydrocarbons, alcohols, ethers, epoxides, and alkylhalides based on such factors as carbon atom hybridization, bond length, bond strength, and bond polarity.

Curved Arrow Mechanisms

Recognize and provide curved arrow mechanisms for the following types of organic reactions: additions, substitutions, and eliminations.

Energetically-Preferred Conformations

Predict the energetically preferred conformation for straight-chain and branched alkanes, and for substituted cycloalkanes.

R and S Configurations/Distinguishers

Determine R and S configurations for chiral molecules and distinguish between enantiomers, diastereomers, meso compounds, and conformational isomers.

Mass Spectra Determining Molecule Structure

Interpret 1H NMR, 13C NMR, IR, UV, and mass spectra and use these data to determine the structure of organic molecules.

Relative Energy Prediction

Predict the relative energies of reactive intermediates such as radicals, carbocations, and carbanions, based on structural considerations such as orbital hybridization, hyperconjugation, and

resonance stabilization.

Top

Organic Chemistry - Majors

Chemical bonds and molecular structure, conformation and configuration, functional classes, reactions and mechanisms, syntheses.

CHEM 351M

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 105; or CHEM 111
Note	For majors in chemistry and biochemistry.
Taught	Fall

Course Outcomes

Recognizing and Naming Classes

Recognize functional group classes commonly encountered in organic chemistry and name representative molecules from each class using IUPAC rules for organic nomenclature.

Structure and Reactivity Prediction

Predict structure and reactivity of alkanes, alkenes, alkynes, aromatic hydrocarbons, alcohols, ethers, epoxides, and alkylhalides based on such factors as carbon atom hybridization, bond length, bond strength, and bond polarity.

Curved Arrow Mechanisms

Recognize and provide curved arrow mechanisms for the following types of organic reactions: additions, substitutions, and eliminations.

Energetically-Preferred Conformations

Predict the energetically preferred conformation for straight-chain and branched alkanes, and for substituted cycloalkanes.

R and S Configurations/Distinguishers

Determine R and S configurations for chiral molecules and distinguish between enantiomers, diastereomers, meso compounds, and conformational isomers.

Mass Spectra Determining Molecule Structure

Interpret 1H NMR, 13C NMR, IR, UV, and mass spectra and use these data to determine the structure of organic molecules.

Relative Energy Prediction

Predict the relative energies of reactive intermediates such as radicals, carbocations, and carbanions, based on structural considerations such as orbital hybridization, hyperconjugation, and

resonance stabilization.

Top

Organic Chemistry

Continuation of Chem 351.

CHEM 352

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	CHEM 351; or CHEM 351M
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Predict Structure and Reactivity

Predict structure and reactivity of aldehydes, ketones, carboxylic acids, esters, anhydrides, amides, b-ketocarbonyl containing compounds, amines, and phenols.

Curved Arrow Mechanisms

Recognize and provide curved arrow mechanisms for the following types of organic reactions: electrophilic & nucleophilic aromatic substitution, nucleophilic carbonyl addition, nucleophilic acyl substitution, carbonyl condensation, [4 2] cycloaddition, and substitution ato a carbonyl.

Recognize and Predict Reactivity

Recognize and predict the reactivity of the following reactive species and/or reactive intermediates: Grignard reagents, Wittig reagents, organolithiums, diorganocuprates, enols, enolates, aryl diazonium ions, and benzynes.

Recognize and Predict Structure/Reactivity

Recognize and predict the structure and reactivity of the following classes of biologically important organic molecules: carbohydrates, amino acids, proteins, and lipids.

Top

Organic Chemistry--Majors

Continuation of Chem 351M.

CHEM 352M

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 351M; or CHEM 351
Taught	Winter

Course Outcomes

Predict Structure and Reactivity

Predict structure and reactivity of aldehydes, ketones, carboxylic acids, esters, anhydrides, amides, b-ketocarbonyl containing compounds, amines, and phenols.

Curved Arrow Mechanisms

Recognize and provide curved arrow mechanisms for the following types of organic reactions: electrophilic & nucleophilic aromatic substitution, nucleophilic carbonyl addition, nucleophilic acyl substitution, carbonyl condensation, [4 2] cycloaddition, and substitution ato a carbonyl.

Recognize and Predict Reactivity

Recognize and predict the reactivity of the following reactive species and/or reactive intermediates: Grignard reagents, Wittig reagents, organolithiums, diorganocuprates, enols, enolates, aryl diazonium ions, and benzynes.

Recognize and Predict Structure/Reactivity

Recognize and predict the structure and reactivity of the following classes of biologically important organic molecules: carbohydrates, amino acids, proteins, and lipids.

Organic Chemistry Laboratory--Nonmajors

Physical and chemical properties, isolation and purification, characterization, syntheses.

CHEM 353

Hours	1.0 - 2.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	CHEM 351; or CHEM 351M; concurrent enrollment in Chem 352 or Chem 352 strongly preferred.
Note	For predentistry, premedicine, and other majors who do not intend to take Chem 455.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Traditional Organic Reactions

Perform a broad range of traditional organic reactions at the micro scale including: nucleophilic carbonyl additions, hydroboration, nucleophilic acyl substitution, electrophilic aromatic substitution, [4 2] cycloaddition, and photochemical alkene isomerization.

Organic Chemistry Techniques

Implement fundamental organic chemistry techniques for carrying out basic experiments, and purifying products, at the micro scale including: extraction, distillation, recrystalization, column chromatography, and TLC.

Form Conclusions

Make correct conclusions about the outcome of experiments after collecting basic physical data, and after providing unambiguous interpretation of the necessary spectra.

Top

Organic Chemistry Laboratory--Majors

Physical and chemical properties, manipulative skills, isolation and purification, characterization and identification, syntheses.

CHEM 354

Hours	2.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	Chem 352 or Chem 352M or concurrent enrollment (preferred).
Taught	Fall, Winter, Spring

Course Outcomes

Traditional Organic Reactions

Perform a broad range of traditional organic reactions at the micro scale including: nucleophilic carbonyl additions, hydroboration, nucleophilic acyl substitution, electrophilic aromatic substitution, [4 2] cycloaddition, and photochemical alkene isomerization.

Organic Chemistry Techniques

Implement fundamental organic chemistry techniques for carrying out basic experiments, and purifying products, at the micro scale including: extraction, distillation, recrystalization, column chromatography, and TLC.

Form Conclusions

Make correct conclusions about the outcome of experiments after collecting basic physical data, and after providing unambiguous interpretation of the necessary spectra.

Top

Organic Chemistry Laboratory 2 - Nonmajors

Physical and chemical properties, isolation, purification, characterization, identification, and syntheses of organic compounds.

CHEM 355

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	CHEM 353
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Traditional Organic Reactions

Perform a broad range of traditional organic reactions at the micro scale including: nucleophilic carbonyl additions, hydroboration, nucleophilic acyl substitution, electrophilic aromatic substitution, [4 2] cycloaddition, and photochemical alkene isomerization.

Organic Chemistry Techniques

Implement fundamental organic chemistry techniques for carrying out basic experiments, and purifying products, at the micro scale including: extraction, distillation, recrystalization, column chromatography, and TLC.

Form Conclusions

Make correct conclusions about the outcome of experiments after collecting basic physical data, and after providing unambiguous interpretation of the necessary spectra.

Technical Writing Using Chemical Literature

Intensive technical writing course based on chemical literature sources.

CHEM 391

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 227 & CHEM 352; or CHEM 227 & CHEM 352M
Note	Fulfills GE Advanced Writing requirement.
Taught	Fall, Winter

Course Outcomes

Communicate Results

Communicate the results of scientific experiments in oral reports, technical graphics, and written reports.

Research Literature

Search the chemical literature for published works relevant to a project of interest, and to read and understand technical literature related to the discipline.

Apply Classroom Knowledge in Research Laboratory

Draw on classroom knowledge to contribute to solutions of problems encountered in a research laboratory.

Post-Graduate Opportunities

Make informed choices among post-graduate opportunities for work or further education.

Ethics

Understand professional and scientific ethics.

Top

Synthesis and Qualitative Organic Analysis

Laboratory course emphasizing isolation, purification, and characterization of major and minor products from selected syntheses.

CHEM 455

Hours	3.0 Credit, 1.0 Lecture, 6.0 Lab
Prerequisites	CHEM 354; or CHEM 353; Chem 201 or concurrent enrollment.
Note	For chemistry and other science majors.
Taught	Fall

Course Outcomes

Design New Reactions to Obtain Desired Products

Critically evaluate literature references, in particular experimental reaction details including reagents, starting materials, solvent, temperature, apparatus, stoichiometry, and scale. Adapt and modify known procedures to design and execute new reactions to obtain desired products on small and moderate scales (mg–g).

Completion of Reactions

Monitor and evaluate the successful completion of reactions using TLC with various solvents and modes, solvent changes and co-spot interpretation.

Reactions Using Appropriate Systems

Work up reactions using the appropriate organic and aqueous system based on polarity and acid/base properties including drying and solvent removal operations.

Basic Purification

Perform basic purification operations using recrystallization, distillation, chromatography with proper choice of solvents, techniques, mode of operation, etc. based on the properties of the product compound.

Hands on Operation

Evaluate purity and identification of structures using hands on operation of NMR, IR, MS, and polarimetry.

Complete Peak Assignment

Prepare sample, set up and obtain routine 1D 1H and 13C NMR spectra showing adequate signal

locking, shimming, formatting, data processing, spectra interpretation with complete peak assignment.

NMR Theory

Demonstrate understanding of NMR theory including magnetic field resonance, radio frequency pulse sequences, shift, splitting, polarization transfer, signal correlation, 2D experiments including homo and heterocorrelation spectroscopy, COSY, HSQC, NOESY, and multiple bond techniques, HMBC, TOCSY

MS Theory

Demonstrate understanding of MS theory including ionization techniques, EI, CI, FAB, ES, MALDI, detection techniques, fragmentation patterns of functional groups, molecular ion, base peak, isotopes, N-rule.

Polarimetry Theory

Demonstrate understanding of polarimetry theory including plane polarized light, interaction with chiral compounds, optical rotation and determination of enantiomeric excess.

Write Clear Lab Reports

Write clear lab reports including clear experimental detail, operation, characterization, interpretation, evaluation, and conclusions.

Top

Physical Chemistry

Quantum mechanics, group theory, atomic and molecular structure, spectroscopy, computational methods, statistical mechanics.

CHEM 462

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 302 & PHSCS 123; Chem 227 or concurrent enrollment; Chem 351M or 351; Phscs 220 or concurrent enrollment.
Taught	Fall

Course Outcomes

Wave Functions and Operators

Demonstrate understanding of wave functions and operators, including solving for eigenvalues and expectation values

Properties of Model Systems

Solve for properties of model systems, including particle in a box, harmonic oscillator, rigid rotor, Hydrogen-like atoms

Approximation Techniques

Apply approximation techniques (variation and perturbation) to relate model system to real chemical systems

Interpret and Extract Information on Molecular Shape

Apply quantum models of molecules to interpret spectra and extract information on molecular shape

Characterize Molecular Properties

Characterize molecular properties by solving for molecular symmetry

Solve for Simple Bonding Orbitals

Solve for simple bonding orbitals using valence bond, linear combinations of atomic orbitals and symmetry adapted linear combinations

Solve for the Partition Function of Molecular Systems

Solve for the partition function of molecular systems, including translational, rotational, vibrational and electronic energies

Top

Physical Chemistry

Thermodynamics and equilibria, states of matter, kinetic-molecular theory, kinetics, statistical mechanics.

CHEM 463

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 462 & PHSCS 220
Recommended	Math 302.
Taught	Winter

Course Outcomes

Find Connections

Demonstrate connections between molecular interactions and equations of state

Understand and Use Molecular Models

Describe physical and chemical phenomena in terms of molecular and bulk models and understand the limitations of these models

Describe Chemical Reactions

Describe the kinetics of chemical reactions in terms of molecular mechanisms and empirical rate laws

Laws of Thermodynamics

Apply the laws of thermodynamics to physical and chemical processes, including phase transitions, mixtures, chemical equilibrium, and electrochemical processes

Analyze and Interpret Data

Analyze and interpret experimental data to draw conclusions about physical and chemical processes

Physical Chemistry Laboratory 1

Experiments related to physical chemistry: thermodynamics and equilibria, phase transitions, kinetic-molecular theory, kinetics; computer manipulation of data, report preparation.

CHEM 464

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Chem 463 or 467 or 468 or concurrent enrollment.
Note	May be taken before, after, or concurrent (preferred) with Chem 465.
Taught	Winter

Course Outcomes

Collect Data

Collect quantitative data using a variety of instruments, including calorimeters and spectrometers

Fit Data to Models

Fit collected data to mathematical models and extract molecular and bulk parameters

Prepare Graphs/Tables Based on Data

Prepare and present clear graphs and tables, showing data from experiments

Lab Reports

Write clear lab reports in standard scientific journal format

Oral Presentations

Prepare and give high quality oral presentations

Top

Physical Chemistry Laboratory 2

Experiments related to physical chemistry: quantum mechanics, group theory, atomic and molecular structure, spectroscopy, computational methods, statistical mechanics; computer manipulation of data, report preparation.

CHEM 465

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Chem 462 or 467 or 468 or concurrent enrollment.
Note	May be taken before, after, or concurrent (preferred) with Chem 464.
Taught	Winter

Course Outcomes

Collect Spectroscopic Data

Collect quantitative spectroscopic data using a variety of instruments, including FT-IR, UV/Vis

Fit Data to Models

Fit collected data to physical chemical mathematical models and extract molecular parameters

Experiment with Molecules

Perform molecular computations on the molecules in laboratory experiments

Prepare Graphs/Tables Based on Data

Prepare and present clear graphs and tables, showing data from experiments

Lab Reports

Write clear lab reports in standard scientific journal format

Top

Physical Chemistry for Engineers

Quantum mechanics, atomic and molecular structure, spectroscopy, computational methods, statistical mechanics, thermodynamics and equilibria, states of matter, kinetic-molecular theory, kinetics.

CHEM 467

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 351 & MATH 302 & PHSCS 121; or CHEM 351 & MATH 314 & PHSCS 121
Recommended	Ch En 263.
Note	For chemical engineering majors and other interested students in fields of engineering and physical science.
Taught	Fall

Course Outcomes

Fundamentals

understand the fundamentals of classical thermodynamics, quantum mechanics, reaction kinetics, and statistical mechanics, including foundational principles, key mathematical relationships and derivations, at a deeper, more rigorous level than Chem 111H and 112.

Relate

be able to relate atomic/molecular properties and interactions to bulk properties and vice versa.

Interpret

be able to interpret atomic and molecular spectra in terms of quantum mechanical models.

Describe

be able to describe the kinetics of chemical reactions in terms of molecular mechanisms and empirical rate laws.

Apply

be able to apply the laws of thermodynamics to physical and chemical processes.

Analyze

be able to analyze and interpret experimental data to draw conclusions about chemical processes from a wide range of disciplines, including chemistry, biology, engineering and geology.

Develop and Use

be able to develop and use models, both conceptual and mathematical, of physical and chemical phenomena and understand the limitations of these models.

Top

Biophysical Chemistry

Applications of physical chemistry to biological systems. Spectroscopic applications, computational methods, structural biochemistry, thermodynamics, equilibria, statistical mechanics, transport properties, kinetics, quantum mechanics.

CHEM 468

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 481 & MATH 113 & PHSCS 220; or CHEM 481M & MATH 113 & PHSCS 220
Note	For biochemistry (BS) majors and those interested in the health professions or biochemistry. (For prerequisites, Phscs 220 may be taken concurrently.)
Taught	Winter

Course Outcomes

Fundamental Concepts in Four Principal Areas

Describe conceptually the fundamental concepts in the four principal areas of physical chemistry: classical thermodynamics, statistical thermodynamics kinetics and quantum mechanics

Define and Manipulate Concepts Mathematically

Define mathematically the concepts outlined in 1) and manipulate the fundamental and derived equations associated with these concepts

Use Skills to Calculate or Predict Conditions

Use the above skills to calculate or predict the equilibrium conditions or direction of spontaneous biochemical processes that are involved in metabolism or energy transfer events given appropriate thermodynamic data and initial system conditions

Mathematical and Graphical Techniques

Employ mathematical and graphical techniques on enzyme kinetic data to extract key parameters and to identify inhibition mechanisms

Solve Schroedinger Equation Problems

Solve simple Schroedinger equation problems (e.g., particle in a box), identify boundary conditions, and explain the significance of boundary conditions on the observance of quantized effects

Predictions of Behavior

Relate the simple Hamiltonians from above to biological molecules and systems and generalize from the simple results to make predictions regarding behavior in the biological systems

Nature of Electronic Energy Levels

Identify the nature of electronic energy levels in key photoactive biological molecules and use spectroscopic data to probe these levels

Apply Concepts to Photosynthesis and Vision

Apply fundamental concepts of electronic structure and reaction kinetics to the steps in photosynthesis and vision

Physical Chemistry Perspectives Lead to Deeper Understanding

Provide examples in which physical chemistry perspectives have enabled a deeper more complete understanding of the structure and function of biological molecules and complex biological systems

Top

Biochemistry

First-semester biochemistry. Molecular components of cells, chemical structure and function, enzymes, metabolic transformations, photosynthesis.

CHEM 481

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 352 & PDBIO 120; or CHEM 352 & BIO 130
Note	For chemistry majors and students in biological sciences who contemplate pursuing advanced degrees, including medicine. (For prerequisite, Chem 352M may be used in place of Chem 352. Get a permission-to-add code from the course instructor.)
Taught	Fall, Winter, Spring

Course Outcomes

Mastery of Key Concepts

Demonstrate mastery of key concepts in the Biochemistry subdiscipline and articulate the relationships between chemistry and biology. This outcome is elaborated in outcomes 2-5 below

Explain How Structure Determines Biological Function

Explain how the structure of biomolecules such as proteins, nucleic acids, lipids, and carbohydrates determines their biological function

Enzymes Catalyze Reactions

Describe how enzymes catalyze reactions in terms of thermodynamics, kinetics, and mechanistic strategies

Energy from Metabolic Reaction

Understand how energy is generated from metabolic reaction pathways

Understanding Reactivity in Metabolic Pathways

Push arrows to predict and understand reactivity in metabolic pathways

Communicate in Writing

Communicate scientific ideas clearly to other specialists in writing

Research

Identify and understand primary research articles relevant to a specific biochemical question of current interest

Interpret and Critique Experimental Data

Interpret and critique experimental data relating to biochemical models

Top

Biochemistry--Majors

First-semester biochemistry. Molecular components of cells, chemical structure and function, enzymes, metabolic transformations, photosynthesis.

CHEM 481M

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 352M & PDBIO 120; or CHEM 352M & BIO 130
Note	For chemistry and biochemistry majors only. (For prerequisite, Chem 352 may be used in place of Chem 352M. Obtain a permission-to-add code from the class instructor.)
Taught	Fall

Course Outcomes

Mastery of Key Concepts

Demonstrate mastery of key concepts in the Biochemistry subdiscipline and articulate the relationships between chemistry and biology. This outcome is elaborated in outcomes 2-5 below

Explain How Structure Determines Biological Function

Explain how the structure of biomolecules such as proteins, nucleic acids, lipids, and carbohydrates determines their biological function

Enzymes Catalyze Reactions

Describe how enzymes catalyze reactions in terms of thermodynamics, kinetics, and mechanistic strategies

Energy from Metabolic Reaction

Understand how energy is generated from metabolic reaction pathways

Understanding Reactivity in Metabolic Pathways

Push arrows to predict and understand reactivity in metabolic pathways

Communicate in Writing

Communicate scientific ideas clearly to other specialists in writing

Understanding Reactivity in Metabolic Pathways

Push arrows to predict and understand reactivity in metabolic pathways

Research

Identify and understand primary research articles relevant to a specific biochemical question of

current interest

Interpret and Critique Experimental Data

Interpret and critique experimental data relating to biochemical models

Top

Mechanisms of Molecular Biology

Second-semester biochemistry. Nucleic acid biochemistry and molecular biology: nucleotide metabolism, chromosome and chromatin structure, DNA structure and replication, RNA transcription and gene expression, protein synthesis and regulation, eukaryotic gene systems, signal transduction.

CHEM 482

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 481M; or CHEM 481
Taught	Winter

Course Outcomes

Draw and Explain

Draw the structure of DNA, determine the topology of a plasmid, explain the chemical sequence of events that occur during DNA replication and draw structural changes that occur due to mutation.

Determine

Determine how to perform and interpret an electrophoresis separation of DNA fragments, southern blot, restriction map, polymerase chain reaction, and a DNA sequencing reaction with necessary controls.

Design

Design a DNA cloning strategy, explain controls necessary, and write procedural plan.

Mechanism

Draw and explain the mechanism of RNA transcription and how RNA is processed, spliced, and regulated. Understand the basic mechanisms of transcriptional regulation using the example of transcription of genes necessary for cholesterol synthesis.

Techniques

Determine when and how to use techniques that involve RNA: Northern blots, quantitative PCR, microarrays, S1 nuclease and primer extension mapping of the transcriptional start with appropriate controls.

Sequence

Determine the sequence of amino acids in a protein from a series of nucleotides.

Process

Draw and explain the process of protein translation and how it is regulated.

Interpret

Determine where a protein is localized in a tissue or cell: interpret a western blot, protein fusion assays.

Interacts

Determine with what a protein interacts: Interpret gel shift assays, Chromatin Immunoprecipitation, DNA footprinting, and yeast two hybrid reporter assays.

Maintain

Maintain faith through challenges and ethical boundaries in reporting and interpreting data.

Top

Structural Biochemistry

Molecular structures of proteins, RNA and DNA as determinants of biological function. Topics include thermodynamics of folding and binding, structural determination, spectroscopy, modeling, protein recognition.

CHEM 489

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 468
Taught	Fall

Course Outcomes

Motifs and Symmetries in Macromolecular Structures

Identify motifs and symmetries in macromolecular structures and chemical interactions that maintain structural integrity

Relate Structure to Biological Function

Relate the structure of a macromolecule to its biological function

Structural Information for Biological Macromolecules

Describe how X-ray crystallography, nuclear magnetic resonance, cryogenic electron microscopy, and circular dichroism techniques give structural information for biological macromolecules

Communicate Orally and In Writing

Communicate scientific ideas (e.g. structure-function relationships) clearly and concisely to others orally and in writing, and use ethical standards in oral and written presentations

Work With Peers

Work with peers to answer scientific questions

Senior Seminar

Research topics presented by faculty and visiting scientists. Completion of undergraduate portfolio.

CHEM 495

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	CHEM 594R
Note	Required of all seniors in all chemistry and biochemistry degree programs the last semester in residence.
Taught	Fall, Winter

Course Outcomes

Become Familiar With Current Research

Become familiar with a variety of current research areas by listening to numerous visiting researchers describe their recent research results.

Prepare for Seminar Presentations

Prepare for seminar presentations by reading literature articles written by visiting speakers before attending the presentation.

Write Summaries of Research Papers

Improve science-writing skills by writing summaries of research papers.

Notes in Presentations

Take notes in presentations attended to record thoughts and ideas for future reference.

Reflect on BYU Education

Reflect on your BYU education and evaluate how it helps you achieve your goals.

Top

Academic Internship: Chemistry and Biochemistry

Research experience in an industrial, academic, or government laboratory in collaboration with a BYU faculty colleague/supervisor.

CHEM 496R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent; Chem 201 or concurrent enrollment or special safety training.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Internship

The student will carry out a successfull internship connecting classroom principles to real-world applications.

Internship report

The students will provide a written report or oral presentation explaining the technical work performec in the internship and its connection to the chemistry curriculum.

Top

Mentored Learning in Analytical Chemistry

Undergraduate research experience.

CHEM 497R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent and Chem 201 or concurrent enrollment or special safety training.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

497R-Analyt

Under the guidance of a faculty mentor, students will carry out research that helps them progress toward the completion of an undergraduate degree in Chemistry or Biochemistry

Top

Mentored Learning in Biochemistry

Undergraduate research experience.

CHEM 497R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent and Chem 201 or concurrent enrollment or special safety training.
Taught	Fall Term 2, Winter Term 2, Spring, Summer

Course Outcomes

497R-biochem

Under the guidance of a faculty mentor, students will carry out research that helps them progress toward the completion of an undergraduate degree in Chemistry or Biochemistry

Top

Mentored Learning in Chemistry Education

Undergraduate research experience.

CHEM 497R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent and Chem 201 or concurrent enrollment or special safety training.
Taught	Fall Term 2, Winter Term 2, Spring, Summer

Course Outcomes

497R-chemEd

Under the guidance of a faculty mentor, students will carry out research that helps them progress toward the completion of an undergraduate degree in Chemistry or Biochemistry

Top

Mentored Learning in Inorganic Chemistry

Undergraduate research experience.

CHEM 497R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent and Chem 201 or concurrent enrollment or special safety training.
Taught	Fall Term 2, Winter Term 2, Summer

Course Outcomes

497R-inorg

Under the guidance of a faculty mentor, students will carry out research that helps them progress toward the completion of an undergraduate degree in Chemistry or Biochemistry

Top

Mentored Learning in Organic Chemistry

Undergraduate research experience.

CHEM 497R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent and Chem 201 or concurrent enrollment or special safety training.
Taught	Fall Term 2, Winter Term 2, Spring, Summer

Course Outcomes

497R-organic

Under the guidance of a faculty mentor, students will carry out research that helps them progress toward the completion of an undergraduate degree in Chemistry or Biochemistry

Top

Mentored Learning in Physical Chemistry

Undergraduate research experience.

CHEM 497R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab

Honors Thesis

CHEM 499R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent and Chem 201 or concurrent enrollment or special safety training.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Honors thesis

The students will carry out a research project and write an acceptable honors thesis.

Top

(Chem-C S-Geol-Math-MthEd-Phscs-Stat) Business Career Essentials in Science and Math

Introduction for science, math, and statistics majors to careers in industry. Project planning, oral and written business presentations, business accounting, and technology readiness.

CHEM 500

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Project Management

Learn the basics of project management and understand why this is important to business success

Business Skills

Demonstrate knowledge of business skills necessary to function as a scientist working in industry. Be able to explain how corporate politics can affect your career.

Effective Communication

Learn how to present concepts and ideas in a clear and effective manner in both oral and written form.

Business Finance

Learn how to read and understand a business financial accounting statement (both internal and external)

Business Projects and Finances

Learn to read and understand corporate accounting statements and data and understand the basic ideas of project and portfolio management.
Learn the steps to moving an idea from concept to completion in a business setting.

Technology Readiness

Understand the different levels of technology readiness and the process of moving a project through these levels to completion

Business Presentations and Writing

Learn the basics of effective business presentations and writing

Inorganic Chemistry

In-depth treatment of theoretical concepts in inorganic chemistry and solid state, organmetallic, and bioinorganic chemistry.

CHEM 514

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 462; or CHEM 468
Taught	Fall

Course Outcomes

Describe Atoms and Molecules

Students will be able to describe atoms and molecules.

Describe Physical and Electronic Properties of Inorganic Com

Students will be able to describe the physical and electronic properties of inorganic compounds such as metals, ionic solids, coordination compounds and nanomaterials.

Assign Point Groups and Deduce Symmetries

Students will be able to assign point groups and deduce the symmetries of atomic orbitals, molecular orbitals, and molecular vibrations.

Draw and Name Coordination Compounds

Students will be able to draw and name coordination compounds.

Identify Compounds, Reactions, and Mechanisms

Students will be able to identify stable organometallic compounds, common organometallic reactions, and catalytic mechanisms.

Describe Metalloproteins

Students will be able to describe several metalloproteins.

Write and Orally Present Element Report

Students will be able to write and orally present a report on an element or family of elements.

Advanced Inorganic Laboratory

Synthesis, characterization, and properties of materials; coordination and organometallic compounds.

CHEM 518

Hours	2.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	CHEM 514; Chem 201 or 601 or concurrent enrollment.
Taught	Winter

Course Outcomes

Safely Handle Lab Equipment

Students will be able to safely and with proficiency handle solvents, chemicals, glassware, and instruments.

Use Solid-State Techniques to Synthesize Compounds

Students will be able to use solid-state techniques to synthesize compounds and characterize the compounds they synthesize.

Synthesize, Isolate, Characterize and Explain Properties

Students will be able to synthesize, isolate, characterize and explain the properties of main group, coordination, organometallic, and bioinorganic compounds.

Write Scientific Lab Reports

Students will be able to write scientific lab reports.

Complete Lab Experiments Independently and in Small Grops

Students will be able to work independently and in small groups to complete laboratory experiments.

Instrumental Analysis Lecture

Modern instrumental methods and basic principles of instrumentation.

CHEM 521

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	CHEM 462 & PHSCS 220; or CHEM 467 & PHSCS 220; or CHEM 468 & PHSCS 220
Taught	Fall

Course Outcomes

Role of Main Components

Students will, with the aid of user manuals, be able to effectively operate optical spectrometers, mass spectrometers, and chromatographs based on a fundamental understanding of the components that make up those instruments.

Method Development

Students will be able to develop an effective method for the analysis of a sample, with appropriate consideration of sample type, instrument selection based on well-defined figures of merit, validation with appropriate standards, quality control, and statistical analysis in reporting of uncertainties.

Interpretation of Results

Students will gain textbook experience in the interpretation of optical, chromatographic, and mass spectrometric measurement in anticipation of hands-on experience with the techniques in Chemistry 523.

Electronic Measurement Principles

Students will understand the concepts of input impedance, output impedance, impedance matching, and A/D conversion, and will be able to apply that understanding to the proper connection of a signal source with an electronic measuring device.

Signals and Noise

Students will understand the origins of noise in analytical measurements and will be able to apply that understaning in a variety of signal processing techniques that optimize signal-to-noise ratios and improve analytical performance of instrumental methods.

Top

Instrumental Analysis Laboratory

Continuation of Chem 521. Laboratory experience with modern analytical instrumentation.

CHEM 523

Hours	2.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	CHEM 521; Chem 201 or 601 or concurrent enrollment.
Taught	Winter

Course Outcomes

Accurate Chemical Analyses

Make accurate chemical analyses using a variety of instrumental techniques.

Communicate Clearly in Writing

Describe their findings clearly and concisely in writing, including interpretation of results and statistical analysis.

Organize Data in Graph and Tabular Formats

Present data in graph and/or tabular formats effectively.

Apply Instrumental Analysis to Their Own Design

Apply what they have learned about instrumental analysis to carry out a new procedure of their own design.

Explain Observations

Explain observations made during the course of an experiment.

Variables Affect on Outcome

Discuss how experimental variables affect the outcome of a measurement.

Identify Appropriate Instrumental Methods

Identify appropriate instrumental methods for given chemical analysis problems, taking into account such factors as sample type, interferences, sensitivity, and selectivity.

Identify and Resolve Problems

Identify and resolve problems when they arise in analyses.

Advanced Organic Chemistry

Physical aspects of organic chemistry; mechanisms, reaction intermediates, bonding, stereochemical and stereoelectronic effects, molecular orbital theory, Lewis acidity and basicity.

CHEM 552

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 352M; or CHEM 352; Chem 462 and 463 (or Chem 468).
Taught	Fall

Course Outcomes

Outcome 1

Predict relative energies and locations of frontier molecular orbitals for organic molecules of intermediate complexity using linear combinations of atomic orbitals and hybridized orbital approaches.

Outcome 2

Perform calculations using *ab initio*, semi-empirical, density functional, and molecular mechanics approaches to predict energies and structures of ground and transition states.

Outcome 3

Use reaction kinetics, linear free energy relationships, isotope labeling, stereo-electronic effects and stereochemical outcomes to determine reaction mechanisms.

Outcome 4

Predict reaction mechanisms of major classes of organic reactions, including substitutions, eliminations, additions and radical reactions.

Outcome 5

Recognize the impact of non-covalent interactions in complex systems and reaction mechanisms.

Top

Advanced Organic Chemistry

Synthetic aspects of organic chemistry; oxidations, reductions, concerted reactions, stereoselectivity, synthetic equivalents, protecting groups. Examples of natural product total synthesis.

CHEM 553

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 352; or CHEM 352M
Taught	Winter

Course Outcomes

Outcome 1

Formulate a retrosynthetic analysis and propose a total synthesis route for a previously un-synthesized complex natural product.

Outcome 2

Apply protecting group strategies in feasible routes to complex natural products and/or other organic molecules of biological or theoretical interest.

Outcome 3

Recognize and be able to apply standard methods for carbon-carbon bond forming reactions including: alkylation of nucleophilic carbon; reactions of carbanions with carbonyl groups; reactions involving transition metals; reactions of compounds of boron, silicon, and tin; and cycloadditions.

Outcome 4

Recognize and be able to apply standard methods for carrying out the following types of synthetic transformations: reductions of carbonyls and other functional groups, oxidations, electrophilic additions, aromatic substitution reactions.

Outcome 5

Predict reaction mechanisms for the reaction types listed in outcomes 3 and 4.

Organic Spectroscopic Identification

Theory and practice of spectrometric methods of identifying organic compounds, including infrared, ultraviolet nuclear magnetic resonance, and mass spectrometries.

CHEM 555

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Students who have completed Chem 455 are not eligible to enroll in Chem 555.
Taught	Fall

Course Outcomes

Outcome 1

Students will develop problem-solving skills by identifying the molecular structure of organic compounds using multiple spectrometric techniques including IR, UV, MS, and NMR (both 1D and 2D spectra).

Outcome 2

Students will receive training on the open-access research instruments used for spectrometric analysis. This includes the IR, UV, MS, NMR spectrometers and the polarimeter, with an emphasis on 1D and 2D NMR methods.

Outcome 3

Students will complete an unknown identification project that gives them practice preparing their own samples, operating the instruments to acquire their own spectra and interpreting this data to identify their unknowns.

Top

Chemical Thermodynamics

Development of the principles of chemical thermodynamics, including laws, pure materials, mixtures, equilibria, and elementary statistical mechanics.

CHEM 561

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 462 & CHEM 463
Taught	Fall Contact Department

Course Outcomes

Chem 561 - Thermodynamics

Students will demonstrate knowledge in chemical thermodynamics.

Reaction Kinetics

Theoretical aspects of chemical kinetics in the gas phase and in solution. Rates and mechanisms in solution, rapid reactions, and other topics.

CHEM 563

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 462 & CHEM 463
Taught	Winter even years

Course Outcomes

Outcome 1

Solve simple and complex (coupled or sequential) kinetic expressions to obtain rate constants, reaction lifetimes, and activation energies, for gas, liquid, surface, and catalyzed reactions.

Outcome 2

Use statistical reaction theories, including transition state theory and RRKM, to both predict and interpret chemical reaction rates.

Outcome 3

Interpret the results of experiments that measure dynamic processes, such as cross-molecular beam experiments.

Outcome 4

Use the concepts of detailed balance and microscopic reversibility to connect the results of experiments that measure dynamic processes to experiments that obtain kinetic results.

Outcome 5

Calculate the potential energy surface (PES) for a simple chemical reaction, explain the relationship between the PES and the outcomes of a chemical reaction including how different types of energy influence the reaction given the PES.

Top

Introduction to Quantum Chemistry

Introduction to physical and mathematical aspects of quantum theory, emphasizing application of the Schrodinger wave equation to chemical systems.

CHEM 565

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 462 & CHEM 463
Taught	Fall

Course Outcomes

Outcome 1

Write and solve the Schrödinger equation in 1, 2 or 3 dimensions for 1, 2, or *N* particles for typical model problems and describe the meaning and significance of the solutions.

Outcome 2

Interpret the wavefunctions in #1 by calculating probability in a region, expectation values and matrix elements of Hermitian operators corresponding to physical observables.

Outcome 3

Use as necessary to solve problems: commutators of operators, basis set expansions, perturbation theory (degenerate and nondegenerate) and the variational principle.

Outcome 4

Describe how the Hartree-Fock SCF method works and use Slater determinants of spin and spatial eigenfunctions to build anti-symmetric atomic wavefunctions

Top

Statistical Mechanics

Introduction to classical and quantum statistical mechanics, including Boltzmann, Fermi-Dirac, and Bose-Einstein statistics. Applications of statistical thermodynamics to gases, liquids, and solids.

CHEM 567

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 462 & CHEM 463
Recommended	Chem 565.
Taught	Winter Contact Department

Course Outcomes

Outcome 1

Use probability density functions to describe a system, and recognize simple probability functions and their properties including Gaussian (normal), binomial (or multinomial), and Poisson distributions.

Outcome 2

Use combinatorics to define probabilities in simple systems.

Outcome 3

Describe how to choose a Gibbsian ensemble for calculation of system properties. Be able to recognize when the following ensembles are appropriate: microcanonical (*N,V,E*), canonical (*N,V,T*), grand canonical (*V,T,m*), isobaric-isothermal (*N,T,P*). Know how to construct the partition function in each case.

Outcome 4

Calculate average system quantities and thermodynamic variables using the appropriate partition function.

Outcome 5

Calculate the size of fluctuations of system properties and relate them to the number of particles in a system.

Outcome 6

Use proper statistics for classical particles and for quantum particles (bosons or fermions).

Outcome 7

Calculate canonical partition functions for translation, rotation, and harmonic vibration. Use them for applications and know when they don't apply.

Outcome 8

Explain the meaning, significance and range of applicability of these fundamentals: ergodic hypothesis, equipartition theorem, and Bose-Einstein condensation.

Outcome 9

Use statistical mechanical principles to describe chemical equilibrium constants.

Outcome 10

Apply statistical mechanical principles to simple crystals, blackbody radiation and imperfect gases.

Outcome 11

Use the Metropolis Monte Carlo method to calculate statistical averages for a system. Know how to choose an efficient sampling method.

Outcome 12

Show how to use molecular dynamics to calculate statistical averages for a molecular system. Know when molecular dynamics is more appropriate than Monte Carlo methods. Know the advantages and disadvantages of common trajectory propagation algorithms.

Outcome 13

Obtain the radial distribution from the probability function for a system, from Monte Carlo calculations or molecular dynamics trajectories and evaluate system properties from the radial distribution function.

Outcome 14

Use Monte Carlo and transfer matrix methods to study a system of interacting spins as a model of phase transitions.

Top

Fundamentals of Spectroscopy

Atomic and molecular spectroscopy and application of group theoretical concepts. Types of experiments and interpretation of data.

CHEM 569

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 462; or CHEM 468
Taught	Winter even years

Course Outcomes

Outcome 1

Explain the electric and magnetic properties of radiation, molecules and bulk matter and solve problems related to these properties.

Outcome 2

Solve time-dependent quantum mechanical problems and apply these solutions to spectroscopy where light is the time-dependent perturbation.

Outcome 3

Explain angular momentum as possessed by atomic or molecular systems, various descriptions of how angular momentum can be coupled, and how conservation of angular momentum is important to spectroscopy.

Outcome 4

Apply solutions of the Schrödinger equation for simple systems (particle in a box, rigid rotor, harmonic oscillator, etc) to real systems (vibrational, rotational, and electronic energy states) for use in determining the energy of stationary states.

Outcome 5

Explain the origin of selection rules and derive electric and magnetic dipole, quadrupole, etc. selection rules for simple model quantum systems.

Outcome 6

Use symmetry arguments, including group theory and parity, to simplify the interpretation and explanation of atomic and molecular spectra.

Outcome 7

Use solutions to the model systems and the selection rules the predict spectra for atomic and

molecular systems.

Outcome 8

Fit experimentally obtained spectra to the mathematical models to obtain physical constants.

Advanced Biochemical Methodology 1

Analytical and structural determination methods used in biochemical research, including mass spectrometry-based proteomics, immunotechniques, atomic force and electron microscopy, NMR and X-ray diffraction.

CHEM 581

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 482
Note	One of two required courses for biochemistry graduate students. May be taken before or after Chem 583.
Taught	Fall

Course Outcomes

Understand the theory, instrumentation and applications of proteomic, immunological and structural methods currently used to address important biochemical questions.

Interpret and critique data from these techniques.

Design appropriate experiments and apply these techniques to their own research problems.

Recognize important technological advances in proteomic, immunological and structural methods.

Present findings from the primary literature describing the application of these methods to significant biochemical questions in a professional manner.

Advanced Biochemical Methodology 2

Maintenance and expression of genetic information, the role of nucleic acids in biology at the chemical and structural level, and methods to study and control nucleic acid function as a means of solving biological problems.

CHEM 583

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHEM 482
Note	One of two required courses for biochemistry graduate students. May be taken before or after Chem 581.
Taught	Winter

Course Outcomes

Describe how genetic information is stably maintained, how it is expressed, and how that expression is regulated, with an emphasis on the mechanism by which molecular machines perform these processes.

Understand methods for studying the structure and function of nucleic acids and methods for manipulating gene expression in living systems.

Interpret and critique data obtained using these methods as reported in the primary scientific literature.

Communicate this understanding in both oral and written formats. [

Design appropriate experiments and apply the techniques of nucleic acid biochemistry to their own research problems.

Top

Biochemistry Laboratory/Proteins

Introduction to current biochemical research procedures including spectrophotometry, chromatography, electrophoresis, and immunological techniques. Protein over-expression; isolation and characterization methods. Enzyme kinetics and protein-ligand interactions. Introduction to bioinformatics.

CHEM 584

Hours	3.0 Credit, 1.0 Lecture, 6.0 Lab
Prerequisites	CHEM 481M; or CHEM 481
Note	May be taken before or after Chem 586.
Taught	Fall, Winter

Course Outcomes

Analyze Proteins

Apply spectroscopic techniques to analyze proteins, both their enzymatic and binding reactions.

Determine Presence and Purity of Proteins

Use gel electrophoresis and immunoblotting techniques to determine the presence and purity of proteins in biological samples.

Identify Protein Binding Partners

Identify protein binding partners using co-immunoprecipitation methods.

Purify Proteins

Purify proteins using state-of-the-art separations methods.

Characterize Enzymes

Characterize an enzyme using steady state kinetics methods.

Enzymes as Tools

Use enzymes as analytical and diagnostic tools.

Interpret Data

Properly record and interpret data.

Communicate Orally and in Writing

Present data they have collected in an oral presentation and in a written scientific paper.

Ethics

Understand ethical means of reporting results and giving proper credit to the work of others.

Outcome

Measure ligand binding to proteins; determine dissociation constants and the degree of cooperativity.

Top

Biochemistry Laboratory/Nucleic Acids

Laboratory course covering major techniques involved in isolation, amplification, and cloning of recombinant DNA as well as isolation, synthesis, translation, and identification of RNA.

CHEM 586

Hours	3.0 Credit, 1.0 Lecture, 6.0 Lab
Prerequisites	CHEM 482
Note	May be taken before or after Chem 584.
Taught	Fall, Winter

Course Outcomes

Design and Execute Experiments

Understand, design and execute experiments using basic DNA manipulation procedures that include isolation, purification and modification of DNA.

PCR Amplification

Explain and perform PCR amplification and use this technique to detect the presence of DNA "targets", DNA cloning (subcloning) and DNA sequencing.

RNA techniques

Understand and explain how to isolate, quantitate and manipulate RNA.

Reverse Transcribe RNA into cDNA

Design and perform experiments to reverse transcribe RNA into complementary DNA (cDNA) and assess gene expression by semi- and quantitative PCR.

Isolate total RNA and be able to purify mRNA

Isolate total RNA and be able to purify mRNA from this material.

DNA in Mammalian Cells

Introduce and express foreign DNA and/or RNA in mammalian cells using the techniques of electroporation, lipid-based transfection, calcium phosphate based transfection and retroviral transduction.

"Knockdown" Expressed Gene

"Knockdown" an expressed gene in mammalian cells using RNA silencing.

Prepare Laboratory Notebooks

Prepare laboratory notebooks that include the objective, results and methods of each laboratory experiment. Additionally, students will provide conclusions to each experiment, including when appropriate, potential explanations to unexpected results.

General Seminar

Research topics presented by faculty and visiting scientists.

CHEM 594R

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Required one semester in residence of all senior BS majors in chemistry and biochemistry.
Taught	Fall, Winter

Course Outcomes

Current Research

Become familiar with a variety of current research areas by listening to numerous visiting researchers describe their recent research results.

Prepare for Seminar Presentations

Prepare for seminar presentations by reading literature articles written by visiting speakers before attending the presentation.

Science-Writing Skills

Improve science-writing skills by writing summaries of research papers.

Note Taking Skills

Take notes in presentations attended to record thoughts and ideas for future reference.

Top

Atmospheric Chemistry

CHEM 596R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

596R - Atmospheric Chem

Students will demonstrate knowledge in atmospheric chemistry.

Top

Special Topics in Chemistry

CHEM 596R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Special topics in Chemistry - 500 level

Students will demonstrate an advanced level of knowledge in a chosen specialty area.

Beginning Mandarin

Basic grammar, vocabulary building, speaking.

CHIN 101

Hours	4.0 Credit, 5.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Effective Writing

Write short paragraphs, notes and similar texts at the ACTFL novice low level. (See Chinese major learning outcome 2)

Practices and Conventions

Demonstrate a basic understanding of a variety of Chinese cultural practices and communicative conventions. (See Chinese major learning outcome 3)

Speaking and Understanding

Speak and understand Mandarin Chinese at the ACTFL novice mid level. (See Chinese major learning outcome 1)

Effective Listening

Listen to conversations, dialogs, and live interaction at the ACTFL novice mid level. (See Chinese major learning outcome 1)

Beginning Mandarin

Continuation of Chin 101.

CHIN 102

Hours	4.0 Credit, 5.0 Lecture, 2.0 Lab
Prerequisites	Chin 101 or equivalent.
Taught	Fall, Winter, Summer

Course Outcomes

Effective Listening

Listen to conversations, dialogs, and live interaction at the ACTFL novice high level. (See Chinese major learning outcome 1).

Speaking and Understanding

Speak and understand Mandarin Chinese at the ACTFL novice high level. (See Chinese major learning outcome 1).

Effective Writing

Write short paragraphs, notes, and similar texts at the ACTFL novice mid level. (See Chinese major learning outcome 2).

Practices and Conventions

Demonstrate a basic understanding of a variety of Chinese cultural practices and communicative conventions. (See Chinese major learning outcome 3)

Top

Beginning Chinese Reading

Chinese writing system, reading, and basic composition using Chinese characters.

CHIN 112

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Equivalent of one year spoken Mandarin skills.
Taught	Fall, Winter, Summer

Course Outcomes

Effective Writing

Write short paragraphs, journal entries, notes, and similar texts at the ACTFL novice mid level. (See Chinese major learning outcome 2)

Speaking and Understanding

Speak and understand Mandarin Chinese at the ACTFL intermediate low level. (See Chinese major learning outcome 1)

Etymology

Understand the structure and composition of Chinese characters and beginning level etymology. (See Chinese major learning outcome 2)

Top

Chinese Calligraphy

Training in the art of writing Chinese characters with a brush.

CHIN 200R

Hours	2.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	Chin 101 or equivalent.
Taught	Fall, Winter

Course Outcomes

Write basic Chinese characters using calligraphy

Write basic Chinese characters using one or more of the writing styles of Chinese calligraphy (see Chinese major expected learning outcome 3).

Explain the importance of Chinese calligraphy

Explain the importance of Chinese calligraphy in Chinese culture and civilization (see Chinese major expected learning outcome 3).

Top

Intermediate Mandarin

Advanced grammar, the writing system, reading and writing, speaking.

CHIN 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	Chin 102.
Taught	Fall, Winter, Spring

Course Outcomes

Speaking and Understanding

Speak and understand Mandarin Chinese at the ACTFL intermediate low level. (See Chinese major learning outcome 1)

Listening Comprehension

Understand conversations and dialogs at the ACTFL intermediate low level. (See Chinese major learning outcome 1)

Effective Writing

Write short essays, journal entries, and notes at the ACTFL novice mid level. (See Chinese major learning outcome 2)

Cultural Practices

Demonstrate an introductory level understanding of Chinese cultural practices. (See Chinese major learning outcome 3)

Intermediate Mandarin

Advanced grammar, the writing system, reading and writing, speaking.

CHIN 202

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	Chin 201.
Taught	Fall, Winter, Summer

Course Outcomes

Speaking and Understanding

Speak and understand Mandarin Chinese at the ACTFL intermediate mid level. (See Chinese major learning outcome 1)

Listening Comprehension

Understand conversations and dialogs at the ACTFL intermediate mid level. (See Chinese major learning outcome 1)

Effective Writing

Write short essays, journal entries, and notes at the ACTFL novice high level. (See Chinese major learning outcome 2)

Social Practices and Behavior

Demonstrate a fundamental understanding of Chinese social practices as well as linguistically and culturally appropriate behavior. (See Chinese major learning outcome 3)

Top

Intermediate Conversation

Emphasis on fluency and vocabulary building.

CHIN 211R

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	CHIN 102
Taught	Fall, Winter

Course Outcomes

Speaking and Understanding

Speak Mandarin Chinese at the ACTFL intermediate low level. (See Chinese major learning outcome 1)

Listening Comprehension

Understand conversations and dialogs at the ACTFL intermediate low level. (See Chinese major learning outcome 1)

Practices and Interactions

Demonstrate an introductory level understanding of Chinese cultural practices and appropriate social interactions. (See Chinese major learning outcome 3)

Third-Year Mandarin

Discourse grammar, advanced reading.

CHIN 301

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	Chin 202.
Taught	Fall, Winter

Course Outcomes

Comprehending Non-Technical Spoken Mandarin

Comprehend non-technical spoken Mandarin in controlled contexts at the ACTFL advanced-low level. (See Chinese major learning outcome 1)

Speaking Mandarin Chinese

Speak Mandarin Chinese at the ACTFL intermediate high level, demonstrating the ability to defend a point of view, narrate events, and give a basic presentation. (See Chinese major learning outcome 1)

Reading Informal and Easy Formal Texts

Read a variety of informal and easy formal texts at the ACTFL intermediate high level, demonstrating the ability to summarize, skim, scan texts and guess unknown words from context. (See Chinese major learning outcome 2)

Writing Notes, Correspondence, and Short Essays

Write notes, correspondence, and short essays at the ACTFL intermediate low level. (See Chinese major expected learning outcome 2)

Understanding Chinese Culture and Society

Demonstrate an understanding of Chinese cultural features as well as contemporary Chinese society. (See Chinese major expected learning outcome 3)

Third-Year Mandarin

Advanced-level Mandarin skills, especially media discourse and reading.

CHIN 302

Hours	4.0 Credit, 5.0 Lecture, 0.0 Lab
Prerequisites	Chin 301.
Taught	Fall, Winter

Course Outcomes

Listening Comprehension

Understand the main points of spoken Chinese on television and radio news broadcasts at the ACTFL advanced mid level. (See Chinese major learning outcome 1)

Reading Journalistic Texts

Read journalistic texts at the ACTFL advanced mid level, demonstrating the ability to both skim and scan texts as well as read for details. (See Chinese major learning outcome 2)

Summarizing, Writing, and Translating

Summarize news stories, express personal insights, and write and translate descriptive reports in formal written Chinese at the ACTFL intermediate mid level and in spoken Chinese at the advanced low level. (See Chinese major learning outcome 2)

Understanding Discourse

Understand the structure of Chinese media discourse, including grammar and stylistics, within the Chinese cultural context. (See Chinese major learning outcome 3)

Top

Advanced Conversation

Emphasis on sophisication of speech.

CHIN 311R

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Chin 202 or equivalent.
Taught	Fall, Winter

Course Outcomes

Listening Comprehension

Understand conversations and dialogs at the ACTFL advanced mid level. (See Chinese major learning outcome 1)

Speaking Chinese

Speak Chinese at the ACTFL advanced low level (See Chinese major learning outcome 1)

Practices and Interactions

Demonstrate an intermediate level understanding of Chinese cultural practices and appropriate social interactions. (See Chinese major learning outcome 3)

Selected Readings of Modern Chinese

Complements overall language competency through reading modern texts selected from a wide range of styles and genres.

CHIN 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHIN 302
Taught	Fall, Spring

Course Outcomes

Discussing Chinese Literary Genres

Discuss Chinese literary genres, works, and authors in their social, historical, and religious contexts, demonstrating the ability to argue and support supporting and opposing points of view in both formal written Chinese at the ACTFL intermediate mid level and in spoken Chinese at the ACTFL advanced mid level. (See Chinese major learning outcomes 1 and 3)

Reading and Comprehending Selected Texts

Read and comprehend selected texts in modern literary Chinese at the ACTFL advanced mid level, demonstrating a knowledge of key grammatical patterns. (See Chinese major learning outcome 2)

Chinese Culture

Analyze and discuss Chinese culture and how it influences Chinese language and literature. (See Chinese major learning outcome 3)

Top

Selected Readings of Modern Chinese

Complements overall language competency through reading modern texts selected from a wide range of styles and genres.

CHIN 322

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHIN 302
Taught	Winter, Summer

Course Outcomes

Writing Conventions

Write notes, routine social correspondence, and short essays at the ACTFL intermediate high level while demonstrating an awareness of formal Chinese writing conventions. (See Chinese major learning outcome 2)

Reading Skills

Read a variety of formal and informal genres of writing at the ACTFL advanced-mid level. (See Chinese major learning outcome 2)

Research Paper

Write essays and research papers in Chinese at the ACTFL intermediate mid level, demonstrating the ability to express personal experiences and opinions as well as well-documented and well-argued research. (See Chinese major learning outcome 2)

Formal Letters

Write formal letters related to school and employment at the ACTFL intermediate-mid level. (See Chinese major learning outcome 2)

Narratives and Descriptions

Write narratives and descriptions at the ACTFL intermediate-mid level while demonstrating an awareness of formal Chinese writing conventions. (See Chinese major learning outcome 2)

Top

Structure of Chinese

Sound, syntax, meaning, and word structure of Mandarin Chinese and its implications to problems of learning Chinese.

CHIN 325

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHIN 202
Taught	Fall

Course Outcomes

In depth Knowledge of Chinese

Demonstrate an in depth knowledge of the structure of Modern Standard Chinese, including its sound system, syntax, discourse structure, and morphology (see Chinese major expected learning outcome 3).

Relate Language to Social Context

Relate the language to its social context (see Chinese major expected learning outcome 3).

Analyze Language Errors

Analyze learner errors in order to resolve problems in ones own spoken and written Mandarin (see Chinese major expected learning outcomes 1 and 2).

Research, Writing and Presentation Skills

Research, write, and present short reports on aspects of the Chinese language.

Introduction to Chinese Linguistics

Dialectology, phonology, syntax, semantics, discourse, morphology, and sociolinguistics.

CHIN 326

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHIN 202
Taught	Winter

Course Outcomes

Culturally Contextualize Chinese Language

Put the Chinese language into its broader historical and geographic context (see Chinese major expected learning outcome 3).

Structure of Modern Chinese

Demonstrate an understanding of the major components of structure of Modern Chinese (see Chinese major expected learning outcomes 1-3).

Understand Chinese Language Variation

Show an understanding of variation in the Chinese language and its implications in high level communication contexts

Knowledge of Chinese Dialects

Demonstrate a general knowledge of the dialects of Chinese and how they relate to one another (see Chinese major expected learning outcome 3).

Research, Writing and Presentation Skills

Research, write, and present short reports on aspects of the Chinese language.

Chinese Translation and Interpretation

Translation techniques, with practice in oral and written translation either from Chinese to English or from English to Chinese.

CHIN 327

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHIN 301
Taught	

Course Outcomes

Put Chinese language in context

Put the Chinese language into its broader historical and geographic context (see Chinese major expected learning outcome 3).

Use translation terminology

Utilize basic vocabulary of translation theory.

Explain translation practice

Explain the development of translation practice in China (see Chinese major expected learning outcome 3).

Top

Chinese Film in Translation

Survey course covering the silent era to the present, including selections from Republican China, the People's Republic of China, Taiwan, and Hong Kong.

CHIN 342

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Knowledge

Students will deepen their understanding of Chinese film in translation.

Top

Chinese Literature in Translation--Poetry

All readings in English; topics vary.

CHIN 343

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Outline Facts of Chinese Poetry

Outline the basic facts of early Chinese poetry: authors, genres, titles (see Chinese major expected learning outcome 3).

Analyze and Appreciate Chinese Literature

Utilize the basic approaches to analyzing and appreciating literature (see Chinese major expected learning outcome 3).

Write Clear and Convincing Prose

Write clear, convincing prose, and understand the basics of proper formatting and documentation for scholarly prose.

Chinese Literature in Translation--Prose

All readings in English; topics vary.

CHIN 344

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Literary Terminology and Frameworks

Acquire and apply knowledge of literary terminology and frameworks for literary analysis (see Chinese major expected learning outcome 3).

Chinese Literature and its Ties to Culture

Analyze and discuss classical and modern Chinese narrative literature and its relations to Chinese cultural traditions (see Chinese major expected learning outcome 3).

Write Coherently and Cohesively

Write coherently and cohesively in English.

Top

Chinese Culture

Selected topics in traditional, modern, and contemporary Chinese culture.

CHIN 345R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Demonstrate cultural literacy

Demonstrate cultural literacy of the foundations of Chinese civilization: geography, history, philosophy, thought, political systems and social structures (see Chinese major expected learning outcome 3).

Explain how cultural factors shape allied disciplines

Explain how cultural factors and institutions have shaped and continue to shape allied disciplines in Chinese studies including language, literature, linguistics, and the visual arts (see Chinese major expected learning outcome 3).

Write coherently in English

Write coherently and cohesively in English.

Top

Introduction to Chinese Philosophy

Introduction to native Chinese philosophies of Confucianism and Taoism. Readings in translation of Lun-yu, Meng-tsu, Lao-tzu, and Chuang-tzu. Themes include self, society, and cosmos.

CHIN 346

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Summarize facts, figures, and dates

Summarize the important facts, figures, and dates relevant to early Chinese philosophy (see Chinese major expected learning outcome 3).

Outline major schools of Chinese philosophy

Explain the broad outlines of the major schools of Confucianism, Mohism, Daoism, and Legalism, and understand their roles in the development of Chinese society and thought (see Chinese major expected learning outcome 3).

Formulate philosophical questions

Formulate philosophical questions.

Write clear prose

Write clear, convincing prose, and understand the basics of proper formatting and documentation for scholarly prose.

Top

Business Chinese

Introduction to terminology and format of business communication in Chinese, emphasizing both reading and writing of various forms of business communication.

CHIN 347

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Chin 301 or instructor's consent.
Taught	Winter

Course Outcomes

Communicate effectively

Communicate orally in Modern Standard Chinese at the intermediate high level on business-related topics (see Chinese major expected learning outcome 1).

Write business texts

Write notes, correspondence, and other short business texts at the ACTFL intermediate low level. (see Chinese major expected learning outcome 2).

Apply linguistic and cultural knowledge

Apply knowledge of Chinese language and culture to real life business and daily life situations in a linguistically, socially, and culturally appropriate ways (see Chinese major expected learning outcome 3).

Chinese Language Teaching Procedures

Acquiring knowledge and skills specific to teaching Chinese as a foreign language. Conducted in Chinese and English.

CHIN 377

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Chin 301 or instructor's consent.
Taught	Fall

Course Outcomes

Teaching

Students will prepare lesson plans and implement their plans in teaching demonstrations (see Chinese major expected learning outcome 3).

Evaluate and develop language teaching materials

Learn to critically evaluate existing language materials and teaching methods, develop an understanding of curriculum design and materials development, and develop effective teaching materials (see Chinese major expected learning outcome 3).

Demonstrate knowledge of teaching four language skills

Demonstrate an understanding of the basic principles and methods of teaching the four language skills: listening, speaking, reading, and writing, within a cultural context (see Chinese major expected learning outcomes 1-3).

Apply basic theories and methods of instruction

Apply a knowledge of basic theories and methodologies for teaching a foreign language including being able to use a performance-based approach for teaching Chinese (see Chinese major expected learning outcome 3).

Top

Academic Internship

On-the-job cultural and/or language experience.

CHIN 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	CHIN 202
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Increase Chinese language proficiency

Increase proficiency in Chinese speaking, listening, reading, and/or writing through participating in an internship (see Chinese major expected learning outcomes 1 and 2).

Apply Cultural Knowledge

Apply knowledge of Chinese culture in a professional work setting (see Chinese major expected learning outcome 3).

Top

Classical and Literary Chinese

Introduction to syntax and stylistic patterns.

CHIN 441

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Chin 301 or equivalent.
Taught	Fall

Course Outcomes

Explain Grammatical Usage

Explain the use of the common grammatical particles and patterns essential in mastering the intricacies and subtleties of "classical" Chinese prose (see Chinese major expected learning outcome 3).

Classical Chinese Vocabulary

Discuss and apply the meanings and usages of the standard vocabulary of classical Chinese (see Chinese major expected learning outcome 3).

Early Chinese Thought

Summarize the thought of each important early thinker (see Chinese major expected learning outcome 3).

Classical and Literary Chinese

Introduction to syntax and stylistic patterns.

CHIN 442

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHIN 441
Taught	Winter

Course Outcomes

Read Documentary Chinese Prose

Read, analyze, and discuss documentary Chinese prose (see Chinese major expected learning outcome 3).

Compare Literary Styles and Discuss Chinese Culture

Compare and contrast the literary craftsmanship exhibited by the writers of documentary Chinese and discuss traditional Chinese history, literature, and religion (see Chinese major expected learning outcome 3).

Continue Learning Classical Chinese Grammar

Explain the use of the basic grammatical particles introduced in Chin 441, learn some more advanced ones, and practice using them in new contexts (see Chinese major expected learning outcome 3).

Modern Chinese Literature

Authors, themes, and writing styles of the period 1915--1949. Texts in Chinese.

CHIN 443

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Chin 321 or 322.
Taught	

Course Outcomes

Read Modern Chinese Literature

Read, analyze, and discuss Chinese literary texts from the modern (1900-1949) period in Chinese (see Chinese major expected learning outcomes 2 and 3).

Discuss Chinese Literature in Chinese

Discuss modern Chinese literary texts in Chinese with fluency and increasing sophistication, demonstrating facility for expressing subjective judgments on literature and other abstract topics in Chinese (see Chinese major expected learning outcomes 1-3).

Analyze Modern Chinese Literature in its Cultural Context

Analyze and discuss modern Chinese literary genres, works and authors in their social, historical, and religious contexts (see Chinese major expected learning outcome 3).

Top

Contemporary Chinese Literature

Contemporary literature of Taiwan and the PRC. Texts in Chinese.

CHIN 444

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Chin 321 or 322.
Taught	Winter

Course Outcomes

Read Contemporary Chinese Literature

Read, analyze, and write about Chinese literary texts from the contemporary (1949-present) period in Chinese (see Chinese major expected learning outcomes 2 and 3).

Discuss Contemporary Chinese Literature

Discuss contemporary Chinese literary texts in Chinese with fluency and increasing sophistication, demonstrating facility for expressing subjective judgments on literature and other abstract topics in Chinese (see Chinese major expected learning outcomes 1 and 3).

Analyze Cultural Context of Contemporary Literature

Analyze and discuss contemporary Chinese literary genres, works and authors in their social, historical, and religious contexts (see Chinese major expected learning outcome 3).

Top

Chinese Poetry

Readings in Chinese poetry. Topics vary from classical and modern poetry. Various themes and genres introduced, emphasizing shi poetry. Texts in Chinese.

CHIN 445R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CHIN 343 & CHIN 441
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Knowledge

Students will deepen their understanding of Chinese poetry.

Top

Individual Study in Chinese

Assignments to fit individual needs of the advanced student.

CHIN 490R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Project approval by instructor.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Focused acquisition of knowledge

Students will concentrate on a specific topic of study and increase their knowledge of and ability to use language appropriate to that field (see Chinese major expected learning outcomes 1-3).

Top

Senior Seminar for Majors

Research methods in Chinese language sources. Paper required.

CHIN 495

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Advanced knowledge of Chinese.
Taught	Fall, Winter

Course Outcomes

Core Aspects of Chinese Civilization

Analyze and discuss core aspects of Chinese civilization including classical Chinese language and literature, modern and contemporary Chinese literature and film, Chinese culture, and/or the Chinese language. (See Chinese major learning outcome 3)

Seminar Presentations and Discussions

Give seminar presentations and participate in seminar discussions, thus demonstrating critical thinking and presentation skills.

Capstone Paper

Write a capstone paper or report that requires primary and secondary research using the Chinese language. (See Chinese major learning outcome 2 and 3)

English Writing Skills

Demonstrate English writing skills by completing a seminar capstone paper, problem sets, short essays and/or other written work.

Top

Academic Internship

On-the-job cultural and/or language experience.

CHIN 599R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Coordinator's and department's consent.
Taught	

Course Outcomes

Demonstrate knowledge and skills

The students will utilize a significant range of skills and abilities in a professional setting.

Honors Introduction to Greek and Roman Literature

Homer's Illiad, Sophocles' Oedipus the King, Vergil's Aeneid, and other important works of the Greeks and Romans.

CL CV 110

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	All readings in English.
Taught	Winter

Course Outcomes

Principles and Practice of Literary Method

Successful students will begin to apply principles and practice of literary method with specific reference to ancient texts.

Ancient Literary Works

By studying Aristotle's *Poetics* and then analyzing subsequest readings in epic poetry, tragedy, and philosophy in light of the Aristotle's ancient literary criticism students will be able to begin reading Greek and Roman texts (in translation) with a uniquely ancient perspective. They will be able to better understand all ancient literary works.

Literary History of Classical Literature

Students will begin to understand the literary history of Classical literature in the larger context of political and cultural history.

Evaluating Texts

Students should be able to evaluate texts through close reading and express the results of this evaluation in essays.

Introduction to Greek and Roman Literature

Homer's Iliad, Sophocles' Oedipus the King, Vergil's Aeneid, and other important works of the Greeks and Romans.

CL CV 110

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	All readings in English. Honors also.
Taught	Fall, Winter
Offered	Honors also.

Course Outcomes

Principles and Practice of Literary Method

Successful students will begin to apply principles and practice of literary method with specific reference to ancient texts.

Ancient Literary Works

By studying Aristotle's *Poetics* and then analyzing subsequest readings in epic poetry, tragedy, and philosophy in light of the Aristotle's ancient literary criticism students will be able to begin reading Greek and Roman texts (in translation) with a uniquely ancient perspective. Literary History of Classical Literature

Students will begin to understand the literary history of Classical literature in the larger context of political and cultural history.

Evaluating Texts

Students should be able to evaluate texts through close reading and express the results of this evaluation in essays.

Top

Honors Classical Tradition 1: Antiquity to Renaissance

Civilization from Greek and Roman antiquity to the Italian Renaissance, emphasizing Greco-Roman culture--its institutions, literature, arts, and ideas.

CL CV 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Precise Knowledge of Human Events

Successful students will demonstrate a precise knowledge of human events, ideas, and accomplishments generally recognized as formative in the history of civilization, with emphasis on contributions of Greek and Roman society.

Broad General Understanding of Classical Tradition

Successful students will demonstrate a broad general understanding of the development of the classical tradition from Homer through the Italian Renaissance and the roles of individuals, peoples, and cultures in establishing the roots of western civilization.

Appreciation of Representative Works

Successful students will appreciate representative works that have established idealized relationships of mankind to the divine, to one another, and to nature.

Lifelong Engagement and Appreciation of Great Works

Successful students will evince preparation for lifelong engagement with and appreciation of great works of the classical tradition

Top

The Classical Tradition 1: Antiquity to the Renaissance

Civilization from Greek and Roman antiquity to the Italian Renaissance, emphasizing Greco-Roman culture--its institutions, literature, arts, and ideas.

CL CV 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall
Offered	Honors also.

Course Outcomes

Precise Knowledge of Human Events

Successful students will demonstrate a precise knowledge of human events, ideas, and accomplishments generally recognized as formative in the history of civilization, with emphasis on contributions of Greek and Roman society.

Broad General Understanding of Classical Tradition

Successful students will demonstrate a broad general understanding of the development of the classical tradition from Homer through the Italian Renaissance and the roles of individuals, peoples, and cultures in establishing the roots of western civilization.

Appreciation of Representative Works

Successful students will appreciate representative works that have established idealized relationships of mankind to the divine, to one another, and to nature.

Lifelong Engagement and Appreciation of Great Works

Successful students will evince preparation for lifelong engagement with and appreciation of great works of the classical tradition

Honors Classical Tradition 2: Reformation to Modern

Civilization from the Reformation to the twentieth century, emphasizing the heritage of Greco-Roman culture--its institutions, literature, arts, and ideas.

CL CV 202

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Broad Understanding of Classical Tradition

Students will demonstrate a broad general understanding of the development of the classical tradition from the Northern Renaissance to the present day and the roles of individuals, peoples, and cultures in treating the rise of western civilization.

Precise Knowledge

Students will demonstrate a precise knowledge of human events, ideas, and accomplishments generally recognized as formative in the history of civilization, with focus primarily on the contributions of Greek and Roman society.

Appreciate Representative Works

Students will appreciate representative works that have established idealized relationships of mankind to the divine, to one another, and to nature.

Preparation for Lifelong Learning

Students will evince preparation for lifelong engagement with and appreciation of great works of the classical tradition.

The Classical Tradition 2: Reformation to Modern

Civilization from the Reformation to the twentieth century, emphasizing the heritage of Greco-Roman culture--its institutions, literature, arts, and ideas.

CL CV 202

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter
Offered	Honors also.

Course Outcomes

Broad Understanding of Classical Tradition

Students will demonstrate a broad general understanding of the development of the classical tradition from the Northern Renaissance to the present day and the roles of individuals, peoples, and cultures in treating the rise of western civilization.

Precise Knowledge

Students will demonstrate a precise knowledge of human events, ideas, and accomplishments generally recognized as formative in the history of civilization, with focus primarily on the contributions of Greek and Roman society.

Appreciate Representative Works

Students will appreciate representative works that have established idealized relationships of mankind to the divine, to one another, and to nature.

Preparation for Lifelong Learning

Students will evince preparation for lifelong engagement with and appreciation of great works of the classical tradition.

Greek and Roman Mythology

Greek and Roman gods, heroes, and myths, emphasizing literature but also giving attention to representations in the visual arts.

CL CV 241

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring
Offered	Honors also.

Course Outcomes

Reading and Writing

Through the reading and writing assignments successful students will develop skills in sound thinking and critical reading.

Reading and Analyzing Greek and Roman Myths

Successful students will intelligently read and analyze various Greek and Roman myths in anthologies and in complete works - e.g. Homer's *Odyssey*, Aeschylus' *Oresteia*, Ovid's *Metamorphoses*, Eugene O'Neill's *Morning Becomes Electra*.

Appreciation for the Aesthetics of Western Civilization

Students will develop an appreciation for the aesthetics of western civilization's most pervasive and seminal texts.

Top

Honors Greek and Roman Mythology

Greek and Roman gods, heros, and myths, emphasizing literature but also giving attention to representatives in the visual arts.

CL CV 241

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab

Taught	Fall, Winter

Course Outcomes

Reading and Writing

Through the reading and writing assignments successful students will develop skills in sound thinking and critical reading.

Reading and Analyzing Greek and Roman Myths

Successful students will intelligently read and analyze various Greek and Roman myths in anthologies and in complete works - e.g. Homer's *Odyssey*, Aeschylus' *Oresteia*, Ovid's *Metamorphoses*, Eugene O'Neill's *Morning Becomes Electra*.

Appreciation for the Aesthetics of Western Civilization

Students will develop an appreciation for the aesthetics of western civilization's most pervasive and seminal texts.

Top

Golden Age of Greece

History of Civilization, culture, and daily life of Greece as indicated through its literature, art, history, and archaeology.

CL CV 245

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	All readings in English.
Taught	Winter odd years

Course Outcomes

Classical Greece and Western Cultural Development

Successful students will learn how Classical Greek literature, philosophy, warfare, religion, and art have influenced the development of later western culture.

Greek Golden Age

Through the careful exploration of the humanities and history of the Greeks in their so-called Golden Age (fifth and fourth centuries BC) successful students will develop a greater understanding of Classical Greek culture, literature, and politics.

Classical Text Critical Analysis

Successful students will develop a greater ability to evaluate a Clasical text (in translation) critically and intelligently.

Top

Golden Age of Rome

History of Civilization, culture, and daily life of Rome as indicated through its literature, art, history, and archaeology.

CL CV 246

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	All readings in English.
Taught	Winter even years

Course Outcomes

Classical Roman Culture, Literature, and Politics

Through the careful exploration of the humanities and history of the Romans in their so-called Golden Age (the Late Republic and the Augustan Age) successful students will develop a greater understanding of Classical Roman culture, literature, and politics.

Roman Literature, Philosophy, Warfare, Religion, and Art

Successful students will learn how Roman literature, philosophy, warfare, religion, and art have influenced the development of later western culture.

Evaluating Classical Texts

Successful students will develop a greater ability to evaluate a Classical text (in translation) critically and intelligently.

Greek and Roman Civilization and Literature in Film

Literature and civilization of ancient Greece and Rome as depicted in modern film with attendant problems of accuracy and historicity.

CL CV 261

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Understanding Classical Culture

Through the exploration of films that present Greek and Roman narratives - historical, mythological, contextual - successful students will develop a greater understanding of adaptations of Classical culture, literature, and politics.

Classical Tradition in Cinema

Successful students will learn how Classical texts have persistently formed the basis of narrative adaptation throughout the history of cinema, in overt and sometimes surprisingly covert ways.

Evaluating Cinematic Texts

Through assigned readings, screenings and individual viewing of films, classroom discussion and written papers, successful students will develop their ability to evaluate cinematic texts critically and intelligently.

Top

(Cl Cv-Hist 247) Greek History

Political, economic, social, and intellectual history of Greece from Mycenaean times to the Hellenistic period.

CL CV 304

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Ancient Greek Historical Sources

Successful students will consider available primary sources of information for ancient Greek history and be able to evaluate the reliability of those sources.

Primary Source Analysis

Successful students will consider available primary sources of information for ancient Greek history and be able to evaluate the reliability of those sources.

Greek Literature Analysis

Successful students will be exposed to selections of Greek literature and be able to evaluate those texts as sources for Greek history; critical skills will be improved by the careful treatment of historiographical texts.

Critical Theories

Successful students will discuss critical theories that are relevant to the texts treated in class and be able to evaluate and judge the rhetorical complexities facing the various authors discussed and how those authors resolved those complexities as they composed their historical narratives.

Historical Texts and Ancient Historiography

Successful students will be able to locate the historical texts treated in class in the context of Classical literature generally and of ancient historiography specifically.

Historical Knowledge of Greek History

Successful students will demonstrate a basic understanding of Greek History from the Bronze Age to the Hellenistic Age

Top

(ClCv-Hist 248) Roman History

Political, economic, social, and intellectual history of Rome from the foundation of the city to Constantine.

CL CV 307

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Historiography and Historical Evaluation

Successful students will be exposed to selections of Latin and Greek literature and be able to evaluate those texts as sources for Roman history; students' critical skills will be improved by the careful treatment of historiographical texts.

Primary Sources of Information

Successful students will consider available primary sources of information for ancient Roman history and be able to evaluate the reliability of those sources.

Critical Analysis

Successful students will discuss critical theories that are relevant to the texts treated in class and be able to evaluate the rhetorical complexities facing the various authors discussed and how those authors resolved those complexities as they composed their historical narratives.

Research and Historiography

Successful students will be able to locate the historical texts treated in class in the context of Classical literature generally and of ancient historiography specifically.

Knowledge of Roman History

Successful students will demonstrate a basic knowedge of Roman history from the Regal period to the decline of the Roman Empire.

Classical Archaeology

Major excavations and antiquities of the Mediterranean region illustrating Greco-Roman history.

CL CV 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Knowledge of the History of Classical Archaeology

Through studying the history of Classical archaeology, from the 18th Century to the present, successful students will develop a greater understanding of how the study of Greek and Roman cultures have shaped modern European and American culture.

Working with the Artifacts of Classical Culture

Where appropriate, students will have opportunities to participate in archaeological excavation, preservation, and restoration and to demonstrate the skills required to excavate, preserve, and restore Classical artifacts.

Evaluating the Artifacts of Classical Culture

Through assigned readings, classroom discussion and written papers, successful students will demonstrate their ability to evaluate museum artifacts and archaeological data intelligently.

(CICv-Engl) Greek and Roman Classics and the English Tradition

Major works by such authors as Homer, the Greek and Roman tragedians, Thucydides, Vergil, and Petronius in English translation, emphasizing their influence on English and American literature.

CL CV 355

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Comprehension

Successful students will demonstrate, through essays, written examination, and class discussion, a sound incipient understanding of the themes, situations, characters, formal structures, and contexts of representative classical and English texts.

Critical Reading

Read critically and analyze selected classical texts in translation in the context of English literature.

Criticism

Successful students will demonstrate, through essays and written examination, the ability to practice literary criticism in the field of classical reception.

Produce Polished and Competent Formal Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Literary History

Successful students will demonstrate, through exams and essays, an incipient understanding of some of the ways that classical literature and culture has shaped, and continues to shape, the development of English literature.

Appreciation

Successful students will have developed an informed sense of the quality of the texts, of their beauty (or not), of their relevance (or not) to life as a whole, and similar range of experiences which

may or may not be demonstrable through academic evaluation.

Top

Judaism and Christianity in the Classical Near East

Historical and cultural contexts of early Judaism and Christianity; analysis of major Jewish and Christian texts produced in classical Near East; methodological emphasis.

CL CV 363

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Classical Influence on the History and Culture of the Ancient Near East

Know and be able to interpret the significant events and developments in the history and cultures of the ancient Near East, in particular of Second Temple Judaism and Early Christianity in their Hellenistic and Roman contexts.

Ancient Text Interpretation

Be able to interpret major ancient Near East texts-including the Bible, Apocrypha, historiography, and early Christian literature-and analyze their significance for understanding the cultures in which they were produced.

Critical Thinking

Develop the capacity for informed, independent, critical thinking and be able to perform appropriate library and online research utilized in the professional study of the ancient Near East.

Analytical Writing

Be able to write sources analyses and exegetical papers that utilize approaches from the Social Sciences and Humanities and that integrate language and interpretive skills to analyze ancient Near Eastern topics

Academics and Faith

Have considered and received affirmation concerning the relationship between academics and faith, and will have been encouraged to engage in a spiritually informed, lifelong pursuit of learning, scholarship, and service.

Acadmic Internship in Classics

Combined study-work experience related to classical studies majors (museums, libraries, international universities and centers, publishers, etc.).

CL CV 399R

Hours	1.0 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	12 hours of classics course work (Latin, Greek, classical civilization, classcis) at the 300-level and above; classical studies major status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Practical Experience

Through a semester- or term-length practicum in a business environment, successful students will strengthen social, communication, and organizational skills essential to competing in the job market after graduation.

Understanding World Cultures

Where appropriate, successful students will expand personal understanding of world cultures through in-country residence and improvement of foreign language skills.

Top

Pro-Seminar in Classical Studies

Mechanics of researching and writing analytical papers in classical studies. Sectional and adjunct professors present seminal sub-disciplines and model research methods. Specialized library resources taught in practicum. Tutorials with faculty underpin focused research questions.

CLSCS 397

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	LATIN 201; or GREEK 201
Recommended	Latin 302 or Greek 301.
Taught	Fall

Course Outcomes

Interpretation of Classical Scholarship

Successful students learn how to evaluate specialized scholarship under the direction of departmental faculty and library research specialists, who introduce students to their own research agenda in the process.

Developing and Expressing Original Interpretations of Classical Texts

Successful students will be able to write analytical papers or the equivalent that apply close readings to Classical literary texts to develop and clearly expression original interpretations of these texts.

Strategies in Scholarship

Successful students acquire strategies in how to find, read, comprehend, and write about the most important scholarship in more and less particular sub-disciplines of classical scholarship.

Preparing for the Capstone Essay

Students develop a learning environment with an individual faculty mentor to define and begin to answer a particular research question that will be interesting and answerable in a capstone essay to be written during the senior year (Clscs 497).

Top

Ancient Literary Criticism

Survey emphasizing both chief works of the tradition and their practical application to reading of Greek and Latin authors.

CLSCS 420

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	GREEK 302; or LATIN 302
Taught	

Course Outcomes

Reading Greek and Latin

Successful students will demonstrate competence in reading both Greek and Latin.

Understanding Ancient Speech and Writing

Successful students will demonstrate an understanding of the ancient disciplines of speech and writing: grammar, rhetoric, poetics, and logic.

Evaluation of Texts

Successful students will be able to intelligently evaluate select texts-such as Aristotle's *Poetics*, Cicero's *De Oratore*, Horace's *Ars Poetica*, and Quintilian's *Institutio Oratoria*-through close reading.

Cultural Context

Successful students will demonstrate an understanding of cultural, intellectual, and politicall history from the fifth century B.C. to the time of St. Augustine, thus creating a context for the study of ancient critical theory.

(Clscs-Hist) Topics in Greek and Roman History

Topics vary (e.g., rise of the Greek city-state, Greek political thought, classical historiography, Rome and the Etruscans, imperial Rome).

CLSCS 430R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Cl Cv 304-Hist 247 and Greek 201 (Greek topics) or Cl Cv 307-Hist 248 and Latin 201 (Roman topics).
Taught	Fall, Winter

Course Outcomes

Understanding History of Greece and Rome

By approaching primary historiographical texts and secondary scholarship treating the History of Greece or Rome (depending upon the special topic chosen for the course), successful students will come to understand the history of Greece and Rome. Topics may fall anywhere within the range of events from Bronze Age Greece to the end of the Roman Empire.

Top

4th Century Greece

CLSCS 430R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CL CV 304 & GREEK 201; or HIST 247 & GREEK 201
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Seminar in Classics

Combined topics in Greek and Latin (e.g., comparative epic poetry, classical tradition of criticism, Euripides and Seneca). Topics vary.

CLSCS 490R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

This course is not currently offered.

This course is not currently offered.

Directed Readings

Students will organize literary texts from Greek and/or Latin traditions into a cogent unit for study and analysis and conduct a thorough investigation into a problem or set of related problems presented by the study unit.

CLSCS 495R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Contract and instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Exit Examination in Classical Literature

Capstone essay culminates undergraduate experience in posing, researching, and writing in consultation with an advisor. Oral exam tests familiarity with a standardized reading list of classical texts. Attendance at weekly lectures expands familiarity with broad questions in classical scholarship.

CLSCS 497

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	CLSCS 397; at least one course in Latin or Greek at 400-level.
Recommended	Coursework above 400-level in Latin and/or Greek.
Taught	Winter

Course Outcomes

The Capstone Paper

Successful students will complete research on and write a capstone paper under the guidance of their chosen member of the Classics faculty. By writing this capstone paper, students will demonstrate 1) the ability to write analytical papers or the equivalent that apply close readings to Latin and Greek literary texts to develop and clearly express original interpretations of these texts nd 2) a broad knowledge and comprehension of the history, literature, philosophy, and visual arts of Greece and Rome.

Civilization: Literature 1

Western civilization from antiquity to early Italian Renaissance, emphasizing socioeconomic, political, intellectual, and aesthetic developments, with primary focus on literary texts.

CMLIT 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Honors also.

Course Outcomes

Western Literary History: Ancients through Italian Renaissan

Demonstrate a sound, general understanding of major literary texts and the intellectual history of Western culture, through the Italian Renaissance.

Literature, History, and Philosophy

Show the capability to accurately and intelligently relate literary works to the main historical and philosophical trends of their times.

Critical Analysis and Effective Communication

Be able to analyze literary texts carefully, critically, coherently, and persuasively, both in discussion and in writing, using the basic tools of literary criticism.

Literature and Civilization

Explain what literature is and how its values are important to the study of Western civilization.

Honors Civilization: Literature 1

Western civilization from antiquity to early Italian Renaissance, emphasizing socioeconomic, political, intellectual, and aesthetic developments, with primary focus on literary texts.

CMLIT 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Western Literary History: Ancients through Italian Renaissan

Demonstrate a sound, general understanding of major literary texts and the intellectual history of Western culture, through the Italian Renaissance.

Literature, History, and Philosophy

Show the capability to accurately and intelligently relate literary works to the main historical and philosophical trends of their times.

Critical Analysis and Effective Communication

Be able to analyze literary texts carefully, critically, coherently, and persuasively, both in discussion and in writing, using the basic tools of literary criticism.

Literature and Civilization

Explain what literature is and how its values are important to the study of Western civilization.

Civilization: Literature 2

Western civilization from Europe's high Renaissance to the present, emphasizing socioeconomic, political, intellectual, and aesthetic developments, with primary focus on literary texts.

CMLIT 202

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Honors also.

Course Outcomes

Literature, History, and Philosophy

Show the capability to accurately and intelligently relate literary works to the main historical and philosophical trends of their times.

Western Literary History: Renaissance to Present

Demonstrate a sound, general understanding of major literary texts and the intellectual history of Western culture, from the Italian Renaissance to the present.

Critical Analysis and Effective Communication

Be able to analyze literary texts carefully, critically, coherently, and persuasively, both in discussion and in writing, using the basic tools of literary criticism.

Literature and Civilization

Explain what literature is and how its values are important to the study of Western civilization.

Honors Civilization: Literature 2

Introduction to Literary Analysis and Comparative Literature

Methods of literary analysis, emphasizing basic issues of comparative literature and prosody and other problems related to foreign language texts.

CMLIT 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Reading knowledge of at least one foreign language.
Taught	

Course Outcomes

Comparative Literature History

Show an understanding of the history of the discipline.

Comparative Literature Theory

Articulate major theories of Comparative Literature as an academic discipline.

Research Methodologies and Tools

Explain and use methodological tools, including library research.

Multilingual Explication

Show an ability to closely explicate literary texts in at least two languages.

Critical Thinking and Fallacies

Demonstrate knowledge of the canons of critical thinking, and a grasp of fundamental thinking fallacies.

Top

Asian Literary Traditions

Comparative analysis of Asian literary works spanning several traditions.

CMLIT 342

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Comparative Literary Analysis

Apply basic concepts of comparative literary analysis to course texts.

Asian Literary Traditions

Gain familiarity with Asian literary traditions, particularly India, China, and Japan.

Critical Analysis and Writing

Demonstrate strong critical reading, writing, and analytical skills across linguistic and national traditions.

12th-Century Renaissance

CMLIT 420R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Literary Periodization

Articulate with considerable sophistication basic concepts and issues in literary periodization, showing an ability to deal with problems, texts, and figures specific to the European twelfth century and Middle Ages more broadly.

Research and Writing

Conduct thorough research into a problem specific to the period in question -- the European 12th century -- and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts from the European 12th century in at least two languages.

17th-Century Literature

CMLIT 420R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Literary Periodization

Articulate with considerable sophistication basic concepts and issues in literary periodization, showing an ability to deal with problems, texts, and figures specific to European seventeenth century.

Research and Writing

Conduct thorough research into a problem specific to the period in question -- the European 17th century -- and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts from the European seventeenth century in at least two languages.

18th-Century Literature

CMLIT 420R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Literary Periodization

Articulate with considerable sophistication basic concepts and issues in literary periodization, showing an ability to deal with problems, texts, and figures specific to the eighteenth century.

Research and Writing

Conduct thorough research into a problem specific to the period in question -- the eighteenth century -- and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts from the eighteenth century in at least two languages.

20th-Century Literature

CMLIT 420R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Literary Periodization

Articulate with considerable sophistication basic concepts and issues in literary periodization, showing an ability to deal with problems, texts, and figures specific to the twentieth century.

Research and Writing

Conduct thorough research into a problem specific to the period in question -- the twentieth century -- and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts from the twentieth century in at least two languages.

Classics and Early America

CMLIT 420R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Literary Periodization

Articulate with considerable sophistication basic concepts and issues in literary periodization, showing an ability to deal with problems, texts, and figures specific to the period or movement at hand.

Research and Writing

Conduct thorough research into a problem specific to the period in question and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts from the period at issue in at least two languages.

Research and Writing

Conduct thorough research into a problem specific to the period in question -- the European Middle Ages -- and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts from the European Middle Ages in at least two languages.

Modernism

CMLIT 420R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Literary Periodization

Articulate with considerable sophistication basic concepts and issues in literary periodization, showing an ability to deal with problems, texts, and figures specific to Modernism.

Research and Writing

Conduct thorough research into a problem specific to the period in question -- Modernism -- and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about Modernist literary texts in at least two languages.

Neoclassicism

CMLIT 420R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Literary Periodization

Articulate with considerable sophistication basic concepts and issues in literary periodization, showing an ability to deal with problems, texts, and figures specific to Neoclassicism.

Research and Writing

Conduct thorough research into a problem specific to the period in question -- Neoclassicism -- and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about Neoclassical literary texts in at least two languages.

Postmodernism

CMLIT 420R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Literary Periodization

Articulate with considerable sophistication basic concepts and issues in literary periodization, showing an ability to deal with problems, texts, and figures specific to Postmodernism.

Research and Writing

Conduct thorough research into a problem specific to the period in question -- Postmodernism -- and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about Postmodern literary texts in at least two languages.

Realism

CMLIT 420R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Literary Periodization

Articulate with considerable sophistication basic concepts and issues in literary periodization, showing an ability to deal with problems, texts, and figures specific to Realism.

Research and Writing

Conduct thorough research into a problem specific to the period in question -- Realism -- and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about Realist literary texts in at least two languages.

Renaissance Literature

CMLIT 420R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Literary Periodization

Articulate with considerable sophistication basic concepts and issues in literary periodization, showing an ability to deal with problems, texts, and figures specific to the European Renaissance.

Research and Writing

Conduct thorough research into a problem specific to the period in question -- the European Renaissance -- and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts from the European Renaissance in at least two languages.

Romanticism

CMLIT 420R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Literary Periodization

Articulate with considerable sophistication basic concepts and issues in literary periodization, showing an ability to deal with problems, texts, and figures specific to Romanticism.

Research and Writing

Conduct thorough research into a problem specific to the period in question -- Romanticism -- and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about Romantic literary texts in at least two languages.

Studies in Periods and Movements

Topics vary.

CMLIT 420R

Course Outcomes

Concepts and Issues in Literary Form

Articulate with considerable sophistication basic concepts and issues in the study of literary form, showing an ability to deal with problems, texts, and figures specific to the genre at hand.

Research and Writing

Conduct thorough research into a problem of literary genre and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

The Romance

CMLIT 430R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Form

Articulate with considerable sophistication basic concepts and issues in the study of literary form, showing an ability to deal with problems, texts, and figures specific to the Romance.

Research and Writing

Conduct thorough research into a problem of literary genre and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Tragedy

CMLIT 430R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Form

Articulate with considerable sophistication basic concepts and issues in the study of literary form, showing an ability to deal with problems, texts, and figures specific to Tragedy.

Research and Writing

Conduct thorough research into a problem of literary genre and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Arthurian Literature

CMLIT 440R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Thematics

Articulate with considerable sophistication basic concepts and issues in the study of literary thematics, showing an ability to deal with problems, texts, and figures specific to Arthurian literature.

Research and Writing

Conduct thorough research into a problem from Arthurian literature and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Don Juan Theme

CMLIT 440R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Thematics

Articulate with considerable sophistication basic concepts and issues in the study of literary thematics, showing an ability to deal with problems, texts, and figures specific to the Don Juan theme.

Scholarly Research and Writing

Conduct thorough research into a problem from the Don Juan theme and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Faust Theme

CMLIT 440R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Thematics

Articulate with considerable sophistication basic concepts and issues in the study of literary thematics, showing an ability to deal with problems, texts, and figures specific to the Faust theme.

Research and Writing

Conduct thorough research into a problem from the Faust theme and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Top

Studies in Themes and Types

Major literary themes (e.g., Faust, Don Juan, Ulysses, Arthur), types, motifs, and problems of literary typology. Topics vary.

CMLIT 440R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CmLit 310 or concurrent enrollment.
Taught	

Course Outcomes

Concepts and Issues in Literary Thematics

Articulate with considerable sophistication basic concepts and issues in the study of literary thematics, showing an ability to deal with problems, texts, and figures specific to the thematological topic at hand.

Research and Writing

Conduct thorough research into a problem of literary thematics and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Ulysses Theme

CMLIT 440R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Thematics

Articulate with considerable sophistication basic concepts and issues in the study of literary thematics, showing an ability to deal with problems, texts, and figures specific to the Ulysses theme.

Research and Writing

Conduct thorough research into a problem from the Ulysses theme and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Top

Asian Literature Traditions

CMLIT 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

East-West Relations

CMLIT 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Relations

Articulate with considerable sophistication basic concepts and issues in the study of the relationships between literary texts, as well as the relationship between literature and other areas of human knowledge.

Research and Writing

Conduct thorough research into a problem of relationship between eastern and western literature and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Top

Literature and Cinema

CMLIT 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Relations

Articulate with considerable sophistication basic concepts and issues in the study of the relationships between literary texts, as well as the relationship between literature and film.

Research and Writing

Conduct thorough research into a problem of the relationship between literature and film and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts and films in at least two languages.

Literature and History

CMLIT 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Relations

Articulate with considerable sophistication basic concepts and issues in the study of the relationships between literary texts, as well as the relationship between literature and history.

Scholarly Research and Writing

Conduct thorough research into a problem of the relationships between literary texts, or between literature on the one hand and history on the other, and write in a professional, scholarly manner about it.

Multilingual Study, Research and Writing

Show an ability to read, study, research, and write about texts in at least two languages.

Literature and Music

CMLIT 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Relations

Articulate with considerable sophistication basic concepts and issues in the study of the relationships between literary texts, as well as the relationship between literature and music.

Research and Writing

Conduct thorough research into a problem of the relationship between literature and music and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Literature and Myth

CMLIT 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Relations

Articulate with considerable sophistication basic concepts and issues in the study of the relationships between literary texts, as well as the relationship between literature and other areas of human knowledge.

Research and Writing

Conduct thorough research into a problem of relationship between literature and myth and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Literature and Politics

CMLIT 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Relations

Articulate with considerable sophistication basic concepts and issues in the study of the relationships between literary texts, as well as the relationship between literature and politics.

Research and Writing

Conduct thorough research into a problem of the relationship between literature and politics and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Literature of Sensibility

CMLIT 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Relations

Articulate with considerable sophistication basic concepts and issues in the study of the relationships between literary texts, as well as the relationship between literature and other areas of human knowledge.

Research and Writing

Conduct thorough research into a problem of literary relations and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Philosophy and Literature

CMLIT 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Relations

Articulate with considerable sophistication basic concepts and issues in the study of the relationships between literary texts, as well as the relationship between literature and philosophy.

Scholarly Research and Writing

Conduct thorough research into a problem of the relationship between literature and philosophy, and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about texts in at least two languages.

Top

Studies in Literary Relations

Interrelations of national literatures and figures and of literature with other areas of knowledge (art, history, law, psychology, music, etc.). Topics vary.

CMLIT 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CmLit 310 or concurrent enrollment.
Taught	

Course Outcomes

Concepts and Issue in Literary Relations

Articulate with considerable sophistication basic concepts and issues in the study of the relationships between literary texts, as well as the relationship between literature and other areas of human knowledge.

Research and Writing

Conduct thorough research into a problem of literary relations and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Symbolism

CMLIT 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Relations

Articulate with considerable sophistication basic concepts and issues in the study of the relationship between literary texts, as well as the relationship between literature and other areas of human knowledge.

Scholarly Research and Writing

Conduct thorough research into a problem of the relationships between literary texts, or between literature on the one hand and other areas of human knowledge on the other, and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about texts in at least two languages.

Top

U.S. and Carribean Literature

CMLIT 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Relations

Articulate with considerable sophistication basic concepts and issues in the study of the relationships between literary texts, as well as the relationship between literature and other areas of human knowledge.

Research and Writing

Conduct thorough research into a problem of literary relations and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Vergil, Augustine, and Dante

CMLIT 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Relations

Articulate with considerable sophistication basic concepts and issues in the study of the relationships between literary texts, as well as the relationship between literature and other areas of human knowledge.

Research and Writing

Conduct thorough research into a problem of literary relations and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Wagner and Wagnerism

CMLIT 450R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Relations

Articulate with considerable sophistication basic concepts and issues in the study of the relationships between literary texts, as well as the relationship between literature and other areas of human knowledge.

Research and Writing

Conduct thorough research into a problem of literary relations and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts in at least two languages.

Top

Classical Rhetoric and Criticism

CMLIT 460R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Theory

Articulate with considerable sophistication basic concepts and issues in the study of literary theory, showing an ability to deal with problems, texts, and figures specific to the theoretical topic at hand.

Scholarly Research and Writing

Conduct thorough research into a problem of literary theory and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts and theory in at least two languages.

Contemporary Theory

CMLIT 460R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Theory

Articulate with considerable sophistication basic concepts and issues in the study of contemporary literary theory, showing an ability to deal with problems, texts, and figures specific to the theoretical topic at hand.

Research and Writing

Conduct thorough research into a problem of literary theory and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts and theory in at least two languages.

Top

Historical Literary Theory

CMLIT 460R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Theory

Articulate with considerable sophistication basic concepts and issues in the study of history of literary theory, showing an ability to deal with problems, texts, and figures specific to the theoretical topic at hand.

Research and Writing

Conduct thorough research into a problem of literary theory and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts and theory in at least two languages.

Top

Kierk and Rom Irony

CMLIT 460R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Concepts and Issues in Literary Theory

Articulate with considerable sophistication basic concepts and issues in the study of literary theory, showing an ability to deal with problems, texts, and figures specific to the theoretical topic at hand.

Research and Writing

Conduct thorough research into a problem of literary theory and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts and theory in at least two languages.

Top

Practical Criticism

CMLIT 460R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None

Course Outcomes

Concepts and Issues in Literary Theory

Articulate with considerable sophistication basic concepts and issues in the study of literary theory, showing an ability to deal with problems, texts, and figures specific to the theoretical topic at hand.

Scholarly Research and Writing

Conduct thorough research into a problem of literary theory and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts and theory in at least two languages.

Top

Studies in Literary Theory

Topics vary.

CMLIT 460R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CmLit 310 or concurrent enrollment.
Taught	

Course Outcomes

Concepts and Issues in Literary Theory

Articulate with considerable sophistication basic concepts and issues in the study of literary theory, showing an ability to deal with problems, texts, and figures specific to the theoretical topic at hand.

Research and Writing

Conduct thorough research into a problem of literary theory and write in a professional, scholarly manner about it.

Multilingual Study, Research, and Writing

Show an ability to read, study, research, and write about literary texts and theory in at least two languages.

Top

Directed Readings

CMLIT 495R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Literary Organization and Analysis

Show an ability to organize literary texts from at least three language traditions into a cogent unit for study and analysis.

Research

Conduct a thorough investigation into a problem or set of related problems presented by the study unit.

Top

Reading List Examination

CMLIT 497

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	CMLIT 310 & CMLIT 342; Three 400-level seminars.
Taught	

Course Outcomes

Scholarly Research and Writing

Prepare a detailed piece of scholarly research and writing based upon four to six texts chosen by faculty supervisors.

Comparative Literature Reading List

Demonstrate thorough knowledge of the Comparative Literature B.A. reading list.

Top

Honors Thesis

CMLIT 499R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Formulating Research, Thesis, and Methodology

Show an ability to formulate a proper piece of literary research, with an appropriate thesis statement and methodological approach.

Research Topic

Carry out thorough library and/or archival research on an approved topic.

Effective Writing and Critical Thinking

Exemplify exceptional writing and thinking skills in preparing a scholarly paper through several drafts and revisions.

Publishable Paper Submission

Submit a final, publishable piece of scholarship in the field of literary studies.

Top

Directed Readings

CMLIT 590R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Graduate coordinator`s consent.
Taught	

Course Outcomes

understand and analyze

Show an ability to understand and analyze literary texts in at least two languages.

articulate

Articulate with considerable sophistication basic concepts and issues in the study of literary texts across linguistic and national boundaries.

Introduction to Speech-Language Pathology and Audiology

Overview of communication disorders, assessment strategies, and treatments.

COMD 133

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Human Communication and Systems

Demonstrate basic understanding of human communication and the systems involved.

Clinical Applications

Demonstrate an initial understanding of the clinical applications of the fields of speech-language pathology and audiology.

Basic Concepts and Terms

Demonstrate understanding of some basic concepts and terms associated with the practice of speech-language pathology and audiology.

Familiarity with Disorders and Professions

Demonstrate basic familiarity with a variety of communication disorders and the professions of speech-language pathology and audiology.

Speech Anatomy

Basic anatomy and physiology of speech mechanisms.

COMD 320

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	PDBIO 220
Taught	Fall, Winter

Course Outcomes

Basic Anatomy

Students will demonstrate competent knowledge of the basic elements of anatomy.

Anatomy and Physiology of Respiration

Students will demonstrate competent knowledge of the anatomy and physiology of respiration.

Anatomy and Physiology of Phonation

Students will demonstrate competent knowledge of the anatomy and physiology of phonation.

Anatomy of Resonation and Articulation

Students will demonstrate competent knowledge of the anatomy of articulation and resonation.

Neuroanatomical and Neurophysiological Correlates of Speech

Students will demonstrate competent knowledge of the neuroanatomical and neurophysiological correlates of speech.

Top

Language Development

Overview of how children learn language, including its relationship to cognitive, neural, and social development; language development in bilingual, minority, and handicapped persons.

COMD 330

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Theories of Language Development

Demonstrate knowledge of the major theories of language development (social interactionist, linguistic, emergentism).

Components of Language

Define the major components of language (syntax, semantic, phonology, morphology, & pragmatics).

Cultural Factors of Language Development

Demonstrate knowledge of how cultural factors influence first and second language development.

Developmental Sequence of Language Behaviors

Demonstrate knowledge of the developmental sequence of pragmatic, semantic, syntactic, and morphologic language behaviors in production and comprehension modalities.

Development of Literacy

Demonstrate knowledge of the development of literacy.

Clinical Phonetics

Transcription and analysis of normal and disordered sound production.

COMD 331

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Elements of Phonetics

Students will demonstrate competent knowledge of the basic elements of phonetics.

Production and Transcription of English Vowels

Students will demonstrate competent knowledge and performance of skills related to the production and transcription of vowel sounds in American English.

Production and Transcription of English Consonants

Students will demonstrate competent knowledge and performance of skills related to the production and transcription of consonant sounds in American English.

Production and Transcription of Suprasegmental Aspects

Students will demonstrate competent knowledge and performance of skills related to the production and transcription of the suprasegmental aspects of speech.

Transcription of Disordered Speech and Dialects

Students will demonstrate competent knowledge and performance of skills related to the transcription of disordered speech and dialect variation.

Accommodations for Diversity and Disability

Students will demonstrate competent knowledge of the appropriate accommodations for culturally and linguistically diverse (CLD) populations of varying ages and differing levels of disability.

Language Science

Morphology, syntax, and semantic roles in language of children and adults; uses both manual and computer-assisted methods.

COMD 332

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

English Sentence Structure and Development

Discuss English sentence structure and its development in children using common descriptive terms.

Evaluate Transcriptions for Syntactic Constructions

Examine a transcript of a client's language sample and evaluate evidence that the client can use various syntactic constructions.

Top

Hearing Science and Acoustics

Hearing anatomy, physiology, and science.

COMD 334

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Decibels and Conversions

Demonstrate an understanding of the decibel and be able to convert among various reference systems.

Acoustics and Sound

Demonstrate an understanding of basic acoustic concepts.

Anatomy and Physiology of Auditory Pathway

Explain details of the anatomy and physiology of the auditory pathway.

Language Impairment

Causes and characteristics of language impairment; techniques for diagnosis, assessment, and treatment of language disorders.

COMD 350

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	COMD 330 & COMD 332
Taught	Fall, Winter

Course Outcomes

Problems with Language Impairment

Demonstrate knowledge of the linguistic, academic, and social problems associated with language impairment.

Models of Child Language Impairment

Describe general models of child language impairment.

Service Issues with Language Impairment

Describe service delivery issues in the assessment of language impairment.

Assessment Procedures

Demonstrate knowledge of assessment procedures to perform the following tasks: screening, qualifying a child for intervention services, determining goals in intervention, predicting the need for future intervention, and measuring progress in intervention.

Treatment of LI

Describe several approaches to the treatment of LI (e.g., focused stimulation).

Top

Disorders of Articulation and Phonology

Causes and characteristics of phonological disorders; techniques for diagnosis, assessment, and treatment.

COMD 351

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	COMD 331
Taught	Fall, Winter

Course Outcomes

Nature of Speech Sound Disorders

Demonstrate knowledge regarding the nature of speech sound disorders, including their etiologies, characteristics, anatomical/physiological, acoustic, psychological, developmental, linguistic, and cultural correlates.

Assessment of Speech Sound Disorders

Demonstrate knowledge regarding the principles and methods of the assessment of speech sound disorders, using both formalized and non-formalized methods.

Speech Sound Disorders Interventions

Demonstrate knowledge regarding the principles and methods of speech sound disorders intervention.

Speech Science

Laboratory investigation of scientific bases of normal and disordered speech perception and production; for audiologists and speech language pathologists.

COMD 421

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	COMD 331 & COMD 334
Taught	Fall, Winter

Course Outcomes

Principles of Speech Production

Demonstrate knowledge and competence in basic principles of speech production, including acoustic and physiological aspects and their measurement.

Quantifying Speech Disorders for Treatment Outcomes

Explain principles and methods of quantifying a variety of speech disorders, based on a sound grasp of the physiologic basis of normal function, with a goal of documenting treatment outcomes.

Applying Principles for Practice

Show understanding of the application of principles from the current research literature in measuring speech performance in preparation for participating in evidence-based practice.

Medical Speech Pathology

Genetic, gestational, and neurogenic factors related to communication disorders in children and adults; role of the speech-language pathologist in medical teams.

COMD 430

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PDBIO 220 & COMD 320
Taught	Fall

Course Outcomes

Preparing for Graduate Work

Demonstrate preparation for graduate coursework in organic and neurologic communication and swallowing disorders.

Role of SLP

Describe the collaborative role of the SLP on professional teams in medical settings.

Describing Disorders and Treatments

Describe the causes and characteristics of TBI, aphasia, voice disorders, motor speech disorders and swallowing disorders, and describe several treatment approaches used for those disorder areas by speech-language pathologists.

Top

Hearing Tests and Measures

Theory and practice of auditory assessment.

COMD 438

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	COMD 334
Taught	Fall, Winter

Course Outcomes

Administering Audiological Testing

Become proficient in the administration of standard audiological testing in adults and older children.

Hearing Tests and Measurements

Demonstrate a theoretical and practical knowledge of hearing tests and measurements in the field of communicative disorders.

Hearing's Role in Communication Disorders

Demonstrate an understanding of the role of hearing and hearing disorders to the broader area of communication disorders.

Top

Aural Rehabilitation

Basic principles of hearing assessment and aural rehabilitation in children from birth to eight years.

COMD 442

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	COMD 438
Taught	Fall, Winter

Course Outcomes

Aural Rehabilitation

Define aural rehabilitation and explain why the service is critical for those who have a hearing impairment.

Impact of Psychosocial Aspects of Hearing Loss

Discuss the psychosocial aspects of hearing loss, including the impact on the individual and the family.

Diagnostic Procedures in AR Program

Describe the diagnostic procedures needed as part of a comprehensive AR program, including the diagnosis of hearing loss and rehabilitation by means of amplification, cochlear implants, and other assistive devices.

Top

Professional Practices

Overview of issues related to clinical practice in public schools and other settings.

COMD 450

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	COMD 350
Recommended	ComD 351.
Taught	Fall, Winter

Course Outcomes

Representing BYU and the Church

Students will learn the importance of being positive representatives of BYU and the Church of Jesus Christ of Latter-day Saints and will demonstrate their understanding by behaving in an ethical and professional manner when interacting with other professionals, clients, caregivers, faculty, staff, fellow students, and guest speakers. Students will write a one page reaction paper to document their understanding of professional integrity, religious integrity and what it means to represent BYU.

Applying Professional Behavior and Leadership

Students will apply professional behavior and leadership skills in their daily lives to improve their relationships with family, friends, fellow students, faculty, staff, ward members, and others. Students will write a one-page reaction paper to demonstrate their understanding of the importance of professional behavior as it relates to leadership.

Worthiness and Gospel Principles

Students will discover for themselves how their personal worthiness and commitment to the principles of the gospel of Jesus Christ will prepare them to be competent and confident professionals. Students will write a one-page reaction paper to demonstrate their understanding of the Honor Code and how it relates to potential cheating in this class.

Applying Contemporary Professional Issues

Students will demonstrate knowledge of contemporary professional issues through class discussion, class writings, role-plays, out-of-class writing assignments, quizzes and other application activities.

Editing and Improving Written Communication

Students will write two Diagnostic reports and will learn to value the editing process as a means to improve written communication by a) participating in a peer review b) working closely with a writing TA c) students will be required to revise reports based on TA feedback

Readings

COMD 493R

Hours	0.5 - 2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Topic Mastery

Students will demonstrate an advanced level of knowledge in a chosen specialty area.

Breadth of Knowledge

Students will explain relationships between key concepts in a specialty area.

Field Experience in Communication Disorders

Supervised experience in a clinical or educational service-delivery setting under the direction of a faculty member.

COMD 495R

Hours	1.0 - 2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	ComD faculty sponsorship.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Reflect on experiences

The students will reflect on and interpret internship experiences.

Range of skills

The students will apply a significant range of skills and abilities in a professional setting

Knowledge to practice

The students will put into practice the knowledge and theories they have learned in university courses in a professional setting.

Top

Mass Communication and Society

Historical and modern roles of mass media in society, emphasizing media effects on individuals and institutions.

COMMS 101

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Independent Study also.

Course Outcomes

Become Professional Media Thinkers

Students should be able to articulate the roles of communicators in their various professions.

Professional Expectations

Students should be acquainted with professional expectations such as meeting expectations.

Media in Society

Students should understand the history and role of professionals and institutions, whose media messages impact society.

Critical Thinking

Students should be able to think critically about complex issues related to media and society.

Diversity

Students should understand media coverage of multicultural and international peoples. Issues include fairness, accuracy and sensitivity to groups, as well as how media coverage promotes or distorts understanding between different groups and cultures.

Communication Skills

Students should become proficient communicators by writing in clear, accurate, fair, compelling and--where appropriate--persuasvie ways and by making smooth and compelling verbal presentaitons.

Cultural Dimensions

Students should be able to critique the organizational, economic and social constraints on media.

Top

Introduction to Advertising

Principles of advertising; critical evaluation of its role and value in American society. Experience in writing and creating ads for all media.

COMMS 230

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Strategy

Students will learn to communicate effectively with their audiences through the understanding and application of advertising strategy.

Team Work

Students will learn to act professionally by working in advertising agency teams, presenting their campaigns, and interacting with client representatives.

Principles of Advertising

Students will be scholars of the mass communication process by understanding the history of advertising, the concepts of advertising theory, and the creation and implementation of advertising strategy.

Ethics

Students will apply Gospel-centered values as they learn to create and develop advertising strategy that is ethical and reflects a sensitivity of diversity.

Top

Introduction to Public Relations

Philosophy and practice of public relations in business, government, education, and other institutions. Study of publics, media, methods, press relations, and publicity.

COMMS 235

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer Contact Department

Course Outcomes

Public Relations Fundamentals

Students will be introduced to the professional field of public relations, its history, theory and principles.

Public Relations Strategy

Students will learn the basic skills in the practice of strategic planning and implementation in public relations.

Ethical and Legal Behavior

Students will learn appropriate legal and ethical behavior in the field of public relations.

Diversity in Public Relations

Students will be exposed to issues of diversity in the public relations professio

History of Public Relations

Students will recognize the historical development of public relations.

Public Relations in Business and Society

Students will recognize the role of public relations in business and society.

Public Relations Practice and Theory

Students will establish a theoretical foundation for various practices of public relations and decision making.

Public Relations Process

Students will be able to explain the four-step public relations process of research, planning, communication and evaluation and apply the process to a public relation case.

Identifying and Addressing Key Public

Students will define key publics and explain how to identify and address them.

Effective Public Relations Practice

Students will understand the skills necessary for the effective practice of public relations, including professional writing skills, strategic thinking, planning, organization and crisis management.

Public Opinion and the Media

Students will understand how organizations work with the media and the crucial role of media in forming public opinion.

Introduction to Communications Studies

Survey of mass communication theory and research; historical and philosophical development of communication theory.

COMMS 238

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Pre-communications status.
Taught	

Course Outcomes

Critical Thinking

Students will demonstrate critical and independent thinking related to the role of communication and society.

Communications Theory and Application

Students will have a deeper understanding of theories and know how to apply them in practical situations.

Inquiry Methods

Students will be able to discuss methods for communications inquiry.

Niche Building

Students will continue to build their own niche within the field and recognize the value of other approaches.

Top

Introduction to News Media

Theories and principles of journalism; critical evaluation of journalists' and news organizations' role and value in societies they serve.

COMMS 239

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer Contact Department

Course Outcomes

Journalism Fundamentals

Students will be able to define the characteristics, purposes, problems, and potential of journalism.

Fundamentals

Students will be able to define the characteristics, purposes, problems, and potential of journalism.

Social Media

Students will demonstrate an ability to deploy social media technologies for the purposes of newsgathering, distribution and discourse.

Social media

Students will demonstrate an ability to deploy social media technologies for the purposes of newsgathering, distribution and discourse.

Professional Conduct

Students will articulate their own personal code of conduct for best practices of journalism.

Professional conduct

Students will articulate their own personal code of conduct for best practices of journalism.

Historical Context and Role

Students will understand the historical context of journalism's evolution and how that history has shaped contemporary practice and the role it plays in a democracy.

Historical context and role

Students will understand the historical context of journalism's evolution and how that history has shaped contemporary practice and the role it plays in a democracy.

Diversity

Students will understand how drawing from a diversity views-whether based on race, gender, or culture-contributes to more complete and accurate reportage.

Diversity

Students will understand how drawing from a diversity views—whether based on race, gender, or culture—contributes to more complete and accurate reportage.

Top

Media Ethics, Law and Responsibility

Introduction to First Amendment history and press freedom, law, and theory; media regulation and policy; relationship between law and ethics; key ethical issues in professional communications.

COMMS 300

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	Fall, Winter, Spring, Summer Contact Department

Course Outcomes

Legal Boundaries of Appropriate Use

Students will be able to practice communication within legal boundaries by employing appropriate use of others' work (in attribution, copyright, trademarks, etc.).

Legal Constraints and Defenses

Students will be able to practice communication within legal boundaries by demonstrating an ability to identify legal constraints and defenses that shape mass media messages.

Free Speech Laws and Statutes

Students will be able to practice communication within legal boundaries by writing and constructing messages that meet the laws and statutes applied to free speech.

First Amendment: Press and Speech

Students will demonstrate they value freedom of speech in the marketplace of ideas by knowing how First Amendment rights extend to press and speech.

Historical Development of Free Speech

Students will demonstrate they value freedom of speech in the marketplace of ideas by understanding the historical development of free speech.

Legal and Moral Limits of Free Speech

Students will demonstrate they value freedom of speech in the marketplace of ideas by recognizing the legal and moral limits of free speech.

Current Issues in Free Speech

Students will demonstrate they value freedom of speech in the marketplace of ideas by applying the concepts underlying this principle to current issues.

Preserving Freedom of Speech

Students will demonstrate they value freedom of speech in the marketplace of ideas by by showing a commitment to preserving freedom of speech, even when it may be contrary to majority views, opinions, or values.

Ethical Issues

Students will be able to demonstrate sensitivity to the ethical issues of their practice by becoming familiar with prominent cases that demonstrate ethical issues in the communication industries.

Professional Values and Ethical Behavior

Students will be able to demonstrate sensitivity to the ethical issues of their practice by identifying professional values that contribute to ethical behavior.

Ethical Complications in Professional Practice

Students will be able to demonstrate sensitivity to the ethical issues of their practice by discerning possible ethical complications in professional practice.

Addressing Ethical Concerns in Practice

Students will be able to demonstrate sensitivity to the ethical issues of their practice by defining a communications situation that addresses the ethical concerns of alternative actions or decisions.

Ethics Theory and Application

Students will be able to exercise moral reasoning when faced with ethical dilemmas by applying principles and theories of ethics to current issues.

Moral Reasoning and Ethics

Students will be able to exercise moral reasoning when faced with ethical dilemmas by articulating the values that underline their ethical framework.

Ethics and Gospel-Centered Values

Students will be able to exercise moral reasoning when faced with ethical dilemmas by resolving ethical dilemmas using moral reasoning based on Gospel-centered values.

Mass Media History and Philosophy

Historical and philosophical development of today's media. Approaches may include theories of media change, social responsibility, economic factors, and influential pioneers.

COMMS 301

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major or minor status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

American Mass Media History

Students will understand how the technical, professional, and societal development of American mass media influenced current media philosophy.

American Media and Society

Students will understand the relationship between the development of American media, freedom of expression, and American society.

Contributors to American Media

Students will recognize the men and women who contributed to the development of American mass media.

Diversity

Students will gain an understanding of gender and race in relation to both the development and effect of mass media in American history.

Top

Popular Culture and Media

Impact of new and traditional media on popular culture. Approaches may include media criticism and cultural theories on the artifacts and drivers of cultural values.

COMMS 302

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major or minor status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Recognizing Pop Culture

Students will develop skills necessary to better recognize the pop culture atmosphere in which they live.

Pop Culture Semiotics

Students will learn how to use theory to analyze and deconstruct semiotic signs of pop culture.

Critical Analysis and Writing

Students will be able to think and write critically about issues of pop culture.

Research Methods for Journalism

Qualitative and quantitative information-gathering strategies and techniques: interviewing, use of surveys and public records; online information gathering and data base analysis.

COMMS 308

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Major status.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Research Methods

Students will demonstrate ability to employ various research methods to collect and analyze quantitative data and qualitative information for news. Such methods include, but are not limited to court and other public documents, surveys, and computer databases.

Ethical Research

Students will apply ethical standards to assess data and information for accuracy, reliability, and relevance.

Freedom of Information

Students will understand and defend the value of freedom of information and freedom of speech in the marketplace of ideas.

Quantitative Evaluation

Students will employ research techniques and to contextualize, evaluate, and organize data and information. Such methods include, but are not limited to the use of computer spreadsheets and databases.

Top

Writing Branded Content

Principles and practices of writing persuasive content for multiple media platforms.

COMMS 310

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	Major status; Comms 300 or concurrent enrollment.
Taught	Fall Term 2, Winter Term 2, Spring, Summer

Course Outcomes

Producing persuasive content

Students will understand how to employ strategies to create compelling and persuasive content for target publics or audiences.

Packaging content

Students will research, produce, and package stories that promote brands or organizations.

Writing headlines

Students will write headlines that capture the attention of target audiences or publics.

Top

Writing for News Media

Principles and practices of writing news content for multiple media platforms.

COMMS 311

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	Major status; Comms 300 or concurrent enrollment.
Taught	Fall Term 2, Winter Term 2, Spring Contact Department, Summer Contact Department

Course Outcomes

Grammar and style

Students will demonstrate proficiency of proper grammar and AP Style to clearly and concisely write news content.

Story structures

Students will organize news accounts in inverted pyramid and other appropriate news styles.

Ethics, Law, and Diversity

Students will understand the ethical and legal implications of their work in the context of a global and diverse society.

Top

Digital Media Production

Practical application of visual and aural multimedia storytelling; acquisition, editing, and distribution of digital audio and video.

COMMS 312

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	Major status; Comms 300 or concurrent enrollment.
Taught	Fall Term 2, Winter Term 2, Spring Contact Department, Summer Contact Department

Course Outcomes

Video and Audio Acquisition

Students will employ fundamental techniques to capture audio and video.

Video and Audio Editing

Students will demonstrate a basic ability to edit audio and video for various uses in the profession.

Top

Media Design and Graphics

Foundational principles and theories of visual communication; use of graphics to communicate information and support persuasive appeals.

COMMS 313

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	Admission to the major.
Taught	Fall Term 2, Winter Term 2, Spring Contact Department, Summer Contact Department

Course Outcomes

Design Theory

Students will understand and apply design theory to the critique of media design and graphics.

Graphics creation

Students will create print and digital media messages and graphics.

Ethics, Law, and Diversity

Students will understand the ethical and legal implications of their work in the context of a global and diverse society.

Top

Social Media Management

Overview of major social media platforms, including best content practices for each; introduction to social media analytics and optimizations.

COMMS 314

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	Admission to the major.
Taught	Fall Term 2, Winter Term 2, Spring Contact Department, Summer Contact Department

Course Outcomes

Message dissemination

Students will be able to effectively disseminate content through social media channels.

Analytics

Students will be able to use analytic tools to measure social media engagement.

SEO Strategies

Students will be familiar with SEO (search engine optimization) strategies.

Media Entrepreneurship

Basic concepts and principles of emerging and evolving media business models, including effects of disruptive technologies; the role of consulting and practices of freelancing.

COMMS 315

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	Admission to the major.
Taught	Spring Contact Department, Summer Contact Department

Course Outcomes

Entrepreneurial principles

Students will recognize and describe principles of media entrepreneurship.

Theories and characteristics of the mass communications market

Students will define and elaborate on theories of the marketplace, startup culture, and digital innovation.

Media Performance

Theory and practice of presenting information for video, audio, or before clients. May include pitches, proposals, news and sports presentations.

COMMS 316

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	Admission to the major.
Taught	Spring Contact Department, Summer Contact Department

Course Outcomes

On camera and mic performance

Students will learn to clearly present information on camera, on microphone, and before audiences.

Approaches to media performance

Students will practice presenting news, sports, pitches, or client presentations.

Advertising Research Methods

Quantitative research methods used in marketing and advertising; the research process; planning, designing, and conducting studies; analyzing results using appropriate methodologies.

COMMS 317

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Major status.
Taught	Fall, Winter, Spring, Summer Contact Department

Course Outcomes

Research Methods

Students communicate effectively by knowing and applying appropriate research methods that will lead to greater understanding of target market characteristics.

Scholarly Analysis

Students will be scholars of the mass communication process by applying research methods, analyzing data, and reaching conclusions that relate to client needs.

Team work

Students will act professionally by working in research teams, presenting their research findings, and interacting with clients.

Ethics

Students will apply Gospel-centered values as they follow prescribed research protocol.

Top

Public Relations Research and Measurement

Research methods and analysis critical to developing strategic public relations and measuring its effectiveness, emphasizing focus group and survey approaches with qualitative and quantitative statistical analysis.

COMMS 318

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Major status.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

The Value of Research

Students will appreciate the value of research to strategic public relations.

PR Research and Strategy

Students will understand the role of research in the strategic public relations process.

Ethical and Responsible Research

Students will understand how to conduct research in a way that is ethical and responsible.

Research Terminology

Students will use the terminology of research, especially related to public relations research and measurement.

Research Methodology

Students will choose the appropriate research method to answer research questions.

Focus Groups

Students will conduct a focus group and analyze qualitative data.

Survey Writing

Students will write a survey.

Sampling

Students will understand sampling strategies and be able to draw a random sample.

Survey Execution

Students will be able to conduct a survey.

Quantitative Measurement

Students will understand different levels of measurement related to quantitative research methods.

Data Analysis and Interpretation in SPSS

Students will be able to analyze and interpret survey results using SPSS.

Guidelines for Ethical Research

Students will understand and abide by the guidelines for conducting ethical research.

Writing and Presentation

Students will write and present research using appropriate style and format.

Effective Group Collaboration

Students will exhibit behavior that is conducive to a group/team project task.

Top

Research in Communication

Procedures and design considerations for studying media messages, audiences, and effects. Emphasizes survey and focus group approaches to data collection and analysis.

COMMS 319

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Major status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Instrument Design

Students will design a survey instrument that meets the scientific criteria of reliability and validity.

Sampling

Students will know how to take an appropriate sample.

Statistical Analysis

Students will perform basic univariate and multivariate statistical analyses.

Research

Students will produce clear, comprehensive research reports for professional and scientific use.

Focus Groups

Students will design, plan, and implement a focus group.

Qualitative Inquiry

Students will analyze and interpret findings using appropriate qualitative methods of data inquiry.

News Reporting

Research and reporting skills. Database retrieval, interviewing, and gathering of audio, video, and still images. Beat reporting for newspapers and online media. Lab required.

COMMS 321

Hours	3.0 Credit, 2.0 Lecture, 5.0 Lab
Prerequisites	COMMS 211; or COMMS 310 & COMMS 311
Taught	Fall, Winter, Spring, Summer Contact Department

Course Outcomes

Information Gathering

Students will gather relevant and timely information for use in news content.

Creation of Journalistic Content

Students will employ journalistic style in creating news stories for targeted print and online audiences.

Professional Comportment

Students will develop ability to work well with others in a deadline-driven mass media environment.

Journalistic Values

Students will apply behave ethically and report fairly, including a diversity of voices.

Feature Writing

Creating, writing, and pitching articles for nonfiction magazine markets; effective writing methods; analysis and criticism of articles.

COMMS 324

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	COMMS 321; Comms 308 or concurrent enrollment.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Feature Writing

Students will create meaningful article ideas and pitch them for niche and general audiences.

Storytelling

Students will learn and apply feature-style storytelling techniques in compelling ways.

Ethical Norms

Students will apply personal ethics and professional norms in reporting and writing.

Freelance Skills

Students will learn business and legal principles associated with freelance writing.

Diversity

Students will learn to include in their writing voices from diverse backgrounds and cultures.

Broadcast Media Reporting

Principles and techniques of broadcast and online news reporting. Includes recording and editing reports of government, courts, and other institutions. Lab includes reporting for daily television and radio newscasts.

COMMS 325

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	COMMS 311 & COMMS 312; or COMMS 211 & COMMS 322; or COMMS 211 & COMMS 312; Comms 308 or concurrent enrollment.
Taught	Fall, Winter, Spring, Summer Contact Department

Course Outcomes

Newsgathering

Students will gather relevant and timely information for use in news content.

Content Creation

Students will employ journalistic style to create news stories for targeted broadcast audiences.

Professional Comportment

Students will develop the ability to work well with others in a deadline-driven mass media environment.

Ethics and Diversity

Students will apply behave ethically and report fairly, including in their reportage a diversity of voices.

Top

Special Topics in Broadcasting

Includes radio arts, specialty reporting, documentary production, and sports broadcasting.

COMMS 327R

Hours	3.0 Credit, 2.0 Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Variable outcome

Outcomes for this course depend upon the topic being taught and will be published in the syllabus.

Backpack Journalism

Mobile media production, including field reporting, editing, and distributing news for multiple platforms.

COMMS 328

Hours	3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	Departmental consent.
Taught	

Course Outcomes

Newsgathering

Students will use consumer and prosumer grade digital technology to gather video, audio, and still images.

Editing and Producing

While in the field, students will write news and edit video, audio and still images.

Social Media

Students will use social media to gather and disseminate news stories.

Ethics and Diversity

Students will behave ethically and report fairly, including voices that reflect the diversity of the community.

Opinion Writing

Function of editorials, columns, commentaries, and reviews in the mass media.

COMMS 329

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Open enrollment.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Conceptualization

Students will demonstrate an understanding of the process of research, writing, and revising columns and opinion pieces.

Role of opinion

Students will understanding the role of opinion in journalism.

Ethics

Students will understand the ethical boundaries of opinion writing.

Writing

Students will be able to write clear and persuasive editorial copy.

Diversity

Students will consider diversity of thought, representing gender, race, class, and culture.

Top

Creating Advertising Concepts - Portfolio 1

Basic consumer advertising; copywriting, design, and layout developed from creative strategies. Solving creative problems.

COMMS 330

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status; software proficiency in InDesign, Adobe Photoshop, and Adobe Illustrator demonstrated by portfolio review.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Message Creation

Students will communicate effectively by creating messages that are salient to their audiences.

Teamwork

Students will act professionally by working in creative teams and presenting their original advertising concepts to selected audiences.

Analysis

Students will be scholars of the mass communication process by critically analyzing and evaluating their own work and other students' work.

Ethics

Students will apply Gospel-centered values as they learn to create appropriate messages for diverse audiences.

Top

Creating Advertising Concepts - Portfolio 2

Advanced consumer advertising: copywriting, design, and layout.

COMMS 331

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	COMMS 330; Software proficiency in InDesign, Adobe Photoshop, and Adobe Illustrator demonstrated by portfolio review.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Message Creation

Students will communicate effectively by creating compelling advertising for multiple venues.

Teamwork

Students will learn to act professionally by working in creative teams and presenting their original advertising concepts to industry professionals.

Analysis

Students will be scholars of the mass communication process by critically analyzing and evaluating their own work, other students' work, and industry awarded work.

Ethics

Students will apply Gospel-centered values as they learn to create appropriate messages for diverse audiences.

Top

Marketing Media Planning and Strategy

Media planning, theory, and practice in context of the marketing mix. Application of computer-based models as aids to media decisions. Writing of marketing- based media plans. Case study approach to both print and broadcast media.

COMMS 332

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Buying & Planning Strategy

Students will learn to communicate effectively with their audiences through the understanding and application of media buying and planning strategy.

Teamwork

Students will act professionally by working in media teams, presenting their media campaigns, and exhibiting literacy in the language of media planning and buying.

Theory

Students will be scholars of the mass communication process by understanding media concepts, advertising theory, current trends in media use, and the use of media industry databases.

Ethics & Diversity

Students will apply Gospel-centered values as they learn to create and develop media strategy that is ethical and reflects a sensitivity to diversity.

Top

TV Commercial Production

Discussing and applying television commercial production principles; creating and executing TV commercial concepts.

COMMS 335

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status or instructor's consent.
Recommended	Comms 330.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Scripting

Students will be able to conceptually design and write commercial television scripts.

Production

Students will learn to apply commercial production principles for television using current technology.

Ethics & Diversity

Students will develop media that is ethical and reflects a sensitivity to diversity.

Strategic Planning and Problem Solving

Cases selected from wide range of actual public relations problems confronting business, government, education, and other institutions. Focus on strategic planning matrix.

COMMS 336

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Analysis

Students will enhance their ability to think analytically and strategically about public relations plans.

Writing

Students will reinforce the need for succinct, clear, accurate, and grammatically correct writing.

Professional Practice

Students will increase their understanding of the professional practices and responsibilities of public relations.

Social Responsibility, Ethics, and Diversity

Students will increase their sensitivity to issues of social responsibility, ethics, and diversity.

Top

Advertising Account Management

Managing advertising agency accounts, including budgets, writing, new business pitches, and relationships with clients.

COMMS 337

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Writing and Presentation

Students will communicate effectively with their audiences by enhancing their practical business writing and presentation skills.

Team work

Students will act professionally by working in advertising agency teams, managing new business, and creating a resume and portfolio appropriate for the advertising industry.

Principles of Advertising

Students will be scholars of the mass communication process by understanding the history of account management, the concepts of advertising theory, and by immersing themselves in the current world of advertising.

Ethics

Students will apply Gospel-centered values as they learn to manage client expectations ethically.

Top

Media Sales and Promotion

Fundamentals of media sales process. Theory and application of persuasion relating to media sales.

COMMS 345

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Business practices

Students will have an understanding of good practices that are grounded in client relationships and based on trust and integrity.

Sales

Students will have an understanding of the requirements and expectations to be successful as a media salesperson.

Process

Students will have an understanding of the sales process, including prospecting, proposing, negotiating and closing the sale.

Process

Students will have an understanding of the emotional and logical process required as a media salesperson.

Media and Their Audiences

Understanding media content and channels empowering and improving media consumption and interpretation. Approaches may include new technology, social media, consumer behavior, media criticism, and media literacy.

COMMS 351

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major or minor status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Media Message Delivery

Students will think critically to have an understanding of the conditions that influence and shape media distribution channels.

Theoretical Grounding

Students will understand relevant communication theory to explain various problems of media and their audiences.

Media Message Consumption

Students will think critically to have an understanding of technological, economic, or cultural conditions that influence the consumption and interpretation of media messages.

Diversity

Students will think critically about the portrayal of minority voices in domestic and global contexts.

Top

Communication Management Principles and Theory

Management principles and theory, emphasizing responsible management benefiting organizations and their stakeholders. Approaches may include crisis communication, media or agency management, and programming.

COMMS 360

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major or minor status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Management Actions and Culture

Students should identify how to enhance their personal contribution to an organization by understanding management actions and culture.

Management Tools and Practices

Students should understand various management activities in an organization and learn to apply related technology, tools and practices.

Effective Group Work

Students should learn to work effectively in groups within an increasingly complex organizational environment.

Media Economics

Students should think critically to understand media economics, including the impact of changes in the economy on media organizations and strategic decisions.

Leadership Styles and Approaches

Students should understand leadership styles and approaches to people management. Define a set of leadership principles that you will practice in your career based on your values, ethics and philosophy.

Top

Photojournalism

Shooting, processing, selecting, and preparing images for use in various news platforms.

COMMS 365

Hours	3.0 Credit, 2.0 Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Evaluating Photographs

Students will judge newsworthiness of photographic images.

News Photography

Students will effectively document news subjects with photographic images.

Storytelling

Students will use photographic images and audio to tell stories.

Ethics & Law

Students will behave ethically, professionally and within legal boundaries.

Diversity

Students will take care to represent diversity in photography of subjects.

Special Topics in Communications

Subject matter may vary. Specific topics emphasizing general issues related to all mass communication.

COMMS 370R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Major or minor status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Outcomes specific to topic

Students will be given learning outcomes that are specific to the topic being taught.

Top

International Media Systems

Comparison of media systems in countries and regions outside the United States. Approaches may include media systems analysis, normative theories of the media, and cultural values and norms.

COMMS 381

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Communications or international relations major or minor status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Communication, Modernization, and Development

Students will learn the role of communication in modernization and development.

Media Systems History

Students will learn the history and development of media systems in nations around the world.

Media Systems and International Events

Students will learn the role of media systems in various countries and some international events that effect them.

International Communication

Students will learn the barriers and challenges to development and communication in different countries or regions.

Conflict and Oppression of Communication

Students will learn about the conflict and oppression of freedom of communications.

Communication Challenges

Students will appreciate the communication challenges facing different peoples.

Diversity and Communication

Students will experience increased respect for diversity of cultures and of the forms of communication.

Freedom of Expression

Students will recognize freedom of expression as a basic (yet relatively rare) human right.

Top

Issues in Global Communication

Issues relating to communicating in a global village. Approaches may include global information and policy, cultural imperialism, intercultural interaction, and multinational communication strategies.

COMMS 382

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Communications or international relations major or minor status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Global Mass Communications

Students will explore the phenomena of global mass communications, focussing on the role of international communications in the modern world.

Vehicles, Sources, and Audiences of International Communication

Students will examine the diversity of vehicles, sources, and audiences of global communication, as well as the motivations of individuals, governments, and groups involved in the dissemination of information internationally.

21st Century Changes in Global Communication

Students will analyze global change in the Twenty-first Century, including the various instruments for international communication.

Ethics and Diversity in International Communication

Students will discuss ethics in international communication, including the problems of cultural communication between ethnic groups and diverse nationalities.

Socio-Political Challenges and International Communications

Students will examine some of the major political and humanitarian challenges of our times and the impact of international communications upon them.

Technology Development and International Communication

Students will study the technological developments that are making the flow of international information faster and more open, as well as the impediments and obstructions with which some governments and individuals attempt to impede that flow.

Editing for News Media

Management and editing of newsflow in digital-first environment. Lab includes managing and editing news platforms.

COMMS 384

Hours	3.0 Credit, 2.0 Lecture, 6.0 Lab
Prerequisites	COMMS 308 & COMMS 321; or COMMS 308 & COMMS 328
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Platform management

Students will manage content on multiple digital platforms.

Ethical Management of Newsflow

Students will demonstrate ability to recognize and edit news content to avoid ethical pitfalls (such as plagiarism and fabrication) and legal problems (such as defamation).

Visual Storytelling

Students wil develop and employ skills using industry standard software to engage in visual storytelling.

Diversity

Students will ensure editorial contect reflects a diversity of viewpoints and is representatitve of all people.

Television News Producing

Theory and practice of producing and presenting information for television. Role of television news in society, nature of audiences, production techniques, and TV news management. Lab includes producing daily television newscast.

COMMS 385

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	COMMS 308 & COMMS 325; or COMMS 308 & COMMS 328
Taught	Fall, Winter, Spring, Summer Contact Department

Course Outcomes

Analysis of Newscasts and Audiences

Students will critically analyze newscasts and their audiences.

Diversity

Students will ensure editorial contect reflects a diversity of viewpoints and is representatitve of all people.

Newsroom Leadership

Students will demonstrate excellent leadership and team-building skills in a deadline-driven newsroom environment.

News Producing

Students will use editorial judgment, broadcast news writing and editing skills, and television producing methods to produce a 30-minute, live television newscast.

Technology

Students will use industry-standard editing and production tools to produce a daily 30 minute newscast.

News Editing

Students will demonstrate an ability to recognize and edit broadcast news content to avoid ethical pitfalls (such as plagiarism and fabrication) and legal problems (including defamation).

Publication Graphics and Production

Layout and graphics for publications. Contemporary practices in production.

COMMS 388

Hours	3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	Departmental consent.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Visual Communication

Students will identify and utilize industry terms, theories, and models to analyze and discuss visual communication.

Design

Students will create printed and electronic designs that are clear, relevant, and compelling.

Production

Students will demonstrate a mastery of production techniques, using industry-standard software.

Ethics and Legal

Students will employ appropriate ethical and legal use of others' work, including photos, artwork, trademarks, etc.

Top

Student Media Labs

Student-run media labs such as the Advanced Advertising Lab, Bradley Agency, Eleven News, and Daily Universe.

COMMS 390R

Hours	1.0 Credit, 1.0 Lecture, Arr Lab
Prerequisites	Appropriate introductory course (Comms 230, 235, or 239); lab advisor's consent.
Note	Cannot be combined with paid position in the same lab.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Account experience

Students will demonstrate an ability to contribute to projects managed by the Bradley Lab, Ad Lab, Universe and ElevenNEWS.

Top

International Media Studies Abroad

Study Abroad course emphasizing media and culture of region selected.

COMMS 395R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Reflection

Students will reflect on and process an IMS abroad experience, relating it to the a communications profession.

Diversity

Students will reflect on the role racial and cultural diversity plays in communications.

Top

Communications Practicum

Practice and projects in communication.

Hours	1.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Instructor's consent and approval of task or projects.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Practicum

Students will meet practicum outcomes for a specific project or activity as specified the instructor.

Projects in Communications

Projects in communication studies.

COMMS 398R

Hours	0.5 - 4.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Junior standing and sequence coordinator's consent. Project approval required before registration.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Projects

Students will meet outcomes for a specific project or activity as specified the instructor.

Top

Academic Internship

Professional field experience.

COMMS 399R

Hours	1.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Major status; departmental consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Experiential learning

Students will use coursework knowledge in a practical, professional setting with the support of a practitioner and faculty advisor.

Media and the First Amendment

Advanced understanding of media law, policy, and regulation of free speech and press. Approaches may include Freedom of Information, rights of press, government control, and legal precedents regarding the First Amendment.

COMMS 406

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	COMMS 300; Major status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Freedom of Speech and Social Issues

Students will gain increased appreciation of freedom of speech in the marketplace of ideas and apply this concept to current social issues.

Social Advocacy and Government Policy

Students will understand the importance of social advocacy in a democracy to reinforce the concept that both media and citizens have unique opportunities to influence the direction of both government policies and public opinion.

Critical Thinking

Students think critically about the relationship between mass media and society and articulate the positive and negative effects of mass media practices on society.

Consumer Communication Interaction

Students will become more professional by understanding the complex interaction between consumers (public opinion), the news media, the legal process, and lobbying by corporations, associations, and other advocacy groups.

Professional Communication Skills and Strategy

Students will learn to apply professional and strategic communications skills to social advocacy situations.

Top

Media Effects

Effects resulting from the interaction between media and members of society. Approaches may include self-image, sterotypes, violence, and other social constructs and behaviors involving media consumption.

COMMS 411

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major or minor status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical and Independent Thinking

Students will demonstrate critical and independent thinking related to the role of communicaiton and society.

Media and Social Systems

Students will have a deeper, theoretical understanding of the impact of media on social systems.

Top

Media Advocacy and Social Change

Communication principles, theories, and approaches applied to effect social change. Approaches may include public policy, grass roots advocacy, social marketing, and social movements.

COMMS 416

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major or minor status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Social Advocacy and Government Policy

As citizens, students will better understand the importance of social advocacy in democracy and understand that both media and citizens have unique opportunities to influence the direction of government policies as well as public opinion.

Lifelong Learning and Responsible Media Use

In the process of becoming life-long learners, students will regularly follow news media coverage of current events to gain an increased appreciation of freedom of speech in the market place of ideas and how to responsibly utilize it with current social and political issues.

Effects of Mass Media on Society

As voters, students will be able to think critically about the relationship between mass media and society and be able to articulate the positive and negative effects of mass media practices on society, especially as those effects relate to objectivity in political matters.

Consumer Communication Interactions

Students will become more professional by comprehending the complex interaction between citizens (public opinion), the news media, the legal process and lobbying by corporations, associations and other advocacy groups.

Social and Political Advocacy

Students will learn to make significant contributions as involved citizens by being able to ethically apply to social and political advocacy situations the communications skills they are now learning.

Advanced Print Reporting

News coverage of government, courts, education, business, international, or legal issues.

COMMS 420

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	COMMS 384
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Source Evaluation

Students will demonstrate a high-level ability to evaluate the relative value and reliability of news information coming from a variety of sources, including anonymous and other sources.

Enterprise Journalism

Students will understand the pitfalls and merits of investigative journalism and apply ethical standards in producing news reporting that benefits the community.

Writing

Students will demonstrate professional-level writing skill in researching, writing and producing journalism content that has constructive purpose, depth, and perspective.

Diversity

Students will ensure editorial contect reflects a diversity of viewpoints and is representatitve of all people.

Public Relations Writing and Production

Professional public relations writing and editing in a variety of formats as used in public relations applications.

COMMS 421

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	COMMS 211 & COMMS 321 & COMMS 336; or COMMS 310 & COMMS 321 & COMMS 336; software proficiency in InDesign, Adobe Photoshop, Flash, and Dreamweaver demonstrated by portfolio review.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Writing and Design Mastery

Students will master the basics of writing and design, including style, punctuation, spelling, grammar, and layout across a range of communications formats and tactics.

Print and Media Tactics and Formats

Students will gain experience in a variety of tactics and formats for print, electronic and social media and learn the standards, as well as the benefits and limitations of each.

Critical Thinking, Strategy, and Analysis

Students will develop and demonstrate in-depth thinking, strategic planning, audience analysis and targeting of key messages on all assignments. By the end of the semester, each student will have experienced writing in a variety of formats for a variety of media.

Top

Newsroom Leadership

Advanced concepts in newsroom management, ranging from editorial conceptualization and news judgment to copy editing, headline writing, and page design. Lab includes fulfilling senior editing positions.

COMMS 422

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	COMMS 384
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Leadership and management concepts

Students will supervise newsroom personnel to demonstrate advanced leadership and knowledge of newsroom management concepts.

News Judgment

Students will demonstrate critical thinking and advanced news judgment related to story selection and approval of copy.

Headlines and page design

Students will demonstrate a mastery of headline writing and basic page design.

Ethics and law

Students will demonstrate mastery of editing news content to avoid ethical pitfalls, such as plagiarism and fabrication, and legal problems, including defamation.

Diversity

Students will ensure editorial content reflects a diversity of viewpoints and is representative of all people.

Account Planning Management

Development and execution of a comprehensive strategic advertising research program, including data collecting, interpretation, field investigating, audience analysis, and strategy development.

COMMS 432

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	COMMS 211 & COMMS 317; or COMMS 310 & COMMS 317; major status.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Account Planning

Students will communicate effectively with their audiences through understanding through the principles of account planning and applying them to clients' advertising problems.

Client Presentations

Students will act professionally by conducting qualitative research with participants and working directly with client representatives.

Research

Students will be scholars of the mass communication process by applying appropriate qualitative research methodologies and protocols and developing the creative brief.

Ethical research

Students will apply Gospel-centered values as they follow prescribed research protocol.

Advanced Advertising Concepting - Portfolio 3

Capstone course in creating consumer advertising concepts, copywriting, design, and layout. Emphasizes finished portfolios.

COMMS 433

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	COMMS 331
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Portfolio Preparation

Students will prepare a portfolio worthy of positive reviews by top creative directors in the country's best ad agencies.

Show Submissions

Students will prepare advertising materials for submission to the creative awards shows and other venues, leading to internships, scholarships and advanced career placement.

Strategic Thinking and Creativity

Students will experience a stimulating and challenging atmosphere in which to continue improving strategic thinking processes and creative skills.

Top

Media Ethics and Moral Reasoning

Advanced application of moral reasoning and understanding of ethical issues in mass communication. Approaches may include current cases and issues, professional practices, and philosophical foundations of ethics.

COMMS 480

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Comms 300 or instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Communication Ethics Fundamentals

Students will understand the moral foundations, philosophical theories and values underlying the ethics of professional communications, and the role of the media in a democratic society.

Moral Reasoning and Ethical Decision-Making

Students will develop moral reasoning skills and judgment mechanisms for informed ethical decision-making; for applying with precision, clarity, and subtlety a systematic, normative approach to the consideration, discussion and judgment of ethical dilemmas.

Assessing Moral Arguments

Students will understand and assess moral arguments.

Applied Ethics

Students will become knowledgeable about basic concepts in applied ethics such as deception, secrecy, loyalty, universality, reciprocity, etc.

Law, Ethics, and Religion

Students will understand the relationships among law, ethics, and religion.

Professional Ethics and Conduct

Students will develop a personal ethical framework and a commitment to ethical conduct as a professional communicator and as a member of society.

Top

Gender, Race, and Class in the Media

Applying critical theory to the interaction between media and underrepresented groups in society. Approaches may include stereotypes and portrayals, access to media, participation, and media ownership.

COMMS 481

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major or minor status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Diversity

Students will be able to demonstrate an understanding of and sensitivity to issues related to gender, race, ethnicity, and sexual orientation.

Inclusiveness

Students will be inclusive of diverse viewpoints and cultures in a global society.

Top

Media and World Religions

The interaction of media, world religions, and beliefs. Approaches may include media coverage and portrayal of religion, religions' use of media, conflict between the two, and communicating across religious cultures.

COMMS 482

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major or minor status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Issues in Contemporary Media and Religion

Students will critically discuss and write about contemporary media and religion issues.

Communication Practice and Theory

Students will know and apply relevant theory to communication practice and phenomena.

Diverse Issues in Media and Religion

Students will examine and appreciate diverse media and religion issues outside their own traditions.

Top

Advanced Communications Studies

Contemporary developments in communication theory, research, and practice.

COMMS 483

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	COMMS 319; or SOC 300; Comms 411 or concurrent enrollment.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Communication Issues in Contemporary Society

Students will be able to discuss, to think critically and analytically about, and to write knowledgeably about current literature and research related to communications issues in contemporary society.

Communication, Technology, and Society

Students will be able to discuss, to think critically and analytically about, and to write knowledgeably about the social role and effects of communications and communications technologies in society.

Contemporary Communications Practice

Students will be able to discuss, to think critically and analytically about, and to write knowledgeably about issues in contemporary practice of communications and other professions.

Communications Ethics and Ethical Theory

Students will be able to discuss, to think critically and analytically about, and to write knowledgeably about ethical issues that confront communicators, and ethical theory that can guide ethical decision making; the moral responsibility of professional communicators to make a positive difference within their sphere of influence.

Professional Preparation and Strategy

Students will be able to discuss, to think critically and analytically about, and to write knowledgeably about strategies for bridge-building from school to work and/or from undergraduate to graduate studies.

Top

Strategic Public Relations Campaigns

Capstone course applying communication principles to internal and external publics; fact finding, planning, and evaluating social interrelationships; major campaigns for selected clients.

COMMS 485

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	COMMS 318 & COMMS 336 & COMMS 421; Software proficiency in Flash, Dreamweaver, and Image Ready as demonstrated by portfolio review.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Public Relations Theory and Practice

Students will understand the relationship between theory and practice in public relations.

Analytical Thinking and Strategy

Students will apply analytical thinking to produce strategic and creative solutions to problems.

Synergy and Collaboration

Students will understand the value of synergy through collaboration in a group environment.

Making and Meeting Deadlines

Students will make deadlines, fulfill requirements, and meet the needs of a real-world client.

Creating Tactics

Students will produce tactics that satisfy strategic outcomes, with a critical eye to message creation and design.

Current PR Theory, Practice, and Ethics.

Students will understand current theories, practices and ethical responsibilities of public relations and gain respect for diversity of opinion and thought.

Working with Ambiguity

Students will learn to be more comfortable in working within some impost (or perhaps even occasionally unintentional) ambiguity.

Advanced Broadcast Reporting

In-depth broadcast news coverage of major public issues and trends. Formats may include daily news reports, series, and documentaries.

COMMS 486

Hours	3.0 Credit, 3.0 Lecture, 5.0 Lab
Prerequisites	COMMS 385
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Storytelling Techniques

Students will demonstrate proficiency in the techniques of visual and aural storytelling by creating advanced-level broadcast news stories.

Professional Preparation

Understanding the nature of changes in the broadcast profession, students will create portfolios of their work in order to gain employment.

Ethics

Students will employ and defend ethical principles expected in a free and diverse society.

Diversity

Students will ensure editorial contect reflects a diversity of viewpoints and is representatitve of all people.

Top

Advanced Broadcast Producing

Advanced concepts in television news producing, news judgment, audiences and newsroom leadership.

COMMS 488

Hours	3.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	COMMS 385; instructor's consent.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Newsroom Management

Students will supervise newsroom personnel to demonstrate advanced leadership and knowledge of newsroom management concepts.

News Judgment

Students will demonstrate critical thinking and advanced news judgment related to story selection and approval of newscasts.

Audience Analysis

Students will analyze news ratings, audience surveys and related scholarly research.

Ethics

Students will demonstrate mastery of editing news content to avoid ethical pitfalls (such as plagiarism and fabrication) and legal problems (including defamation).

Editing

Students will demonstrate mastery in newswriting, editing, and presentation of images for broadcast.

Diversity

Students will ensure editorial contect reflects a diversity of viewpoints and is representatitve of all people.

Technology

Students will employ industry-standard technology relevant to the dissemination of broadcast news.

Top

Strategic Advertising Campaigns

Researching, planning, budgeting, creating, and writing national advertising campaigns; writing and producing a complete advertising plan, accompanied by a formal client presentation.

COMMS 489

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	COMMS 332 & COMMS 337 & COMMS 432; or COMMS 317 & COMMS 331; or COMMS 332 & COMMS 330 & COMMS 432; Comms 433 or concurrent enrollment.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Strategy Application

Students will learn to communicate effectively with their audiences through a comprehensive applicaiton of advertising strategy.

Professional Teamwork

Students will act professionally by working in advertising agency teams, presenting their advertising campaigns, and interacting with client representatives in a competitive environment.

Advertising Theory

Students will be scholars of the mass communication process by applying the concepts of advertising theory learned in previous courses to create comprehensive advertising campaigns.

Ethics and Diversity

Students will apply Gospel-centered values as they learn to create ethical and morally responsible persuasive messages for diverse audiences.

Media Innovations Capstone

Synthesis of news media competencies gained through successful completion of directed project. Projects may include a digital media product, in-depth reportage or documentary, working prototype, market research, or scholarly work. Projects may be done individually or in groups.

COMMS 490

Hours	3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	Comms 420 or Comms 422; Comms 486 or Comms 488.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Senior project

Students will propose and complete a professional-quality project that demonstrates mastery and synthesis of competencies learned in the news media curriculum.

Collaboration

Students will demonstrate the ability to work collaboratively wit minimal supervision.

Creativity and innovation

Students will demonstrate creativity by producing an original or innovative media product.

Ethics and Diversity

Students will behave ethically and report fairly, including in their reportage a diversity of voices.

Top

Research and Readings in Communication Practice

Independent research projects and readings for communications majors.

COMMS 495R

Hours	0.5 - 4.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Senior standing and instructor's approval of projects.
Note	Projects must be approved in advance of registration.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Research and Readings

Students will meet outcomes for a specific readings and research activity as specified the instructor.

Academic Internship

Professional field experience.

COMMS 496R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Major status; prerequisites satisfied; clearance by the Communications Department.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Skills

Students demonstrate proficiency in research, writing, and technical abilities.

Professionalism

Students demonstrate professionalism by comporting themselves professionally, meeting deadlines, and demonstrating a positive attitude and high level of commitment.

Ethics

Students demonstrate ethical and legal-sound behavior and show sensitivity to diversity.

Top

Mentored Research Practicum

Conducting research in a mentored environment with a faculty-sponsored research project.

COMMS 497R

Hours	1.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Writing skills

Students will demonstrate an ability to effectively communicate research in a scholarly fashion.

Top

Exceptional Students: Principles of Collaboration

Basic principles and legislative issues in effectively communicating and collaborating with professionals, parents, and other service providers to meet needs of individuals with disabilities in inclusive educational environments. Lab.

CPSE 300

Hours	2.0 Credit, 1.0 Lecture, Arr Lab
Prerequisites	FBI fingerprint background clearance.
Taught	Fall, Winter, Spring

Course Outcomes

Learning Difficulties and Accommodations

Analyze student's learning difficulties and plan appropriate accommodations.

Special Needs Learning Characteristics

Describe learning characteristics of special needs students.

Assessment Plans and School Support

Develop assessment plans to evaluate students' progress and collaborate with school experts to support student learning.

Collaboration

Collaboration: Candidates work effectively with parents, professionals, paraprofessionals, and others in the school and community to help students with disabilities achieve their IEP goals.

Interpersonal Relations

Interpersonal Relations: Candidates work with students, parents, professionals, paraprofessionals, and others in the school and community with kindness and respect regardless of their diverse backgrounds.

Professional Practice

Professional Practice: Candidates fulfill all duties and assignments, comply with all education laws and policies, and continue to improve professional practice.

Practicum in Educational Partnerships

Collaborating with parents, professionals, and others to meet needs of individuals with disabilities in inclusive or special education environments.

CPSE 401R

Hours	1.0 Credit, 0.0 Lecture, 1.0 Lab
Prerequisites	Admission to elementary, secondary, or special education program.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Application

The students will utilize a significant range of skills and abilities in a professional setting

Top

Educating Students with Disabilities in Secondary Classrooms

Issues, policies, and methods in teaching secondary students with disabilities in general education classrooms. Lab.

CPSE 402

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Sc Ed 350 or concurrent enrollment; Sc Ed 276R or comparable major course; FBI fingerprint background clearance.
Taught	Fall, Winter, Spring

Course Outcomes

Sensitivity

Demonstrate sensitivity to individuals with disabilities.

Effects of Diversity

Describe the effects of cultural, ethnic, and language diversity on the education of individuals with disabilities

IEP

Describe the steps in the Individual Education Program (IEP) process, including Individualized Transition Plans for students aged 14-22.

Research-supported Methods

Use research-supported methods for academic instruction of individuals with disabilities including explicit instruction, learning strategies, task analysis, and active participation.

Models and Strategies of Consultation

Describe models and strategies of consultation and collaboration including co-planning and co-teaching.

Definitions and Descriptions of Legal Structure

Define special education and describe the legal structure of services for individuals with

disabilities, including the Individuals with Disabilities Education Act (IDEA).

Personal Philosophy

Develop a personal philosophy of special education which includes an understanding of the implications of Least Restrictive Environment as defined in IDEA.

Classroom Management Theories

Demonstrate knowledge of basic classroom management theories and an understanding of teacher attitudes and behaviors that influence behavior of individuals with exceptional learning needs.

High and Low Incidence Disabilities

Describe the characteristics and educational implications of students with high and low incidence disabilities

General Curriculum

Demonstrate ability to identify and prioritize areas of the general curriculum and provide accommodations for individuals with exceptional learning needs

Top

Introduction to Special Education

Understanding the characteristics of students with various exceptionalities, ranging from mild to moderate to severe disabilities. How student with specific disabilities learn; using basic strategies for meeting their educational needs.

CPSE 403

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	FBI fingerprint background clearance.
Taught	Fall, Winter

Course Outcomes

Learning characteristics and special learning needs

1. Describe the ways in which people differ, learning characteristics and special learning needs.

Legal structure of services

2. Define special education and describe the legal structure of services for individuals with disabilities, including the Individuals with Disabilities Education Act.

Issues related to the identification of disabilities

3. Articulate issues related to the identification of students with disabilities, referral and placement and the need to provide differing levels of support.

Issues related to collaboration

4. Articulate issues related to collaboration in special education. Identify the skills for effective collaboration.

Policies and programs for young children

5. Describe policies and programs for young children; define elements of the Child Find system.

Steps in IEP

6. Describe the steps in the Individualized Education Program (IEP) process.

Characteristics, prevalence, and educational implications

7. Describe the characteristics, prevalence, and educational implications for students with specific learning disabilities, speech or language impairment, mental retardation, and emotional disturbance.

Characteristics, prevalence, and education implications

8. Describe the characteristics, prevalence, and educational implications for students with other health impairments, orthopedic impairment, visual impairments, autism, traumatic brain injury, deaf/blindness, and developmental delay.

Effects of cultural, ethnic, and language diversity

9. Describe the effects of cultural, ethnic, and language diversity on the education of individuals with disabilities

Strategies

10. Identify strategies for accommodating to meet individual student needs.

Assessment results

10. Demonstrate the ability to use assessment results to make instructional decisions.

12-hour field experience

11. Complete a 12-hour field experience involving volunteer service with four students with disabilities (2 at each site) and submit assignments regarding the experience.

Top

Applied Behavior Analysis in Education

Strategies for educating individuals with or at-risk for disabilities. Prevention, early intervention, and treatment strategies.

CPSE 410

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	Admission to special education program; FBI fingerprint background clearance.
Taught	Fall

Course Outcomes

ABA history

(Knowledge-based objectives)
1. Describe the history of ABA.

Occurence of Human Behavior

2. Describe several approaches for explaining the occurrence of human behavior.

Ethical and Responsible use of ABA

3. Describe the ethical and responsible use of ABA.

FBA and BIP

4. Describe the components of a Functional Behavior Assessment and Behavior Intervention Plan.

Target replacement behaviors

5. Describe the function and format of target replacement behaviors and behavior objectives.

Data collection

6. Describe data collection and graphing procedures.

Single-subject designs

7. Describe a variety of single-subject designs, their elements, how they are used, and when they are used.

Appropriate consequences

8. Describe the principles that underlie the selection of appropriate consequences and providing differential reinforcement.

Stimulus control

9. Describe stimulus control, its various facets, and how it is used.

Generalization procedures

10. Describe the principle components of generalization procedures and provide appropriate rationale for training for generalization.

Self-management

11. Effectively describe the elements of self-management and how it might be taught to children, youth, and adults.

FBA

(Skill-based objectives)
1. Use the Functional Behavior Assessment procedures to determine the function of an identified problem behavior.

TRB

2. Develop a target replacement behavior (TRB) that serves the same function as the identified problem behavior.

Behavioral objective

3. Develop a behavioral objective that corresponds with the target replacement behavior.

Behavioral Data

4. Observe, count, and graph behavioral data that is based on the target replacement behavior.

TRB

5. Make data based decisions using these data to determine the most effective intervention to increase the occurrence of the TRB.

Appropriate techniques

6. Employ appropriate techniques for designing the Behavioral Intervention Plan. This includes manipulating setting events, using instructional methods, providing differential reinforcement, and arranging appropriate consequences.

Top

Assessment and Evaluation of Students with Exceptional Needs

Determining present levels of performance, classifying students for special education services, and writing goals and objectives for IEP development.

CPSE 420

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	Admission to special education program; FBI fingerprint background clearance.
Taught	Fall

Course Outcomes

Basic terminology

Demonstrate an understanding of the basic terminology used in an assessment.

Ethical concerns

Discuss the ethical concerns related to assessment.

Procedures

Identify the procedure used for screening, pre-referral, referral, and classification.

Legal provisions

Outline legal provisions, regulations and program standards regarding assessment.

Application and interpretation of assessment scores

Describe the application and interpretation of assessment scores, including grade score vs. standard score, percentile rank, age/grade equivalents, and standings.

Assessments

Identify, administer, select and describe the different types of non-biased assessments using appropriate technology when necessary.

Informal test procedures

Discuss the components of and procedures for curriculum-based, portfolio, authentic, and functional assessment (informal test procedures), and apply these to different categories of exceptional children (e.g., L.D., E.D, & I.D.).

Influence of diversity

Discuss the influence of diversity on assessment, eligibility, programming and placement of exceptional learners.

Relationship between assessment and placement decisions

Describe the relationship between assessment and placement decisions.

Methods for monitoring student progress

Outline, develop or modify methods used for monitoring student progress.

Data-based goals and objectives

Use assessment information to derive appropriate statements for Present Levels of Academic Achievement and Functional Performance (PLAFFP) and measureable annual goals.

Top

Foundations in Language Arts Instruction for Students with Disabilities

Foundations in analyzing and delivering research-based language arts instruction to students with disabilities, including second language learners with disabilities.

CPSE 425

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Components of oral language

Describe the components of oral language.

Process of oral language development

Describe the process of oral language development.

Common communication disorders in children

Describe common communication disorders in children.

Interplay between culture and language

Explain the interplay between culture and language.

Interplay between language and learning

Explain the interplay between language and learning.

Listening Comprehension

Describe listening comprehension and its effect on learning.

Demands of learning English as a second language

Describe the demands of learning English as a second language.

Cognitive processes

Explain the cognitive processes for transitioning from spoken to written language.

5 component skills for reading

Explain the 5 component skills for reading.

DIBELS©Benchmark assessment

Administer DIBELS©Benchmark assessments for K-1.

Top

Teaching Reading/Language Arts to Students with Disabilities

Research-based methods for teaching language arts to students with disabilities.

CPSE 430

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to special education program; CPSE 403 or equivalent; FBI fingerprint background clearance
Taught	Winter

Course Outcomes

IEP

1. Write IEP present levels of educational performance and, measurable annual goals for reading.

Core curriculum for reading and language arts

2. Demonstrate knowledge of core curriculum for reading and language arts

Analyze learning objectives

3. Task analyze learning objectives for reading and language arts

Daily lesson plans

4. Plan daily lessons for reading and language arts.

Dynamic Indicators

5. Use Dynamic Indicators of Basic Early Literacy Skills (DIBELS) to benchmark and monitor reading progress of one early elementary student.

Matching student instructional reading levels

6. Choose reading materials to match student instructional reading levels.

Teaching of the 5 areas of the national reading panel

7. Demonstrate the teaching of the 5 areas of the national reading panel

Teach writing

8. Demonstrate the teaching of writing.

Progress monitoring data

9. Demonstrate the use of progress monitoring data to make instructional decisions.

Top

Curriculum and Instruction for Secondary Students with Disabilities

Selection and adaptation of curriculum accommodations, transition planning, and post-secondary preparation.

CPSE 440

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Admission to special education program; CPSE 403 or equivalent.
Taught	Winter

Course Outcomes

Historical foundations

Historical foundations, classic studies, major contributors, major legislation, and current issues related to knowledge and practice of transition/secondary special education.

Continuum of placement

Continuum of placement and services available for individuals with disabilities at the secondary level.

Psychological and social-emotional characteristics

Psychological and social-emotional characteristics of individuals with disabilities as adolescents and young adults.

Specialized materials and instructional approaches

Specialized materials and instructional approaches for individuals with disabilities at the secondary level.

Instructional strategies and practices

Advantages and limitations of instructional strategies and practices for teaching individuals with disabilities at this level.

Strategies

Strategies for integrating student initiated learning experiences into ongoing instruction.

Methods

Methods for guiding individuals in identifying and organizing critical vocational content.

Transition planning

Assessing for transition planning.

Multicultural competence

Multicultural competence in transition planning processes

Research-supported methods for academic instruction

Use research-supported methods for academic instruction of secondary age individuals with disabilities.

Research-supported methods for non-academic instruction

Use research-supported methods for non-academic instruction of secondary age individuals with disabilities.

Adaptations and technology

Use appropriate adaptations and technology for all individuals with disabilities.

Resources and techniques for transitioning

Use resources and techniques for transitioning individuals with disabilities into and out of school and post-school environments.

Top

Social and Behavioral Strategies for Students with Mild/Moderate Disabilities

Principles, procedures, and strategies for classroom behavior management, social competence, and individual and school wide intervention plans.

CPSE 442

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	CPSE 403 or equivalent; CPSE 410; admission to special education program.
Taught	Winter

Course Outcomes

Components of schoolwide positive behavior support

(Knowledge-based Objectives)
1. Describe and define the components of schoolwide positive behavior support, it relationship with risk and protetective factors and multicultural issues.

Positive learning environments

2. Describe how to assess and create a positive learning environment in schools.

Building strong positive relationships

3. Describe how to build strong, positive relationships with children and youth.

Positive teaching approach

4. Describe how to use a positive, teaching (discipline) approach.

Social needs of individuals and groups

5. Describe how to assess and address the social needs of individuals and groups of students.

Effective socail skills program

6. Describe and list the procedural and content steps of an effective social skills program.

Effective classroom managment system for all students

7. Describe how to organize an effective classroom management system for all students, particularly those with exceptional learning needs (i.e., schedules, procedures, routines, signals, physical set-up of room, rules and consquences, monitoring, transitions).

LRBI

8. Describe the various components and appropriate use of Utah's Least Restrictive Behavioral Interventions (LRBI).

Multi-level interventions

9. Describe the elements of multi-level interventions (primary, secondary, and tertiary), includeing positive and reductive interventions.
1. Token economy and response cost
2. Group contingencies
3. Behavioral contracts
4. Home notes
5. Precision commands
6. Time-out
7. Self managment
8. Response cost
9. Administrative intervention
10. Other procedures

Assess school climate

(Skill-based objectives)
1. Assess a school climate and identify strengths and areas in which to improve the environment.

Strong positive relationships

2. Build strong, positive relationships with children and youth. Develop and use praise notes as one way in which to build such relationships.

Social skills assessments

3. Demonstrate correct use of social skills assessments, procedures and curriculum that can be used in a classroom environment.

Positive behavior support system

4. Design a positive behavior support system for classroom and nonclassroom environments. Develop a classroom management plan/disclsure document.

Effective behavior intervention strategies

5. Demonstrate a variety of effective behavior intervention strategies appropriate to the needs of individuals with exceptional learning needs.

Least intensive intervention

6. Select and implement the least intensive intervention consistent with the needs of individuals with exceptionalities. Consider LRBI and multi-level evidence-based practices that offer prevention with various behaviors.

Top

Social and Behavioral Strategies for Students with Severe Disabilities

Principles, procedures, and strategies for creating positive educational environments, including functional assessment, behavior intervention plans, and development of social competence.

CPSE 443

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	CPSE 403 or equivalent; CPSE 410; admission to special education program; FBI fingerprint background clearance.
Taught	Winter

Course Outcomes

Adaptive behavior assessment

· Demonstrate knowledge of adaptive behavior assessment.

FUBA

· Describe the correct, ethical, and responsible use of Functional Behavior Assessment (FUBA) for students with severe disabilities.

Common environmental and personal barriers

· Demonstrate knowledge of common environmental and personal barriers that hinder accessibility and acceptance of individuals with severe disabilities.

Sources of student services, networks, and organizations

· Demonstrate knowledge of sources of unique services, networks, and organizations for students with severe disabilities.

Behaving and communicating among cultures

· Demonstrate knowledge of ways of behaving and communicating among cultures that can lead to misinterpretation and misunderstanding.

Cultural perspectives

· Demonstrate knowledge of cultural perspectives influencing relationships among families,

schools, and communities as related to instruction.

Variations in belief, traditions, and values

· Demonstrate knowledge of variations in belief, traditions, and values across and within cultures and their effects on relationships among individuals with exceptional learning needs, family, and schooling.

Coordinate activities

· Demonstrate knowledge of how to coordinate activities of related services personnel to maximize direct instruction time for individuals with severe disabilities.

Theories of behavior problems

· Demonstrate knowledge of theories of behavior problems in individuals with severe disabilities, including self-stimulation and self-injurious behavior.

Impact of multiple disabilities on behavior

· Demonstrate knowledge of the impact of multiple disabilities on behavior.

Integration of fuctional and social training

· Demonstrate knowledge of how to integrate functional and social skills training into the curriculum.

Top

Practicum in Secondary Education: Mild/Moderate Disabilities

Practicum in teaching students with mild-moderate disabilities in secondary settings.

CPSE 446R

Hours	1.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Admission to special education program; CPSE 403 or equivalent; concurrent enrollment in CPSE 440 (secondary); FBI fingerprint background clearance.
Taught	Winter

Course Outcomes

Placement and services available

Continuum of placement and services available for individuals with disabilities at the secondary level.

Psychological and social-emotional characteristics

Psychological and social-emotional characteristics of individuals with disabilities as adolescents and young adults.

Specialized materials and instructional approaches

Specialized materials and instructional approaches for individuals with disabilities at the secondary level.

Instructional strategies

Advantages and limitations of instructional strategies and practices for teaching individuals with disabilities at this level.

Strategies

Strategies for integrating student participation learning experiences into ongoing instruction.

Methods

Methods for guiding individuals in identifying and organizing critical vocational content.

Assessing for transition planning.

Assessing for transition planning.

Multicultural competence in transition planning processes

Multicultural competence in transition planning processes.

Resources and techniques for transitioning individuals

Skill-Based Objectives
Use resources and techniques for transitioning individuals with disabilities into and out of school and post-school environments

Sensitivity

Demonstrate sensitivity for the culture, language, religion, gender, disability, socio-economic status, and sexual orientation of individuals.

Learning environment

Create a safe, equitable positive and supportive learning environment in which diversities are valued.

Learning environments

Organize, develop, and sustain learning environments that support positive intracultural and intercultural experiences.

Research-supported methods for academic instruction

Use research-supported methods for academic instruction of secondary age individuals with disabilities.

Research-supported methods for non-academic instruction

Use research-supported methods for non-academic instruction of secondary age individuals with disabilities.

Adaptations and technology

Use appropriate adaptations and technology for all individuals with disabilities.

General curriculum

Identify and teach essential concepts, vocabulary, and content across the general curriculum.

Top

Practicum in Secondary Education: Severe Disabilities

Practicum in teaching students with severe disabilities in secondary settings.

CPSE 447R

Hours	1.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Admission to special education program; CPSE 403 or equivalent; concurrent enrollment in CPSE 440 (secondary); FBI fingerprint background clearance.
Taught	Winter

Course Outcomes

Placement services

Continuum of placement and services available for individuals with disabilities at the secondary level.

Psychological and social-emotional characteristics

Psychological and social-emotional characteristics of individuals with disabilities as adolescents and young adults.

Specialized materials and instructional approaches

Specialized materials and instructional approaches for individuals with disabilities at the secondary level.

Instructional strategies

Advantages and limitations of instructional strategies and practices for teaching individuals with disabilities at this level.

Integrating student initiated learning experiences

Strategies for integrating student participation learning experiences into ongoing instruction.

Methods for guiding individuals

Methods for guiding individuals in identifying and organizing critical vocational content.

Transition planning processes

Multicultural competence in transition planning processes

Resources and techniques for transitioning

Use resources and techniques for transitioning individuals with disabilities into and out of school and post-school environments.

Top

Effective Teaching Strategies for Students with Mild/Moderate Disabilities

IEP-based lesson planning and teacher-directed and student-mediated instructional strategies.

CPSE 452

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to special education program; CPSE 403 or equivalent.
Taught	Fall

Course Outcomes

Characteristics of students with mild/moderate disabilities

Describe educational characteristics of students with mild/moderate disabilities.

Components of the Individualized Education Program (IEP)

List and describe the components of a standards-based IEP.

Utah Core Curriculum for mathematics

Demonstrate understanding of the Utah core curriculum for mathematics.

Standards-based planning

Write standards-based PLAAFP statements, IEP and unit goals, and lesson objectives for case study students.

Lesson planning for the effective teaching cycle

Write scripted direct instruction lesson plans with recording methods for student achievement data.

Enacting the effective teaching cycle

Use direct instruction lesson plans to enact the effective teaching cycle with high student response rates, praise, and corrective feedback.

Informal curriculum based assessments

Demonstrate how to design and collect data with curriculum based assessments, and how to use data to make instructional decisions for case study students.

Response to Intervention

Describe the RtI concept and process, and use progress-monitoring data to make RtI decisions for case study students.

Top

Curriculum and Instruction: Severe Disabilities

Strategies for designing and implementing educational programs, curricula, and teaching methods for students with severe disabilities.

CPSE 453

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to special education program or instructor's consent.
Taught	Spring

Course Outcomes

Assessment for curriculum planning

The necessity of assessment for curriculum planning.

Historical foundations and current issues

Historical foundations, classic studies, major contributors, major legislation, and current issues related to knowledge and practice of curriculum & instruction in special education.

Effective Teaching principles

Effective Teaching principles.

Positive classroom management

Positive classroom management.

Teaching field as a professional setting

Teaching field as a professional setting.

Teaching methods

Various teaching methods used in teaching students with severe disabilities.

Research-supported methods for instruction

Use research-supported methods for academic instruction of individuals with severe disabilities.

Reasearch-supported methods for non-academic instruction

Use research-supported methods for non-academic instruction of individuals with severe disabilities.

Appropriate adaptations and technology

Use appropriate adaptations and technology for all individuals with disabilities and from diverse backgrounds.

Lesson plans

Create lesson plans derived from assessments.

Collaborating with School and Family

Foundations in collaborating with school professionals, para-professionals, and families of children with disabilities.

CPSE 460

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to special education program; CPSE 403 or equivalent.
Taught	Winter

Course Outcomes

Collaboration issues

1. Define and address issues related to collaboration and other models of working together including:
a. Teams
b. Consultation
c. Team teaching

Collaborating

2. Demonstrate understanding of collaborating with the following:
a. Other professionals
b. Paraeducators
c. Families

Interpersonal skills

3. Understand and demonstrate appropriate interpersonal skills including:
a. Problem solving
b. Communication
c. Using statements
d. Asking questions
e. Handling difficult interactions

Top

Teaching Math to Students with Disabilities

Research-based methods for teaching mathematics to students with disabilities.

CPSE 462

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to special education program; CPSE 403 or equivalent.
Taught	Spring

Course Outcomes

Utah Common Core for Math

1. Access and use the common core standards for assessment, lesson planning, and individualized instruction for math.

Cognitively Guided Instructon

2. Create and teach lesson plans using cognitively guided instruction to teach core math skills.

Curriculum-based assessment (CBA) for math

3. Administer and score curriculum-based assessments for math core standards in grades K-6.

IEP PLAAFPs from CBA data

4. Write standards-based Present Levels of Academic and Functional Performance (PLAAFP) statements and measurable annual IEP goals based on math CBA data for mulitple math core domains.

Instructional units and daily lesson planning

5. Write instructional unit goals to address annual IEP goals for multiple math core domains. Write daily lesson plans to address each unit goal.

Unit and lesson curriculum-based measurements

6. Create curriculum-based measurements for units and daily lessons.

Direct instruction for math

7. Create and teach direct instruction lessons for unit daily objectives.

Data systems for monitoring student progress

8. Design and implement data recording systems for monitoring student progress toward lesson objectives, unit goals, and annual IEP goals..

Top

Assistive Technology for Students with Disabilities

Principles and applications in using assistive technology to improve the education and communication skills of students with disabilities.

CPSE 463

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to special education program or instructor's consent; FBI fingerprint background clearance.
Taught	Fall

Course Outcomes

Cultural and linguistic differences

Effects of cultural and linguistic differences on growth and development.

Characteristics of culture

Characteristics of one's own culture and use of language and the ways in which these can differ from other cultures and uses of languages.

Communicating among cultures

Ways of behaving and communicating among cultures that can lead to misinterpretation and misunderstanding.

Augmentative and assistive communication strategies

Augmentative and assistive communication strategies.

Language development and listening comprehension

Impact of language development and listening comprehension on academic and non-academic learning of individuals with disabilities.

Communication and social interaction alternatives

Communication and social interaction alternatives for individuals who are nonspeaking.

Strategies to support and enhance communication skills

Use strategies to support and enhance communication skills of individuals with exceptional learning needs.

Communication strategies and resources

Use communication strategies and resources to facilitate understanding of subject matter for students whose primary language is not the dominant language.

Instructional and assistive technology

Incorporate and implement instructional and assistive technology into the educational program.

Appropriate adaptations and assistive technology

Use appropriate adaptations and assistive technology for all individuals with disabilities.

Assistive technologies

Use and maintain assistive technologies.

Monitoring for errors in oral and written languages

Teach individuals with disabilities to monitor for errors in oral and written language.

Alternative and augmentative communication systems

Plan instruction on the use of alternative and augmentative communication systems.

Technology plan

Develop and use a technology plan based on adaptive technology assessment.

Top

Practicum: Teaching Students with Mild/Moderate Disabilities

Practicum in the effective teaching cycle for students with mild/moderate disabilities.

CPSE 466R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Admission to special education licensure program; CPSE 403 or equivalent; FBI fingerprint background clearance.
Taught	Spring, Summer

Course Outcomes

Classroom management plan

1. Develop a classroom management plan that includes 4-6 operational rules, positive and negative consequences, reinforcement menu and explanation of routines and reward system.

DIBELS and math CBA

2. Administer DIBELS, math CBA assessment to students and record data.

1. Compile and organize summer teaching materials, including instructional binders.
2. Practice effective self-reflection skills.
3. Teach and evaluate language arts and math lessons.
4. Review forms and expectations for Summer Term 466R.
5. Set-up summer teaching classroom.

DIBELS and math CBA

2. Administer DIBELS, math CBA assessment to students and record data.

1. Compile and organize summer teaching materials, including instructional binders.
2. Practice effective self-reflection skills.
3. Teach and evaluate language arts and math lessons.
4. Review forms and expectations for Summer Term 466R.
5. Set-up summer teaching classroom.

Top

Practicum: Teaching Students with Severe Disabilities

Practicum in the effective teaching cycle for students with severe disabilities.

CPSE 467R

Hours	1.0 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Admission to special education licensure program; CPSE 403 or equivalent; FBI fingerprint background clearance.
Taught	Spring, Summer

Course Outcomes

Rights and responsibilities

Rights and responsibilities of students, parents, teachers, and other professionals, and schools related to exceptional learning needs.

Models, theories, and philosophies for special ed

Models, theories, and philosophies that form the basis for special education practice.

Specialized materials

Specialized materials for individuals with disabilities.

Nonaversive techniques

Use a variety of nonaversive techniques to control targeted behavior and maintain attention of individuals with disabilities.

Attitudes and behaviors

Teacher attitudes and behaviors that influence behavior of individuals with exceptional learning needs. Social skills needed for educational and other environments.

Curricula standards

National, state or provincial, and local curricula standards to design and teach assessment-based lessons. Develop and conduct a mock IEP.

Daily lesson plans and materials

Prepare and organize materials to implement daily lesson plans.

Individualized assessment strategies

Develop or modify individualized assessment strategies and administer formal and informal assessments.

Learning environments

Create a safe, equitable, positive, and supportive learning environment in which diversities are valued.

Lifelong professional development

Continuum of lifelong professional development.

Top

Legal Issues Influencing Collaboration in Special Education

Laws and issues influencing special education and educator's roles in collaborating with families and professionals.

CPSE 470

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admission to special education program; CPSE 403 or equivalent.
Taught	Summer

Course Outcomes

P.L. 94-142/IDEA/IDEA 04

Students will describe, discuss and/or apply:
1. The six principles basic to P.L. 94-142/IDEA/IDEA 04.

Provision of special education services

Rules governing the provision of special education services.

Learning environment

Create a safe, equitable, positive and supportive learning environment in which diversities are valued.

Sensitivity

Demonstrate sensitivity for the culture, language, religion, gender, disability, socio-economic status, and sexual orientation of individuals.

Assessment information

Use assessment information in making ineligibility, program, and placement decisions for individuals with exceptional learning needs, including those from culturally and/or linguistically diverse backgrounds.

Historical points of view

Historical points of view and contribution of culturally diverse groups.

Ways specific cultures are negatively stereotyped

Ways specific cultures are negatively stereotyped.

Legal provisions

Legal provisions and ethical principles regarding assessment of individuals.

Duties and responsibilities

3. Duties and responsibilities of school personnel in relation to provision of special education services.

Assessment information

Use assessment information in making eligibility, program, and placement decisions for individuals.

Communication with families from diverse backgrounds

Communicate effectively with families of individuals with exceptional learning needs from diverse backgrounds.

Top

Educational and Multicultural Issues in Special Education

Special education issues: multicultural, historical, and legal foundations.

CPSE 480

Hours	3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	FBI fingerprint background clearance.
Taught	Fall

Course Outcomes

Learning of individuals

Knowledge
Differing ways of learning of individuals with exceptional learning needs including those from culturally diverse backgrounds and strategies for addressing these differences.

Learning environments

Ways to create learning environments that allow individuals to retain and appreciate their own and each others' respective language and cultural heritage.

Negative stereotypes of cultures

Ways specific cultures are negatively stereotyped.

Strategies used to cope

Strategies used by diverse populations to cope with a legacy of former and continuing racism.

Characteristics of culture and use of language

Characteristics of one's own culture and use of language and the ways in which these can differ from other cultures and uses of languages.

Behaving and communicating among cultures

Ways of behaving and communicating among cultures that can lead to misinterpretation and misunderstanding.

Mediate controversial intercultural issues

Skills

Mediate controversial intercultural issues among students within the learning environment in ways that enhance any culture, group, or person.

Interact with individuals from a different culture

Students will interact with individuals from a culture different than their own.

Student Teaching: Students with Mild/Moderate Disabilities

Culminating experience teaching students with mild/moderate disabilities in school settings.

CPSE 486R

Hours	1.0 - 12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Successful completion of all core courses and practica in special education; FBI fingerprint background clearance.
Note	Fee.
Taught	Fall, Winter

Course Outcomes

Teacher work sample

Students must complete the Teacher Work Sample including:
a. Contextual Factors
b. Unit Framework
c. Assessment Plan
d. Design for Instruction
e. Data-Based Decision Making
f. Report of Student Learning

Planning Rubric

Planning Rubric:
a. Participation in IEP Process
b. Developing, Writing, and Conducting and IEP

Interpersonal Relationships

Interpersonal Relationships:
A. Working with and Training Paraprofessionals
a. Role Description
b. Training
B. Collaboration and School Involement

Student Teaching: Students with Severe Disabilities

Culminating experience teaching students with severe disabilities in school settings.

CPSE 487R

Hours	1.0 - 12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Successful completion of all core courses and practica in special education; FBI fingerprint background clearance.
Taught	Fall, Winter

Course Outcomes

Teacher work sample

Student must complete the Teacher Work Sample:
a. Contextual Factors
b. Unit Framework
c. Assessment Plan
d. Design for Instruction
e. Data-Based Decision Making
f. Report of Student Learning

Planning Rubric

Planning Rubric:
a. Participating in IEP Process
b. Developing, Writing, and Conducting and IEP

Interpersonal Relationships

Interpersonal Relationships:
A. Working With and Training Paraprofessionals
a. Role Description
b. Training
B. Collaboration and School Involvement

Top

Capstone Seminar: Students With Disabilities

Synthesis of knowledge and skills in special education; development of professional ethics and commitment to professional development.

CPSE 490

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Successful completion of all special education courses and concurrent enrollment with student teaching/internship.
Taught	Fall, Winter

Course Outcomes

Basis for Special Education practice

Models, theories, and philosophies that form the basis for special education practice.

Rights and responsibilities

Rights and responsibilities of students, parents, teachers, and other professionals, and schools related to exceptional learning needs.

Teacher attitudes and behaviors

Teacher attitudes and behaviors that influence behavior of individuals with exceptional learning needs. Social skills needed for educational and other environments.

Standards

National, state or provincial, and local curricula standards. As well as organizations to support individuals with special needs.

Materials for daily instruction

Prepare and organize materials to implement daily instruction.

Specialized materials

Develop or modify specialized materials for individuals with disabilities.

Learning environment

Create a safe, equitable, positive, and supportive learning environment in which diversities are valued.

Continuum of lifelong professional development

Continuum of lifelong professional development.

Readings

CPSE 493R

Hours	0.5 - 2.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Focused topic

Students will improve their understanding of a focused topic through mentored inquiry and the completion of related writing or design activities.

Academic Internship: Special Education

Culminating experience in the licensure program teaching students with disabilities in a school setting full-time for one academic year.

CPSE 496R

Hours	1.0 - 12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Departmental approval of application; placement one semester in advance of registration; FBI fingerprint background clearance.
Taught	Fall, Winter

Course Outcomes

Teacher Work Sample

Students must complete the Teacher Work Sample:
a. Contextual Factors
b. Unit Framework
c. Assessment Data
d. Design for Instruction
e. Data-Based Decision Making
f. Report of Student Learning

Planning Rubric

Planning Rubric:
a. Participating in IEP Process
b. Developing, Writing, and Conducting an IEP

Interpersonal Relationships

Interpersonal Relationships
A. Working with and Training paraprofessionals
a. Role Description
b. Training
B. Collaboration and School Involvement

Introduction to Three-Dimensional Computer Graphics

Fundamentals of modeling, texturing, lighting, and rendering used in exploring principles and elements of three-dimensional design.

CSANM 150

Hours	1.5 Credit, 1.5 Lecture, 1.5 Lab
Prerequisites	None
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Basic Skills

- Attain basic skills in modeling, texturing, lighting, and rendering in three-dimensional computer graphics.

Top

Intermediate Three-Dimensional Computer Graphics

Fundaments of building three-dimensional computer models and setting up model rigs for mobility.

CSANM 250

Hours	2.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Course changed to CSAnm 250 beginning Fall 2012.
Taught	Fall

Course Outcomes

Intermediate Skills

- Intermediate skills in 3-dimesional computer graphics including modeling, lighting, perspective, composition utilizing both artistry and technology.

Prep for 252

- Students will build on knowledge and skills learned in STAnm 150 to prepare them for STAnm 252.

Introduction to Three-Dimensional Animation

Foundational principles and techniques of three-dimensional animation, including timing and pacing, character setup, and dynamics.

CSANM 252

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	CSANM 250
Note	Course changed to CSAnm 252 beginning Fall 2012.
Taught	Winter

Course Outcomes

Basic skills

- Attain basic skills in three-dimensional animation, including timing and pacing, character setup, and dynamics.

Technology

- Gain a basic understanding of the various ways animation is created using multiple technologies.

Animation

- Students will learn how to combine artistic animation principles learned in VAAnm 160 with the technology learned in STAnm 150.

Scripting for Animation

Developing basic scripting skills to procedurally build intricate systems of models, rigs, and animation. Students learn how to reduce manual hours and efficiently create simple to complex effects.

CSANM 258

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Course changed to CSAnm 258 beginning Fall 2014.
Taught	Winter

Course Outcomes

Scripting Skills

- Attain basic scripting skills using Python inside computer animation tools, to understand how scripting hones artistic capability in a 3D creative pipeline.

Modeling and Rigging

Learn to automate modeling, rigging, and animation processes, so that intricate animation systems can be completed and useful for production in a practical, timely manner.

Top

Character Animation in 3D

Three-dimensional character animation applying traditional animation principles.

CSANM 350

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	CSANM 252
Note	Course changed to CSAnm 350 beginning Fall 2012.
Taught	Fall

Course Outcomes

3D

Ability to create three-dimensional character animation

Animation

- The student will coalesce the knowledge and skills gained in STAnm 252 and VAAnm 265 and integrate that into a polished character animation.

Top

Lighting for Three-Dimensional Graphics

Developing lighting and color, and the compiling of the various elements for final images for use in three-dimensional applications.

CSANM 351R

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Course changed to CSAnm 351R beginning Fall 2012.
Taught	Winter

Course Outcomes

Application

Students will learn and apply the skills of lighting for 3D graphics.

Top

Shader Programming

Shading and rendering techniques for the attainment of desired visual effects: use of shading languages for the realization of both photorealistic and non-photorealistic imaging.

CSANM 354

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Course changed to CSAnm 354 beginning Fall 2012.
Taught	Fall

Course Outcomes

CG objects

- Learn how to create believable, aesthetic materials for CG objects, including how to combine procedural and painted patterns, textures, and material properties.

Shading

Understand how shading fits into a production pipeline.

Top

Photography for Animation

Layout, references, camera technology and terminology, application of composition, lighting, and core art skills emphasized.

CSANM 355

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Course changed to CSAnm 355 beginning Fall 2012.
Taught	Spring

Course Outcomes

Practices and artistry

Students will understand and be able to use current technologies to transfer information from digital photography to animation artifacts. Students will understand how artistic requirements inform when and how to use photography to support animation.

Top

Advanced Senior Film Production 1

In-depth experiences creating computer animations and visual effects. Senior film front-end development and introduction to full animation production.

CSANM 450R

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Course changed to CSAnm 450 beginning Fall 2012.
Taught	Fall

Course Outcomes

Application

Students will engage in a senior film production.

Top

Advanced Senior Film Production 2

Portfolio development based on advanced animation/design projects. Senior film production and post production.

CSANM 452R

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Course changed to CSAnm 452R beginning Fall 2012.
Taught	Winter

Course Outcomes

Application

Students will engage in a senior film production.

Special Topics in Advanced Graphics

Researching new technologies in animation and visualization. Topics might include real-time technologies, three-dimensional data acquisition, performance capture, or new entertainment platforms.

CSANM 453R

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Course changed to CSAnm 453R beginning Fall 2012.
Taught	Fall

Course Outcomes

Emerging graphics practices

Students will be able to implement, apply, and extend state-of-the-art practices in computer graphics relevant for animation.

Top

Advanced Shading

Advanced shading, rendering, and lighting methods for creating virtual scenes that emphasize story and innovatively meet an art director's vision through traditional and procedural methods.

CSANM 454

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Course changed to CSAnm 454 beginning Fall 2012.
Taught	Fall

Course Outcomes

Practice and artistry of shading

Students will understand the artistic importance and subtleties of shading, and be able to implement/extend state-of-the-art practices in shading for animation.

Top

Three-Dimensional Visual Effects

Exploring procedural and three-dimensional animation methods to create realistic special effects. Applying a large spectrum of animation principles to integrate their effects aesthetically and convincingly into a live action or animated environment.

CSANM 458

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Note	Course changed to CSAnm 458 beginning Fall 2012.
Taught	Spring

Course Outcomes

3D Animation

- Learn principles of 3D effects animation, built on core knowledge of hand-drawn effects, and create effects within a 3D environmental context and help merge characters into their story and environment.

Top

Interactive Animation Technology

In-depth experiences creating interactive computer game mechanics and art. Includes senior game project development and experience in full interactive media production.

CSANM 459R

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	Junior or senior status
Taught	Fall, Winter

Course Outcomes

Tools and workflow

Students will understand how state-of-the-art animation tools support the workflow of animation for both movies and games. Students will be able to contribute tools and modify existing workflow tools in the support of a real project.
Learn and apply leadership and communication skills in a full production. Coordinate real time gameplay and art, applying software engineering, illustration, and computer animation principles. Produce demo reel worthy material for interactive applications.

Top

Special Problems in Animation

Individual study in area of special interest.

CSANM 494R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Note	Course changed to CSAnm 494R beginning Fall 2012.
Taught	

Course Outcomes

Application

Students will solve special problems in animation.

BFA Final Project

Advanced individual project with minimum guidance, showing high degree of competence within chosen major.

CSANM 497R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	BFA advisor's consent.
Note	Course changed to CSAnm 497R beginning Fall 2012.
Taught	

Course Outcomes

Application

Students will complete a BFA final project.

First-Year Czech

Basic language skills.

CZECH 101

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

First-Year Czech

Basic language skills.

CZECH 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	CZECH 101
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

Second-Year Czech

Grammar review and conversation.

CZECH 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	CZECH 102
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Vocabulary

Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Elaboration

Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Grammar

Review and increase understanding of basic language structures.

Culture

Discuss in the target language common products and practices related to every-day life in the target culture.

Second-Year Conversation

Intermediate listening comprehension and speaking skills.

CZECH 211R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	CZECH 201
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Conversation

Speak comfortably about predictable, familiar topics related to daily activities; this includes the ability to Initiate, maintain, and close simple conversations and to ask and respond to simple questions.

Survival Transactions

Carry out "survival" transactions (shopping, getting directions, ordering meals, etc.)

Pronunciation and Accuracy

Be understood by native speakers unaccustomed to dealing with non-native speakers.

Cultural History of Czech Republic

Entry course for returned missionaries or others with extensive Czech or Slovak language experience.

CZECH 330

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	Czech 201 or foreign residence experience.
Note	Required course for obtaining language credit by examination (Czech 101, 102, 201, 211R). Culminating course for Languages of Learning requirement.
Taught	

Course Outcomes

Communication skills

In both written and spoken target language, communicate accurately with well educated members of the target-culture about real-world activities.

Comprehension

Understand detailed written and verbal instructions. Comprehend historical passages, newspaper and magazine articles, and broadcast news reports well educated native speakers encounter routinely in their daily life.

Cultural Knowledge

Acquire background knowledge of important achievements related to the target culture (historical figures and events, major literary and artistic movements, government and religious institutions, etc.). Discuss in the target language cultural practices related to major life events in the target culture (birth, marriage, death, etc.).

General Education Requirements

Complete language and cultural aspects of General Education "Languages of Learning" and "Global & Cultural Awarness" requirements.

Top

Jazz Dance, Beginning

DANCE 131

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Technique Outcome 1

Students will be introduced to jazz dance as a stylized dance form

Techique Outcome 2

Students will acquire a degree of mastery in jazz dance technique at a beginning level as their foundation.

Technique Outcome 3

Students will experience the joy of jazz rhythms and motion.

Technique Outcome 4

Students will increase awareness in their physical health and well-being through activity and correct principles of training.

Self Image

Students will increase awareness to their overall self-image, emphasizing; discipline, coordination, strength, flexibility and endurance.

Religion and the Fine Arts

Students will develop more understanding of a relationship between religion and the fine arts.

Art Patronage

Students will acquire the desire to patronize the art to some degree in the future.

Evaluation

Students will develop an evaluation standard to aid in selecting future quality jazz dance training for self and /or family.

Top

Tap Dance, Beginning

DANCE 135

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Dance Philosophy and the BYU Mission

Students will embrace a philosophy of dance compatible with the mission of BYU that guides their personal choices in the professional or recreational worlds of dance

Technical and Artistic Skill

Students will demonstrate advanced technical and artistic skill in one dance genre and at least beginning to intermediate skill in another.

Contemporary Modern Dance, Beginning

DANCE 140

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Technical Ability

Students will demonstrate beginning technical ability in the areas of:
·flexibility
· strength and endurance
· control of parallel and turn out positions

Elements of Dance

Students will demonstrate and articulate an understanding of the elements of dance (energy, space, and time).

Improvisation and Composition

Students will demonstrate creative problem solving and interpersonal skills through collaborative improvisation and composition experiences

Dance as an Art Form

Students will articulate an awareness and appreciation of dance as an art form.

Modern/Contemporary Dance History

Students will articulate knowledge of basic modern/contemporary dance history

Top

Movement for Musicians

Developing strength, flexibility, responsiveness, centering, breath, and freedom of movement through both fine and gross motor activities.

DANCE 164

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Kinesthetic Awareness

Students will understand the connection between music and dance by practicing and integrating kinesthetic awareness with musicality.

Movement and Music

Students will analyze the shared characteristics of movement and music by creating and discussing movement phrases.

Movement Disciplines

Students will evaluate the appropriateness of particular movement disciplines for solving real physical and musical problems.

Musical Awareness

Students will increase musical awareness by choreographing and performing a solo to varied musical styles.

Recreational World Dance: Beginning

Dances from selected cultures at the beginning skill level.

DANCE 170

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Sequence and formations

Students will demonstrate sequence patterns, formations and positions of selected folk dances

World dance vocabulary

Students will develop a world dance movement vocabulary

Coordination and motor skills

Students will explore coordination, fine and gross motor skills

Rhythmic Awareness

Students will increase rhythmic awareness

Cultural stylings

Students will interpret styling differences between cultures

Cultural appreciation and understanding

Students will improve their appreciation and understanding of other cultures, traditions, and customs

Top

Clog Dance, Beginning

Beginning steps and technique, emphasizing slide/drag.

DANCE 171

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Clogging Techniques

Students will learn traditional and contemporary clogging techniques including arm movements, footwork, correct alignment, placement and weight shifts.

Movement Vocabulary

Students will learn a movement vocabulary using correct clog dance terminology.

Movement Patterns and Sequences

Students will learn, dance and test beginning sequences and patterns of movement.

Presentation Skills

Students will learn basic presentation skills in clog dance movement patterns, combinations, and skills.

Clog Dance History

Students will learn a knowledge of the history and progression of clog dance

Top

Western: Square and Contra Dance

Fundamental dance skills in western styles of country, round, and square dance.

DANCE 172

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Partner and Line Dances

Students will learn partner dances, line dances and round dance forms

Country Western Positions, Formations, and Footwork

Students will learn the traditional positions, formations and footwork used in country western dance

Square Dance Figures

Students will learn basic and mainstream movements of Square Dance figures

Square Dance Vocabulary

Students will learn a movement vocabulary of square dance terminology, etc.

Coordination and Rhythm

Students will enhance their coordination and rhythmic abilities.

Dance Etiquette

Students will develop social interaction skills and proper dance etiquette used in dance.

Movement Patterns

Students will enhance their ability to memorize sequential patterns and combinations of movement.

Ethnic Dance - Spanish

DANCE 173R

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

Ethnic Dance, Beginning

Ethnic dances selected from the Irish, Polynesian, or Spanish cultures.

DANCE 173R

Hours	0.5 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Please contact the individual department for outcome information.

Top

Irish Dance, Beginning

Introduction to Irish dance technique--soft and hard shoe--at a begining level. Instruction in solo and figure dances as well as some cultural background information about music, costumes, traditions and on-going development in this style of dance.

DANCE 174

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Irish Dance Beginning

1. learn basic Irish step dancing skills on a beginning technique level
2. increase technique, stamina, and foot work
3. enhance rhythmical and musical skills and awareness
4. learn a variety of team figure dances and solo dances
5. develop a greater appreciation and understanding of music, costume and historical facts

Top

Polynesian Dance, Beginning

Instruction in movement, songs, myths and legends of Hawaii, New Zealand, Tahiti, Samoa, and Tonga.

DANCE 175

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Polynesian Dance Beginning

1. Acquaint the student with the basic movement techniques and styles of Polynesian dancing.
2. Introduce the student to the history of Polynesian dance with the myths and legends as to why the dances are done.
3. Develop and increase coordination and rhythm.
Develop a greater understanding and appreciation for the Polynesian culture through dance.

Social Dance, Beginning

Traditional and popular ballroom dance; also social skills.

DANCE 180

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Independent Study also.

Course Outcomes

Beginning School Figures

Students will demonstrate beginning level school figures associated with each dance by practice and application.

Beginning Technique

Students will demonstrate beginning level the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.

Demonstrate Leading and Following

Students will demonstrate their ability to lead and follow through their participation at labs and through exams.

Social Skills

Students will improve their social skills though knowledge and practice.

Country Western Social Dance, Beginning

Beginning popular country western dance.

DANCE 181

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

School figures

Students will demonstrate the beginning level school figures associated with each dance by practice and application.

Footwork, rhythm, alignment and styling

Students will demonstrate beginning level technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.

Leading and following

Students will demonstrate their ability to lead and follow through their participation at labs and through exams.

Social skills

Students will improve their social skills though knowledge and practice.

Top

Ballroom Dance, International Beginning

Bronze level. Waltz, fox-trot, tango, quickstep.

DANCE 184

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Demonstrate Bronze Level Ballroom School Figures

Students will be able to effectively demonstrate bronze level school figures of International Style Waltz and Quickstep.

Demonstrate Beginning Level Technique

Students will be able to effectively demonstrate beginning level ballroom technique in the following areas: 1) posture and dance position 2) clarity and use timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

Top

Latin Dance, International Beginning

Bronze level. Cha-cha, rumba, samba, jive, paso doble.

DANCE 185

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Demonstrate Bronze Level Latin School Figures

Students will be able to effectively demonstrate bronze level school figures of International Style Samba and Rumba.

Demonstrate Beginning Level Latin Technique

Students will be able to effectively demonstrate beginning level technique in the following areas:1) posture and dance position 2) clarity and use timing 3)proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills.

Ballet, Beginning

Fundamentals of ballet technique for those with little or no previous training.

DANCE 190

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

TECHNIQUE OBJECTIVES

Each student will:
1. Acquire a degree of mastery in beginning ballet technique. These basic skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific technique criteria and standards

WRITTEN OBJECTIVES

Each student will:
1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level and then pass an objective written exam prepared by the ballet program.
2. Submit a completed self-assessment rubric and/or written self-evaluation at the individual midterm conference.
3. Submit a written critique of a perceptively analyzed live ballet performance according to the guidelines provided. Required expectations include sound writing skills, qualitative reasoning, and an ability to assess ballet technique at a beginning level standard

PARTICIPATION OBJECTIVES

1. Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

Character Dance

Male and female techniques of traditional Hungarian, Polish, and Ukrainian folk forms stylized with classical ballet discipline.

DANCE 192

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Technique Objectives

Each student will:

1. Acquire improved awareness and appreciation of the dances of other nations.
2. Acquire improved awareness of rhythm, style and presentation.
3. Practice active class participation and the practice of a movement vocabulary and technique standard which describes the "A" grade achievement criteria.

Writing Objectives

Each student will:

1. acquire a knowledge of the history and purpose of Character Dance by passing an objective written exam.
2. develop analytical skills and apply sound writing skills by first, attending a live folk dance (or character performance in ballet), and second, submitting a written critique of that live ballet performance following the guidelines provided.

Participation Objectives

Each student will:

1. achieve an 80% participation requirement as a prerequisite for a grade.

Top

Dance Performance 1

Participation as dancers in concert dance production.

DANCE 229R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Production director's consent.
Taught	Fall, Winter

Course Outcomes

Performance Groups

The learning outcomes of this course will be correlated somewhat with the learning outcomes of one of the regular dance performance groups. However, due to the individualized nature of this course, individual outcomes will be designed by the instructor based upon the needs and opportunities of the student.

Conditioning and Injury Prevention for Dance

Developing conditioning programs specific to dance. Recognizing and resolving dance injuries. Practical application.

DANCE 230

Hours	2.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	PDBIO 220
Taught	Fall, Winter

Course Outcomes

Conditioning Program Development

Students will learn how to develop a well rounded conditioning program.

Injury Prevention

Students will gain knowledge of training and conditioning principles that will help them prevent injury.

Conditioning Program Participation

Students will create and participate in an actual conditioning program based on principles learned in the class.

Physical Conditioning

Students will be in better physical condition and have a working knowledge of all aspects of conditioning and injury prevention.

Top

Jazz Dance Technique 1

DANCE 231R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 240R or Dance 290 or equivalent; Dance 131 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Jazz Styles

Students will gain knowledge of styles within the jazz genre.

Intermediate Jazz Technique

Students will acquire a degree of mastery in jazz dance technique at a intermediate level as their foundation.

Jazz Rythms

Students will experience the joy of jazz rhythms and motion.

Health and Well-Being

Students will increase awareness in their physical health and well-being through activity and correct principles of training.

Increase self image

Students will increase awareness to their overall self-image, emphasizing; discipline, coordination, strength, flexibility and endurance.

Religion and Fine Arts

Students will develop more understanding of a relationship between religion and the fine arts.

Arts Patronage

Students will acquire the desire to patronize the art to some degree in the future.

Evaluation standard

Students will develop an evaluation standard to aid in selecting future quality jazz dance training for self and/or for family.

Tap Dance Technique 1

DANCE 235

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 135 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Dance Practice and the BYU Mission

1. Students will embrace a philosophy of dance compatible with the mission of BYU that guides their personal choices in the professional or recreational worlds of dance.

Advanced Technical and Artistic Skill

2. Students will demonstrate advanced technical and artistic skill in one dance genre and at least beginning to intermediate skill in another.

Top

Contemporary Modern Dance, Technique and Theory 1

Fundamental dance skills and basic theories.

DANCE 240R

Hours	1.5 Credit, 0.0 Lecture, 4.5 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Please contact the individual department for outcome information.

Contemporary Modern Dance, Technique and Theory 2

DANCE 241R

Hours	2.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	None
Taught	Fall, Winter, Summer

Course Outcomes

Appreciating the Human Body

1. Articulate a knowledge and appreciation of the human body regarding physical function, spirituality, and as a tool of expressivity.

Technical Ability

2. Demonstrate increased technical ability in the areas of:

- flexibility
- strength
- endurance
- balance
- coordination
- phrasing
- dance performance skills
- applying the Patterns of Total Body Connectivity
- kinesthetic awareness of body alignment

Elements of Dance

3. Demonstrate knowledge, fundamental control, and application of the elements of dance (as defined by the BEST and BESS vocabularies).

Dance Appreciation

4. Articulate an appreciation for dance as an art form.

Studio Workshop in Contemporary Modern Dance Technique and Theory

Technique and theory in a workshop setting.

DANCE 243R

Hours	2.5 Credit, 0.0 Lecture, 7.5 Lab
Prerequisites	Dance 241R or equivalent; instructor's consent; concurrent enrollment in Dance 244R the first time taken.
Taught	Fall, Winter

Course Outcomes

Body Connectivity and Kinesthetic Awareness

Students will demonstrate increased body connectivity and kinesthetic awareness, including:

- Breath
- Core-distal
- Head-tail
- Upper-lower
- Body-half
- Cross-lateral connections

Performance Skills

Demonstrate performance skills including intent, nuance, dynamics, and sense of ensemble.

Anatomical and Dance Language

Articulate and analyze the above principles of technique using accurate anatomical and dance elements language.

Top

Studio Workshop in Contemporary Modern Dance Improvisation and Choreography

Beginning improvisation and choreography in a workshop setting.

DANCE 244R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 241R or equivalent; instructor's consent; concurrent enrollment in Dance 243R the first time taken.
Taught	Fall, Winter

Course Outcomes

Improvisation and Choreography

Students will demonstrate, apply, and articulate a fundamental understanding of the elements of dance in improvisation and choreography.

Collaboration and Problem Solving

Students will demonstrate problem solving skills in collaborative group and solo improvisation and choreography.

Avoiding Habit and Cliche

Students will demonstrate the ability to create original and personally meaningful movement - avoiding habit or cliche.

Creative Process and Movement Intention

Students will articulate a knowledge of, and critically analyze, the creative process and movement intention in improvisation and choreography.

Aesthetics and Values

Students will articulate aesthetic and expressive values in dance and other arts.

Top

Urban and Street Dance Forms

Studio course facilitating freestyle movement and surveying various urban and street dance forms.

DANCE 245

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Recommended	Dance 240 or 241.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Honors Introduction to Dance

Critical analysis of dance as a cultural and expressive art form studied through lecture, reading, research, multimedia presentations, and practical movement experiences.

DANCE 260

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	No previous dance experience required.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

Introduction to Dance

Critical analysis of dance as a cultural and expressive art form, studied through lecture, reading, research, multimedia presentations, and practical movement experiences.

DANCE 260

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	No previous dance experience required.
Taught	Fall, Winter, Spring
Offered	Honors also.

Course Outcomes

Please contact the individual department for outcome information.

Orientation to Dance

Introduction to dance as a discipline and at Brigham Young University.

DANCE 261

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Critical Review and Observation

Students will be able to hone in on important information while also providing their own thoughtful reactions to what they have read.

Laban Movement Analysis Midterm

Students will understand principles, terminology, and execution of Laban Movement Analysis.

Dance Concert Analyses

Students will develop critical analysis skills.

Group Presentation

Students will delve into a dance related topic of interest to them and develop group collaboration and presentation skills.

Dance Analysis Papers

Students will understand the common aspects of several forms of dance through analysis of how aesthetic principles and varied movement techniques are applied and emphasized within various dance genres.

Top

Music for Dancers

Basic music notation, simple and complex rhythmic patterns, and polyrhythms; analysis of selected international music styles; brief historical survey.

DANCE 264

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Performance Outcomes

Demonstrate an understanding of basic musical concepts through physical movement.

Performance Outcomes

Acquire improved awareness of his/her physical responses to music.

Teaching Outcomes

Demonstrate the ability to utilize music appropriately in the technique class and collaborate with musicians.

Teaching/Choreography Outcomes

Demonstrate musical awareness by creating appropriate movement to odd meter music and binary/ternary rhythms.

Choreography Outcomes

Acquire improved listening skills to use music to stage or create choreography

Top

World Dance Technique 1

Techniques of selected traditional, folk, and national dance styles.

DANCE 270

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 170 or equivalent.
Taught	Fall, Winter, Spring

Course Outcomes

Footwork and Rhythmic Structures

Each student will demonstrate footwork and various rhythmic structures from selected cultures

Posture, Gesture, and Free Movement

Each student will develop proper technique of posture, gesture and free movement

Body Alignment and Movement Execution

Each student will interpret proper body alignment and technical execution of movement styles and phrases

World Dance Vocabulary and Cultural Context

Each student will enhance the ability to recognize and understand world dance vocabulary, significance and context within selected cultures

Patterns: Tradition and Innovation

Each student will understand the distinction of various patterns concerning tradition and innovation

World Dance Appreciation and Awareness

Each student will increase awareness and appreciation of world dance and how it relates to other dance forms and styles

Clog Dance Technique 1

Intermediate steps and technique; buck styling; introduction to choreography.

DANCE 271

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 171 or equivalent.
Taught	Fall, Winter

Course Outcomes

Presentation Skills

Students will learn additional presentation skills in clog dance movement patterns, combinations, and skills.

Movement Vocabulary

Students will learn a movement vocabulary using correct clog dance terminology.

History of Clog Dance

Students will learn a knowledge of the history and progressions of clog dance.

Clog Technique

Students will learn traditional and contemporary intermediate clogging techniques including arm movements, footwork, correct alignment, placement and weight shifts.

Top

Chinese Dance: Practice and Theory, Technique 1

Accelerated ethnic dance technique from the Chinese culture.

DANCE 272

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 173R or previous dance experience.
Taught	Winter odd years

Course Outcomes

Chinese Dance Technique 1

1. Promote awareness of the basic shapes, steps, and movement sequences from the three major Chinese folk dance forms.
2. Teach a variety Chinese folk dance styles through the use of short phrases, and compositions.
3. Increase technical skills, including coordination, balance, dynamics, rhythm, etc.
4. Demonstrate the use of Chinese folk dance props and to uncover the reasons behind the use of those props.
5. Introduce a different style of movement as well as a new culture.
6. Nurture the potential of the body by supplementing movement options with what Chinese folk dance has to offer.

Enhance appreciation for the value and beauty of Chinese folk dance.

Hungarian Dance: Practice and Theory, Technique 1

Accelerated ethnic dance techniques from the Hungarian culture.

DANCE 273

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 173R or previous dance experience.
Taught	Winter even years

Course Outcomes

Hungarian and Transylvanian dance dialects

1. Each student will learn to become proficient in several Hungarian and Transylvanian dance dialects.

Knowledge of Step Combinations

2. Each student will learn to demonstrate a knowledge of step combinations performing couple, solo, and circle dances.

Musical awareness

3. Students will Improve rhythmical skills, technique and musical awareness.

Improvisational Skills

4. Each student will learn improvisational skills of specific traditional Hungarian couple dance styles

Partnering Skills

5. Each student will learn partnering skills

Cultural Aspects

6. Each student will learn basic aspects of music, costumes, history and cultural issues

Top

Irish Dance: Practice and Theory, Technique 1

Accelerated ethnic dance technique from the Irish culture.

DANCE 274R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 174 (Ethnic Dance Irish) or equivalent.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Polynesian Dance: Practice and Theory, Technique 1

Accelerated ethnic dance technique from the Polynesian culture.

DANCE 275

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 173R or previous experience.
Taught	Fall, Winter

Course Outcomes

Beginning Technique and Theory

Students will learn beginning Polynesian dance skills with proper technique and theory in the styles of Modern Hawaiian, Maori and Tahiti dance syles.

Polynesian Dance History

Students will gain a knowledge of the history of Polynesian dance including myths and legends.

Enhanced Coordination and Rhythm

Students will enhance their coordination and rhythm.

Correct Alignment and Posture

Students will develop correct alignment and posture in the various styles of Polynesian dance.

Polynesian Terminology

Students will learn a movement vocabulary using correct Polynesian terminology.

Polynesian Music and Costumes

Students will gain a basic knowledge of the music and costumes of Polynesian dance.

Exploration of Teaching

Field-based, initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching developmentally sequenced dance in K-12 settings.

DANCE 276R

Hours	3.0 Credit, 6.0 Lecture, Arr Lab
Prerequisites	DANCE 261 & DANCE 243R & DANCE 244R; Major approval; FBI fingerprint and background clearance.
Taught	

Course Outcomes

Teaching Dance in Elementary, Junior High and High School

1. identify the challenges and uniqueness involved with teaching dance in the Elementary, Junior High and High School settings.

Effective Teaching Methods and Personal Philosophy

2. articulate a personal philosophy about the role of dance in education and effective teaching methods and strategies that they will apply as future teachers.

Teaching Standards and Guidelines

3. Identify and analyze the following teaching standards and guidelines:

- National Standards for Dance Education
- State Core Curriculum
- INTASC Standards
- Moral Dimensions (SANE 3)

Self-Assessment

4. identify and self-assess their own qualifications for entering the teaching profession, including perceived strengths and weaknesses based on the aforementioned standards.

Teaching Skills, Preparation, and Technical Ability

5. demonstrate emerging teaching skills, including strong voice, teacher presence, planning/preparation, professionalism, and technical ability for modeling/demonstrating.

Top

Spanish Dance: Practice and Theory, Technique 1

Accelerated ethnic dance technique from the Spanish culture.

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 173R or previous dance experience.
Taught	Fall even years

Course Outcomes

Spanish dance - Technique 1

1. Historical background of the dances and the people who do them
2. Basic vocabulary of the steps associated with Spanish dance styles
3. Rhythmical skills and musical awareness
4. Cultural issues as it pertains to the dances of Spain
5. Traditional Spanish costuming for men and women

Basic technique in all areas of Tech I Spanish dance forms

Top

Ukrainian Dance: Practice and Theory, Technique 1

Accelerated ethnic dance technique from the Ukrainian culture.

DANCE 278

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 173R or previous dance experience.
Taught	Fall odd years

Course Outcomes

Ukrainian Movement and Choreography

Students will learn stylistic movement combinations, footwork, arm placement and choreography from the regions Poltava, Hutsul, Bukovynia and Volyn.

Warm-up Preparation

Students will learn a warm-up combination designed to prepare and train the body for Ukrainian dance.

Ukrainian Cultural and Historical Facts

Students will learn information about cultural traditions, ritual beliefs and historical facts Ukraine which influence the movement and stylistic characteristics.

Ukrainian Dance Vocabulary

Students will learn basic Ukrainian dance vocabulary.

Top

Indian Dance: Practice and Theory, Technique 1

Classical India dance technique, primarily in religious-based styles and motifs of Bharatha Natyam, Ganapathi, Allaripu, and Bollywood.

DANCE 279

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Winter, Spring

Course Outcomes

Dance Movement Patterns and Styles from India

Students will learn various movement patterns expressing the technique, motifs and rhythmic structure of the four styles.

Posture and Gesture

Students will develop postural and gestural techniques including hand/arm articulation.

Alignment, Precision, Sequencing Exploration

Students will explore proper body alignment, whole body precision, sequencing, eye movement and expression.

Movement Vocabulary

Students will understand the basic movement vocabulary, the significance and context.

Cultural Processes

Students will understand the cultural processes at work on movement practices and structures such as improvisation, composition, tradition and innovation.

Cultural Aspects Experience

Students will experience the ability to comprehend, appreciate and participate in cultural aspects of dance from India.

Social Dance, Technique 1

DANCE 280

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 180 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Dance Practice and Application

Students will demonstrate the school figures associated with each dance by practice and application.

Dance Technique

Students will demonstrate the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.

Lab and Exam Participation

Students will demonstrate their ability to lead and follow through their participation at labs and through exams.

Top

Country Western Social Dance, Intermediate

Intermediate-level instruction in popular country western dances.

DANCE 281

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 181 or equivalent.
Taught	Fall, Winter

Course Outcomes

Dance Philosophy and the Mission of BYU

Students will embrace a philosophy of dance compatible with the mission of BYU that guides their personal choices in the professional or recreational worlds of dance.

Advanced Technical and Artistic Skill

Students will demonstrate advanced technical skill and artistic skill in one dance genre and at least beginning to intermediate skill in another.

Top

Ballroom Dance, International Technique 1

Silver level. Waltz, fox-trot, tango, quickstep.

DANCE 284

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 184 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Demonstrate silver level ballroom school figures

1. Students will be able to effectively demonstrate silver level school figures of International Style Waltz, Tango and Foxtrot.

Demonstrate, intermediate level, ballroom technique

2. Students will be able to effectively demonstrate intermediate level technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

Top

Latin Dance, International Technique 1

Silver level. Cha-cha, rumba, samba, jive, paso doble.

DANCE 285

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 185 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Demonstrate silver level latin school figures

1. Students will be able to effectively demonstrate silver level school figures of International Style Samba, Rumba and Paso Doble.

Demonstrate, intermediate level, latin technique

2. Students will be able to effectively demonstrate intermediate level technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

Ballet Accelerated Technique 1

DANCE 290

Hours	1.5 Credit, 0.0 Lecture, 4.5 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Technique Objectives

Each student will:
1. Acquire a degree of mastery in accelerated beginning ballet technique. These basic skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific criteria and standards.

Writing Objectives

Each student will:
1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level and then pass an objective written exam prepared by the Ballet program.
2. Submit a completed self-assessment rubric and/or written self-evaluation at the individual midterm conference.
3. Submit a written critique of a perceptively analyzed live ballet performance according to the guidelines provided. Required expectations include sound writing skills, qualitative reasoning, and an ability to assess ballet technique at a beginning level standard.

Participation Objectives

Each student will:
1. Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

Ballet Technique 2

DANCE 291R

Hours	2.5 Credit, 0.0 Lecture, 7.5 Lab
Prerequisites	Dance 290 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Intermediate Beginning Ballet Technique

TECHNIQUE OBJECTIVE 1. Acquire a degree of mastery in intermediate beginning ballet technique. These basic skills will be accomplished through active class participation and the practice of the movement vocabulary listed in the appendix. Please consult the appendix for the specific criteria and standards.

Postural Awareness

TECHNIQUE OBJECTIVE 2. Increase postural awareness; begin to correct imperfections; add physical strength, endurance, flexibility, extension, coordination, grace, precision and elevation; and improve the health and appearance of the physical body.

French Ballet Terminology and Technique

WRITING OBJECTIVE 1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level, then pass an objective written exam prepared by the Ballet Division.

Participation Objective

Each student will:

1. Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

Top

Ballet Technique, Men

Intermediate classical ballet technique for men.

DANCE 294R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	DANCE 290
Taught	Winter

Course Outcomes

Male Technique

Students will acquire a degree of mastery in men's intermediate ballet technique.

Improvement in Postural Awareness, Strength, etc.

Students will Increase postural awareness; begin to correct imperfections; add physical strength, endurance, flexibility, extension, coordination, grace, precision and elevation; and improve the health and appearance of the physical body.

Awareness and Appreciation of Ballet

Students will Increase their awareness and appreciation for ballet, its aesthetic beauty, demanding discipline, and lifelong benefit of enhancing and integrating the physical, spiritual, intellectual, and emotional aspects.

Awareness of Physical Potential

Students will acquire improved awareness of the physical body and its capacity to move.

Improved Sense of Self Worth

Students will gain a sense of personal accomplishment and worth.

Relationship between Religion and Fine Arts

Enlarge one's understanding of the relationship between religion and the fine arts.

Desire to Patronize Ballet in the Future

Students will increase in desire to patronize the art to some degree in the future.

Evaluation Standard

Students will develop an evaluation standard to aid in selecting future quality ballet training for self and/or for family.

Top

Music Theatre in Contemporary Culture

Analysis of the form, evolution and influence of music dance theatre in Western culture.

DANCE 300

Hours	1.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MUSIC 290 & DANCE 243R & DANCE 244R; Concurrent enrollment in Music 300 and TMA 300.
Recommended	Concurrent enrollment in Music 328, Dance 328, and TMA 328.
Taught	Fall

Course Outcomes

MDT Analysis and Communication

Students will be able to analyze, synthesize and articulate the significant facets of music, dance and theatre within the historical context of the musical theatre genre.

Top

Dance for the Elementary Classroom

Methodology course for elementary education majors; creative dance and structured rhythmic dance forms.

DANCE 326

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Dance in elementary schools

Students will identify the value of dance in the elementary setting, including the following benefits:
· Decision making skills
· Confidence and self-expression
· Cultural perspective
· Collaboration and social skills
· Physical skills and kinesthetic learning
· Accessibility for a diverse population
· Recreation and fun

Dance methodology

Students will demonstrate sound dance methodology, including:
· Teaching structured dance forms
· Leading the creative process
· Clear verbalization of directions, cues, side-coaching, and feedback

Teaching resouces

Students will identify various dance teaching resources that enrich the curriculum, including:
· State Core Curriculum
· National Standards
· Music resources

Dance knowledge and skills

Students will increase knowledge and develop skills in the dance discipline, including:
· The elements of dance: space, motion, time, energy
· Problem solving through movement

· Choreographic skills

Age appropriate materials and pedagogy

Students will identify age appropriate material and pedagogy that address the needs of the wide age span of elementary students.

Incorporate dance into school projects

Students will identify ways to incorporate dance into school-wide projects that create community, including dance festivals and performances.

Top

Living Legends

Participation as soloists, coaches, or directors in music dance theatre performances.

DANCE 327R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Audition and director's consent.
Taught	Fall, Winter

Course Outcomes

Living Legends

1. Students will embrace a philosophy of dance compatible with the mission of BYU that guides their personal choices in the professional or recreational worlds of dance.

Top

Script, Movement and Score Analysis

The integration into performance of information gathered from careful research and analysis of movement style, script and score.

DANCE 328

Hours	1.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	TMA 229; Music dance theatre BFA major status; concurrent enrollment in Music 328, TMA 328.
Recommended	Concurrent enrollment in Music 300, Dance 300, TMA 300.
Taught	Fall

Course Outcomes

Landmark Productions in American Musical Theatre

Students will be familiar with the selected landmark productions of the American musical theatre.

Landmark Musical Theatre Works Record

Students will have compiled a written record of these landmark musical theatre works as a personal resource.

Performance Improvement

Students will have learned to implement into their musical theatre performance essential acting, vocal and movement skills as outlined in the evaluation forms.

Performance Ratings

Student's performance work will be consistantly rated in the 3.5 and above catagory based on the evaluation form scale.

Integrating Performance Feedback

Students will be able to integrate into their performance detailed feedback from faculty and peers.

Professional Conduct

Students will approach their work in a competent, courteous and professional manner.

Top

Jazz Dance Technique 2

DANCE 331R

Hours	1.5 Credit, 0.0 Lecture, 4.5 Lab
Prerequisites	Dance 231 or equivalent. Dance 241R and Dance 243; or Dance 291R.
Taught	Fall, Winter

Course Outcomes

Jazz Dance Styles

Students will gain a greater knowledge jazz dance styles through various advance movement combinations.

Jazz Dance Technique

Students will acquire a degree of mastery in jazz dance technique at an advance level as their foundation.

Movement Sequence Retention

Students will increase their intellectual ability to retain complex and substantial length of movement sequences given in a short amount of time.

Psychology of Performance and Auditioning

Students will explore the psychology of performance and auditioning.

Jazz Rythms and Motion

Students will experience the joy of jazz rhythms and motion.

Physical Health and Training

Students will increase awareness in their physical health and well-being through activity and correct principles of training.

Self-image Awareness

Students will increase awareness to their overall self-image, emphasizing; discipline, coordination, strength, flexibility and endurance.

Understanding the Gospel of Jesus Christ as an Artist

Students will gain understanding of the gospel of Jesus Christ as an artist in the world.

Patronage in the Arts

Students will acquire the desire to patronize the art to some degree in the future.

Evaluation

Students will develop an evaluation standard to aid in selecting future quality jazz dance training for self and/or for family.

Top

Cougarette Collegiate Performing Team

DANCE 332R

Hours	2.0 Credit, 0.0 Lecture, 14.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Representing BYU

1. Students will represent Brigham Young University with honor and dignity.

Advanced Level Technique

2. Students will demonstrate advanced level technique.

National Level Competition

3. Students will compete on a Nationals Level as determined each year.

Top

Tap Dance Technique 2

DANCE 335R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 235 or equivalent.
Taught	Fall, Winter

Course Outcomes

Complex Rhythms

Students will explore the intricacies of complex rhythms

Dynamics, Accents, and Shading

Students will focus on dynamics, accents, and shading, etc.

Tap Technique

Students will continue to work on speed, clarity, and exactness in tap technique

Counterpoint, Stop Time, Phrasing, and Time Signatures

Students will explore the use of counterpoint, stop time, phrasing, and different time signatures.

Improvisation and Creative Thinking

Students will enhance improvisational skills, creative thinking and risk-taking.

Composition Process and Theory

Students will learn the theory and process of composition.

Personal Style and Performance

Students will work on their performance skills and personal style.

Tap Notation

Students will learn the skills of tap notation.

Self-Evaluation and Correction

Students will develop a sense of aesthetic perception to self evaluate and self correct.

Top

Contemporary Modern Dance, Technique and Theory 3

DANCE 340R

Hours	2.5 Credit, 0.0 Lecture, 7.5 Lab
Prerequisites	Dance 243R or equivalent; by audition.
Taught	Fall, Winter, Spring

Course Outcomes

Dance Performance Artistry

Demonstrate increased dance performance artistry in:

- sequence mastery
- musicality
- expressivity
- personal interpretation
- nuance
- ensemble

Intermediate/Advanced Modern Dance Technical Proficiency

Demonstrate intermediate/advanced Modern dance technical proficiency in

- whole body connectivity
- strength & flexibility
- breath initiation and support
- consistent core support
- functional alignment
- balance & coordination
- groundedness and weight sensing
- shape clarity, spatial accuracy and range
- focus
- rhythmic accuracy
- articulation
- dynamic contrast
- complex movement skills

Technical and Performance Skill Analysis

Describe, assess and write about demonstrated achievement of technical and performance skill

Applying Feedback

Show sustained application of feedback from assessments

Contemporary/Modern Dance as an Art Form

Articulate understanding of Contemporary/Modern dance as an art form

Dance and Gospel Principles

Articulate dance connections to gospel principles mind, body and spirit

Top

Contemporary Modern Dance Technique Forms

Contemporary dance forms and techniques, including Chinese contemporary dance, contact improvisation, and other new and hybrid dance forms useful in contemporary dance training. Offerings subject to teacher expertise.

DANCE 341R

Hours	2.5 Credit, 0.0 Lecture, 7.5 Lab
Prerequisites	Dance 340 or equivalent; by audition.
Taught	Fall, Winter

Course Outcomes

Contemporary/Modern Dance as an Art Form

Articulate understanding of Contemporary/Modern dance as an art form

Top

Kinesiology for Dancers

Study and analysis of the neuromusculoskeletal system in practical application to dance for more efficient use of the body and reduction of injuries.

DANCE 342

Hours	4.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	PDBIO 220 & DANCE 230
Taught	Winter, Spring odd years

Course Outcomes

Joint and Muscle Group Movement

1. Identify actions and roles of specific joints and muscle groups while moving and stationary

Correcting Skeletal Alignment

2. Identify correct skeletal alignment, as well as incorrect alignment and skeletal deviations common to dancers.

Skeletal Misalignment

3. Identify chain reactions of skeletal misalignment, and muscular imbalances that commonly occur in the presence of a given misalignment.

Body Structure and Function

4. Identify individual differences in body structure and function, and outline specific strategies for working with those differences.

Body Education Procedures

5. Outline appropriate procedures to address bodily education/re-education through neurological, muscular and skeletal means.

Area of Specialization

6. Demonstrate explicit knowledge in one self-selected dance and science related topic.

Top

Principles of Somatics

Experiential approach to movement training including body patterning. Integration and personal expression of body and movement choices.

DANCE 343

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	DANCE 243R & DANCE 244R; or DANCE 291R; Dance 342.
Taught	Fall

Course Outcomes

Somatic Principles and Practices

Students will be able to:
1. identify and demonstrate a basic theoretical and practical understanding of selected Somatic principles and practices.

Movement Awareness and Understanding

2. demonstrate an awareness and understanding of movement from a place of inward knowing.

Physical Connectivity

3. physically embody connectivity

Personal Movement Choices

4. understand the joys and consequences of their own personal movement choices

Teaching and Coaching Practices

5. integrate the concepts of the class into the practical applications of teaching, coaching and re-patterning for self or other.

Top

Methods of Teaching Dance to Social Groups in Secondary Education

Teaching methodologies in social and world dance, specifically to prepare students in secondary dance education to teach these forms in the public schools.

DANCE 346

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	None
Recommended	Dance 170, 180.
Note	For dance education majors only.
Taught	Fall

Course Outcomes

Social and World Dance Vocabulary

2. Students will learn the vocabulary of the steps associated with social & world dance.

Social and World Dance Fundamentals

1. Students will learn the basic skill fundamentals of social & world dance.

Dance Teaching Methodology

3. Students will learn the basic teaching methodology of social & world dance.

Calling Ahead and Prompting

4. Students will learn basics of calling ahead and prompting for social & world dance.

Teaching Skills and Techniques

5. Students will understand the value of good teaching skills and techniques in order to help others enjoy these dance styles.

Personal Teaching Style

6. Students will begin to develop a teaching style of your very own.

Kinnect

Educational outreach dance company specifically focusing on developing teaching, creative, and performance skills.

DANCE 348R

Hours	1.0 - 2.0 Credit, 1.0 Lecture, 6.0 Lab
Prerequisites	Audition.
Taught	Winter, Spring

Course Outcomes

Collaborative Choreography for Performance

1. Collaboratively choreograph theme based dances for an educational lecture performance

Teaching Dance to Children

2. Demonstrate creative dance teaching skills with children in elementary schools

Performance and Improvisation

3. Demonstrate increased performance and improvisation skill in real world venues

Leadership in Production and Teaching

4. Demonstrate leadership within the group by fulfilling specific roles and assignments related to the creation, production, presentation, and teaching tasks of the company

Evaluating and Modifying Lessons and Dances

6. Evaluate, modify and adapt original presentations, lessons and dances in authentic dance experiences in schools, museums and/or conferences

Professionalism and Advocacy

7. Demonstrate dance education professionalism and advocacy

Laban Movement Analysis

Tools to make sense of, and derive meaning from movement. Constituent movement components that facilitate accuracy in teaching, performance, and choreography.

DANCE 351

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	DANCE 243R & DANCE 244R & DANCE 291R
Taught	Winter

Course Outcomes

Laban Movement Fundamentals

Each student will be able to:
1. Identify the basic vocabulary, concepts and principles that are used in LMA.

Systematic Movement Description

2. Describe a movement event systematically using the aspects of the system.

Laban Movement Application and Skill

3. Demonstrate functional skill in both a personal and professional application of LMA, including appropriate notational forms and/or specialized terminologies.

Top

Dance Production, Introduction

Principles and practices of technical aspects of dance production.

DANCE 355

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Technical Theatre Equipment and Techniques

1. Students will identify and articulate a knowledge of equipment, techniques, and procedures in technical theatre.

Theatrical Production Theory and Practice

2. Students will demonstrate basic competency (in theory and practice) of theatrical production principles, including lighting, costuming, and technologies for dance performances

Elements of Artistic Vision

Students will demonstrate an understanding of the relationship of light, color, fabric, and technology; and how to use that knowledge to accomplish an artistic vision.

Top

Dance and Health Issues

DANCE 359R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	DANCE 243R & DANCE 244R & DANCE 261
Taught	Fall odd years

Course Outcomes

Knowledge

Students will deepen their understanding of how dance and health issues are related.

Top

Dance and Identity

DANCE 359R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	DANCE 243R & DANCE 244R & DANCE 261
Taught	Fall even years

Course Outcomes

Knowledge

Students will deepen their understanding of how dance and identity are related.

Dance Philosophy and Aesthetics

DANCE 359R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	DANCE 243R & DANCE 244R & DANCE 261
Taught	Winter odd years

Course Outcomes

Analysis of Spiritual Connections

Students will analyze spiritual connections between gospel principles and aesthetic concepts. This includes :
• Open expression of reverence for the Creator, His Creations, and the act of creativity.
• Compatible choices in the dance profession with the Latter-day Saint standards and culture.

Exploration Intellectual Reasoning in Dance

Students will explore intellectual reasoning in the field of dance aesthetics including:

- Discovery of important aesthetic and ethical issues with clear analytical critical thinking.
- Risk-taking, connecting, and synthesizing personal meaning from complex ambiguities.
- Develop an aesthetic philosophy, and ability to advocate and defend it.

Cultivating Respect and Courtesy for Different Viewpoints

Students will build character by cultivating a respect for differing points of view, and applying courtesy during the individual expression sessions. The course content will encourage independent thinking and individual responsibility.

Engage in Discussion and Writing about Dance

Students will voice value for Lifelong Learning *as* they articulate a love for and engage in discussion and writing about dance. Students will be encouraged to share their passion for dance in a way that is lucid, succinct, and compelling.

Articulate Value of Dance

Students will be challenged to articulate the value of dance in a manner that is founded on gospel principles and moral ideals, rather than on mere emotional declarations.

Top

Special Topics and Issues

Seminar with rotating topics and issues selected from: dance and health, dance and identity, dance and technology, and dance philosophy and aesthetics.

DANCE 359R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	DANCE 243R & DANCE 244R & DANCE 261
Taught	Fall, Winter

Course Outcomes

Cultivating Respect and Courtesy for Different Viewpoints

Students will build character by cultivating a respect for differing points of view, and applying courtesy during the individual expression sessions. The course content will encourage independent thinking and individual responsibility.

Music Dance Theatre Choreographic Styles

Physical and conceptual aspects of dance styles as they relate to music dance theatre.

DANCE 361

Hours	2.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	DANCE 231R & DANCE 244R & DANCE 291R; Dance 235, 243R, 229.
Taught	Winter

Course Outcomes

Music Dance Theatre Styles

Students will:
1. Be able to reproduce specific Music Theatre dance styles with clarity. Sequences to be mastered will come from a variety of sources – instructor, guests, and fellow students.

MDT Choreographer or Style Specialization

2. Acquire knowledge on a specific historical or current Music Theatre choreographer or appropriate style that is pertinent in the field of Music Theatre.

Professional Auditioning Techniques

3. Increase better understanding of techniques used for professional auditioning.

Choreography Skills

4. Gain specific skills to produce original choreography that can be used in Musical Theatre.

Religion and Music Theatre

5. Develop more understanding of a relationship between religion and the role of Music Theatre in culture and society.

Contemporary Modern Dance Choreography Intermediate

Fundamental choreographic structure emphasizing visual, kinesthetic, and musical aspects in contemporary dance.

DANCE 362

Hours	2.0 Credit, 0.0 Lecture, 4.0 Lab
Prerequisites	DANCE 244R
Taught	Fall, Winter

Course Outcomes

Dance Composition Fundamentals

1. Students will learn technical elements, process and crafting principles of composition, such as: transitions, traditional formations, dynamic structure, stylistic coherence, form, musical dynamics and phrasing.

Aesthetic Criteria and Analysis

2. Students will develop a critical eye in analyzing and forming own aesthetic criteria.

Ethno-Choreographic Elements

3. Students will discover ethno-choreographic elements of a particular style or cultural group.

Issues in Dance Composition

4. Students will address issues of authenticity versus creativity, traditional versus contemporary.

Choreography Documentation

5. Students will learn to document choreography.

Top

Dance Improvisation, Intermediate

DANCE 363R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	DANCE 244R
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Creative Dance for Elementary Education

Theory and teaching experience in creative movement for preschool and elementary school children.

DANCE 365

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Dance 243R, 244R, or approved Kinnect membership.
Taught	Winter

Course Outcomes

Dance Education Theory, Content, and Pedagogy

1. Articulate an understanding of creative dance education theory, content, and pedagogy that facilitates artistic development and process orientation.

Developmentally Appropriate Dance

2. Apply knowledge of developmentally appropriate dance learning activities for children pre-school through grade eight.

Elementary Dance Teaching Practices

3. Demonstrate an understanding of dance, elements, concepts and vocabulary physically, verbally and in writing, and apply that knowledge to teaching dance in the elementary setting

Lesson Objectives and Curriculum Standards

4. Identify and use clear lesson content objectives drawn from national and state curriculum standards when planning lessons and teaching dance.

Teaching Strategies and Management Techniques

5. Understand and apply a variety of teaching strategies and management techniques necessary to effectively guide dance skill building, exploration, improvisation, and compositional experiences for young children.

Dance Assessment

6. Explore and identify various forms of dance assessment

Methods of Teaching Contemporary Modern Dance

Planning, teaching, and evaluating lessons.

DANCE 366

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	DANCE 243R & DANCE 261; Dance 244R or equivalent.
Taught	Winter

Course Outcomes

Teaching and Learning Philosophy in Contemporary Dance

1. develop, articulate and demonstrate a clear philosophy of teaching and learning as it relates to Contemporary Dance.

Learning Content and Processes

2. demonstrate a conceptual understanding of the content and processes needed to facilitate learning in the field of Contemporary Dance.

Planning, Teaching, and Evaluation Experience

3. demonstrate teaching competency through experiences in planning, teaching and evaluating lessons.

Teaching Strategies

4. demonstrate an ability to use a variety of teaching strategies to produce new knowledge and skills in others.

Process-Oriented Instruction

5. facilitate artistic development through process-oriented instruction.

Methods of Teaching Children's Creative Dance

DANCE 367

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	DANCE 243R & DANCE 244R
Taught	Fall

Course Outcomes

Creative Dance for Children

Students will:
1. Gain an increased understanding of the importance of Creative Dance for children.

Developmentally Appropriate Dance Skills

2. Learn to teach developmentally appropriate technical dance skills to children.

Problem Solving and the Creative Process

3. Demonstrate an understanding of the methods of encouraging creative problem solving skills and the creative process.

Teaching Children Dance Elements

4. Demonstrate knowledge, mastery and application of the elements of dance (time, space, and force) in relation to the teaching of children.

Teaching Experience

5. Gain practical experience through teaching children.

DancEnsemble - Contemporary Dance Performance and Choreography

Experiences in contemporary dance choreography and performance.

DANCE 368R

Hours	1.0 - 2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Performance Skill

1. Demonstrate increasing performance skill, including skills of concentration, discipline, focus and stage presence.

Technical Skill

2. Demonstrate increasing technical skill, focusing specifically of the refinement of nuance, projection, dynamics and the ability to dance within the context of an ensemble.

Dance Creation and Evaluation

3. Create and evaluate dances, giving increased attention to the ability to see and respond to the possibilities within any given choreographic situation.

Personal Voice

4. Investigate and refine their own individual choreographic and performance voice.

World Dance Technique 2

In-depth dance technique of selected traditional, folk, and national dance styles.

DANCE 370

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	DANCE 270
Taught	Winter

Course Outcomes

Posture and Gesture Technique

2. Develop proper technique of posture and gesture

Cultural Movement Patterns

1. Demonstrate complex movement patterns from selected cultures

Body Alignment and Movement Execution

3. Interpret proper body alignment and technical execution of movement styles and phrases

World Dance Vocabulary and Context

4. Enhance the ability to recognize and understand world dance vocabulary, significance andcontext within selected cultures

Top

Clog Dance Technique 2

Fundamentals of clog technique at the advanced level.

DANCE 371R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 271 or equivalent.
Taught	Fall, Winter

Course Outcomes

Advanced Clogging Techniques

Students will learn traditional and contemporary advanced clogging techniques including arm movements, footwork, correcrt alignment, placement, and weight shifts

Clogging Terminology

Students will learn a movement vocabulary using correct clog dance terminology.

Intermediate Movement

Students will learn, dance and test intermediate sequences and patterns of movement.

Presentation skills

Students will learn additional presentation skills in clog dance movement patterns, combinations, and skills.

Clog Dance History

Students will learn a knowledge of the history and progression of clog dance.

Top

Hungarian Dance: Practice and Theory, Technique 2

Advanced ethnic dance techniques from the Hungarian culture.

DANCE 373

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 273 or equivalent.
Taught	Fall

Course Outcomes

Proficiency in Hungarian and Transylvanian Dance Dialects

1. Students will learn to become proficient in several Hungarian and Transylvanian dance dialects.

Step Combination Knowledge

2. Students will demonstrate a knowledge of step combinations performing couple, solo, and circle dances.

Hungarian Couple Dance Improvisational Skills

3. Students will gain improvisational skills of specific traditional Hungarian couple dance styles.

Musical Awareness

4. Students will learn rhythmical & musical awareness skills.

Partnering Skills

5. Students will acquire partnering skills in Hungarian Dance.

Hungarian Cultural Issues, Music, Costuming

6. Students will learn basic aspects of music, costumes, history and cultural issues.

Self Analysis and Correction

7. Each student will learn how to analyze and self correct technique and performance skills

Irish Dance: Practice and Theory, Technique 2

Advanced ethnic dance techniques from the Irish culture.

DANCE 374R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 274R or equivalent.
Taught	Winter

Course Outcomes

Irish dance Technique 2

1. To explore Irish step dancing skills on an advanced technique level
2. To increase technique, stamina, and foot work
3. To enhance rhythmical and musical skills and awareness
4. To learn a variety of advanced team figure dances and solo dances

Top

Methods of Teaching World Dance

DANCE 376

Hours	2.0 Credit, 2.0 Lecture, 3.0 Lab
Prerequisites	None
Recommended	Dance 170 or equivalent.
Taught	Fall

Course Outcomes

Steps, Formations and Positions

1. Students will study logical progressions in the breakdown of steps, formations and positions

Verbal Cue Delivery

2. Students will learn to communicate specific verbal cues in the delivery of content

Calling Ahead Techniques

3. Students will develop calling ahead techniques

Class Management

4. Students will learn the mechanics of class structure and management

Styling and Technique

5. Students will demonstrate correct styling and technique

World Dance Descriptions

6. Students will learn how to read and understand world dance descriptions

Group Teaching Skills

7. Students will learn the skills in successfully teaching large groups in a recreational setting

Teaching and Learning Philosophy

8. Students will develop and actualize a clear philosophy of teaching and learning as it related to dance

World Dance Choreography

Fundamental choreographic structure emphasizing visual, kinesthetic, and musical aspects in World Dance.

DANCE 377

Hours	2.0 Credit, 0.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Compositional Elements

1. Students will learn technical elements, process and crafting principles of composition, such as: transitions, traditional formations, dynamic structure, stylistic coherence, form, musical dynamics and phrasing.

Form Aesthetic Criteria and Critical Eye

2. Students will develop a critical eye in analyzing and forming own aesthetic criteria.

Ethno-choreographic Elements

3. Students will discover ethno-choreographic elements of a particular style or cultural group.

Issues

4. Students will address issues of authenticity versus creativity, traditional versus contemporary.

Document Choreography

5. Students will learn to document choreography.

Top

Folk Dance Performance, Intermediate

Performance techniques and experience in folk dance.

DANCE 378R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Regional Dance Technique and Style

1. Students will learn the traditional dance technique and stylization of selected countries or regions

Performance Skills

2. Students will develop the performance skills of posture, presentation, and characterization

World Dance: Recreational and Staged

3.Students will explore both the recreational and staged forms of world dance

Team Citizenship

4. Students will demonstrate strong citizenship as a member of a performance team

Top

Social Dance, Technique 2

DANCE 380R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 280 or equivalent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Technique

2. Students will demonstrate the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.

School Figures

1. Students will demonstrate the school figures associated with each dance by practice and application.

Participation in Labs and Exams

3. Students will demonstrate their ability to lead and follow through their participation at labs and through exams.

Top

Ballroom Dance, International Technique 2

Gold 1 level. Waltz, tango, fox-trot, quickstep.

DANCE 382R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 284 or equivalent; instructor's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Demonstrate gold level ballroom school figures

1. Students will be able to effectively demonstrate gold level school figures of International Style Waltz, Tango, Foxtrot and Quickstep.

Demonstrate advanced level ballroom technique

2. Students will be able to effectively demonstrate advanced level ballroom technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

Top

Latin Dance, International Technique 2

Gold 1 level. Cha-cha, samba, rumba, paso doble.

DANCE 383R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 285 or equivalent; instructor's consent.
Taught	Fall, Winter, Summer

Course Outcomes

Demonstrate gold level latin school figures

Students will be able to effectively demonstrate gold level school figures of International Style Cha-Cha, Samba, Rumba, Paso Doble

Demonstrate advanced level latin technique

Students will be able to effectively demonstrate advanced level latin technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

Top

Ballroom Dance, International Technique 3

Gold 2 level. Waltz, fox-trot, tango, quickstep.

DANCE 384R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 382R or equivalent; instructor's consent.
Taught	Fall, Winter

Course Outcomes

Demonstrate competency in competitive ballroom figures

1. Students will be able to demonstrate, competitive figures at a pre-championship level in the International Style Waltz, Tango, Foxtrot and Quickstep.

Demonstrate pre championship level ballroom technique

2. Students will be able to demonstrate pre-championship level ballroom technique in the following areas: 1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

Top

Latin Dance, International Technique 3

Gold 2 level. Cha-cha, rumba, samba, jive, paso doble.

DANCE 385R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 383R or equivalent ; instructor's consent.
Taught	Fall, Winter

Course Outcomes

Demonstrate competency in competitive latin figures

1. Students will be able to demonstrate, competitive figures at a pre-championship level in International Style Cha-Cha, Samba, Rumba, Paso Doble

Demonstrate pre championship level latin technique

2. Students will be able to demonstrate pre-championship level latin technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

Methods of Teaching Social Dance

Pedagogy training in social dance at the bronze and silver skill levels.

DANCE 386

Hours	2.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	DANCE 280
Taught	Fall, Winter

Course Outcomes

Characteristics of Great Teachers

1. Students will analyze the most important characteristics of great teachers through discussion.

Dance Participation and Practice

2. Students will demonstrate basic skills of ballroom dance by participation and practice including both the mans and ladies parts.

Group Teaching Skills and Experience

3. Students will demonstrate the basic skills of teaching dance to groups by developing lesson plans and through practical experience.

Top

Ballroom Dance Choreography

Choreography in Ballroom Dance emphasizing formation dancing.

DANCE 387

Hours	2.0 Credit, 0.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Foundation Elements of Formation Choreography

1. Students will find coherence in foundational elements of formation choreography.

Basic Skills of Ballroom Formation Choreography

2. Students will demonstrate basic skills of composing ballroom formation choreography.

Top

Ballroom Dance Performance, Intermediate

Performance techniques and experience in ballroom dance.

DANCE 388R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Ballroom Dance Skills

1. Students will demonstrate dance skills through technique, stylization, and choreography.

Representing BYU and the Church

2. Students will find coherence if what it means to represent Brigham Young University and the Church of Jesus Christ of Latter-day Saints in local areas.

Ballet Technique 3

DANCE 390R

Hours	2.5 Credit, 0.0 Lecture, 7.5 Lab
Prerequisites	Audition.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Technique Objective

Each student will:
1. Acquire a degree of mastery in advanced/intermediate ballet technique. These skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific criteria and standards.

Writing Objectives

Each student will:
1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level and then pass an objective written exam prepared by the ballet program.
2. Submit a completed self-assessment rubric and/or written self-evaluation at the individual midterm conference.
3. Submit a written critique of a perceptively analyzed live ballet performance according to the guidelines provided. Required expectations include sound writing skills, qualitative reasoning, and an ability to assess ballet technique at an advanced/intermediate level standard.

Participation Objective

Each student will:

1. Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

Ballet Technique 4

DANCE 391R

Hours	2.5 Credit, 0.0 Lecture, 7.5 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Technique Objective

Each student will:
1. Acquire a degree of mastery in advanced levelballet technique. These skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific criteria and standards.

Writing Objectives

Each student will:
1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level and then pass an objective written exam prepared by the ballet program.
2. Submit a completed self-assessment rubric and/or written self-evaluation at the individual midterm conference.
3. Submit a written critique of a perceptively analyzed live ballet performance according to the guidelines provided. Required expectations include sound writing skills, qualitative reasoning, and an ability to assess ballet technique at an advanced level standard.

Participation Objective

Each student will:

1. Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

Top

Ballet Pointe 1

Intermediate level pointe. Satisfies BA requirements in Dance.

DANCE 392R

Hours	0.5 Credit, 0.0 Lecture, 1.5 Lab
Prerequisites	A minimum of two years of previous pointe technique and concurrent enrollment in Dance 390R.
Note	Although this is an open enrollment course, all students must receive teacher approval or level placement audition before registering.
Taught	Fall, Winter, Spring

Course Outcomes

Ballet Pointe - 1

1. Acquire a degree of mastery and control in Begoinning pointe technique. These skills will be accomplished through active class participation and the practice of the movement vocabulary listed in the appendix. Please consult the appendix for the specific criteria and standards.
2. Increase artistry, endurance, control and strength.

Ballet Pointe 2

Advanced level pointe. Satisfies BA requirements in Dance.

DANCE 393R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Audition required; concurrent enrollment in Dance 390R or 391R.
Note	Although this is an open enrollment course, all students must receive teacher approval or level placement audition before registering.
Taught	Fall, Winter

Course Outcomes

Technique Objective

Each student will:
1. Acquire a degree of mastery in advanced/intermediateballet pointe technique. These skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific criteria and standards.

Writing Objective

Each student will:
1. Apply a working knowledge of French ballet terminology, analytical skills, and sound writing skills by submitting a weekly journal entry or written self-evaluation, and a written critique of a live performance.

Participation Objective

Each student will:

1. Participate fully in the pointe technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

Methods of Teaching Ballet

Teaching classical ballet from preballet through advanced; includes analysis of Bournonville, Cecchetti, Vaganova, RAD, Kneeland, and SAB methods.

DANCE 396

Hours	2.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Dance 390R or equivalent.
Taught	Fall odd years

Course Outcomes

Ballet Curriculum

1. Students will demonstrate a knowledge of ballet class structure and progression between levels bywriting an 8-year ballet curriculum.

Ballet Class Observation and Analysis

2. Students will experience practical observation of ballet classes/labs and analyze teachers at work.

Music in Teaching

3. Students will apply sound musical principles in practical teaching experiences.

Methodology Analysis

4. Students will philosophically and historically analyze each of the major ballet methodologies: Cecchetti, Royal Academy of Dancing, Vaganova, etc.

French Ballet Terminology

5. Students will demonstrate a working knowledge (both written and verbal) of ballet French terminology for the technique appropriate for each level of ballet instruction.

Top

Ballet Choreography

Fundamental choreographic structure emphasizing visual, kinesthetic, and musical aspects in ballet. Exploration of the choreographic process through theoretical study and analysis as well as practical application in the presentation of choreographic work. Concepts include clarity, creativity, transition, musical accent and phrasing, dynamic structure, form, stylistic coherence, artistic merit.

DANCE 397

Hours	2.0 Credit, 0.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Learning Outcome 1

Each student will creatively experiment with and arrange movement with regard to clarity, transition, musical accent and phrasing, dynamic structure, form and stylistic coherence.

Learning Outcome 2

Each student will begin to formulate his/her own aesthetic criteria through the process of watching dance concerts and writing concise and thoughtful critiques.

Learning Outcome 3

Each student will enhance his/her understanding of choreography through reading, observation, discussion, and active participation.

Learning Outcome 4

Each student will demonstrate knowledge acquired through completion of creative, choreographic project and written examination.

Top

Academic Internship: Dance

DANCE 399R

Hours	0.5 - 4.0 Credit, 0.0 Lecture, 50.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Network for career choices

1. Develop contacts with professionals in their field of study with the intent of creating a network that will be beneficial to future career choices.

Interact with Professionals

2. Demonstrate the propensity to interact with professionals in their field of study in a credible, responsible and articulate manner.

Assigned Responsibilities

3. Demonstrate improvement in the assigned responsibilities throughout the course of the internship as evaluated by the mentor teacher/intern supervisor in three periods, early, middle, and end of the internship.

Top

Music Dance Theatre: Senior Performance Project

Participation in an MDT performance group culminating in a showcase for agents and directors in New York City during April.

DANCE 426

Hours	1.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	DANCE 361; Concurrent enrollment in Music 426, and TMA 426.
Taught	Winter

Course Outcomes

Professional Feedback

Students will audition for and receive feedback from industry professionals in two markets.

Audition/ Showcase

Students will experience an audition/showcase situation in two entertainment markets.

Preparation

Students will have several performance ready audition selections prepared.

Personal CV/Bio

Students will have professioanlly produced personal promotional material on hand.

Master Classes

Students will experience Master Classes from working Broadway professionals.

Marketability

Students will recognize their types and marketability within the entertainment industry.

Networking

Students will establish professional contacts that will aid them in making the transition from the adademic to the professional world of theatre.

Top

Dance Performance 2

Participation as dancers in concert dance production.

DANCE 429R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter

Course Outcomes

Performance

The learning outcomes of this course will be correlated somewhat with the learning outcomes of one of the regular dance performance groups. However, due to the individualized nature of this course, individual outcomes will be designed by the instructor based upon the needs and opportunities of the student.

Top

Contemporary Modern Dance Technique and Theory 4

DANCE 440R

Hours	2.5 Credit, 0.0 Lecture, 7.5 Lab
Prerequisites	Dance 340R or equivalent; by audition.
Taught	Fall, Winter

Course Outcomes

Advanced Technique

Students will demonstrate advanced technique proficiency in

- strength
- flexibility
- connectivity
- complex sequence mastery movement problems

Performance Awareness and Control

Students will demonstrate performance awareness and control over movement in

- nuance
- dynamic
- musicality
- freedom from tension
- shaping
- initiation
- breath quality
- phrasing and composition

Skill and Performance Assessment and Writing

3. Students will describe, assess and write about achievement of technical skills and performing skills

Gospel Principles and the Human Body

4. Students will articulate appreciation for the divine nature of the human body as it relates to gospel principles as well as the relationship between mind/body/spirit.

Dance Appreciation

5. Students will articulate appreciation for dance as an art form

Top

Seminar in Dance

Seminar exposing students to a variety of dance related topics. Instruction by multiple dance professionals in their areas of expertise.

DANCE 459

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Career Opportunities

2. Student will identify a variety of career opportunities in the field of dance

Advanced Degree Opportunities

1. Student will articulate an understanding of advanced degree opportunities

Professional Preparation

3. Student will demonstrate an understanding of appropriate professional skills needed for entry into the dance field

Professional Document Preparation

4. Student will generate professional documents relevant to their future in the dance field

Enhanced Perspective on Current Dance Issues

5. Student will articulate an enhanced perspective on current dance issues

Personal Spiritual Views on Dance

6.Student will express personal spiritual views in relation to dance performance, choreography and pedagogy

Top

Dance History to 1850

Survey of dance in tribal cultures and ancient through Romantic historical periods, emphasizing dance of Western civilization.

DANCE 460

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Dance History: Ancient through 1850

1. Students will critically analyze, synthesize, internalize, and apply to present day dance prevalent in Western civilization, dance information gleaned through the study of dance within tribal cultures and ancient through romantic historical periods. (To be evaluated via midterm and final written examinations)

Dance Issues and Analysis

2. Students will analyze current dance and culturally related issues in contemporary society and articulate them verbally and in written form through class discussion and completion of course assignments. (To be evaluated via written response questions)

Research Concepts and Methodology

3. Students will apply basic historical research concepts and methodology in personal research processes and products. (To be evaluated via unit assignments.)

MLA Style

4. Students will become proficient in the use of MLA documentation style and format through application in unit assignments. (To be evaluated via formal documentation associated with unit assignments.)

Top

Dance History from 1850

Survey of dance in modern and postmodern historical periods, emphasizing dance of Western civilization.

DANCE 461

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Dance History: 1850 to Present

1. Students will critically analyze, synthesize, and internalize key Western dance history information focusing on 1850 to the present. (To be evaluated via midterm and final written examinations)

Dance Analysis and Writing

2. Students will analyze current dance and culturally related issues in contemporary society; and articulate them verbally and in written form through class discussion and completion of course assignments. (To be evaluated via written response questions)

Research Concepts and Methodology

3. Students will apply basic historical research concepts and methodology to strengthen personal research processes and products. (To be evaluated via unit assignments)

MLA Style

4. Students will become competent in the use of MLA documentation style and format through application in relevant course assignments. (To be evaluated via formal documentation associated with unit assignments)

Top

Contemporary Modern Dance Choreography, Advanced

Creation and presentation of complete choreographic works.

DANCE 462

Hours	2.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	DANCE 362
Taught	Fall

Course Outcomes

Choreography

Each student will choreograph a four-minute dance on more than one dancer (duet, group, etc.). The concepts that I will evaluate in each piece of choreography are: clarity, transition, musical accent and phrasing, dynamic structure, form, stylistic coherence. In this class, each student will design his or her own choreographic concept for the piece.
This choreographic project will include the submission of the following information at the time that the choreography is presented.

1. Title of dance
2. Costume sketch
3. Program notes and information
4. Lighting information
5. Newspaper write-up
6. Personal "Bio."
7. Resume

Dancer/Performer/Observer of Choreographic Process and Princ

Each student will be involved in learning a number of choreographies of other students. Consequently, each will be evaluated on attendance, promptness and commitment when working with other choreographers. *Each student will write a two-page summary of what principles were explored and emphasized and was learned in working with each one of the different choreographers.*

Two Concert Critiques

You will write a three page critique with an introduction, middle, and conclusion: You will comment on the concert as a whole, and then you will choose two or three dances and discuss them in terms

of form, style, musicality, transition, dynamic structure, and clarity of purpose. *You may **not** critique a concert in which you are performing*.

Readings

Various reading may be assigned throughout the semester depending of the special interests and questions of the students in the class. The readings will be discussed, and students will be evaluated on quality of participation in the discussions.

Top

Dance Accompaniment

DANCE 464

Hours	1.0 Credit, 1.0 Lecture, 1.0 Lab
Prerequisites	DANCE 264
Taught	

Course Outcomes

Leadership in Teaching and Accompanying Dance

Students will demonstrate leadership skills by teaching and accompanying short dance sequences.

Dynamics, Articulation and Rhythm

Students will understand the importance of dynamics, articulation and rhythm in dance.

Improvisation and Demonstration on Djembe

Students will understand how to improvise rhythms by practicing and demonstrating rhythms on a djembe drum.

Accompanying Movement Exercises

Students will demonstrate musical proficiency by accompanying dancers movement exercises.

Audio File Preparation

Students will use technology to edit and enhance audio files used for movement studies.

K-12 Dance Curriculum Design

Dance unit planning, scope and sequencing, core curriculum, and curriculum mapping with cross-curricular, thematic, and cultural integration K-12.

DANCE 465

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	DANCE 276R & DANCE 365 & DANCE 366; Dance 348R or 399R.
Taught	

Course Outcomes

National and State Standards

1. Demonstrate the ability to represent existing national and state dance standards within a relevant dance curriculum;

Unit Planning and Sequencing

2. Understand and be able to articulate the value of unit planning and scope and sequencing within a larger curriculum map;

Developmentally Appropriate Curriculum

3. Demonstrate the ability to organize and create unit and curricular plans that are developmentally appropriate for specific populations within the K-12 setting;

Cross-Disciplinary Dance Curriculum

4. Demonstrate the ability to apply cross-disciplinary concepts within a larger dance curriculum in K-12 settings;

Assessment

5. Articulate understanding of the language and uses of assessment.

Top

Dance Teaching Practicum

Pre-student teaching course giving students practical teaching and classroom management experience in a mentored environment. Discussion lab integrating theory and experience.

DANCE 466

Hours	3.0 Credit, 5.0 Lecture, Arr Lab
Prerequisites	Dance major status.
Taught	Fall

Course Outcomes

Curriculum Development

1. Create unit and lesson plans that appropriately align with the Utah core curriculum;

INTASC Standards

2. Demonstrate competent use of INTASC standards while teaching;

Classroom Management

3. Articulate and demonstrate various strategies for successful classroom management;

Student Assessment Methods

4. Demonstrate varied student assessment methods and strategies, including successful design and use of a rubric;

Self-Assessment

5. Reflect upon and accurately self-assess teaching strengths and weaknesses.

Contemporary Dance Theatre

Performing modern and contemporary dance repertory on and off campus.

DANCE 468R

Hours	2.0 Credit, 0.0 Lecture, 12.0 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Performance Skill and Artistry

1. Develop advanced performance skill and artistry.

Choreography

3. Understand choreographic principles.

Choreographic Process

4. Contribute to the choreographic process.

Performance

5. Perform dances for audiences on campus, in schools, in professional venues, and at conferences.

Top

Capstone in Dance

DANCE 469

Hours	2.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	BA in Dance: Dance 362 if a choreographic project. Dance Education: Dance 362; 361 or 462.
Taught	Fall, Winter

Course Outcomes

Capstone Project

Students will reflect in their capstone project a philosophy compatible with the mission of BYU

Capstone Project

Students will complete a capstone project, whether it be choreographic, research, or performance that represents a significant and comprehensive synthesis of the learning they have experienced during their years in the program

Percussive Step Styles

Technique and theory, fusing a diversity of percussive dance styles including, but not limited to, French Canadian Gigue, Cape Breton Step, Power Tap, traditional and contemporary Clog Dance. Composition and improvisation included.

DANCE 474R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Two of three possible courses: Dance 371 or 335 or 374R.
Taught	Fall even years

Course Outcomes

Speed, Clarity, and Precision in Percussive Footwork

1. Students will gain speed, clarity and precise technique in various styles of percussive footwork.

Coordination, Motor Memory, Fine and Gross Motor Skills

2. Students will improve coordination, motor memory, fine and gross motor skills.

Alignment, Placement, and Weight Shifts

3. Students will demonstrate correct alignment, placement and weight shifts.

Movement Sequences and Patterns

4. Students will learn sequences and patterns of movement.

Improvisation and Composition

5. Students will apply the theory and process of improvisation and composition.

Movement Terminology

6. Students will learn the current movement vocabulary and or terminology.

Self Evaluation and Correction

7. Students will gain a kinesthetic perception and concentration in order to self-evaluate and self correct.

Secondary Student Teaching

Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards. Seminar required.

DANCE 476

Hours	12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Prior application; requires a major GPA of 3.00, at least a C grade in all major and minor courses; FBI fingerprint background clearance.
Taught	Winter

Course Outcomes

SFL 476R - Student Teaching- Family and Consumer Sciences

Upon completion of the Family and Consumer Sciences Program, teacher candidates meet the needs of secondary students through competencies related to Utah Affected Teaching Standards. *Program outcomes* include:
Learner and Learning:
Candidates understand how students learn and develop, recognize individual and cultural diversity, and design learning environments that create positive classroom climates.

Instructional Practice

Candidates utilize content knowledge, assess to inform instruction, plan instruction based upon Core Curriculum standards, and implement instructional strategies that engage students and promote content understanding.

Professional Responsibility

Candidates continually reflect on and evaluate their teaching practices, actively seek opportunities to grow professionally, engage in ethical behavior, and collaborate with stakeholders (students, parents, and other professionals in the learning community).

Utah Effective Teaching Standards

Candidates will demonstrate basic competency in the Utah Effective Teaching Standards as assessed by the *Clinical Practice Assessment System*

Top

Dance - a Reflection of Culture

Study of dance as an expression of culture.

DANCE 477

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Cultural Concepts and Identity

1. Students will learn cultural concepts and identity associated with world dance

Traditions and Rituals Connected to Dance

2. Students will understand the differences and similarities in traditions and rituals connected to dance

Group Research and Assigned Readings

3. Students will participate in class discussions and analysis of group research and assigned readings;

Ethnochoreology and Ethnography

4. Students will understand ethnochoreology and ethnography and how they interface in cultural dance

Folk Dance Performance Company

Performance technique and experience with International Folk Dance Ensemble.

DANCE 478R

Hours	2.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Dance Philosophy and the Mission of BYU

1. Students will embrace a philosophy of dance compatible with the mission of BYU that guides their personal choices in the professional or recreational worlds of dance.

Dance Performance

2. Students will demonstrate artistry and advanced ability in dance performance.

Top

Social Dance, Technique 3

DANCE 480R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 380R or equivalent.
Taught	Fall, Winter

Course Outcomes

Dance Routine Practice and Application

1. Students will demonstrate the class routines associated with each dance by practice and application

Advanced Technique

2. Students will demonstrate advanced level the technique (including footwork, rhythm, alignment, and styling) associated with each dance by practice and application.

BYU Dancesport Competition

3. Students will demonstrate their ability to compete in an open event by participation in the BYU Dancesport competition.

Ballroom Dance, International Technique 4

Gold bar level: waltz, tango, fox-trot, quickstep, Viennese waltz.

DANCE 484R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 384R or equivalent; instructor's consent.
Taught	Fall, Winter

Course Outcomes

Demonstrate championship level technique

2. Students will be able to demonstrate "championship" level ballroom technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

Top

Latin Dance, International Technique 4

Gold bar level: cha-cha, rumba, samba, jive, paso doble.

DANCE 485R

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Dance 385R or equivalent; instructor's consent.
Taught	Fall, Winter

Course Outcomes

Demonstrate mastery of competitive latin figures

1. Students will be able to demonstrate competitive figures at a championship level in the International Style Cha-Cha, Samba, Rumba, Paso Doble

Demonstrate championship level latin technique

2. Students will be able to demonstrate "championship" level latin technique in the following areas:1) posture and dance position 2) clarity and use of timing 3) proper use of feet 4) correct weight transfer 5) a clear understanding of partnering skills

Theory and Notation of International Ballroom Dance

Preparation for professional teaching certification examinations.

DANCE 486

Hours	2.0 Credit, 0.0 Lecture, 4.0 Lab
Prerequisites	DANCE 384R
Taught	Winter even years

Course Outcomes

Technical Codification of International Style Waltz, Tango F

1. Students will find coherence in technical codification of International Style Waltz, Tango Foxtrot, and Quickstep.

Bronze and Silver Level Waltz, Tango Foxtrot, and Quickstep

2. Students will be able to demonstrate with technical clarity the man and woman's part of Bronze and Silver level school figures of the Waltz, Tango Foxtrot, and Quickstep.

Technical Evaluation

3. Students will be able to correctly articulate and deliver the technical information as required for a future professional examination the following categories: Feet Positions, Alignment, Amount of Turn, Rise & Fall, Footwork, C.B.M., and Sway

Figures and Routines

4.Students will be able to successfully amalgamate school figures into a cohesive routine.

Theory and Notation of International Latin Dance

Theory and notation of International Latin Dance and preparation for professional teaching certification examinations.

DANCE 487

Hours	2.0 Credit, 0.0 Lecture, 4.0 Lab
Prerequisites	DANCE 385R
Taught	Winter odd years

Course Outcomes

Bronze and Silver Level Cha-Cha, Samba, Rumba, Paso Doble, a

2. Students will be able to demonstrate with technical clarity the man and woman's part of Bronze and Silver level school figures of the Cha-Cha, Samba, Rumba, Paso Doble, and Jive

Technical Codification of International Style Cha-Cha, Samba

1. Students will find coherence in technical codification of International Style Cha-Cha, Samba Rumba Paso Doble, and Jive

Technical Evaluation

3. Students will be able to correctly articulate and deliver the technical information as required for a future professional examination the following categories: Feet Positions, Alignment, Amount of Turn, Footwork

Figures and Routines

4. Students will be able to successfully amalgamate school figures into a cohesive routine.

Ballroom Dance Performance Company

Performance techniques and experience with BYU Ballroom Dance Company.

DANCE 488R

Hours	2.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Ballroom Dance Choreographic Repertoire

1. Students will demonstrate an increased ability to perform the art of Ballroom Dance through participation in choreographic repertoire .

Representing BYU and the Church

2. Students will exemplify the standards of Brigham Young University and the Church of Jesus Christ of Latter-day Saints, and the United States as student ambassadors

Dance as Cultural Tradition

3. Students will find coherence of dance as a cultural tradition, an art form, an uplifting form of entertainment, and a social/recreational activity.

Top

Preparation for Ballroom Dance Competitions

Creation and presentation of ballroom competitive routines, emphasizing visual and musical aspects.

DANCE 489R

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Competitive Dancing

1. Students will find coherence in the rigor required for competitive dancing. practices for International Style Ballroom Dance.

Competitive Dance Repertoire

2. Students will demonstrate a repertoire of competitive dances in the Ballroom or Latin style.

Ballet Technique 5

Advanced ballet technique, including advanced pointe work for women and advanced technique for men.

DANCE 490R

Hours	3.0 Credit, 0.0 Lecture, 9.5 Lab
Prerequisites	Audition.
Taught	Fall, Winter

Course Outcomes

Technique Objective

Each student will:
1. Acquire a degree of mastery in advancedballet technique. These skills will be accomplished through active class participation and the practice of the movement vocabulary detailed in the appendix. Please consult the appendix for the specific criteria and standards.

Writing Objectives

Each student will:
1. Acquire a working knowledge of French ballet terminology and the correct execution for the technique appropriate at this level and then pass an objective written exam prepared by the ballet program.
2. Submit a completed self-assessment rubric and/or written self-evaluation at the individual midterm conference.
3. Submit a written critique of a perceptively analyzed live ballet performance according to the guidelines provided. Required expectations include sound writing skills, qualitative reasoning, and an ability to assess ballet technique at an advanced level standard.

Participation Objective

Each student will:

1. Participate fully in the technique class by dancing each class period and pass the required technique exam at the end of the semester/term, being graded on the movement vocabulary detailed in the appendix.

Top

Ballet Variations

DANCE 494R

Hours	1.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Dance 391R and 393R or equivalents.
Taught	Fall

Course Outcomes

Participation Objective 1

Students will learn and achieve technical and stylistic mastery of several variations from classical ballets.

Participation Objective 2

Students will learn and record the background, libretto, and style of the specific ballets through brief lectures.

Writing Objective 1

Students will compile a notebook with the background, libretto, and details of each variation which will aid in the future instructing of these variations. The student will include specifics on choreographers, composers, and dancers where applicable; as well as all steps of each variation written in a clear, understandable form.

Technique Objective 1

Students will learn each variation and be required to perform throughout the semester.

Technique Objective 2

Students will prepare variations to perform and be graded on those technical and stylistic requirements.

Top

Pas de Deux

Ballet partnering techniques.

DANCE 495R

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	Audition.
Taught	Winter

Course Outcomes

Point of Balance

1. Students will find the point of balance for incomplete and complete turns.

Falling Poses and Promenades

2. Students will learn to perform falling poses and promenades.

Basic Turns

3. Students will demonstrate knowledge of three basic turns: finger pirouette, pirouette partnered at the waist, and pirouette partnered at the hand(s) / wrist(s).

Female Lift Placement

4. Students will maintain placement and strength during lifts (Female).

Male Lift Position

5. Students will lift partner above the head with stretched elbows and correct position of the back and head, with knees stretched and heel on the floor (Male).

Partner Focus

6. Students will demonstrate focus on partner during combinations while being cognizant of the facial expressions.

Shoulder Lift

7. Students will demonstrate shoulder lift on one side (left or right) with appropriate expression and maintain position for 10 seconds.

Double Pirouette, En Dehors, and En Dedans

8. Students will perform a double pirouette, en dehors and en dedans, when partnered at the waist at least 75% of the time.

Triple Finger Pirouette

9. Perform triple finger pirouettes, en dehors at least 75% of the time.

Correct Partnering Technique

10. Perform technique and partnering skills correctly to avoid injury.

Partner Manners

11. Students will achieve traditional manners of courtesy and noble dignity that should be present between the male and female dancers.

Union of Movement

12. Students will achieve an appreciation for the partner's role in creating a union of movement.

Trust

13. Students will increase trust between the male and female partner.

Ballet Performance Company

Performance technique and experience with BYU Theatre Ballet.

DANCE 498R

Hours	2.0 Credit, 0.0 Lecture, 10.0 Lab
Prerequisites	Audition and concurrent enrollment in Dance 391R or 490R; 494R or 495R.
Taught	Fall, Winter

Course Outcomes

Technique Objectives

Students will:
1. Learn and master technically and stylistically several variations from various ballets, thereby expanding his/her ballet knowledge and repertoire. (Specific variations and ballets vary according to semester.)
2. Learn the background, libretto, and style of the specific ballets through brief lectures.

Writing Objectives

Students will:
1. Acquire, through research, a working knowledge of several classical ballets and classical ballet variations
2. Compile a notebook with the background, libretto, and details of each variation which will aid in the future instructing of these variations. The student will include specifics on choreographers, composers, and dancers where applicable; as well as all steps of each variation written in a clear, understandable form. This will be a valuable written source that will be a lasting tool for any future teaching, dancing, or choreographing position.

Participation Objectives

Students will:
1. Learn the variations and strive to understand the differing technical and stylistic requirements of each.
2. Prepare the variations to **perform** and be graded on those technical and stylistic requirements.

Ballet Showcase Company

DANCE 498R

Hours	2.0 Credit, 10.0 Lecture, 0.0 Lab
Prerequisites	Audition and concurrent enrollment in Dance 490R; 493R (females only) and 494R or 495R.
Taught	Fall, Winter

Course Outcomes

Writing Objectives

Students will:
1. Acquire, through research, a working knowledge of several classical ballets and classical ballet variations
2. Compile a notebook with the background, libretto, and details of each variation which will aid in the future instructing of these variations. The student will include specifics on choreographers, composers, and dancers where applicable; as well as all steps of each variation written in a clear, understandable form. This will be a valuable written source that will be a lasting tool for any future teaching, dancing, or choreographing position.

Participation Objectives

Students will:
1. Learn the variations and strive to understand the differing technical and stylistic requirements of each.
2. Prepare the variations to **perform** and be graded on those technical and stylistic requirements.

Top

Studies in Dance

Experience in dance. Possibilities include but are not limited to study abroad, workshops, or pilot dance courses.

DANCE 500R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Commitment to Standards

1. Students will demonstrate a commitment to BYU and Dance Department standards in dress and behavior.

Top

Workshop in Ballet

DANCE 500R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Workshop in Dance

Course outcomes are tailored to the specifc inent of these specialized courses

Top

Workshop in Ballroom

DANCE 500R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Workshop in Dance

Students will demonstrate, apply, and articulate a fundamental understanding of the elements of dance in improvisation and choreography.

First-Year Danish

Basic language skills. Includes International Cinema.

DANSH 101

Hours	4.0 Credit, 5.0 Lecture, 1.5 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Comprehension

Students will comprehend Danish as they hear and read authentic language relating to familiar topics.

Speaking

Students will comprehend Danish as they hear and read authentic language relating to familiar topics.

Language Learning Strategies

Students will develop comprehension and learning strategies to help them derive meaning from a wide variety of authentic language texts.

Culture

Students will display appropriate awareness of everyday culture in Danish-speaking countries.

First-Year Danish

Basic language skills. Includes International Cinema.

DANSH 102

Hours	4.0 Credit, 5.0 Lecture, 1.5 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Comprehension

Students will be able to comprehend Danish as they hear and read authentic language relating to familiar topics.

Speaking

Students will be able to speak Danish well enough to satisfy immediate needs. (They will learn to communicate in basic social situations, meet routine travel needs, carry out simple transactions, and talk about a variety of topics of common interest in present, past, and future times.)

Writing

Students will be able to write short messages and well-articulated sentences in Danish on familiar topics.

Language Learning Strategies

Students will develop strategies to help them derive meaning from a wide variety of authentic language texts.

Culture

Students will display appropriate awareness of everyday culture in Danish-speaking countries.

Second-Year Danish

Conversation, vocabulary building, and reading and writing skills, emphasizing reading. Includes International Cinema.

DANSH 201

Hours	4.0 Credit, 5.0 Lecture, 1.5 Lab
Prerequisites	Dansh 102 or equivalent experience.
Taught	Fall odd years

Course Outcomes

Comprehension

Students will be able to comprehend Danish as they hear and read authentic language relating to familiar topics with strategies to even derive meaning out of less familiar topics.

Speaking and Writing

Students will be able to speak and write Danish well enough to satisfy immediate needs. (Students will learn to communicate in social situations asking and answering questions, carrying out transactions, and talking about a variety of topics of common interest in present, past, and future times.)

Conversation

Students will be able to participate actively in conversations about Danish-speaking countries, concrete topics, and current events.

Opinions

Students will be able to begin expressing and supporting opinions about familiar topics.

Second Year Danish

Emphasis on literature and culture with continued writing, grammar, listening, and speaking. Includes International Cinema.

DANSH 202

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	DANSH 201
Note	Culminating course for GE Foreign Language requirement (except for returned missionaries or those with equivalent experience). This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Winter even years

Course Outcomes

Literature and Cultural History

Students will be able to identify and define key characteristics of the important moments in Danish cultural history and place significant works in a meaningful cultural and historical context using the basic tools of literary analysis.

Comprehension

Students will be able to comprehend Danish as they hear and read authentic language relating to familiar and less familiar topics.

Speaking and Writing

Students will improve their reading and writing skills in Danish by beginning to communicate in connected and extended discourse, expressing and supporting opinion, and navigating less-familiar topics and situations.

Danish Culture

Students will broaden and deepen their perception and appreciation of Danish culture.

Second-Year Conversation

Intermediate listening comprehension and speaking skills.

DANSH 211R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Dansh 102 or equivalent experience.
Taught	

Course Outcomes

Description and Narration

Students will be able to describe and narrate in present, past and future times in the context of paragraph-level speech about autobiographical and concrete topics.

Opinions

Students will be able to speak about autobiographical and concrete topics, initiate and maintain conversations by asking and responding to questions, and cope with gaps in knowledge.

Fluency

Students will be able to use an appropriate variety of vocabulary related to autobiographical and concrete topics.

Vocabulary

Students will speak in a way so as to be understood most of the time without difficulty by native speakers unaccustomed to dealing with non-native speakers.

Third-Year Conversation

Advanced conversational skills.

DANSH 311R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Dansh 211R or equivalent experience.
Taught	

Course Outcomes

Description and Narration

Students will be able to describe and narrate in present, past and future times in the context of paragraph-level speech about autobiographical and concrete topics.

Opinions

Students will be able to relate current events, plots of books or movies, and state opinion.

Fluency

Students will be able to initiate and maintain fluent conversations and cope with gaps in knowledge in contexts related to concrete topics.

Vocabulary

Students will be able to speak using an appropriate variety of vocabulary related to autobiographical and concrete topics as well as to current and other events.

Pronunciation

Students will speak in a way so as to be understood without difficulty by speakers unaccustomed to dealing with non-native speakers.

Advanced Danish

Third-year course in Danish. Developing advanced language skills in speaking, reading, listening, and writing as defined by ACTFL standards.

DANSH 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Dansh 202 or equivalent experience.
Note	Entry course for returned missionaries or others with equivalent Danish language experience. Required course for obtaining language credit by examination (Dansh 101, 102, 201, 211R).
Taught	Fall even years

Course Outcomes

Speech and Writing

Students will develop their ability to narrate and describe in the present and past time frames, use connected discourse, and learn to manage complications in the language through communicative strategies, without patterns of breakdown. Students will develop partial control of their ability to support their opinions and hypothesize about abstract topics, in the context of extended discourse. You should be able to discuss various subjects with ease and debate your position with success using a number of strategies.

Critical Thinking, Accuracy, Text Types

Students will analyze and employ proper grammatical, lexical, phonological and literary functions in descriptive and narrative texts, in summaries, detailed descriptions and narrations, analyses and argumentative essays.

Listening Comprehension

Students will be able to understand a variety of advanced topics and dialects and use this as a basis for communication.

Danish Culture

Students will broaden and deepen their perception and appreciation of Danish culture.

Top

Danish Literature

Readings in Danish literature; introduction to basic literary concepts. Includes International Cinema.

DANSH 340

Hours	3.0 Credit, 3.0 Lecture, 0.5 Lab
Prerequisites	None
Recommended	Dansh 321 or equivalent experience.
Note	Culminating course for GE Foreign Language requirement.
Taught	Winter odd years

Course Outcomes

Danish Culture

Students should understand key trends and works from Danish culture, recognize connections between these works, and be able to relate them to the development of contemporary Danish culture.

Analytic and Writing Skills

Students should be able to insightfully analyze important literary and artistic works from Danish cultural history and be able to communicate this analysis through articulate written and oral presentations in Danish. Students will also develop basic research skills.

Cultural Literacy

Students should relate the ideas and issues raised by the works we study in class to the students' own cultural moment as well as to their own experience with contemporary Danish culture.

Lifelong learning

Students should better know how to understand, interpret, and thoughtfully reflect upon the literature and art encountered later in life.

Academic Internship

On-the-job experience in Danish.

DANSH 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Department's consent.
Taught	

Course Outcomes

Professional Experience

Improve professional experience and appreciation of cultural practices in an international context.

Top

Design Seminar: Theory, Criticism, and Visual Culture

Visiting lecture series with theoretical readings exploring visual culture, aesthetics, critical studies, art and design practice across various professional disciplines. Overview of historical image systems, visual communications, and contemporary visual media in diverse social contexts.

DES 111

Hours	1.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Pre-graphic design, pre-illustration, pre-photography, pre-design, pre-ARTED major/minor status.
Taught	Fall

Course Outcomes

Design Practice

Survey diverse modes of professional practice in various disciplines of contemporary visual communications-graphic design, photography, illustration, and interaction design-through guest lectures and research.

Design Theory and Criticism

Examine critical theories of design, art, aesthetics, image systems, pictorial semiotics and visual perception through selected readings and writing assignments.

Design Thinking

Develop sound thinking, creative inquiry and diverse modes of reasoning-visual, perceptual, conceptual, inductive, deductive, analytical, logical, critical, organizational and creative-through discussion and writing.

Creative Discovery

Through visiting lectures and class discussions, explore methodologies to foster creativity, solve visual problems and address social concerns with innovative approaches to design practice.

Communication, Beliefs, and Ethics

Discuss the central role of beliefs and ethics in visual communication through art and design. Examine how the values of societies are expressed in their visual cultures. Recognize the role of the individual designer in delivering meaning through image systems.

Drawing

Increased competence in drawing methods for visual communicators. Students develop observational and conceptual abilities through intensive practice, lecture, demonstration and critique, applying representational drawing principles and techniques to portray form, space, and texture effectively.

DES 114

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Pre-graphic design, pre-illustration, pre-photography, pre-design, pre-ART ED major/minor status.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Drawing as Visual Language

Develop a clear understanding of elements and principles of design as applied to drawing practice, and acquire familiarity with concepts and terminology necessary to discuss visual ideas in meaningful ways. Explore representational modes of visual communication through drawing and sketching.

Linear Drawing Concepts and Methods

Working from life, create drawings that demonstrate a conceptual understanding of, and practical proficiency in linear drawing methods including gesture, contour, sighting, and perspective construction.

Tonal Drawing Concepts and Methods

Develop and apply an understanding of the interaction of light with matter to develop tonal drawings that describe three-dimensional forms, spatial relations, surface materials, textures and atmospheric effects using value contrast.

Drawing Media, Methods, and Processes

Develop methods, processes, skills and media techniques for 1. compositional sketches ("thumbnails"), 2. observational studies, 3. design ideation and 4. imaginative conceptualization.

Visual Perception, Aesthetics, and Craft

Enhance visual perception, aesthetic sensitivity, craftsmanship and fluency in drawing media.

Composition

Establishes a foundation of contemporary design practice and theory in an historical context. Students develop skill in visual problem solving, analytical thinking, and craftsmanship through application of design principles and color theory in compositional problems.

DES 115

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Pre-graphic design, pre-illustration, pre-photography, pre-design, pre-ARTED major/minor status.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Design Thinking

Practice creative, analytical and critical thinking to solve visual problems through the design process.

Visual Vocabulary

Express, analyze and discuss visual ideas using language that demonstrates understanding of visual concepts and terms. Appreciate the central role of visual communication and ideas in creative design.

Design Theory and Practice

Demonstrate fluency in fundamentals of 2-dimensional design theory by applying design principles in compositional exercises: unity, variety, balance, emphasis, rhythm etc.

Color Theory and Application

Express mood and emotion visually by understanding and applying principles of color theory in compositions.

Design Aesthetics and Presentation

Exhibit good organization, craftsmanship, presentation and taste in design exercises, projects and assignments.

Design Thinking

Designed in sequence with the freshman core, will focus on the critical thinking and creative problem-solving strategies utilized in design. Students will hone critical thinking, conceptual development, and craft through various design projects.

DES 117

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	Pre-graphic design, pre-illustration, pre-photography, pre-design, pre-ARTED major/minor status.
Recommended	Concurrent enrollment in DES 111, 114, 115.
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Issues in Contemporary Design

Investigating selected topics and current issues in history, theory, criticism, aesthetics, and ethics in the interdisciplinary practice of visual communications, art, and culture.

DES 385

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	DES 117
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Field Study

On-location study of design.

DES 411R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Top

Academic Internship: Professional Internship

Work experience in professional design studio evaluated by supervisor.

DES 496R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Department and faculty advisor's consent.
Taught	Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

Figure Drawing for Animators

Figure study in animation using a variety of media and methods. Readings, writing, and participation in course work exhibition required.

DESAN 131

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	Pre-animation major status.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Figure Drawing

Students will demonstrate the basic principles of figure drawing in quick studies and in longer studies.

Volume, Foreshortening, and the Human Form

Students will demonstrate an understanding of volume, foreshortenning and body rhythms as they pertain to the human form.

Top

Introduction to Two-Dimensional Animation Skills

Foundational principles and techniques for animation, storyboarding, design, and a variety of two-dimensional animation skill sets.

DESAN 160

Hours	1.5 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Pre-animation major status.
Taught	Fall, Winter, Summer

Course Outcomes

Perspective, Composition and Layout

Students will demonstrate the basic principles of design, perspective and composition, and begin to apply them by creating layouts for the animated shot.

Structural Elements

Students will demonstrate the basic the structural elements present storytelling and the shots used in story-boarding and film.

12 Principles of Animation

Students will demonstrate the twelve principles of animation and how they apply to creating the animated shot.

1. Students will learn the basics of one, two and three point perspective as well as the basics of composition.
1. Students will learn the basic theory of gesture drawing and begin to put it into practice.
1. Students will learn elements of design and how they apply to creating an animated character.
1. Students will learn basic concept for story boarding as well as understand the function of protagonist, antagonist, conflict, and resolution in a story.
1. Students will learn the twelve principles of animation and how they apply to creating the animated scene.

Top

Gesture Drawing for Animators

Drawing humans and animals in motion.

DESAN 250R

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	DESAN 131
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Basic Storyboarding

Introduction to visual storytelling.

DESAN 260

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	DESAN 131 & DESAN 160
Taught	Fall

Course Outcomes

Individual Artistic and Critical Voice

Goal: Establish an individual artistic and critical voice in terms of animation story telling

- Outcome 1: Apply knowledge and skills gained through the study of the history of the art form and appraise the usage in student work
- Outcome 2: Assess student work in the classroom (open peer and faculty reviews will be an ongoing part of this course)

Personal Artistic and Technical Skills

Goal: Develop personal artistic and technical skills through the production of animated product (in this case that product will be storyboards)

- Outcome 1: Demonstrate a competent application of foundation drawing skills
- Outcome 2: Illustrate a working knowledge of quality visual storytelling

Community Contribution

Goal: Contribute to the respective communities (in this class you will learn to contribute to your respective community by actively participating in the development of two storyboarding projects)

- Outcome 1: Practice collaborative production development through collaborative story development

Two-Dimensional Animation

Fundamental principles of two-dimensional animation: timing, acting, performance, overlapping action, volumes, etc. This is a traditional two-dimensional drawing course.

DESAN 262

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	DESAN 131 & DESAN 160
Taught	Winter

Course Outcomes

Basic Body Language

Students will demonstrate basic body language and apply it to full body animated scenes.

12 Principles of Animation

Students will demonstrate in greater depth how to apply the twelve principles of animation.

Ex-Sheet and Sound

Students will deomstrate how to use an ex-sheet, read sound and use the sound and ex-sheet to work out ruff timing for a scene.

Action Analysis and Trouble Shooting

Students will demonstrate basic action analysis and trouble shooting for animation and how to apply it to action based character animation.

Top

Writing for Animation

Fundamental principles of writing, creation, and telling of short animations.

DESAN 263

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	DESAN 160 & CSANM 150; Acceptance into animation program.
Taught	Fall

Course Outcomes

Narrative Storytelling

Students will demonstrate a fundamental understanding of writing and narrative storytelling through the creation of short animated films.

Top

Drawing for Animation

Fundamental skills of animation artists, namely design, composition, staging, value, color, etc.

DESAN 265

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	DESAN 131 & DESAN 160
Taught	Fall, Winter

Course Outcomes

Design Process and Construction

Students will obtain a core knowledge of design, creative process, and basic art construction

Receiving and Giving Critique

Students will demonstrate the ability to receive and give valid critique in a group setting

Art Practices

Students will establish good art practices, sketchbooking, research, creativity, etc.

Top

Advanced Storyboarding

Exploring the professional practices of storyboard artists in advertising, film, TV, and animation through individual and group projects.

DESAN 360R

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	DESAN 250R & DESAN 260 & DESAN 265
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Visual Development and Character Design

Design characters, props, and environments for various uses in animation and print.

DESAN 361R

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	DESAN 250R & DESAN 265
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Two-Dimensional Character Animation

Character animation and performance animation.

DESAN 362R

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	DESAN 131 & DESAN 160 & DESAN 262
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Two-Dimensional Animation Production

Develop basic knowledge of two-dimensional animation; emphasizing acting and performance of individual projects.

DESAN 363R

Hours	1.5 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	DESAN 250R & DESAN 260 & DESAN 262
Taught	Winter Term 2

Course Outcomes

Please contact the individual department for outcome information.

Top

Digital Painting

Tools and techniques of digital painting for concept design in the entertainment industry.

DESAN 365R

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	DESAN 250R & DESAN 265 & DESAN 361R
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Top

Animation Field Study

On-location study of animation.

DESAN 411R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

Business and Ethics in Animation

Learning the practical and ethical side to the entertainment industry through readings and discussions as preparation for expectations as artists, leaders, and members of the Church.

DESAN 460

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Acceptance to animation program.
Taught	Fall

Course Outcomes

Practices and Ethics in Industry

Students will learn practical information about the entertainment industry such as unions, locations, work hours, commutes, leadership, etc. and understand how to apply this knowledge to their respective interests in entertainment.

Top

Animation Studio 2

Individual advanced animation projects.

DESAN 461R

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	BFA acceptance.
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Special Effects

The principles of design, research, timing, and movement of effect animation in a traditional drawing format.

DESAN 468R

Hours	1.5 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	DESAN 262 & DESAN 265 & CSANM 350
Taught	Winter Term 1

Course Outcomes

Please contact the individual department for outcome information.

Top

Special Problems in Animation

Individual study in animation of special interest.

DESAN 494R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

BFA Independent Film Production

Advanced individual animation project with minimum guidance, showing a high degree of competence.

DESAN 497R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

Directed Studies in Animation

Credit for work experience in animation.

DESAN 498R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	BFA advisor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

Typography 1

Studio course which familiarizes the student with the history, terminology, elements, and principles of effective typographic communication.

DESGD 243

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	Graphic Design emphasis, Illustration emphasis, or Advertising Design minor acceptance.
Taught	Fall, Winter, Spring

Course Outcomes

Type History

Students will study the evolution of typography from early printing methods through current digital typography.

Type Nomenclature

Students will learn typographic terminology, classification and anatomy.

The Aesthetics of Typography

Students will develop an awareness of the aesthetic principles and skills required to compose type effectively.

Processes in Typography

Students will understand typographic production processes and technologies and output type for multiple mediums.

Communicating with Type

Students will consider the relationship between typography and effective communication. Understand its effect on mood, the creation of typographic personality and appealing to a defined target market.

Typographic Emphasis

Students will understand the importance of heirarchy and emphasis within typography.

Typographic Systems

Students will design and implement a complex, elegant, typographic grid system.

Top

Design 1

Study in the elements and principles of design through the use of form, visual principles, theoretical and visual experimentation, concept development, and creative thinking. Systems, symbols, icons and expressive typography will be used to create visual representations of ideas and messages.

DESGD 245

Hours	3.0 Credit, 1.0 Lecture, 3.0 Lab
Prerequisites	Graphic Design emphasis or Advertising Design minor acceptance.
Taught	Fall, Winter, Spring

Course Outcomes

The Design Process

Students will evaluate and examine the design process.

Principles and Elements of Design

Students will learn the principles and elements of design (such as balance, contrast, shape, etc.) and their relationship to graphic design.

Composition, Color, Effective Use of Type, Photography

Students will learn design skills associated with special areas such as composition, color, appropriate use of photography and illustration, and the effective use of text type.

Communication Mediums

Students will learn a graphic designer's role in working in various communication mediums including print, broadcast, and digital media.

Basic Printing Processes

Students will learn the characteristics of basic printing processes and the benefits and restrictions of each.

Paper and Printing Choices

Students will learn of the impact of paper and printing choices on the environment.

Graphic Design Market and Careers

Students will understand the market and careers of graphic design.

Top

Letterpress Studio

Letterpress Studio addresses letterpress history, type, terminology, format, tools, and the materials of letterpress printing.

DESGD 248R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Graphic Design emphasis acceptance.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Media Design 1

Introduction to the process and methodology of designing across multiple media types. An introduction to designing interactive experiences and motion design.

DESGD 280

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Understand media

Students will learn how to describe the affordances and constraints of different media and how these unique qualities affect design

Design across media

Students will apply fundamental design principles to motion design and other digital media design problems

Plan and execute designs

Students will plan digital media projects and learn to independently solve technology and production problems

Communication and feedback

Students will defend and explain their design decisions, communicate clearly, and give and receive constructive feedback.

Branding 1

Develop strategic, integrated brand systems including trademarks, logos, and corporate identity systems and apply them to a diverse range of products and media. Conduct brand research, competitive audits, and develop identity guidelines.

DESGD 340

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Graphic Design emphasis or BFA acceptance.
Taught	Fall, Winter

Course Outcomes

Brand & Corporate Identity Process

Students will study the process of creating brands and visual corporate identities.

Nomenclature

Learn the terminology of branding and corporate identity work.

Strategy & Marketing

Understand how design strategy and market research inform branding, corporate identity and creative implementation.

Brand Creation

Create corporate identity systems that successfully address the concerns of the marketplace, audience and design aesthetics.

Top

3-Dimensional Design

An advanced studio course in three-dimensional design. 3-dimensional forms including packaging, environmental graphics, signage systems, and experience design. Appropriate material use and selection relative to sustainability will be emphasized. The tactile qualities of dimensional form and the development of strategic, viable design solutions will also be considered.

DESGD 341

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	BFA acceptance or instructor consent.
Taught	Winter

Course Outcomes

Design in Multiple Formats

Students learn how to design in a variety of physical formats

3-Dimensional Design Process

Students will learn the 3 dimensional design process

Product Marketing

Students learn to position products for the marketplace

Advertising Design

Particular demands of the advertising world: marketing strategy, editorial and visual concepts, etc. Design ads, collateral materials, campaigns.

DESGD 342

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	BFA or Advertising Design minor acceptance.
Taught	

Course Outcomes

Advertising Strategy

Students learn to think more strategically, in the service of an ad campaign.

Collaboration

Participate in the collaborative process with other senior ad students with different talents.

Language of Advertising

Students will learn to deal with and create the language of advertising.

Typography 2

An advanced studio course that continues the study of complex typographic systems and their application in visual problem solving. Through a rigorous exploration of written and visual content, students refine their understanding of typography as an essential element in visual communication.

DESGD 343

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	DESGD 243
Taught	

Course Outcomes

Publication Design Fundamentals

Students will learn fundamental principles such as pacing, structure, typographic solutions, editing, and photography.

Grid in Publication Design

Students will learn and understand the complexities of the grid in publication design.

Magazine Branding

Students will create a brand for a magazine.

Practicum in Graphic Design

Studio course which emphasizes individual projects and portfolio refinement, research, conceptual thinking, typographic excellence, and the effective use of design principles.

DESGD 346

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	DES 111 & DES 114 & DES 115; Graphic Design emphasis or BFA acceptance.
Taught	Fall Term 2, Winter Term 2, Spring, Summer

Course Outcomes

Knowledge of Design Principles

Expand and deepen their knowledge of broad design principles.

Personal Voice

Develop a personal voice of expression.

Self-Promo Materials

Prepare personalized promotional materials for entrance into the marketplace.

Career Research

Research career opportunities in both in-house and studio environments.

Type as Image

Developing unique and expressive letterforms, especially the modification of letters to create new abstract or pictorial images.

DESGD 348

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	BFA acceptance.
Taught	

Course Outcomes

Type and Image combine to create meaning

Students will incorporate type and image to generate original, meaningful visual artifacts.The meaning of an artifact is revealed by analyzing the companion parts of letters, the total typographic system and how meaning unfolds in combination with imagery. In a spirit of experimentation students will analyze how letters and imagery, in free and structured contexts, reveal the diversity and power of letterforms.

Expressive Typography

Students will explore using typography in ways other than for strict legibility. Students will develop an appreciation of letterforms, typestyles, and families of typefaces from an understanding of the standard structure, history and nomenclature of type. Students will become more familiar with the expressive qualities of type, discern the subtleties in type choices, understand the varying earmark characteristics and individual attributes of a letterform. Students will train their eyes to identify how size, color, value, shape, structure, texture and placement conveys information beyond the literal content of words, and will understand how typographic characteristics, combined together, convey subtleties not inherent in language itself.

Letterpress as an alternative process

Students will apply the principles, aesthetics, and unique qualities of the alternative process of letterpress.Letterpress work provides richness and depth to creative solutions, as such the medium is an unavoidable part of the message. Students will explore the use of type and image through the medium of letterpress. Students will learn how to print their creative work using a press as a distinct alternative to the computer.

History of Graphic Design

Survey of graphic design historical periods from pre-history to present day.

DESGD 349

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Design Core.
Taught	

Course Outcomes

Incorporate Historical Design Knowledge

By the end of this course, each student should be able to skillfully incorporate historical design cues into modern design problems, when appropriate, and avoid repeating mistakes & ineffective ideas from the past.

Visual Communication Solutions Throughout History

By the end of this course, each student will be able to demonstrate an understanding of how designers from different historical eras resolved visual communication problems. Specifically, students will be able to articulate how past designers have dealt with these challenges: communicating efficiently, working with clients, resolving the tension between innovation and the status quo, balancing commercial requirements with personal expression, and achieving economic viability while contributing something valuable to the world.

Design Writing & Thinking

By the end of this course, each student will be able to effectively write about graphic design, thinking and communicating in a way that allows readers who are not designers to understand important concepts related to design.

Historical Contributions to Design

By the end of this course, each student will be able to recognize the contributions of leaders in the field of graphic design, with an ability to explain what their contributions were and what motivated them. The result of this outcome is that students will be better citizens of the graphic design profession, with an understanding of how they too might contribute to the profession.

Top

Interactive Design 1

Introduces foundational interaction design principles and tools to prototype user-centered interfaces. Through team-based course work students gain user interface experience and work-flow best practices.

DESGD 360

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	DESGD 243 & DESGD 280
Taught	Fall, Winter, Spring

Course Outcomes

Apply user-centered design methods

Use design research methods to promote user empathy and to focus design efforts on user needs

Define interface and system interactions

Create detailed user flows and clarify interface content and functionality

Style interface design patterns

Learn platform specific design patterns and style with current interface design sensibilities

Motion 1

Studio course instructing students in the art of design and communication with motion and sound. Design principles, editing, and narrative concepts are employed to create short motion design projects.

DESGD 380

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	DESGD 280
Taught	Fall, Winter

Course Outcomes

Story and Mood

Students will learn how to create a story and mood with movement and animation, and how to use editing to control the story.

Designing with Time, Space, and Sound

Students will learn how to design with time, 3D space, and sound.

Motion Graphics Projects

Students apply graphic design principles and narrative techniques to motion graphics projects, using After Effects and other methods.

30-Second Motion Graphic Piece

Students will acquire the necessary design and production skills to produce a compelling 30-second motion graphic piece.

Written and Oral Communication

Students will develop essential written and oral communication skills to explain and defend your work.

Top

Special Topics

Advanced studio course offering an in-depth study of a specialized design topic. Explores either a conceptual, practical, or technical requirement within the current discipline, or focuses on one particular project.

DESGD 394R

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Please contact the individual department for outcome information.

Top

Graphic Design Field Study

On-location study of graphic design.

DESGD 411R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

Branding 2

Advanced studio course that provides an in-depth study of branding and its applications, which culminates in the creation of integrated branding systems.

DESGD 440

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	DESGD 340
Taught	Winter

Course Outcomes

Develop Self-Promotional Materials

Students will develop self-promotional and marketing pieces for gaining employement.

Continue Progress from VAGD 442

Students will continue the progress made in VAGD 442.

Polish Portfolios

Students will polish their portfolios, in preparation for graduation.

Top

Design Lab

Students work in a collaborative, project-based learning environment.

DESGD 441R

Hours	3.0 Credit, 6.0 Lecture, 3.0 Lab
Prerequisites	Graphic Design emphasis acceptance, or instructor consent.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Portfolio

Individualized portfolio development to prepare student for entrance into professional practice or graduate school.

DESGD 442

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	DESGD 360; DESGD 440.
Taught	Fall, Winter, Spring

Course Outcomes

Major Branding Project

Students will create a major branding project including a styleguide/brand bible.

Minor Branding Project

Students will create a minor branding project for an existing company.

Refining Magazine Project

Students will refine and redo their magazine project.

Top

Special Problems in Graphic Design 2

Continuation of DesGD 440.

DESGD 444

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	BFA acceptance.
Taught	

Course Outcomes

Exhibition Experience

Students will gain gallery and/or exhibition experience in the implementation of their project.

Collaborative Design Project

Students will participate in a collaborative group art/design project, based on an altruistic, socially-based theme.

Top

Interaction Design 2

Explores how interaction design integrates both client/user needs to prototype holistic and appropriate experiences. Through team-based course work students gain an understanding of user experience design and workflow.

DESGD 460

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	DESGD 360
Taught	Winter

Course Outcomes

Apply user-centered design methods

Use design research methods to promote user empathy and to focus design efforts on user needs

Prototype interface interactions and animations

Use prototyping tools to clarify interactions and animations that enhance the user experience

Optimize an interface with user testing

Learn how to conduct usability tests to inform interface design decisions

Top

Motion 2

Continues the exploration of design and communication with motion and animation, including designing in 3-D spaces. Graphic design principles and storytelling concepts are employed to create short motion design projects.

DESGD 480

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	DESGD 280 & DESGD 380
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Studio Practices for Graphic Designers

Explore studio methods and practices common to the design profession.

DESGD 488

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Graphic Design emphasis or BFA acceptance.
Taught	Fall, Winter, Spring

Course Outcomes

Design Marketing

Learn the process of selling design, self-promotion, and the importance of building a network.

Professional Practices

Students will recognize that a successful, sustained career requires both the understanding and practice of sound professional practices.

Project Estimating

Understand the process of creating accurate estimates for design project costs.

Starting a Design Business

Explore the legal and financial aspects of starting a design studio including business structures, licensing, tax implications and legal liabilities.

Freelance Design

Understand the requirements of working as a freelance designer and prepare to effectively work in the current environment.

Career Opportunities

Learn the skills necessary to compete in the design industry including job hunting skills, interviewing, networking and possible design career paths.

Design Proposal & Contracts

Create working proposals and contracts for the design marketplace.

Intellectual Property

Study intellectual property laws that relate to design work and understand the implications of infringement, plagiarism, copyright, trademark, licensing, and the negotiation of reproduction rights.

Design Ethics

Understand the ethical issues facing designers and explore current professional models.

Design Finances

Understand the importance of adequate financial oversight in the design process. Learn the fundamentals of bookkeeping, expense tracking, accounts receivables and tax preparation.

Top

BFA Capstone Project

Students complete an intensive project on a topic of their choosing which includes developing personal research and design methods, a project implementation, and a public exhibition.

DESGD 497R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	BFA acceptance.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

Directed Studies in Graphic Design

Credit for work experience in graphic design.

DESGD 498R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	BFA advisor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

Figure Drawing for Illustrators

Figure study for illustrators using a variety of media and methods. Readings, writings, and participation in course work exhibitions required.

DESIL 131

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Tubular Concept

Students will depict the figure in a variety of poses using foreshortening.

Gesture

Students will convey gesture, the illusion of expressed movement, when drawing the figure spontaneously in very brief periods of time.

Sustained Work

Students will alternate gesture studies with longer, methodical studies. The aim is to enable the student to draw spontaneously, energetically and accurately.

Form

Students will draw the figure so that the illusion of form is achieved through modeling and direct lighting techniques.

Manikin Figure

Students will demonstrate a basic knowledge of the standard Manikin Figure and the body's muscle structure by drawing and by quizzes

Design

Students will begin to incorporate concepts of Design as they pertain to the human figure.

Proportions

Students will be able to draw the human figure accurately, displaying normative proportional relationships of the body's parts to the whole

Top

Introduction to Digital Illustration

Introduction to computer software programs specific to illustration.

DESIL 210

Hours	2.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Design Core.
Taught	Winter, Spring

Course Outcomes

Computer as a Tool

Students introduced to computer as a tool through various in-class exercises and assignments

Raster and Vector Images

Students become familiar with creation of raster and vector images through a variety of projects, instruction and in-class exercises

Visual Production

With ingenuity and imagination students should be able to produce creative visual solutions to assignments

Visual Arts Ethics

Students develop an understanding of ethics in visual arts through class discussions and lecture

Portfolio Critiques

Students work on producing quality projects for their portfolios through teacher and peer/class critiques

Professional Design Processes

Students will be expected to understand and apply professional processes to the design and rendering of their images

Research Paper and Presentation

Students become familiar with other digital illustration professionals and how the digital medium is used in their work through a student research paper project and class presentation,

Top

Intermediate Life Drawing

Drawing the classic figure from gesture to finished rendering, emphasizing structure, anatomy, form, and medium.

DESIL 250

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	DESIL 131; or DESAN 131
Taught	Fall, Winter, Summer

Course Outcomes

Life Drawing Proficiency

Students will master life drawing based on deep observation through a proficiency in demonstrating a clear understanding of: anatomy, proportion, movement, balance, foreshortened perspective, a high degree of 3-dimensional structure through application of Chiaroscuro (soft form and hard edged cast shadows), composition, and drapery (folds).

Life Drawing

Students will master life drawing based on deep observation through a proficiency in demonstrating a clear understanding of: anatomy, proportion, movement, balance, foreshortened perspective, a high degree of 3-dimensional structure through application of Chiaroscuro (soft form and hard edged cast shadows), composition, and drapery (folds).

Skeletal and Muscular Landmarks

Students will gain a knowledge of the skeletal land marks and major muscle landmarks by drawing them from reference and then by memory. Drawing from the model will reinforce study of anatomy. By studying old masters students' line quality and use of tonal shape will improve.

Media exploration

Students will demonstrate proficiency in at least one of the illustration mediums studied (oil, acrylics, gouache, or digital).

Anatomy Knowledge

Students will gain a knowledge of the skeletal land marks and major muscle landmarks by drawing them from reference and then by memory. Drawing from the model will reinforce study of anatomy. By studying old masters students' line quality and use of tonal shape will improve.

Medium Specialization

Students will demonstrate proficiency in at least one of the illustration mediums studied (oil, acrylics, gouache, or digital).

Illustration 1

Overview of styles, techniques, methods, and materials. Illustrative concepts and problem solving.

DESIL 251

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	Design Core.
Taught	Fall, Winter, Summer

Course Outcomes

Create exceptionally unique visual solutions.

Students will develop a procedure of deep exploration of ideas. Engage in patterns of broad exposure to ideas in the visual arts. Learn to use narrative and interpretive concepts.

Deepen theoretical and practical understanding of design.

Students will apply principles and elements of composition effectively. Understand and soundly apply principles of color theory.

Students will acquire professional illustration media experi

Students will experience a variety of traditional and digital illustration painting techniques and processes. Shoot effective photographic reference. Effectively apply drawing skills.

Students will gain an understanding of professional illustra

Students will understand and apply professional creative processes. Develop and apply problem-solving patterns. Develop a practical understanding of the patterns and problems related to illustration markets.

Top

Intermediate Digital Illustration

Intermediate problems in digital media.

DESIL 310

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	DESIL 210
Taught	Fall

Course Outcomes

Illustration Process

Utilize effective processes to develop studies and a series of digital illustrations that demonstrate creative solutions for visual problems.

Digital Media Workflow

Develop competence in digital painting methods and techniques using professional 2D graphics software to create original illustrations.

Design Theory and Practice

Synthesize and apply design principles including drawing, value, composition, color and texture.

Professional Application

Explore professional practices, market applications, and careers in digital illustration.

Ethics of Digital Imagery

Discuss the legal, ethical, and spiritual aspects of illustration in digital media and culture.

Top

Advanced Life Drawing

Drawing the figure in modern or historical costume; developing drawing skills, especially relating to the draped figure.

DESIL 350R

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	DESIL 250; or DESAN 250R; BA acceptance.
Taught	Fall, Winter, Spring

Course Outcomes

Please contact the individual department for outcome information.

Top

Illustration 2

Narrative illustration problems emphasizing academic study of the human figure using various media.

DESIL 351

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Design Core.
Taught	

Course Outcomes

Oil Painting Methods and Materials

Attain proficiency in the oil medium. Cultivate sensitivity and purposefulness in preparing the painting surface, selecting brushes, observing the subject and mixing colors. Develop craftsmanship and skill in painting, making careful marks using palette knives and brushes. Control pigments using suitable mediums to form paint textures and consistencies varying from thin and transparent to opaque and impasto. Practice effective methods including *alla prima* (direct painting) over *imprimatura* (toned surface), and indirect methods such as transparent wash underpainting and grisaille.

Composition, Drawing and Value

Deepen awareness of applied principles and elements of design, the aesthetics of composition, and the centrality of value contrast in representational painting. Develop skill in drawing accurate shapes and edges with paint and brush using simple masses of tone to indicate form through chiaroscuro effects. Use value to create the illusion of spatial depth in the portrayal of a subject by increasing contrast and detail in foreground objects while simplifying background elements.

Color and Light

Apply principles of color theory to portray the effects of light falling on objects in color. Learn to perceive, analyze, mix and match observed color in terms of the three dimensions of color-hue, value, and chroma (saturation)-as well as its relative color "temperature." Observe and understand these color characteristics in the direct and indirect light falling on a subject, the reflected light in the shadows, and how varied sources of illumination affect the appearance of local color. Develop a clear mental model of color relationships and how to mix any observed color within a broad gamut accurately using a palette of only about ten pigments.

Historical and Contemporary Context

Become familiar with historical and contemporary ideas of representational painting including Naturalist and Realist methods based on fidelity in observation, as well as Romantic, Symbolist and Conceptual approaches emphasizing the visualization of abstract ideas, dreams, myths and fantasy. Apply one or more of these ideas to develop a semester project synthesizing techniques and concepts of observation-based oil painting to create an illustration that conveys a meaningful

theme.

Illustration 3

Conceptual illustration problems and market applications, using various media.

DESIL 352

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Design Core.
Taught	

Course Outcomes

Develop media competency.

Students will clearly understand the unique character of high viscosity acrylic paint and demonstrate a high degree of competency in its use

Develop the ability to solve abstract problems.

Students will be able to extract the meaning of abstract concepts and construct concrete visual symbols that communicate their meaning.

Understand the role and nature of style related to conceptua

Students will develop distinctively unique styles appropriate to abstract concepts.
Students will build an accurate understanding of how and where conceptual illustration is used .

Create exceptionally unique visual solutions.

Develop a practice of deep exploration of ideas.
Engage in patterns of broad exposure to ideas in the visual arts.

Develop deep theoretical and practical understanding of desi

Apply principles and elements of composition effectively.
Understand and soundly apply principles of Color Theory.

Narrative Illustration

Narrative problem solving patterns. Use of character, mood, and environment to tell a story or develop conceptual ideas. Study of media, aesthetic principles, and classic story models.

DESIL 353

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Recommended	DESIL 350R.
Taught	

Course Outcomes

Creating Marketable Illustrations

Students will learn procedures of creating marketable illustrations; concept, rough sketches, color comps, and finished art. Emphasis will be placed on effectively communicating story concept.

Life Drawing Mastery

Students will master life drawing based on deep observation through a proficiency in demonstrating a clear understanding of: anatomy, proportion, movement, balance, foreshortened perspective, a high degree of 3-dimensional structure through application of Chiaroscuro (soft form and hard edged cast shadows), composition, and drapery (folds).

Medium Specialization

Students will demonstrate proficiency in at least one of the illustration mediums studied (oil, acrylics, gouache, or digital).

Conceptual Illustration Solutions

Students will analyze and develop visual images based on conceptual (symbolic) illustration solutions.

Narrative Illustration Solutions

Students will analyze and develop visual images based on narrative (literal) illustration solutions.

Design Theory and Practice

Students will develop deep theoretical and practical understanding of design.

Top

History of American Illustration 1 (1860-1930)

Survey of illustration in visual communication, emphasizing the birth of publishing and "Golden Age" of American illustration, 1860-1930.

DESIL 355

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Design Core.
Taught	

Course Outcomes

History of Illustration

Students will learn and understand the historical and cultural influences that illustration has had on popular culture from Victorian to late Golden Age of Illustration. They will also learn about artists' lives so that if or when they meet with similar challenges, they will have a frame of reference from which to act.

History of American Illustration 2 (1930-Present)

Survey of American illustration in visual communication, emphasizing from 1930 to the present.

DESIL 356

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Design Core.
Taught	Winter

Course Outcomes

History of Illustration

Students will learn and understand the historical and cultural influences that illustration has had on popular culture from Norman Rockwell through contemporary illustration. Students will learn about the new direction of media and image use. Students will study artists lives so that if they (the student) meet with similar challenges professionally or personally they will have a frame of reference from which to solve them

Sketchbook

Using a sketchbook in visual thinking process: exploring ideas, recording visual experience, and developing fundamental drawing skills.

DESIL 357

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	DESIL 250; or DESAN 250R
Taught	Winter

Course Outcomes

Drawing Skills

Students will develop drawing skills as they sketch from life at different sights.

Using Sketchbooks to Improve

Students will learn to be more creative, and learn from other artists how they use their sketchbooks to improve their work and ideas.

Sketchbook Use in Portfolios

Students will learn how sketches have been used historically and how portfolios and jobs are also determined with sketchbooks.

Top

Character Design for Illustrators

Concepts and projects dealing with the interpretation and stylization of human and animal characters applied to children's markets, caricature, animation, and humorous illustration.

DESIL 358

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	DESIL 251; or DESAN 265
Taught	Fall

Course Outcomes

Pitching Ideas

Students will have a chance to learn business side of concept work learning how to pitch ideas.

Story Elements

Students will each explore all the different elements of the story (characters, settings, etc.) using their own vision.

Applying Design Principles

Students will learn to apply principles of design, creating a sense of harmony throughout their pieces.

Practicum in Illustration

Market applications, portfolio preparation, advertising patterns, and other aspects of the illustration business. Individual portfolio projects designed to develop personal illustration skills.

DESIL 359

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	DES 111 & DES 114 & DES 115; Sophomore courses.
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Visual Communication

Student will learn and apply the basic principles of visual communication in their illustration.

Illustration Genres

Students will be introduced to different illustration genres including publishing, juvenile literature, editorial, gaming, concept design, character design and portraiture.

Special Topics

Advanced studio course offering an in-depth study of a specialized topic in illustration. Focuses on a selected collaborative project or a conceptual, practical or technical issue relevant to current concerns in the discipline.

DESIL 394R

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	Instructor consent.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Advanced Digital Illustration

Advanced problems in digital media and markets.

DESIL 410

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	DESIL 310; or DESAN 365R
Taught	Winter

Course Outcomes

Digital Media Fluency

Develop fluency in advanced illustration software applications to solve creative problems for print, video and interactive media.

Digital Illustration Process

Create production-ready three-dimensional illustrations based on original concept designs. Paint and apply surface textures using 2D and 3D graphics software.

Design and Color Theory

Apply principles of 2- and 3-dimensional design and color theory to create appealing, professional-quality work.

Thematic Expression

Communicate meaningful, uplifting themes through narrative and symbolic imagery.

Professional Application

Explore professional practices and market applications for digital illustration.

Top

Painting the Human Head

Painting from a live model; unique aspects of portraiture and colors of the human face.

DESIL 450R

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	DESIL 350R
Taught	

Course Outcomes

Please contact the individual department for outcome information.

Senior Illustration Studio 1

Senior Illustration BFA students develop a cohesive portfolio of original work, as evidence of conceptual and theoretical understanding, substantial technical ability, creative range and individual expressive quality.

DESIL 451

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Communicating Story Concept

Students will learn procedures of creating marketable illustrations; concept, rough sketches, color comps, and finished art. Emphasis will be placed on effectively communicating story concept.

Life Drawing Mastery

Students will master life drawing based on deep observation through a proficiency in demonstrating a clear understanding of: anatomy, proportion, movement, balance, foreshortened perspective, a high degree of 3-dimensional structure through application of Chiaroscuro (soft form and hard edged cast shadows), composition, and drapery (folds).

Medium Specialization

Students will demonstrate proficiency in at least one of the illustration mediums studied (oil, acrylics, gouache, or digital).

Design Theory and Practice

Students will develop deep theoretical and practical understanding of design.

Conceptual Illustrations

Students will analyze and develop visual images based on conceptual (symbolic) illustration solutions.

Narrative Illustrations

Students will analyze and develop visual images based on narrative (literal) illustration solutions.

Senior Illustration Studio 2

Flexible in nature, featuring various instructors with unique individual skills. Team taught. Advanced assignments in illustration; individual portfolio preparation.

DESIL 452

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	DESIL 451
Taught	

Course Outcomes

Figure Staging

Students will understand how to place and relate the figure to context-Students will learn how to create appropriate lighting for stories-Professional standards require students to develop a high degree of skill in staging figures in illustration compositions

Media Competency

Students will develop media competency-A clear understanding the unique character of your preferred medium and a high degree of proficiency in its use must be developed

Design Theory and Practice

Students will develop deep theoretical and practical understanding of design-Effective application of principles and elements of composition is expected-Understanding and sound application of principles of Color Theory particularly related to depicting human form is a key element of this course and this skill must be developed. Skills in both observation and invention of color must necessarily be highly developed

Illustration 4

Extensive study painting landscape on location, applying advanced concepts in color theory and composition. Projects include color studies, finished landscape paintings and creatively designed environment illustrations, combining observation of nature with visual reference and research.

DESIL 453

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	DESIL 351; BFA acceptance.
Taught	

Course Outcomes

Landscape Painting Theory and Practice

Develop proficiency in outdoor painting concepts, methods and techniques in oils and/or watercolors, including a working knowledge of the history and contemporary practice of plein-air painting. Gain deeper understanding of principles of natural light and theory behind varied environmental conditions.

Outdoor Painting as Illustration Process

Paint successfully observed studies of the natural landscape *en plein air* and utilize the practice in the creative process to develop studio illustrations. Gain confidence in gathering, interpreting, and utilizing supplemental photographic landscape reference.

Design and Color Theory & Practice

Apply principles and elements of design, composition, light & shadow, linear and atmospheric perspectives, and color theory to outdoor studies and studio illustrations. Develop understanding of color as a narrative tool and how to employ color and light thematically and consistently throughout a series of sequential pieces.

Aesthetic and Communicative Appreciation

Develop greater appreciation for the order and beauty of the natural environment, the aesthetics of light and color, and the environment as an artistic subject to communicate uplifting narratives, themes and concepts.

Illustration 5

Continuation of DesIl (formerly VAIll) 453. Advanced assignments in illustration and media.

DESIL 454

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	DESIL 351 & DESIL 352; BFA acceptance.
Taught	

Course Outcomes

Communicating Client's Story/Message

Your ideas must communicate the client's/story's message and your unique vision clearly and creatively. Through inventive and unique solutions all aspects of your image from concept, to medium, to composition must contribute to the clarity of your message. You must demonstrate professional design/composition proficiency. Great design/composition is a hallmark of the best illustrators—those who are able to sustain a lifetime career. This will be greatly emphasized. You must demonstrate professional proficiency in at least one illustrative medium. By the time students graduate they, too often, have failed to develop professional media competency. Yet this is an essential professional competency. Your projects, therefore, will be focused on deepening your media skill. Additional in-class media problems may be part of your course work where unmarketable media skills are identified. You must study and clearly grasp the nature of illustration in your particular market(s) and the viability of your portfolio. Projects during the semester are intended to create a professionally marketable portfolio; understanding of your particular market application is essential to creating salable work.

Professional Medium Skill

You must demonstrate professional proficiency in at least one illustrative medium. By the time students graduate they, too often, have failed to develop professional media competency. Yet this is an essential professional competency. Your projects, therefore, will be focused on deepening your media skill. Additional in-class media problems may be part of your course work where unmarketable media skills are identified. You must study and clearly grasp the nature of illustration in your particular market(s) and the viability of your portfolio. Projects during the semester are intended to create a professionally marketable portfolio; understanding of your particular market application is essential to creating salable work.

Top

Concept Design

Application of illustration methods and creative process to solve visual problems for entertainment production design. Faculty-led teams work within given parameters to research, visualize, and render original compositions, characters, environments, creatures, vehicles and props.

DESIL 457

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	None
Recommended	DESIL 310 350R, 351.
Taught	Fall

Course Outcomes

Professional Preparation

Complete a series of project assignments designed to simulate professional problems in the art departments of film, animation, and interactive entertainment studios.Become conversant in best practices, processes, literature and tools of the concept design field. Acquire knowledge of the contributions of past concept artists and leading contemporaries. Identify personal artistic influences and professional opportunities.

Conceptualization, Visualization and Analysis

Develop competence in 1) creative conceptualization through observation; 2) effective visualization through individual artistic study and practice; and 3) meaningful analysis through group critiques and faculty assessments.

Design Process and Teamwork

Apply a design process that emerges from fluid ideation and research, advances through critical analysis, revision and iteration, and results in original outcomes. Adapt individual art practice to the visual direction of a team project and contribute meaningfully within given aesthetic parameters.

Visual Communication

Explore the visual languages of literal, symbolic, and emotive representation through characterization, personification, aesthetic design, and applied color theory. Engage creative design solutions and visual storytelling strategies to appeal to, and communicate with, a diverse audience via entertainment media.

Thematic Expression

Create images that communicate uplifting ideas with clarity. Consider the potential for spiritually inspiring themes expressed through the narrative and conceptual aspects of creative work, and identify opportunities for positive cultural influence through the Concept Design field.

Advanced Concept Design

Synthesis of advanced principles and methodologies in illustration to solve complex visual problems of production design. Students work within stated narrative and aesthetic perimeters to develop original ideas from research to production-ready concept artwork.

DESIL 458

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	DESIL 457; or DESAN 361R
Recommended	DESIL 358, 410, 453.
Taught	Winter

Course Outcomes

Visual Development Direction

Compose a visual style guide, present it to peers for review, and apply it to the story world of your chosen project.

Concept Design Process

Define and implement an effective creative process to develop original designs.

Personal Vision

Develop a series of creative and stylistically distinctive designs to portray a story world of your choice.

Thematic Expression

Communicate meaningful, uplifting themes through narrative and symbolic imagery.

Professional Application

Publish an online portfolio of your best concept artwork.

Professional Practices for Illustrators

Business aspects of the illustration profession.

DESIL 488

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	BFA or BA acceptance.
Taught	Fall

Course Outcomes

Professional Preparation and Practices

This course is designed to provide BFA seniors with the knowledge required to successfully pursue a career in illustration. This course is designed to engender leadership principles, business ethics and creative objectives necessary to embrace the transition from academic life to that of a committed professional artist. In this course students will learn about professional illustration practices and the current state of the business through lectures, guest speakers, readings, and student projects. Students need to be aware of their creative future; in particular, students should understand how the business of illustration is operated and current issues affecting it, as well as the broader application of aesthetic skills to various visual arts careers.

Personal and Visionary Business Strategy

The student will be instructed to ponder, appraise and seamlessly incorporate their academic experience into a personal and visionary business strategy. During the course of the semester the student will evaluate their role as a visual communicator through an artist statement, personal business strategy and a visual identity package that reflects an understanding of diverse market trends. The student will leave with a network of potential clients and contacts that will provide a supportive association in regards to their chosen fields of expertise. Topics covered will include: marketing and promotion, portfolios, pricing and billing, copyrights, business records and taxes, and reps.

Top

Special Problems in Illustration

Individual study in illustration of special interest.

DESIL 494R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

BFA Illustration Final Project

Advanced individual project in illustration with miminum guidance, showing a high degree of competence.

DESIL 497R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	BFA advisor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

Directed Studies in Illustration

Credit for work experience in illustration.

DESIL 498R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	BFA advisor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Introduction to Photography and Digital Workflow

Basic camera techniques and digital capture, developing entry-level skills in digital imaging workflow, developing skills with industry-related software and working methods. Lighting two-dimensional work for portfolio documentation.

DESPH 116

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Pre-graphic design, pre-illustration, pre-photography, pre-design, pre-ARTED major/minor status.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

1. Develop Technical Competency

1. Students will learn to produce quality photographs through the development of basic craft

2. Use Good Design

2. Students will learn to sensitively compose photographs using the elements and principles of good design

3. Effectively Utilize Light

3. Students will develop greater sensitivity to light generally and use it define form

4. Refine Seeing and Creativity

4. Students will refine their ability to see photographically and think creatively

5. Develop a Digital Imaging Workflow

5. Students will develop a personal digital imaging workflow to manage their creative output

Top

Introduction to Digital Imaging

Photography-based digital imaging, including film scanning, digital capture, color management, Photoshop instruction, fine art and commercial print output, and archiving.

DESPH 120

Hours	3.0 Credit, 6.0 Lecture, 2.0 Lab
Prerequisites	DESPH 116; BA major status.
Taught	Winter

Course Outcomes

Course Outcome 1

Develop an entry-level professional skills with professional digital and traditional camera systems including those of small, medium, and large format.

Course Outcome 2

Develop entry-level professional skills in digital workflow, including skills with relevant industry related software and working methods.

Course Outcome 3

Develop understanding and skill in two dimensional image design and composition.

Course Outcome 4

Develop the ability to effectively communicate ideas.

Adobe Photoshop

Students will acquire a confident working knowledge of Adobe Photoshop including its use in creative expression, efficient digital workflow and making quality digital prints.

Digital Image Capture

Students will learn the unique characteristics of digital image capture using digital cameras

Film and Print Scanning

Students will learn the fundamentals of successful film and print scanning in order to be comfortable working on most scanner platforms

Top

Introduction to Lighting

Introduction to studio lighting for photographers. Using light as a medium for creating expressive imagery.

DESPH 140

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	Photography emphasis acceptance.
Taught	Fall, Winter

Course Outcomes

Illustration Lighting and Camera Techniques

Students will learn professional lighting and camera techniques required to produce photographic illustrations for advertising, still life, fine art, layout and other applications.

Workflow Techniques

Students will learn professional workflow techniques of capturing digital photographic images with small, medium and large format cameras directly to the computer for critical analysis and refinement in the studio.

Photographic Assisting

Students will learn important skills, qualities and talents related to being photographic assistants.

Professionalism

Students will learn to execute and present their work in a professional manner consistent with todays working enviroment.

Top

Moving Image and Video Art 1

Introduction to videography. Fundamental techniques and processes used in capturing and editing moving imagery.

DESPH 260

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	Photography emphasis acceptance, DESPH 140.
Taught	Fall

Course Outcomes

Camera Techniques and Style

Students will learn the beginning techniques of making a moving image. Basic camera skills, from ISO, Shutter, Aperture will be learned. Composition, and camera movements will be learned as well.

Lighting

The student will learn the basic skill of lighting, 3 point lighting, location lighting, natural lighting, and artificial lighting.

Editing

Students will learn the basic principles of editing using the most current editing software.

Introduction to Black and White Photography and Darkroom Techniques

Basic camera and darkroom techniques emphasizing black and white film processing and printmaking with concern for visual communication, aesthetics, and personal expression.

DESPH 270

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Photography emphasis acceptance.
Taught	Fall

Course Outcomes

Entry Level Processing and Printing

Students will learn entry level skills of processing and printing traditional (meaning film vs. digital) black & white photographs, including a variety of special effect techniques.

35mm and Medium Format Camera Skills

Students will learn entry level professional skills associated with traditional 35mm and medium format film camera systems.

Two Dimensional Image Design and Composition

Students will gain increased understanding of two dimensional image design and composition including the ability to effectively communicate ideas.

Top

Advanced Photography

Camera and darkroom techniques using the zone system for exposure and development control of large format negatives and prints.

DESPH 273

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	DESPH 270; or VAPHO 170
Note	Lab required.
Taught	Winter

Course Outcomes

Zone System

Students will learn advanced black and white techniques of the Zone System including large format camera technniques

Critical Thinking and Decision Making

Students will learn critical thinking and decision making techniques that teach the intellectual skills that are necessary in controlling the photographic process.

Advanced Exposure and Film/Print Controls

Students will learn advanced exposure and development controls of film and prints including the presentation skills associated with the fine photographic print.

Top

Classical Portrait Photography

Studio and environmental portraiture as well as traditional approaches to portrait photography. Lab required.

DESPH 275

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	DESPH 116 & DESPH 120
Taught	Winter

Course Outcomes

Effectively Light People

Students will develop useful lighting skills to powerfully communicate their vision of the people they photograph.

Develop Post-Production Imaging Techniques

Students will develop and refine post-production digital imaging skills to enhance and empower their message through color, contrast, juxtaposition and image manipulation.

Develop Basic Business Practices

Students will learn basic business practices associated with the field of portrait and people photography

Top

Editorial Photography

Narrative storytelling through the medium of photography. Concepts, techniques and styles used in photojournalism, documentary, and photoreportage.

DESPH 276

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	DESPH 120 & DESPH 140
Taught	Winter

Course Outcomes

Editorial Techniques and Styles

Students will learn the techniques and styles used in editorial photography with emphasis on content, concept and narrative as used in photojournalism, documentary and photo-reportage, including techniques used to tell stories and persuade thought and opinion in editorial media.

Portable Flash Systems

Students will learn camera and lighting techniques used in location editorial photography including the use of portable dedicated and non-dedicated flash systems.

Historic and Contemporary Photographers

Students will learn the styles and techniques used by a variety of significant editorial photographers both historic and contemporary.

Moving Image and Video Art 2

Advanced studies in videographic storytelling.

DESPH 360

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	DESPH 260; acceptance into BFA degree program.
Taught	Fall

Course Outcomes

Camera

Students will work with and understand the professional workflow on a motion picture camera.

Lighting

Students will learn lighting set ups in relationship to motion picture productions.

Sound

Students will be introduced to recording sound, and building soundscapes for their films.

Concept

Students will apply the technical expertise and skill development toward finding their own visual voice and artistic expression.

Top

Survey of Applied Photography

Introduction to a broad range of photographic applications, including copy work, portraiture, editorial, architectural, and photojournalism.

DESPH 370

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	DESPH 140
Recommended	DESPH 120.
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Still Life Photography

Camera and studio techniques to produce illustrations for advertising layout and other media.

DESPH 372

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	BFA acceptance.
Note	Lab required.
Taught	Fall

Course Outcomes

Story Telling

Students will develop their own voice and vision and learn how to communicate through their photographs in a manner that will persuade and emotionally move the viewer.

Illustration Lighting and Camera Techniques

Students will learn professional lighting and camera techniques required to produce photographic illustrations for advertising, still life, fine art, layout and other applications.

Workflow Techniques

Students will learn professional workflow techniques using Capture One Pro 9 to capture digital photographic images with small, and medium format cameras directly to the computer for critical analysis and refinement in the studio. This

Professional Skills

Students will learn important skills, qualities and talents related to being a photographic assistants. Students will also work under the direction of a local business executing real world work.

Practicum in Photography

Professional portrait studio practices, including lighting, working with people, basic business practices; portfolio preparation, advertising and marketing.

DESPH 373

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	DES 111 & DES 115 & DESPH 270
Taught	Fall, Winter

Course Outcomes

Visual Communications

Students will learn the principles of visual communication and apply them to their photography.

Photography Genres

Genre specific explorations will include location lighting, mood development, tabletop studio lighting for product, and the creation of journalistic and editorial photography.

Studio Practices

Students will learn the studio practices necessary to run an independent photography studio.

Top

Exploring Alternative Photography Processes

Photography as an exploratory, sensitizing process.

DESPH 377R

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	DESPH 273
Note	Lab required.
Taught	Winter

Course Outcomes

Life Long Learning

Students will learn how to teach themselves and their classmates as part of life long learning.

Skill Development

Students will expand their creative exploration by being exposed to different photographic processes other than ink jet printing.

History of Photography

Students will have a better understanding of the history of photography through hands-on applications.

History of Photography

Origin and development of photographic aesthetics.

DESPH 379

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Design Core.
Taught	Fall

Course Outcomes

Scope

Students will acquire a solid foundation in the historical context of the history of photography from the nineteenth-century to the present.

Style

Students will be able to articulate the characteristics of the period styles, processes, techniques, cultural used and philiosophies of key photographers in Europe and the Western Hemisphere. Students will become conversant with important photographs and collections in terms of style, patronage, reception, and meaning.

Research Skills

Students will develop art historical research skills by conducting advanced research focused on a single photographer or photograph.

State of Research

Students will situate their informed, original ideas within the best publications and reviews of period photography.

Sources

Students will demonstrate familiarity with advanced research skills and best research practices as taught by the course professor and supported the HBLL Art History and Photography research guides. Students will also be required to use acceptable style guides.

Top

Special Topics

Collaborative photographic practice with other visual arts disciplines.

DESPH 394R

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	DESPH 120 & DESPH 140 & DESPH 260; Acceptance into BFA degree program.
Recommended	DESPH 372, 377R, 475, 478.
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Computer Applications Studio for Photographers

Individual photography project using high-end hardware and software.

DESPH 410R

Hours	2.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Photographic Field Study

On-location study of photography.

DESPH 411R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

Senior Portfolio

Individualized portfolio development to prepare students for entrance into professional practice or graduate school.

DESPH 442

Hours	3.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	DESPH 120 & DESPH 140
Recommended	DESPH 372, 377R, 475, 478.
Taught	Winter

Course Outcomes

Trends and professional practice

Students will study and research the specific focus of photography to learn the current trends of the art and professional market.

Portfolio Development

Students will develop and propose a project that will help them in developing their own voice in the medium of photography.

Exploration

Students with further explore and experiment with different methods of photography to help in their overall development as photographers.

Advanced Location Photography

Lighting and photographing architecture, products, people, and concepts in environmental settings for the editorial, corporate, industrial, and advertising industry.

DESPH 475

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	BFA acceptance.
Taught	Fall

Course Outcomes

1. Develop skills used in Photographing Architecture

1. Students will develop skills to effectively photograph architecture emphasizing how to light interiors and the importance of working at the right time of day to powerfully portray exteriors.

2. Increase Location Photography Skills

2. Students will develop skills used in professional location photography, including those connected to corporate, industrial, editorial and advertising photography

3. Develop a Professional Portfolio

3. Students will create and refine their portfolios (electronic and print versions) for professional presentation purposes

Top

Nature Photography

Techniques of professional nature and landscape photography.

DESPH 477R

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	Instructor's consent.
Taught	Spring, Summer

Course Outcomes

Please contact the individual department for outcome information.

Top

Fine Art Photography

Fine art approaches to photography, including conceptual, social, and aesthetic values.

DESPH 478

Hours	3.0 Credit, 2.0 Lecture, 4.0 Lab
Prerequisites	DESPH 377R.
Taught	Fall

Course Outcomes

Fine Art Photography Analysis

Students will learn to understand and analyze and broaden their perspective of contemporary movements in fine art photography.

Critical Evaluation and Critique Strategies

Students will learn to apply and support critical evaluation, self motivations and critique strategies of their own work as well as the work of others.

Gospel Standards and Contemporary Art

Students will learn to successfully incorporate Gospel standards while navigating through the environments of contemporary art movements.

Professional Practices for Photographers

Business aspects of the photographer's profession.

DESPH 488

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	BFA or BA acceptance.
Taught	Winter

Course Outcomes

Photography Business Management

Students will learn basic skills and concepts of earning a living and running a photographic business, including legal business organization models, writing a business plan, calculating fixed overhead and variable business expenses.

Effective and Competitive Pricing

Students will learn how to effectively and competitively price and market their photographic work.

Photographic Assisting

Students will learn important skills and attributes of being photographic assistants.

Top

Special Problems in Photography

Individual study in photography of special interest.

DESPH 494R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

BFA Photography Final Project

Advanced individual project in photography showing a high degree of competence.

DESPH 497R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	BFA advisor's consent.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Top

Directed Studies in Photography

Credit fort work experience in photography.

DESPH 498R

Hours	1.0 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	BFA advisor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Humanities Technology: Tools & Skills

Introduction to the skills required to create teaching and research applications in the Humanities; fundamental principles and skills of programming; principles of interface and human/computer interaction; critical problem solving.

DIGHT 210

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Information Flow & Structure

Students will be able to model the flow and structure of information between users and application.

Logical Reasoning

Students will be able to reason logically and think critically to solve basic programming problems.

From the Abstract to the Concrete

Students will be able to convert abstract design requirements into machine-executable code.

Top

Introduction to the Digital Humanities

Introduction to the premises and practices of the Digital Humanities. Exploration of current technology used in Digital Humanities research.

DIGHT 215

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Scholarly Primitives

Students will understand one or more models of organization applied to digital humanities research and development.

Evaluate Technology

Students will be able to evaluate the utility of new technology for use in the Humanities.

Novel Uses forTechnology

Students will be able to propose new uses for technology based on unmet needs in the Humanities.

Introduction to Print Publishing

Introduction to layout and typesetting and their place in the publications process; includes graphic design theory, audience analysis, and basic skills with professional desktop publishing application.

DIGHT 230

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Typesetting's Place in Publishing

Students will situate typesetting and printing within the scope of the publishing process as a whole.

Typesetting Software

Students will master the basic functions of Adobe InDesign for the purpose of typesetting various publications.

Design Principles

Students will use a set of basic design principles (proximity, alignment, repetition, contrast) to improve the quality of their publications in InDesign.

Photo Editing Software

Students will be familiar with Adobe Photoshop and some of its uses in print publishing.

Groupwork

Students will work effectively in groups to produce high quality printed material.

Web Publishing

Overview and introduction to web programming as a form of expression. Includes HTML, CSS, and some JavaScript.

DIGHT 250

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

The Context of Web Technologies

Students will evaluate new web technologies in light of the general history of the web.

Website Production

Students will be able to draft, design, and code static web content, and then post that content to a publicly-accessible web server.

HTML/CSS/JavaScript Skills

Students will have a mastery of HTML/CSS syntax, common HTML elements/attributes/properties, and basic skill with JavaScript.

Tools for Text Processing and Analysis

Introduction to tools and techniques suited for use with text analysis, including basic text encoding, text preparation, basic regular expression, and concordance programs.

DIGHT 260

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Text Representation in Computers

Understand how text is represented in computers. This includes 8-bit code points and various encodings of Unicode.

Regular Expressions

Be able to construct regular expressions and apply them to text files to search for patterns and make changes.

Regular Expressions and Procedural Scripting

Be able to use regular expressions in conjunction with a procedural scripting or general purpose programming language.

Introduction to Localization

Internationalization and localization of websites and software. Introduction to other digital project types. Cultural internationalization and localization. Includes elements of technical internationalization and localization such as locales and regional settings; character encoding, placeholders, logic, etc.

DIGHT 270

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Four semesters of foreign language or equivalent.
Taught	Winter

Course Outcomes

Understanding the field

Students will learn the parameters of the emerging field of localization in a context of globalization and be able to recognize potential needs for localization work.

Localization technique and technology

Students will demonstrate capacity to practice localization of various technologies.

Programming in the Humanities

Intermediate topics in programming and creating teaching and research applications in the Humanities, including digital media integration, networked and mobile applications.

DIGHT 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	DigHT 210 or instructor approval.
Taught	Winter

Course Outcomes

Logical Reasoning

Students will be able to reason logically and think critically to collaboratively solve significant programming problems.

Advanced Programming Concepts

Students will understand advanced programming concepts: object orientation, data-driven applications, encapsulation, etc.

Databases and Web Services

Students will know how to integrate databases, web services, and basic server side scripting.

From the Abstract to the Concrete

Students will be able to convert abstract design requirements into machine-executable code.

Research in the Digital Humanities

Applications of computer technology to research in the Digital Humanities across language and literature, e.g. text processing, data mining, information storage and retrieval, etc.

DIGHT 315

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	DIGHT 215
Recommended	DigHT 260.
Taught	Fall, Winter

Course Outcomes

Research

Students will demonstrate an advanced level of knowledge in a chosen specialty area and conduct research in that area.

Print Publishing 2

Advanced application of digital layout and typesetting. Includes audience analysis, color theory, and photo preparation.

DIGHT 330

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	DIGHT 230
Taught	Fall, Winter

Course Outcomes

Criticism of Print

Students will be able to offer useful and appropriate criticism of printed material.

Print Design Software

Students will master advanced techniques in Adobe InDesign including styles, libraries, and indexing.

Photo Adjustment

Students will be able to adjust color, exposure, and other visual characteristics of photographs (Adobe Photoshop).

Typsetting

Students will be able to typeset professional publications including books and magazines.

Top

Web Information Technologies

Using advanced web applications and services to create dynamic, database-driven Web sites. Integrating database methods with web publishing approaches and principles. Techniques for Web-based Digital Humanities applications such as crowd-sourced markup, automatic data visualizations, etc.

DIGHT 350

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	DigHT 250 or instructor approval.
Taught	Fall, Winter

Course Outcomes

Information Extraction

Students will be able to extract information across a variety of electronic relationships.

Information Schemas

Students will be able to organize information in various electronic schemas.

Information Routines

Students will be able to routinize the insertion, extraction, manipulation, and reporting of information.

Top

(DigHT-Ling) Programming for Text Processing and Analysis

Development of computer applications for research in language and literature (text processing, retrieval, and analysis) in one or more programming languages (e.g., Perl, Python, etc.).

DIGHT 360

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 100 or equivalent experience.
Taught	Fall, Winter

Course Outcomes

Understanding of Unicode

Students will have an advanced understanding of Unicode and its advantages over ASCII and other text encoding standards.

Locate Complex Patterns and Make Substitutions

Students will be able to locate complex patterns and make substitutions (e.g., using technologies such as Perl, Python) within texts for the purpose of manipulating and analyzing texts and corpora.

Top

Tools Development Seminar

Individual or group development of new technological tools with use in the Digital Humanities.

DIGHT 390R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	DIGHT 250; or DIGHT 260; or DIGHT 350
Taught	Fall, Winter

Course Outcomes

Topical Kowledge

Students will have knowledge regarding the special topic selected by the instructor.

Top

Digital Humanities Research Seminar

Individual or group research of original problems in Digital Humanities research.

DIGHT 395R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	DIGHT 215
Recommended	DigHT 315.
Taught	Fall, Winter

Course Outcomes

Research

Students will demonstrate an advanced level of knowledge in a chosen specialty area and conduct research in that area.

Top

Digital Humanities Project

Original research project on open questions within the Digital Humanities field. Content and/or technology advisor is required.

DIGHT 495R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Any DigHT 300-level course or instructor approval.
Taught	Fall, Winter, Spring

Course Outcomes

Project Proposal

Students will be able to draft written proposals for products/techniques they hope to develop.

Work with Clients

Students will be able to negotiate and meet the demands of a sponsor/client to develop technology solutions.

Solve Problems

Students will be able to apply their technology skills to solve a real problem they or someone else has.

Technology Internship

Sponsored development of technology tools for application within the Digital Humanities (e.g. print or electronic publishing production, courseware/software development, museum/collection/textbase management, language/linguistic tools, etc.). Approval by project sponsor, DigHT Coordinator, and BYU Internship Office are required.

DIGHT 496R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Any DigHT 300-level course or instructor approval.
Taught	Fall, Winter, Spring

Course Outcomes

Professional Environment

Students will be able to complete tasks related to DHT skills in a professional environment.

Professional Level

Students will be able to apply at least one DHT-related technology at a professional level.

Professional Traits

Student will be able to demonstrate professional traits such as promptness, positive demeanor, well-spokenness, etc.

First-Year Dutch

Basic language skills.

DUTCH 101

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

First-Year Dutch

Basic language skills.

DUTCH 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	DUTCH 101
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Speaking

Speak the target language well enough to satisfy immediate needs related to basic social situations, simple transactions, basic food and lodging, and routine travel.

Comprehension

Understand written and spoken target language relating to familiar topics.

Writing

In the target language, write short, simple messages consisting of structurally-accurate sentences on familiar topics.

Culture

Function appropriately in routine, familiar situations in the target culture.

Second-Year Dutch

Conversation, vocabulary building, and reading and writing skills, emphasizing reading.

DUTCH 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	DUTCH 102
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Vocabulary

Broaden vocabulary for both reception (listening and reading comprehension) and production (speaking and writing).

Elaboration

Create structurally-accurate, elaborated utterances and begin to group utterances into paragraphs and narratives. Do this in present, past and future time.

Grammar

Review and increase understanding of basic language structures.

Culture

Discuss in the target language common products and practices related to every-day life in the target culture.

Second-Year Conversation

Intermediate listening comprehension and speaking skills.

DUTCH 211R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	DUTCH 201
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Conversation

Speak comfortably about predictable, familiar topics related to daily activities; this includes the ability to Initiate, maintain, and close simple conversations and to ask and respond to simple questions.

Survival Transactions

Carry out "survival" transactions (shopping, getting directions, ordering meals, etc.)

Pronunciation and Accuracy

Be understood by native speakers accustomed to dealing with non-native speakers.

Third-Year Conversation

Advanced conversational skills.

DUTCH 311R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	DUTCH 211R
Note	Teacher may waive prerequisite based on prior experience.
Taught	

Course Outcomes

Conversations

Speak comfortably about predictable, familiar topics related to daily activities and current events; this includes the ability to initiate, maintain, and close conversations and to ask and respond to questions.

Organized Speech

Begin to speak in "oral paragraphs."

Strategies

Apply appropriate strategies to deal with unpredictable language situations.

Pronunciation and Accuracy

Be understood by native speakers unaccustomed to dealing with non-native speakers.

Introduction to Dutch Literature

Readings from the best Dutch literature. Introduction to basic literary concepts.

DUTCH 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Dutch 201 or foreign residence.
Note	Entry course for returned missionaries or others of equivalent language experience. Required course for obtaining language credit by examination. May fulfill the GE Languages of Learning requirement.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Recognize and Analyze

Recognize and analyze the most important genres in target-language literature.

Key Characteristics

Identify and discuss key characteristics of the most important literary movements in the target culture.

Context

Place literature in a meaningful cultural and historical context.

Language Skills

Improve target-language reading, writing, and speaking skills.

General Education Requirements

Complete language and cultural aspects of General Education "Languages of Learning" and "Global & Cultural Awarness" requirements.

Top

New Student Seminar

Overview of electrical and computer engineering with group and individual design projects.

EC EN 191

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Understand ECEn

Understand the discipline of electrical and computer engineering and its many roles in the modern technological world.

Academic Internship

Work experience evaluated by supervisor and posted on student's transcript.

EC EN 199R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Department chair's and internship coordinator's consent.
Taught	

Course Outcomes

Student acquires professional experiences in the discipline.

Student demonstrates professional communication skills (report).

Student demonstrates the ability to use reflective thinking to convert professional experience into academic understanding.

Top

Fundamentals of Digital Systems

Digital logic: theory, design, and implementation of combinational and sequential logic. Laboratory experience in construction of digital logic circuits.

EC EN 220

Hours	3.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	C S 142 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Combinational Networkw

Ability to design, minimize, and analyze a combinational network

Sequential Networks

Ability to design and analyze a sequential network.

Design and Debug

Ability to design and test a digital system that includes I/O, state machines and combinational networks.

Microprocessor

Ability to design major components of a simple microprocessor.

Schematic Capture

Ability to use schematic capture tools.

Circuit Analysis and Laboratory

Analysis of electric circuits including transients, sinusoidal steady-state, and power. Includes labs.

EC EN 240

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	MATH 113 & PHSCS 220; Average of B or better in completed Math and Physics courses, or advisor approval.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

AC

Application of complex variables to AC steady state circuit analysis.???

DC

Application of algebra, linear algebra, and circuit equivalencies to DC circuit analysis.???

RC and RL

Application of differential equations to transient analysis of RC and RL circuits.???

Mathematical Circuit Models

Application of algebra, linear algebra, and circuit equivalencies to AC circuit analysis.???

Create

Ability to design, analyze, and demonstrate a working integrated stereo audio amplifier system.

Tools

Ability to use oscilloscopes, function generators, and DC power supplies in an applied design/debug environment.

Top

Elements of Electrical Engineering

Linear electric circuits, computer organization, and logic circuits for nonmajors.

EC EN 301

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	MATH 303; or MATH 334
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Basics of ECEn

Understand and apply basic principles of electronic circuits.

Digital System Design

Advanced digital design, including hardware description languages, electrical properties of digital circuits, synchronous and asynchronous circuits, computer arithmetic, and interfacing to external circuitry.

EC EN 320

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	EC EN 220 & EC EN 240
Taught	Winter

Course Outcomes

VHDL Design

Ability to describe a digital system in VHDL.

Simulate and Debug

Ability to simulate and debug a digital system described in VHDL.

Data Sheets

Ability to read and interpret a data sheet.

FPGA Design

Ability to implement logic using an FPGA.

Asynchronous Synchronization

Ability to synchronize asynchronous inputs into a synchronous system and analyze the MTBF.

Introduction to Embedded System Programming

Understanding the hardware-software interface in an embedded system. Using C and assembly language in device-driver design. Software interfacing to peripherals. Performance and memory issues. Hardware interrupt programming.

EC EN 330

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	C S 235 & EC EN 220
Taught	Fall, Spring

Course Outcomes

Specifications

Ability to read and interpret device specifications

Interrupts

Ability to write efficient interrupt service routines

Drivers

Ability to write software to communicate with peripherals

Microprocessors

Ability to understand basic microprocessor architecture

Software

Ability to organize software in a complex embedded application

Communication

Ability to write a user manual for an embedded application

Electronic Circuit Design 1

Analysis and design of electronic circuits with an emphasis on amplifier gain and frequency response.

EC EN 340

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	EC EN 240
Taught	Fall

Course Outcomes

Application

Ability to apply electronic device models to the solution of a circuit problem.???

Knowledge

Ability to relate circuit theory to practice.???

Circuit Design

Ability to understand and develop circuit designs in a professional manner.â?¨

Communication

Ability to document engineering/experimental results and to write summary reports.

Experience

Ability to use specialized circuit analysis techniques including approximate equivalent circuits.â?¨

Equipment

Ability to use oscilloscopes, function generators, and DC power supplies.

Spice

Ability to use Spice

Top

Electromagnetic Fields and Waves

Analysis of transmission lines and electromagnetic waves including the development and application of Maxwell's equations.

EC EN 360

Hours	4.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 314 & MATH 334 & EC EN 240
Taught	Winter

Course Outcomes

Mathematics

Application of differential equations to wave propagation.

Calculus

Application of integral multivariate calculus to solve for electromagnetic fields.

Wave Equasions

Application of complex variables to phasor solutions of wave equations.

Electromagnetic Fields

Ability to analyze the interaction of electromagnetic fields with structures and materials.

(EC En - Math 431) Probability Theory

Axiomatic probability theory, conditional probability, discrete / continuous random variables, expectation, conditional expectation, moments, functions of random variables, multivariate distributions, laws of large numbers, central limit theorem.

EC EN 370

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MATH 313
Taught	Winter, Spring

Course Outcomes

Reasoning

The ability to use probabilistic reasoning and the foundations of probability theory to describe probabilistic engineering experiments in terms of sample spaces, event algebras, classical probability, and Kolmogorov's axioms.

Probability

The ability to use and simulate random variables, distribution functions, probability mass functions, and probability density functions, through calculus and functional transformations, to answer quantitative questions about the outcomes of probabilistic systems.

Variables

The ability to use and simulate multivariate distributions, independence, conditioning, and functions of random variables, including the ability to compute expectations, moments, and correlation functions, to describe relationships between different experimental conditions.

Statistical Inference

The ability to use statistics from measurements and acquired data to make reasonable quantitative inferences about engineering systems.

Top

Signals and Systems

Time and frequency domain analysis of discrete or continuous systems subjected to periodic or nonperiodic input signals.

EC EN 380

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	EC EN 240 & MATH 334
Taught	Fall

Course Outcomes

Continuous-Time LTI System

Application of integral calculus, differential equations, complex variables, to transform analysis of a continuous-time LTI system.

Discrete-Time LTI System

Application of integral calculus, differential equations, complex variables, to transform analysis of a discrete-time LTI system.

Continuous-Time Convolution Problems

Application of integral calculus to solve continuous-time convolution problems.

Discrete-Time Convolution Problmes

Application of discrete math to solve discrete-time convolution problems.

Tools

Ability to use Matlab or similar tools to analyze, model, simulate, and experiment with linear systems.

Signals and Systems

Ability to interpret and synthesize signals and systems in both the time and frequency domains.

Mathematics of Signals and Systems

Ability to recognize the mathematical properties of signals and systems including linearity, time invariance, causality, stability, etc.

Consequences and Principles

An understanding of the consequences and principles associated with digitally sampling and

reconstructing analog signals.

Junior Team Design Project

Culminating design experience based on skills learned in junior-level courses. Students works in teams to plan, design, and test a project based on the integration of components built in other classes.

EC EN 390

Hours	3.0 Credit, 1.0 Lecture, 6.0 Lab
Prerequisites	EC EN 330 & EC EN 340 & EC EN 380
Taught	Winter

Course Outcomes

Design

Ability to complete a significant culminating design that draws upon the knowledge gained in prerequisite and concurrently enrolled course.

Leadership

Ability to assign and accept leadership responsibilities on a team.

Decisions

Ability to define, understand, and participate in team decision making processes.

Requirements

Ability to take high level, customer requirements, identify from them the specifications a solution must meet, and formulate those specifications as an engineering problem.

Technology

Ability to combine new technology with custom built components

Safety

Ability to apply safety issues to engineering hardware.

Top

Junior Seminar

Seminars and colloquia on current topics in electrical and computer engineering, as well as ethics, contemporary issues, and life-long learning.

EC EN 391

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	EC EN 240 & ENG T 231
Note	Attendance and some writing are required.
Taught	Fall

Course Outcomes

Ethics

An understanding of professional ethics.

Technology

Ability to use the library, internet, etc. to learn about recent developments in a particular technical field.

Knowledge

Knowledge of recent developments in a particular technical field.

Computer Systems

Machine-level representations of programs and data, processor architecture, program performance optimizaton, memory hierarchies, virtual memory, linking, exceptions.

EC EN 424

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	EC EN 330
Taught	Winter

Course Outcomes

Program Optimization

Ability to understand and optimize programs from the assembly code output by the compiler.

CPU

Ability to modify a CPU design to add instructions and to improve the overall efficiency of pipelined execution.

Skills

Ability to design and verify software that exploits a buffer-overflow security flaw in example code.

Tools

Ability to use a C compiler, a disassembler, a debugger, and CPU emulators to develop, debug, test, analyze, and optimize programs.

Real-Time Operating Systems

Hardware/software interface, real-time kernel internals, implementation of high-level language constructs, issues in real-time application software development.

EC EN 425

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	EC EN 324; or EC EN 330
Taught	Fall

Course Outcomes

Programming Languages

Ability to apply C and assembly programming languages and knowledge of the hardware/software interface to the design and implementation of a real-time kernel.

Real-Time Applications

Ability to design and implement a real-time application.

Real-Time Kernel

Ability to design and implement a real-time kernel.

Real-Time Application Software

Ability to use C programs, compilers, and debuggers in the design and implementation of real-time application software.

Service Routines

Ability to write interrupt service routines.

Tools

Ability to use a real-time operating system as a tool in the development of real-time application software.

Embedded Systems

Interfacing digital hardware components to an embedded system processor. Developing the hardware-software interface. Developing application software. Using C and assembly language in device-driver design, monitor-debugger, and real-time kernel. Lab.

EC EN 427

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	EC EN 320 & EC EN 324; or EC EN 320 & EC EN 330
Taught	Fall

Course Outcomes

Digital I/O device

Ability to design a bus-based digital I/O device.

System Design

System design project integrating custom bus-based digital I/O device.

Interface

Ability to interface to a processor or I/O bus.

Data Sheets

Ability to read and interpret device specifications (data sheets) in order to integrate a device within a microprocessor based system.

DMA

Ability to use DMA for a high-bandwidth I/O device.

Communication and Power Circuits

Introduction to amplitude modulation, frequency modulation, and phase modulation circuits. Modulators, mixers, detectors, and the phase-locked loop. Power amplifier stage and orcillator design.

EC EN 443

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	EC EN 340
Taught	Winter

Course Outcomes

Application

Ability to use differential calculus for circuit optimization.

Noisy Circuits

Ability to apply probability theory to noisy circuits.

Electronic Communication Circuits

Ability to conduct lab experiments with electronic communication circuits.

Design

Ability to design mixers, modulators, and power stages.

Communication

Ability to write lab reports.

Technology

Ability to use Spice.

Introduction to Mixed-Signal VLSI

VLSI circuit design emphasizing mixed-signal circuits such as D/A and A/D converters, phase-locked loops, S/H circuits. Associated laboratory provides layout-design experience.

EC EN 445

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	EC EN 340
Taught	Fall

Course Outcomes

Modern VLSI Processes

An understanding of modern VLSI processes and how this processing relates to circuit performance.

A/D & D/A Converters

Ability to conduct lab experiments with A/D and D/A converters.

CMOS

Ability to design a mixed-signal IC in CMOS including ADC or DAC chips

Communication

Ability to write lab reports.

Industry

Ability to work with design, verification, and CAD tools

Technology

Ability to use Spice including advanced features.

Top

Introduction to Semiconductor Devices

Physics of electronic and optical solid state devices; includes semiconductor materials, bipolar and FET device physics and modeling, optical properties of semiconductors, and lasers.

EC EN 450

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	EC EN 340
Taught	Winter

Course Outcomes

Model p-n Junctions

Application of basic physical processes to model p-n junctions.

Charge Transport

Application of differential equations to charge transport in semiconducting material.

Electromagnetics

Application of the physical properties of device building blocks (pn junctions, metal semiconductor interfaces, MOS structures) to model MOSFET operation.

Technology

Application of basic microfabrication processes to design semiconductor device fabrication process flows.

Introduction to Digital VLSI Circuits

Design of very large-scale integrated circuits for digital systems. CAD tools used extensively to simulate the design and create and verify mask circuits.

EC EN 451

Hours	4.0 Credit, 3.0 Lecture, 5.0 Lab
Prerequisites	EC EN 320 & EC EN 340
Taught	Winter

Course Outcomes

CMOS Circuits

Ability to analyze CMOS circuits.

Translate Digital Logic to CMOS Circuits

Ability to translate digital logic to CMOS circuits to achieve desired behavior and performance requirements.

CMOS Layout

Ability to perform CMOS layout.

Tools

Ability to use eCAD tools for CMOS design.

Techniques

Ability to characterize timing and noise in CMOS circuits.

Experiments in Integrated Circuit Development

Measurements of key silicon properties and fabrication of integrated circuits.

EC EN 452

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	EC En 450 or concurrent enrollment; or Ch En 381 or concurrent enrollment.
Taught	Winter

Course Outcomes

Fabricated Devices

Ability to analyze and interpret data measured from fabricated devices.

MOSFET Devices

Ability to design processes for fabrication of MOSFET devices.

Tools

Ability to use modern microelectronics fabrication equipment.

Top

VLSI Testing

Testing of ICs designed previous semester in ECEn 451 or ECEn 445. Topics in VLSI-testable circuit designs.

EC EN 455

Hours	1.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	EC EN 451; or EC EN 445
Taught	

Course Outcomes

Understand and apply the following:

- Understand the principles of VLSI test
- Apply VLSI test principles to devices under test

Electromagnetic Radiation and Propagation

Electromagnetic and optical theory including guided wave theory, modes, propagation in materials, radiation analysis, antenna analysis, and aperture diffraction.

EC EN 462

Hours	2.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	EC EN 360
Taught	Fall Term 1

Course Outcomes

EM Analysis

Application of vector differential and integral equation methods to EM analysis.

Wave Propagation

Ability to analyze wave propagation in materials and guiding structures.

Electromagnetic Fields & Systems

Ability to model electromagnetic fields and systems using numerical algorithms and interpret results physically.

Top

Wireless Communication Circuits

Analysis, design, and fabrication of RF/microwave passive circuit structures, amplifiers, oscillators, and mixers. System concepts, including stability, gain, and noise figure.

EC EN 464

Hours	2.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	ECEn 462 or instructor's consent.
Taught	Fall Term 2

Course Outcomes

Microwave Systems

Ability to function in groups to design and test microwave systems.

Microwave

Facility with microwave passive and active structures.

Skills

Ability to simulate microwave systems and components.

Introduction to Optical Engineering

Introduces principles and practices of optical engineering including optical communications system and components.

EC EN 466

Hours	2.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	EC EN 462
Taught	Fall Term 2

Course Outcomes

Waveguide Problems

Application of differential equations to solve metallic and dielectric waveguide problems.

Diffraction Problems

Application of integral calculus to solve diffraction problems.

Anisotropic Media

Application of linear algebra to find propagation characteristics in anisotropic media.

Optical

Ability to apply modern optical test equipment to measure optical communication system parameters.

Top

(EC En-Me En 431) Design of Control Systems

Classical frequency response and time domain design of control systems. State-variable control and computer simulation of control systems.

EC EN 483

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	EC EN 380; or ME EN 335
Taught	Fall

Course Outcomes

Simulation Models

The ability to develop (nonlinear) mathematical models of complex dynamic systems.

Final Value Theorem

Ability to use the final value theorem to predict steady state behavior.

Design Models

The ability to simplify those models into linear transfer function and state space representations.

Using Equations and Functions

Ability to model dynamic systems using differential equations, transfer functions, and state space equations.

Design Specifications

The ability to develop design specifications for physical systems with sensing and actuation limits.

Frequency Domain Techniques

Ability to design feedback systems using frequency domain techniques.

Design of PID Control

The ability to design PID controllers for systems described by linear time-invariant models.

State Space Techniques

Ability to design feedback systems using state space techniques.

Design of Loopshaping Control

The ability to use loopshaping techniques to design frequency domain controllers for systems described by linear time-invariant models.

Meeting Specifications

Ability to design feedback control systems to meet desired specifications.

Using Simulink and Matlab

Ability to simulate dynamic systems using Simulink and Matlab.

Design of Observer Based Control

The ability to design observer-based controllers for systems described by linear time-invariant models.

Introduction to Digital Communication Theory

Analysis and design of digital communications systems in AWGN: signal space concepts, modulation, matched filter and correlation detection, synchronization, performance. Computer-based design exercises.

EC EN 485

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	EC EN 370 & EC EN 380
Taught	Winter

Course Outcomes

Fourier Transform

An understanding of the relationship between the Fourier transform of continuous-time signal and the DTFT of its samples.

Digital Modulation

Application of linear algebra in describing digital modulation using the constellation representation.

Statistics

Application of probability and statistics to bit error rate analysis of digital communication systems.

PLL Loop Filter

Ability to design the parameters of a PLL loop filter to meet given performance specifications.

Matched Filter Techniques

Ability to apply matched filter techniques to detection.

Digital Communication

Ability to simulate digital communication systems using Simulink and Matlab.

Introduction to Discrete-Time Signal Processing

Digital signal processing, fast Fourier transforms, digital filter design, spectrum analysis. Applications in speech processing, SONAR, communications, etc.

EC EN 487

Hours	4.0 Credit, 3.0 Lecture, 3.0 Lab
Prerequisites	EC EN 370 & EC EN 380
Taught	Winter

Course Outcomes

Probability Theory

Ability to apply principles of probablity theory for analysis and numerical estimation of power spectral densities.

DSP functions & Algorithms

Ability to use basic DSP functions and algorithms (i.e., FIR filters, IIR filters, polyphase systems, windows, FFTs, etc.) to formulate and solve engineering problems.

Experiments

Ability to perform experiments with real-world signals and DSP systems, including discrete-time filters, spectrum analyzer, acoustic direction finding, etc.

Tools

Ability to use software tools such as Matlab (R) to design, implement, and debug DSP functions.

Application of Mathematics

Application of integral calculus, discrete math, and complex variables, and transform theory to discrete-time signal processing.

Top

Team Design Project

Culminating design experience based on skills learned in advanced technical courses. Students work in teams to plan, design, test, and demonstrate a major project.

EC EN 490

Hours	4.0 Credit, 2.0 Lecture, 6.0 Lab
Prerequisites	EC EN 340 & EC EN 380; selected 400-level EC En courses, depending on project.
Taught	Fall, Winter

Course Outcomes

Collaborative Thinking

Ability to define, understand, and participate in team decision making processes.

Record Keeping

Ability to produce and maintain the necessary control documents on a design team.

Team behavior

Ability to establish and follow ground rules governing team behavior.

Presentation Skills

Ability to give an oral presentation describing a technical design.

Expectations

Ability to understand the expectations from other members on a team.

Leadership

Ability to assign and accept leadership responsibilities on a team.

Team Dynamics

Ability to understand the different skill sets each team member brings to a team.

Expectations

Ability to understand the expectations (regarding participation) of each team member.

Project Completion

Ability to complete a significant culminating design that draws upon the knowledge gained in

prerequisite courses.

Public Speaking

Ability to give an oral presentation describing team progress during a design review.

Leadership Concepts

An understanding of the principles of leadership and project management.

Written Communication

Ability to produce a written report describing a technical design.

Problem Solving

Ability to take high level, customer requirements, identify from them the specifications a solution must meet, and formulate those specifications as an engineering problem.

Documentation

Ability to maintain a team portfolio documenting the design process.

Design Standards

Ability to read, interpret, and use published design standards as a part of the design process.

Top

Special Topics in Electrical and Computer Engineering

Topics vary. Recent developments in electrical and computer engineering.

EC EN 493R

Hours	0.5 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Special Topics in ECEn

Ability to understand and apply a diverse range of special topics in electrical and computer engineering.

Top

Introduction to Algorithm Design

Algorithm analysis, data structures, sorting and searching, graph traversal, weighted graph algorithms, combinational search and heuristic methods, dynamic programming, approximation algorithms, designing algorithms.

EC EN 521

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	C S 235 and 236 and EC En 324; or equivalents.
Taught	Fall

Course Outcomes

Understand and apply the following:

- An understanding of well-known algorithms and data structures and the ability to adapt them to solve a variety of computational problems.
- The ability to determine the complexity class of algorithms.

Top

Special Topics in Computer Systems

EC EN 522R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

Understand and apply the following:

- Understand special topics in signals and systems.

Top

Computer System Reliability

Analysis, modeling, and design of reliable, fault-tolerant computing systems.

EC EN 523

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EC En 320, 324, 370.
Taught	Winter odd years

Course Outcomes

Reliaiblity Concepts

Understanding of fundamental reliability concepts and terminology

Reliability Techniques

Ability to apply common reliability techniques such as redundancy and encoding to improve system reliability

Reliaiblity Analysis

Ability to mathematically analyze the reliability of computer systems and reliability improving techniques

Computer Architecture

Architectural analysis and design of computer systems: instruction-level parallelism, memory hierarchy, instruction sets, low-power architecture.

EC EN 528

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EC En 424 or equivalent.
Taught	Fall

Course Outcomes

Computer Architecture

Understand principles and techniques of computer architecture.

Applying Principles and Analyzing Problems

Apply these principles and techniques to design problems, using analysis to make design tradeoffs in the face of constraints.

Research Literature

Read and critique research literature.

Communication

Communicate design decisions and justifications effectively.

Active and Passive Filter Design

Design methods for electronic filters based on passive components, active components, and integrated circuit components.

EC EN 541

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECEn 340, 380; or equivalents.
Taught	

Course Outcomes

1

Learn the relationship between transfer function pole and zero locations in the Laplace plane and the frequency response of the circuit.

2

Learn the form of transfer function to lead to Butterworth, Chebyshev,and linear phase filters.

3

Be able to design passive LC filters with prescribed transfer functions.

4

Learn how to use active circuits, resistors, and capacitors to create desired filter responses with no inductors.

5

Become familiar with the latest integrated circuit active synthesis methods.

Special Topics in Electronics

EC EN 542R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	

Course Outcomes

1

Understand special topics in electronics

CMOS Amplifier Design

Factors affecting performance of MOS devices in analog applications. Design of MOS amplifiers, buffers, and comparators.

EC EN 543

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECEn 443 or 445 or equivalent.
Taught	

Course Outcomes

1

Understand MOSFET operation at an advanced level.

2

Learn how to design components used such as current mirrors in CMOS amplifier design.

3

Learn the basic op amp configurations.

4

Understand the frequency response and stability problems of op amps.

5

Learn how to compensate op amps to improve stability.

Analog CMOS Circuit Design

Design of CMOS comparators, wideband amplifiers, bandgap references; multipliers, PTAT generators, charge-transfer amplifiers, chopper-stabilized amplifiers, and advanced D/A and A/D CMOS architectures.

EC EN 548

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECEn 443 or 445 or equivalent.
Taught	

Course Outcomes

1

Learn how to characterize comparators, wideband amplifiers, bandgap references, multipliers, PTAT generators, charge transfer amplifiers, and advanced D/A and A/D circuits.

2

Learn how to design comparators, references, charge-transfer amplifiers, and D/A and A/D circuits.

3

Understand the differences between the BJT Gilbert multiplier and the CMOS Gilbert-like multiplier.

VLSI Communication Circuit Design

Frequency synthesizers; low-jitter, voltage-controlled oscillators; high Q circuits; clock regeneration; phase-locked loops; frequency discriminators; and radio-on-a-chip concepts.

EC EN 549

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECEn 443 or 445 or equivalent.
Taught	

Course Outcomes

1.

Understand the challenges of designing modern wireless circuits such as wireless local area networks, cell phones, Bluetooth, and other systems.

2.

Learn the various architectures of wireless transceivers suited to MOSFET circuit design.

3.

Learn the modulation methods and bandwidth requirements for wireless transceivers.

4.

Understand the technical specifications that characterize modern wireless systems.

5.

Learn how to implement components of wireless systems using MOSFET integrated circuits.

(EC En-Me En) Microelectromechanical Systems (MEMS)

Design, fabrication, and applications of MEMS. Mechanical properties governing their design and reliability and the processing technologies used to fabricate them.

EC EN 550

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EC En 450 or Me En 372 or equivalent.
Taught	

Course Outcomes

Mechanical Performance

1. Use mechanics principles to analyze the mechanical performance of microsystems.

Tools and Processes

2. Be familiar with the tools and processes used in micromaching of microelectromechanical systems (MEMS).

Analyze and Design

3. Use principles of physics to analyze and design MEMS, including sensors and actuators.

Top

Optoelectronic Devices

Design, operation, and fabrication of modern optoelectronic devices, including photodiodes, photovoltaics, LEDs, and lasers.

EC EN 555

Hours	3.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	ECEn 450 or equivalent or instructor's consent.
Taught	Fall

Course Outcomes

1.

Use principles of physics to analyze and design the following optoelectronic components – LEDs, lasers, photodiodes, and photovoltaics.

2.

Be familiar with the tools and processes used in fabricating the following optoelectronic components - LEDs, lasers, photodiodes, and photovoltaics.

3.

Understand metrics of optoelectronics devices and be able to incorporate them into systems for optimal performance.

Top

Electromagnetic Wave Theory

Principles and methods of modern electromagnetic wave theory: anisotropic media, dyadic green functions, Huygen's principle, contour integration methods, asymptotic integration. Applications in radiation and scattering.

EC EN 560

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EC En 462 or equivalent.
Taught	

Course Outcomes

1.

Ability to analyze propagation in media.

2.

Ability to use Green's function to model radiation.

3.

Ability to apply electromagnetic theorems to boundary value problems.

Optical Communication Components and Systems

Fiber-optic communication system components and their operating and performance characteristics.

EC EN 562

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EC En 462, 466; or equivalents.
Taught	

Course Outcomes

1.

Learn the fundamental properties of optical fiber channels, sources and detectors.

2.

Design an optical fiber system while considering the bandwidth, distance required, and expense.

3.

Examine a topic of current interest in optical systems and make an oral presentation to the class.

4.

Become familiar with the modern test and evaluation tools for fiber optic systems, including the OTDR Time Domain Reflectometer (OTDR), Optical Spectrum Analyzer (OSA), and Optical Oscilloscopes for eye diagram analysis.

Top

Applied Computational Electromagnetics

Current theory and practice in numerically solving Maxwell's equations for antenna and circuit design and radar-scattering prediction.

EC EN 563

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EC En 462 or equivalent.
Taught	

Course Outcomes

1.

Ability to implement and apply numerical methods including finite differences, method of moments, and finite element method.

Top

Radar and Communication Systems

Design and performance of radar and communication systems: radar equation ambiguity functions, modulation, signal detection, link budgets, spread spectrum, system design, and performance trade-offs.

EC EN 564

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EC En 464 or 485; EC En 360 or 462; or instructor's consent.
Taught	Fall odd years

Course Outcomes

1.

Understand the basic concepts in modern surveillance radar and satellite telecommunication systems including the radar ambiguity function, modulation, signal detection, link budgets, spread spectrum, and system design.

2.

Understand design and system performance tradeoffs for such systems.

3.

Practice applying system performance and tradeoff techniques for the design of radars and satellite telecommunication systems

4.

Communicate design and analysis concepts.

5.

Research practical systems.

6.

Write original reports about practical radar and satellite systems.

Microwave Remote Sensing

Emphasis on space-borne remote sensing of the earth's atmosphere, land, and oceans. Primary methods and applications for both active (radar) and passive (radiometry).

EC EN 568

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall even years

Course Outcomes

1.

Understand design and system performance tradeoffs for microwave sensors.

2.

Understand and experience applications of remote sensing.

3.

Practice applying system performance and tradeoff techniques for the design of radars and satellite telecommunication systems.

4.

Conduct original research in the application of remote sensing.

5.

Communicate research results.

6.

Research practical systems.

7.

Write an original report about a sensor system.

Medical Imaging and Image Reconstruction

Fundamentals of medical imaging modalities (x-ray, CT, ultrasound, and MRI) from a signals and systems perspective, magnetic resonance physics, medical image reconstruction methods (backprojection, partial-Fourier techniques, parallel imaging, compressed sensing).

EC EN 576

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EC EN 360 & EC EN 370 & EC EN 380
Taught	Fall odd years

Course Outcomes

Understand and apply the following:

- Develop a familiarity with the basic biomedical imaging modalities and their history (x-ray, CT, ultrasound, MRI, and nuclear medicine).
- Develop a working knowledge of the basic physics, engineering, and instrumentation principles underpinning each modality.
- Deepen their understanding of the typical applications for each modality, and of each modality's strengths and weaknesses.
- Develop a deep understanding of the physics of MRI, MRI image acquisituion, and reconstruction techniques, and be able to apply that knowledge to the analysis and solution of typical problems arising in MRI image acquisition and reonstruction.

Foundations of Child Development

The development of the whole child including cognitive, social, emotional, linguistic, and physical development and how to apply it to planning, teaching, and assessing children.

ECE 202

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	Fall, Winter, Spring

Course Outcomes

Foundations of Child Development

- Teacher candidates will develop dispositions that are grounded in moral, spiritual, and intellectual understandings that recognize the potential of individual students within the contexts in which they live and develop.
- Teacher candidates will understand core issues related to child development. This includes knowledge about theories of cognitive, linguistic, physical, social, emotional and moral development, and how students develop within the various contexts of early and middle childhood.
- Teacher Candidates will make informed, defensible, and appropriate decisions about classroom instruction and assessment, based on knowledge, that maximizes essential learning and development for all learners.

Parenting and Child Guidance in Early Childhood

Address young children's socio-emotional development in early childhood classrooms. Review theory and research to related peer interactions and parent-child and teacher-student relationships. Develop an understanding of instructional strategies and guidance practices in early childhood classrooms.

ECE 322

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECE 202
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Parenting and Guidance in ECE

ECE 322 is currently an inactive course. Learning outcomes will be created when this course is offered.

Top

Integrated Curriculum in Programs for Young Children

Implementing integrated learning experiences in dance, music, drama, and visual art for the very young, including importance of home, family, and environments on child's aesthetic growth.

ECE 323

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Admittance to either ECE or El Ed licensing programs. Dual majors, please see advisor.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Factors That Impact Learning

1. The student will recognize the significance of factors that impact children's learning and development

Cognitive Processes for Learning

2. The student will understand the cognitive processes associated with various kinds of learning (e.g., critical and creative thinking, problem structuring and problem solving, invention, memorization and recall).

Integrated Curriculum and Social/Emotional Development

3. The student will understand how an integrated curriculum not only addresses children's cognitive development but how social and emotional development is also incorporated into learning activities.

Integrating Parents and Family

4. The student will know how to integrate the parents and family into the curriculum.

Understand Instructional Strategies

5. The student will become aware of the principles and techniques along with advantages and limitations associated with various instructional strategies (e.g., cooperative learning, direct instruction, discovery learning, whole group instruction, independent study and interdisciplinary instruction).

National and State Curriculum

6. The student will become familiar with the value and use of national and state curriculum

standards in developing curriculum.

Evaluating Resources

7. The student will evaluate teaching resources and curriculum materials for usefulness, relevance and appropriateness in teaching ideas and concepts to young children and develop integrated learning activities (e.g., activity enhancers, learning centers, thematic activities, literature extensions, etc.).

Human and Technological Resources

8. The student will know how to enhance learning through the use of a wide variety of materials as well as human and technological resources (e.g., computers, audiovisual technologies, videotapes and discs,local experts, primary documents and artifacts, texts, reference books, literature and other printresources).

Creating Learning Experiences

9. The student will create developmentally appropriate learning experiences using integrated curriculum strategies (e.g., project work, curriculum mapping) that encourage and allow children tointegrate knowledge, skills and methods of inquiry from several subject areas and thatmaximize student progress.

Culturally Appropriate Learning Experiences

10. The student will create culturally appropriate learning experiences for children utilizing integrated curriculum strategies. Understand the importance of a multicultural and anti-bias curriculum.

Planning and Management

Learning principles, lesson planning, classroom atmosphere, classroom management, professional attitudes and practices.

ECE 324

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Admittance to ECE program.
Taught	Fall, Winter

Course Outcomes

Assessment Goals, Benefits, and Uses

Understand the unique goals, benefits, and uses of assessment in early childhood.

Lessson Planning

Use knowledge of child development and appropriate practice to create learning activities.

Appropriate Assessment Tools and Approaches

Know about and use appropriate assessment tools and approaches to inform teaching.

Designing Curricula

Use their own knowledge, appropriate early learning standards, and other resources to design, implement, and evaluate meaningful, challenging curricula for each child.

Top

Assessment and Action Research in Early Childhood Programs

Formal and informal assessment strategies and data collection procedures for evaluating children's progress; programs to enhance learning, individualize instruction, and communicate with others.

ECE 327

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Admittance to ECE program.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Understanding Parts of an Assessment

1. The student will understand major concepts, conditions, and assumptions central to assessment.

Understanding Different Assessments

2. The student will understand the characteristics, uses, advantages, and limitations of different types of assessments.

Using Assessments and Learning Outcomes

3. The student will select, construct, and use assessment strategies and instruments appropriate to learning outcomes being evaluated and to other diagnostic purposes.

Measurement Theory

4. The student will understand measurement theory and assessment-related issues, such as validity, reliability, bias and scoring concerns.

Culturally and Developmentally Relevant Assessment

5. The student will recognize the importance of culturally and developmentally relevant assessment

Formal and Informal Assessments

5. The student will appropriately use a variety of formal and informal assessment techniques to enhance his or her knowledge of learners, evaluate students' progress and performances and modify teaching and learning strategies.

Self Assessment

6. The student will use assessment strategies to involve learners in self assessment activities and, when appropriate, to help them become aware of their strengths and needs and to encourage them to set personal goals.

Evaluating Class Activities

7. The student will evaluate the effect of class activities on both individuals and the class as a whole, collecting information through observation of classroom interactions, questioning and analysis of student work.

Maintaining Records

8. The student will know how to maintain useful records of student work and performance and will communicate student progress knowledgeably and responsibly.

Partnership with Families and Professionals

Students will know about communicating regarding assessments with parents and professionals in a manner that develops partnerships and demonstrates professionalism.

Top

Early Childhood Education Developmentally Appropriate Practices Seminar

Designing an Early Childhood curriculum based on child development as hands-on experiences are created to meet children's individual learning needs and address contextual factors in the child's life experiences.

ECE 331

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	ECE 202; ECE 332 concurrently.
Note	Due to enrollment constraints, ECE 331 may not be retaken to improve a grade unless approved by the Child and Family Studies Laboratory Steering Committee.
Taught	Fall, Winter

Course Outcomes

Developmentally Appropriate Practices Seminar

- Become conversant with developmentally appropriate practice standards published by NAEYC (National Association for the Education of Young Children).
- Understand how developmentally appropriate practice applies to making effective educational decisions that benefit children and enhance their growth and development.
- Gain a functional understanding of how teachers within a developmental model implement appropriate guidance and classroom management stragegies, create and modify effective learning environments, facilitate and scaffold learning and, develop strategies to meet the diversity of needs in the children and families they serve.

Early Childhood Education Developmentally Appropriate Practices Practicum

Intitial practicum with young children in designing an Early Childhood curriculum based on a knowledge of child development that meets children's individual learning needs and address contextual factors in the child's life experience.

ECE 332

Hours	3.0 Credit, 0.0 Lecture, 8.0 Lab
Prerequisites	ECE 202; ECE 331 concurrently.
Note	Due to enrollment constraints, ECE 332 may not be retaken to improve a grade unless approved by the Child and Family Studies Laboratory Steering Committee.
Taught	Fall, Winter

Course Outcomes

PreK/K Practicum in Early Childhood

The practicum student will:

- observe and reflect with the intent to improve practice.
- use child guidance strategies to effectively support children's learning.
- design lessons, provide instruction, and implement appropriate assessments.
- apply knowledge of developmentally appropriate practices to support children's development and learning.
- demonstrate appropriate professional behaviors and dispositions (e.g., dress and grooming, attendance and punctuality, positive interactions with mentors, peers, parents, and children, and commitment to the profession).

Top

Early Childhood Education Integration Methods

Methods in designing an early childhood curriculum with attention to hands-on experiences meeting children's individual learning needs and addressing contextual factors in the child's life experiences.

ECE 335

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EL ED 213; Concurrent enrollment in El Ed 332 or ECE 332.
Taught	Fall, Winter

Course Outcomes

ECE Integration Methods

- Understand and apply the framework of developmentally appropriate practices.
- Understand effective and appropriate methods for supporting young children's growth and development in a classroom setting.

Top

Planning and Assessment in Early Childhood Education (Pre K-3)

Learn key instructional principles, instructional strategies, lesson planning procedures that are appropriate and effective when working with young children. Understand formal and informal assessment strategies and data collection procedures for evaluating children's progress, informing instruction, communicating results with key stakeholders.

ECE 336

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECE 331 and 332 concurrently.
Taught	Fall, Winter

Course Outcomes

Assessment Goals, Benefits, and Uses

Understand the unique goals, benefits, and uses of assessment in early childhood.

Lessson Planning

Use knowledge of child development and appropriate practice to create learning activities.

Appropriate Assessment Tools and Approaches

Know about and use appropriate assessment tools and approaches to inform teaching.

Designing Curricula

Use their own knowledge, appropriate early learning standards, and other resources to design, implement, and evaluate meaningful, challenging curricula for each child.

Family, School, and Community Partnerships in ECE

Understand policies and processes for partnering with families, schools, and communities of young children in early childhood settings.

ECE 337

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECE 331 and ECE 332.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Partnerships in ECE

ECE 337 is currently an inactive course. Learning outcomes will be created when this course is offered.

Emergent Literacy

Issues, themes, and practices of literacy instruction for young children (P-3).

ECE 353

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	SFL 355 or equivalent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Theories and processes of literacy

Explain, compare, and critique theories of reading and writing processes and development with supporting research evidence. (IRA Standard 1.1.1)

Language processes

Explain and apply first language acquisition processes that support literacy development across elementary years, e.g., cueing systems, vocabulary, teacher talk. (IRA Standard 1.1.2)

Literacy Processes

Explain and apply reading and writing development across elementary years, e.g., word recognition, language comprehension, strategic knowledge, spelling, qualities of good writing, and reading/writing connections. (IRA Standard 1.1.2)

Second Language and Literacy Acquisition

Identify and synthesize major milestones in literacy instruction.(IRA Standard 1.2.1)

Historical Foundations

Identify and synthesize major milestones in literacy instruction.(IRA Standard 1.2.1)

Preschool or Kindergarten Student Teaching

Student teaching experience in preschool or kindergarten.

ECE 422

Hours	6.0 Credit, 0.0 Lecture, 6.0 Lab
Prerequisites	All ECE core and professional sequence courses; concurrent enrollment in ECE 426; prior application; requires a major GPA of 2.85; at least a C- grade in methods courses (ECE 324, 327, 356, 361, 363, 365); FBI fingerprint background clearance.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Planning and Instruction

1. The students will observe, plan, teach, assess, and reflect throughout this course as they participate in a PK or K classroom.

Reflecting and Evaluating Choices

2. The student will demonstrate ability to be a reflective practitioner who continually evaluates the effects of his or her choices, and who actively seeks out opportunities to grow professionally.

Top

Grades 1-3 Student Teaching

Student teaching experience in the primary grades.

ECE 425

Hours	6.0 - 12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Prior application; requires a total GPA of 3.00, at least a C grade in all major and minor courses; FBI fingerprint background clearance.
Taught	Fall, Winter, Spring

Course Outcomes

Student Teaching in Early Childhood Classrooms

The student teacher will:

- observe and reflect with the intent to improve practice.
- use child guidance strategies to effectively support children's learning.
- assume the role of lead teacher for a portion of the student teaching expereince as they design lessons, provide instruction, and implement appropriate assessments.
- apply knowledge from various content courses as they relate to teaching in an early childhood classroom.
- apply knowledge of developmentally appropriate practices to support children's development and learning.
- provide learning experiences that meet students' diverse cogntive styles, cultural backgrounds, and linguistic diveristy.
- demonstrate appropriate professional behaviors and dispositions (e.g., dress and grooming, attendance and punctuality, positive interactions with mentors, peers, parents, and children, and commitment to the profession).
- create a Teacher Work Sample that measures their skills in using contextual factors, planning, assessment, lesson design, interpretation of student performance, and reflection.

El Ed/ECE Emphasis Capstone Seminar

Gaining insight into significant issues in early childhood education, developing a sense of professional ethics, and becoming personally committed to ongoing professional development.

ECE 427

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	El Ed majors with an ECE emphasis; concurrent enrollment in ECE student teaching practicum block.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Reflective practitioner

The student will be reflective practitioner who continually evaluates the effects of his or her choices, and who actively seeks out opportunities to grow professionally.

Foster relationships

The student will foster relationships with school colleagues, parents, and agencies in the larger community to support students' learning and well-being.

Teaching Literacy in Early Childhood Classrooms (Pre K-3)

Study instructional practices for teaching children the literacy concepts, skills and strategies they need to learn in Pre K-3rd grade, and assessing, monitoring and evaluating children's literacy knowledge and learning in Pre K-3rd grade.

ECE 433

Hours	2.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	EL ED 323; Admittance to ECE program; concurrent enrollment in ECE 441 or 442.
Taught	Fall, Winter

Course Outcomes

Learner Development

Teacher candidates will plan and implement primary grade literacy instruction that is linked to student backgrounds across a variety of diverse characteristics. (See ILA Standard 4)

Literacy Instruction

Teacher candidates will be able to plan, implement, and reflect on early literacy instruction (prek-3) for whole class, small groups, and individual students (e.g., read aloud, shared reading, guided reading, independent reading, shared writing interactive writing, language experience). (See ILA Standard 2)

Professional Learning

Teacher candidates will be able to locate current research-based information in the professional literature (i.e., journal articles, state core curriculum, IRA position statements, books), and consult these professional resources as they pursue the development of their individual professional knowledge and behaviors. (See ILA Standard 6).

Early Childhood Education Primary Grade Seminar

Gaining insight into significant issues in early childhood education, developing a sense of professional ethics, and becoming personally committed to ongoing professional development.

ECE 441

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	ECE 331; Concurrent with ECE 442.
Taught	Fall, Winter

Course Outcomes

Child Guidance

Know and use approrpiate child guidance practices.

Lesson Plan Implementation and Reflection

Design, implement, and reflect on a variety of lesson plans.

Professionalism

Demonstrate professional behaviors and attitudes.

Primary Grade Practicum

Practicum experience in the primary grades. Field experience designed to give students opportunities to interact with primary children (grades 1-3) and apply skills and knowledge acquired in Pre K-3 methods courses.

ECE 442

Hours	2.0 Credit, 0.0 Lecture, 12.0 Lab
Prerequisites	ECE 332; ECE 441 concurrently.
Taught	Fall, Winter

Course Outcomes

Primary Grade Practicum in Early Childhood

The practicum student will:

- observe and reflect with the intent to improve practice.
- use child guidance strategies to effectively support children's learning.
- design lessons, provide instruction, and implement appropriate assessments.
- apply knowledge from various content courses as they relate to teaching in an early childhood classroom.
- apply knowledge of developmentally appropriate practices to support children's development and learning.
- provide learning experiences that meet students' diverse cogntive styles, cultural backgrounds, and linguistic diveristy.
- demonstrate appropriate professional behaviors and dispositions (e.g., dress and grooming, attendance and punctuality, positive interactions with mentors, peers, parents, and children, and commitment to the profession).

Teaching Social Studies in Early Childhood Classrooms (Pre K-3)

This course will prepare teaching candidates (1) with methods, skills and strategies for teaching social studies to children in grades Pre K-3, (2) to model democratic teaching practices, and (3) to establish democratic classrooms as they prepare children to assume roles as participatory citizens in a democracy.

ECE 445

Hours	2.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Concurrent enrollment in ECE 441 and 442.
Taught	Fall, Winter

Course Outcomes

ECE 445 Course Outcomes

- Students will demonstrate their understanding of the history, purpose, and current status of social studies in the classroom.
- Students will identify and recognize democratic principles and practices in the social studies curriculum, in K-3 classrooms, and in society.
- Students will demonstrate the ability to appropriately plan for teaching social studies.
- Students will experience and participate in various strategies appropriate for teaching K-3 social studies.

Top

Teaching Science in Early Childhood Classrooms (Pre K-3)

Develop the pedagogical knowledge, skills, and dispositions necessary to teach science to young children of various ages, abilities, backgrounds, and exceptionalities.

ECE 446

Hours	2.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Concurrent enrollment in ECE 441 and 442.
Taught	Fall, Winter

Course Outcomes

ECE 446 Course Outcomes

Teacher candidates will:

- evaluate their personal dispositions, development, and growth toward becoming a teacher of science.
- identify and describe purposes for teaching science in K-3 classrooms.
- explain what science is and how young children learn science, including the knowledge and reasoning skills students must acquire to become proficient in science.
- recognize the practices, crosscutting concepts, and core ideas of science and engineering and how they influence science instruction in K-3 classrooms.
- plan for science instruction for children of various ages, abilities, backgrounds, and exceptionalities, including how to (a) identify appropriate science content from national standards and state core curricula; (b) apply a variety of appropriate teaching methods and strategies to support science learning; (c) integrate science with other disciplines across the early childhood curriculum; and (d) employ appropriate assessment methods and strategies.

Top

Teaching Mathematics in Early Childhood Classrooms (Pre K-3)

Study the teaching and learning of early childhood mathematics guided by current principles relating to mathematics content, social interaction, student thinking, and child development.

ECE 447

Hours	2.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	MTHED 305; ECE 441 and 442 concurrent.
Taught	Fall, Winter

Course Outcomes

ECE 447 Course Outcomes

- Establish mathematics goals that accommodate students' varied mathematical trajectories and align appropriately with state content and practice standards as well as informal and formal assessments of student thinking.
- Select and/or design worthwhile mathematical tasks that include varying levels of cognitive demand, thus increasing access to learning.
- Design, implement, and evaluate inquiry-based lessons as structured by the Launch-Explore-Summarize (Discuss/Debrief) teaching and learning cycles or sequences.
- Anticipate student mathematical thinking (for planning lessons and/or units, orchestrating discourse, questioning, etc.)
- Create high levels of mathematical interaction by planning for discussion, questioning, and establishing a supportive classroom environment.
- Adapt instruction to address the diverse learning strengths and needs of both groups and individuals.
- Assess student learning, both formatively and summatively, using a range of appropriate strategies, and employ the results of assessment in guiding instruction.
- Practice professionalism: In commitment to learning to teach, in appearance and demeanor, and in the quality of work submitted.

Independent Readings or Project

ECE 493R

Hours	0.5 - 4.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Departmental approval.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content knowledge

Students will demonstrate an advanced level of knowledge in a chosen specialty area.

Breadth of knowledge

Students will explain relationships between key concepts in a specialty area.

Academic Internship

A full-year classroom teaching internship in the public schools.

ECE 496R

Hours	12.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Prior application; requires a total GPA of 3.00, at least a C grade in all major and minor courses; FBI fingerprint background clearance.
Note	See Education Student Services for application dates.
Taught	Fall

Course Outcomes

Planning and Instruction

1. The students will observe, plan, teach, assess, and reflect throughout this course as they participate in an early childhood classroom.

Reflecting and Evaluating Choices

2. The student will demonstrate ability to be a reflective practitioner who continually evaluates the effects of his or her choices, and who actively seeks out opportunities to grow professionally.

Top

Economic Principles and Problems

Strengths and weaknesses of markets and governments for solving problems of social organization or conflict, including policy response to inflation, unemployment, pollution, poverty, growth, etc.

ECON 110

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer
Offered	Honors also.

Course Outcomes

Econ 110 students will be able to

1. Understand why there are gains from being able to trade and to specialize and, with regard to the latter, be able to explain the difference between comparative advantage and absolute advantage and the importance of comparative advantage in determining what individuals and economies choose to do.
2. Understand the basic principles of optimization and, in particular, the importance of thinking about "marginal" effects.
3. Identify and analyze "incentives" and evaluate whether and under what conditions "incentives matter."
4. Understand the economic model of the behavior of "individuals or entities who have money who want goods or services" (i.e., demand).
5. Understand the economic model of the behavior of "individuals or entities who have or produce goods or services who want money" (i.e., supply).
6. Analyze how markets work with regard to 4 and 5 above: prices as incentives; how prices adjust and how demanders and suppliers respond to price changes.
7. Understand and be able to use the concept of "market equilibrium."
8. Understand the difference between short run and long run behavior for 4 and 5 above.
9. Distinguish between and analyze short run and long run market adjustments.
10. Analyze market adjustments using a basic graphical analytical economic model and incorporating 4 through 9 above.
11. Analyze normative claims for perfectly competitive markets (i.e., "efficiency").
12. Understand and be able to analyze "market distortions" including: taxes, subsidies, price ceilings, price floors, barriers to entry and prohibited activities using a simple analytical model of supply and demand.

13. Understand and be able to analyze "market failures" including: market power (monopoly), negative externalities, positive externalities and public goods using a simple analytical model of a supply and demand.
14. Understand the nature and construction of key macroeconomic data: GDP, real GDP, per capita GDP, per capita real GDP, price indexes (e.g., CPI), money (e.g. M1, M2 etc), labor force and unemployment, Federal deficit, National debt.
15. Understand the definitions and effects of: inflation/deflation, economic growth/stagnation, business cycles.
16. Understand the determinants of potential GDP and the growth in potential GDP.
17. Understand the key elements of, and problems created by, macroeconomic shocks.
18. Develop a basic understanding of the institutions associated with fiscal policy and monetary policy.
19. Understand and evaluate fiscal and monetary policy responses to macroeconomic shocks.
20. Use economics to evaluate the current debates about counter cyclical policies; economic growth policies; and government funding policies (i.e., deficits and debt).

Top

Honors Economic Principles and Problems

Strengths and weaknesses of markets and governments for solving problems of social organization or conflict, including policy response to inflation, unemployment, pollution, poverty, growth, etc.

ECON 110

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Econ 110 students will be able to

1. Understand why there are gains from being able to trade and to specialize and, with regard to the latter, be able to explain the difference between comparative advantage and absolute advantage and the importance of comparative advantage in determining what individuals and economies choose to do.
2. Understand the basic principles of optimization and, in particular, the importance of thinking about "marginal" effects.
3. Identify and analyze "incentives" and evaluate whether and under what conditions "incentives matter."
4. Understand the economic model of the behavior of "individuals or entities who have money who want goods or services" (i.e., demand).
5. Understand the economic model of the behavior of "individuals or entities who have or produce goods or services who want money" (i.e., supply).
6. Analyze how markets work with regard to 4 and 5 above: prices as incentives; how prices adjust and how demanders and suppliers respond to price changes.
7. Understand and be able to use the concept of "market equilibrium."
8. Understand the difference between short run and long run behavior for 4 and 5 above.
9. Distinguish between and analyze short run and long run market adjustments.
10. Analyze market adjustments using a basic graphical analytical economic model and incorporating 4 through 9 above.

Academic Internship

ECON 199R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Faculty advisor's and department chair's prior written consent
Note	Not counted toward required major or minor hours.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Students in an academic internship will

Apply economic analysis to real-world problems while working for an employer in the private, public, or non-profit sectors.

Top

Topics in Economic Analysis

ECON 213R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	ECON 110
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

Economic Development and Growth

Problems and processes of economic growth and development, emphasizing less-developed nations.

ECON 230

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 110
Taught	Spring

Course Outcomes

Econ 230 students will be able to

1. Be familiar with the labor and consumption patterns among the world's poor.
2. Demonstrate an understanding of how modifying the neoclassical assumptions learned in Econ 110 can affect the welfare implications of markets. In particular, how the welfare implications are affected by
    1. Externalities and Public Goods
    2. Fixed Costs or Increasing Returns
    3. Poorly Enforced Property Rights

1. Analyze the Solow Growth model and its implications for economic growth.
2. Explain the functioning of the credit and capital market: Gain a basic understanding of econometric methods used in testing economic theories in growth and development.
    1. How it relates to alleviating poverty and stimulating economic growth.
    2. Why it may be prone to information problems and the implications of those problems.

1. Discuss the potential role of government in economic development. Especially as it relates to:
    1. Public Goods and Externalities
    2. Enforcing Contracts
    3. Corruption

1. Explain the importance of labor, health, and education to the lives of those in developing countries and how these fields relate to improving outcomes among the poor.

Top

Money and Banking

Economic principles applied to monetary analysis and policy and the banking structure.

ECON 253

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 110
Taught	

Course Outcomes

Course To Be Deleted

This course is currently not being taught and will be deleted in an upcoming curriculum year.

International Trade and Finance

Economic analysis of the mechanisms, problems, institutions, and policies of trade among countries. Financial and monetary arrangements that facilitate trade.

ECON 257

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 110
Taught	Fall

Course Outcomes

Econ 257 students will be able to:

1. Explain the key developments (models) in the intellectual history of the study of the patterns of trade in goods and services from Adam Smith through the present.
2. Broadly discuss the evidence which supports or is contrary to the application of these developments to particular countries and goods and services.
3. Analyze policy within the context of these models in order to gain insights about the patterns of trade.
4. Analyze the gains from international trade with these key models and understand the political economy of trade (who gains and who loses from trade).
5. Analyze the patterns, gains, and losses from international trade (migration) in financial and direct foreign investment and labor migration in the short and long runs.
6. Analyze the reasons for international outsourcing portions of production and the gains and losses from doing so.
7. Identify how trade in goods, services, and capital enter the international income accounts and the balance of payments.
8. Discuss how exchange rates affect trade and how trade, fiscal, and monetary policy affects exchange rates.
9. Explain the essential differences in fiscal and monetary effects for floating and fixed exchange rates.
10. Broadly discuss the development of U.S. trade policy and the world institutions that support international trade and finance.

Top

Introduction to Health Economics

Applying economic principles to markets for health and health care.

ECON 265

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 110
Taught	

Course Outcomes

Course to Be Deleted

This course is currently not being taught and will be deleted in an upcoming curriculum yearThis course is currently not being taught and will be deleted in an upcoming curriculum year.

Top

American Economic History

Impact on households, firms, and government of America's transformation from a rural, agricultural colony to a major industrial nation.

ECON 274

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 110
Taught	

Course Outcomes

Course to Be Deleted

This course is currently not being taught and will be deleted in an upcoming curriculum year.

Public Finance

Economics of decision making in the public sector; cost-benefit analysis and efficiency-equity issues of taxation and expenditure policies.

ECON 275

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 110
Taught	

Course Outcomes

Students in ECON 275 will be able to

1. Discuss the revenue, expenditure, and debt patterns of the U.S. Federal Government.
2. Analyze how welfare impolications are affected by

- Externalities and Public Goods
- Fixed Costs or Increasing Returns
- Poorly Enforced Property Rights
- Information Problems

1. Demonstart an understanding of the function and incentive effects of the major redistribution programs in the United States.
2. Demonstrate an understanding of the function and incentive effects of the major redistribution programs in the United States.
3. Discuss the efficiency and distributional effects of taxation.

Top

Introduction to Economic Analysis and Reasoning

Maximizing self-interest model of behavior and the environment, and constraints within which business and household decisions are made.

ECON 280

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 110 & MATH 112
Note	Not for majors or major credit.
Taught	

Course Outcomes

Course To Be Deleted

This course is currently not being taught and will be deleted in an upcoming curriculum year.

Statistics for Economists

Introduction to matrix algebra and statistics in preparation for regression analysis. Other topics include: probability, random variables, density and distribution functions, estimation, hypothesis testing.

ECON 378

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 110 & MATH 112
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Econ 378 students will be able to:

1. Demonstrate an understanding of the basic principles and terminology of probability, simple distribution theory, statistics, and matrix algebra in preparation for a successful introduction to econometric methods in Economics 388. These principles and concepts include:

The language, intuition, and notation necessary to understand basic approaches to probability, including basic combinatoric counting techniques, the additive and multiplicative laws of probability, conditional probability and independence, the law of total probability, and Bayes' rule, and to solve basic probability problems using these techniques.
Random variables, both univariate and bivariate, including: distribution functions, density functions, conditional density, expected values, variance, covariance, and correlation coefficients. Specific examples of useful random variables.
Statistics and sampling distributions.
Law of Large Numbers and Central Limit Theorem.
Parameter estimators and their derivation using the Method of Moments and Method of Maximum Likelihood.
Statistical inference, including the idea of sampling error, sampling distributions, the construction of confidence intervals, and formal hypothesis tests.
Basic matrix theory and the properties of matrix operations, including addition, subtraction, matrix products, matrix determinants, and matrix inversion.

1. Use these statistical techniques to analyze data in diverse applications.
2. Recognize the usefulness of statistics in a variety of career fields.

Top

Intermediate Price Theory 1

Producer, consumer, and equilibrium theories; mathematical techniques of unconstrained and constrained optimization introduced and applied extensively.

ECON 380

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 110 & MATH 112
Taught	Fall, Winter, Spring

Course Outcomes

Formally express and analyze economic models

- Recognize the common building blocks of economic models (actors, choices, objectives, constraints)
- Solve economic models (constrained optimization, equilibrium conditions)
- Interpret the results (comparative statics)
- Explain concepts using graphs, prose, and mathematical analysis

Demonstrate an understanding of core microeconomic theories

Consumer

- The axioms upon which standard microeconomic consumer theory is based.
- The implications of consumer demand including price and income responses in absolute and elasticity forms in both utility maximization and expenditure minimization problems.

Firms

- The meaning and representation of technology.
- The implications of cost and profit maximization for firms.

Markets

- Integrate consumers and producers into a market in order to perform market analysis on equilibrium traded quantities and prices.
- Use market analysis to understand the effects of public policy.

Adapt models to new scenarios

- Compare the impact on equilibrium behavior of altering the assumptions of canonical models
- Contrast the results of different market imperfections

Intermediate Macroeconomics

Intermediate macroeconomic theory, emphasizing income, unemployment, and price-level analysis.

ECON 381

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 110 & MATH 112
Recommended	Econ 380 or concurrent enrollment.
Taught	Fall, Winter, Summer

Course Outcomes

Econ 381 students will be able to

1. Demonstrate an understanding of the nature and construction of key macroeconomic data;
2. Demonstrate an understanding of the connection between microeconomics and macroeconomics;
3. Demonstrate an understanding of standard models of
    1. economic growth
    2. long-run macroeconomic behavior
    3. short-run macroeconomic behavior
4. Use these models to analyze the macroeconomic effects of monetary and fiscal policy changes as well as other economic shocks;
5. Use these models to interpret historical and current events; and
6. Demonstrate an understanding of issues regarding the value and limitations of monetary and fiscal policy.

Top

Intermediate Price Theory 2

Welfare theory, imperfect information, imperfect competition, uncertainty, externalities, and public goods.

ECON 382

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 378 & ECON 380
Taught	Fall, Winter, Spring

Course Outcomes

Econ 382 students will be able to

1. Formally express and analyze economic models

Recognize the common building blocks of economic models (actors, choices, objectives, constraints)
Solve economic models (constrained optimization, equilibrium conditions)
Interpret the results (comparative statics)

1. Demonstrate an understanding of the core microeconomic models of

Perfect competition in general equilibrium (exchange and production)
Monopoly and oligopoly
Externalities and public goods
Decision-making under uncertainty (expected utility)
Information problems (moral hazard, adverse selection)

1. Adapt models to new scenarios

Compare the impact on equilibrium behavior of altering the assumptions of canonical models
Contrast the results of different market imperfections

1. Establish a knowledge base that will be useful in economic field classes

Apply models in various real-world examples and identify the positive and normative conclusions in that environment

Introduction to Econometrics

Mathematical and statistical techniques used in estimating, predicting, and testing hypotheses associated with quantifiable economic relationships.

ECON 388

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 378 & ECON 380
Taught	Fall, Winter, Spring

Course Outcomes

Econ 388 students will be able to

1. Demonstrate an understanding of the theoretical foundations of estimating and testing the basic regression model, employing tools from matrix algebra, calculus, and statistics.
2. Perform basic regression and testing procedures using Stata.
3. Complete an empirical research project that includes the following elements:.

- Formulate an econometric model.
- Collect and prepare relevant data for use in estimating the model.
- Use appropriate methods of estimation.
- Test relevant behavioral hypotheses.
- Understand and test the Gauss-Markov assumptions.
- Analyze and interpret the estimated model.
- Prepare a written report summarizing the research results.

Top

Topics in Economic Theory

ECON 413R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	ECON 378 & ECON 380
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Students in ECON 413R will

1. Learn in depth about an area of research in economics;
2. Understand the research literature and in particular the contributions of the seminal articles;
3. Analyze current journal articles and assess their contribution to the literature.

Economics of Antitrust Law and Regulation

Economic analysis of reasons for - and effects of - antitrust laws and regulation in selected areas, including utilities, telecommunications, transportation, energy, health, safety, and the environment.

ECON 420

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 378 & ECON 380
Recommended	Econ 382.
Taught	Fall

Course Outcomes

Econ 420 students will be able to

1. Demonstrate basic familiarity with the provisions of the principal Federal antitrust statutes, including the Sherman Act, the Clayton Act, the FTC Act, the Robinson-Patman Act, and the Hart-Scott-Rodino Act.
2. Evaluate the likely effects of Section 1 of the Sherman Antitrust Act using monopoly, Cournot, Stackelberg, and Bertrand models of non-cooperative behavior among a small number of rival firms.
3. Evaluate the likely effects of Section 2 of the Sherman Antitrust Act using simple analytical models of predation, exclusion, tying, bundling.
4. Evaluate the likely effects of laws limiting price discrimination, including the Robinson-Patman Act, using simple analytical models of price discrimination.
5. Evaluate the likely effects of Section 7 of the Clayton Act and the HRS Act using simple analytical models of mergers.
6. Evaluate public regulation of monopolies as an alternative to relying on antitrust law using simple analytical models of rate-of-return regulation, nonlinear pricing and peak load pricing.
7. Synthesize the relevant economics and legal literature, including Federal and Supreme Court rulings, via a substantial survey paper on a specific antitrust issue.

Law and Economics

Common law allocative mechanisms (contract, tort, and property law) as alternatives to collective intervention when markets fail; consideration of economic logic of law.

ECON 421

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 378 & ECON 380
Taught	Winter

Course Outcomes

Econ 421 students will be able to

1. Demonstrate a basic familiarity with the Common Law.
2. Analyze the incentives created by Common Law tort rules.
3. Analyze the incentives created by Common Law contract rules.
4. Distinguish between "property rules" and "liability rules" with regard to property rights.
5. Evaluate the relative efficiency of specific tort rules.
6. Evaluate the relative efficiency of specific contract rules.
7. Analyze the incentives to litigate or settle under different rules about which party pays the costs of the litigation.
8. Analyze the incentives created by criminal sanctions.
9. Synthesize the relevant economics and legal literature, including Federal and Supreme Court rulings, via a substantial survey paper on a specific tort, contract or property issue.

Economic Development

Microeconomic analysis of the causes of income differences across countries.

ECON 431

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 380; Econ 388 (or concurrent enrollment) or Pl Sc 328.
Taught	Winter, Spring

Course Outcomes

Econ 431 students will be able to

1. Discuss the labor and consumption patterns among the world's poor.
2. Demonstrate an understanding of how modifying the neoclassical assumptions learned in Econ 380 can affect the welfare implications of markets. In particular, how the welfare implications are affected by

- Externalities and Public Goods
- Fixed Costs or Increasing Returns
- Poorly Enforced Property Rights.

1. Discuss the functioning of the credit and capital market:

- How it relates to alleviating poverty and stimulating economic growth.
- Why it may be prone to information problems and the implications of those problems.

1. Explain the potential role of government in economic development, especially as it relates to:

- Public Goods and Externalities
- Enforcing Contracts
- Corruption

1. Explain the importance of labor, health, and education to the lives of those in developing countries and how these fields relate to improving outcomes among the poor.

Economic Growth

Theory and evidence relating to economic growth, including physical and human capital accumulation, population, technological change, institutions, and government.

ECON 432

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 381 & ECON 388; or ECON 380 & ECON 381 & POLI 328
Taught	Fall, Winter

Course Outcomes

Econ 432 students will be able to

1. Adjust values in one currency to values in another currency controlling for purchasing power parity (PPP) deviations.
2. Demonstrate an understanding of basic dynamic models of economic growth, including:

- The Solow model
- The Solow model with population growth
- The Harrod-Domar model
- AK models
- Models of product variety
- Schumpeterian models.

1. Discuss growth and development accounting, and decompose observed differences across countries into efficiency and technology components.
2. Discuss Lorenz curves and Gini coefficients.
3. Discuss how growth interacts with:

- Population & demography
- Human capital
- Technical progress
- Openness
- Government
- Inequality
- Culture
- Geography, Climate & Resources.

Top

Natural Resources and Environmental Economics

Economic theory applied to allocation of natural resources and environmental amenities. Issues relating to externalities, common property resources, public goods, allocation of depletable natural resources over time, economic factors of environmental polarization, and others.

ECON 440

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 380 & ECON 388
Recommended	Econ 382.
Taught	Fall, Winter

Course Outcomes

Econ 440 students will be able to

1. Utilize economic principles and models to address private and public policy issues related to allocating natural resources and environmental amenities.
2. Demonstrate an active understanding of the following elements of economic theory as it relates to natural resource and environmental economics:

Welfare economics and concepts of Pareto optimality, efficiency, and equity
The role of property, property rights, and the bundle of rights concept
The role of externalities, common property resources, and public goods
Concepts and measures of economic value including non-market valuation.

1. Demonstrate a basic knowledge of the role of markets and market failure with regards to the allocation of natural resources and environmental amenities.
2. Gain a basic understanding of the effects and relative merits of public environmental policy efforts, including cap-and-trade schemes, Pigovian taxes, regulation, and public ownership and/or management.
3. Become knowledgeable about and be able to use economic principles and non-market valuation techniques to address a variety of continuing and contemporary natural resource and environmental issues. These issues may include, but are not exclusive to:

Population growth and the environment
Global warming
Wilderness protection and related public lands issues
Air pollution and public health
Intergenerational allocation of soil, forest, and other depleteable natural resources
Impacts of environmental features on property values.

Top

Financial Economics

Theory of financial economics, emphasizing capital markets, investment decisions, choice, capital asset pricing model, futures and options markets, efficient markets, and capital structures.

ECON 450

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 382 & ECON 388
Taught	Fall, Winter

Course Outcomes

Econ 450 students will be able to

1. Understand and derive the fundamental relationship between risk and return that is implied by the Capital Asset Pricing Model (CAPM). Students should also know the assumptions necessary for this model to hold and be capable of identifying when potential investment projects satisfy these assumptions.
2. Use linear regression to calculate an asset's historical sensitivity to broad market indices, its implied historical mispricing and an estimate of the asset's idiosyncratic risk. Students should also be capable of performing hypothesis testing on these values.
3. Replicate traditional tests of the CAPM using currently available data.
4. Be capable of collecting and analyzing asset market data to estimate the efficient frontier of risky assets using either Excel or another software package. Students should also be able to understand the efficient frontier mathematically and the reasons that it is useful.
5. Calculate the present value of a stream of payments given an appropriate discount factor. Students should know how to use the CAPM to derive potential discount factors for payment streams.
6. Calculate the yield to maturity of a stream of payments given an observed price. Students should also understand the relationship between the coupon rate of traditional bonds, their price and their yield to maturity.
7. Calculate forward rates for all future periods given the observed yield curve.
8. Understand the liquidity preference theory of bond markets as well as the expectations hypothesis. They should also be able to price complicated payment streams using observations of the yield curve and the expectations hypothesis.
9. Calculate the duration and modified duration of a stream of payments and use these to calculate optimal hedges given an arbitrary position in the fixed income market.
10. Calculate and understand bond convexity and its role (along with duration) in hedging.
11. Price forward contracts by arbitrage given a risk-free rate.
12. Price futures contracts whose payoffs are not correlated with the market reinvestment rate.

13. Understand currently used hypotheses regarding futures contract pricing.
14. Understand the structure of call and put options.
15. Price put options given a call option (and vice versa) using the put-call parity relationship.
16. Apply the Black-Scholes option pricing formula to price call and put options given beliefs about the volatility of the underlying asset.
17. Apply the Black-Scholes option pricing formula to calculate the implied volatility of an asset given its price.

Monetary Theory and Policy

Macroeconomic aspects of money demand, money supply, the monetary transmission mechanism, central bank policy, and other current issues.

ECON 453

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 380 & ECON 381
Recommended	Concurrent enrollment in Econ 388.
Taught	

Course Outcomes

Econ 453 students will be able to

1. Summarize the broad empirical evidence regarding the long-run and short-run relationships between money and inflation and money and output.
2. Demonstrate a fundamental knowledge of the institutional and regulatory structure of the U.S. financial system.
3. Explain the macroeconomic role of central banks with special emphasis on the role of the Federal Reserve System in the U.S. economy.
4. Demonstrate an active understanding of the following elements of modern monetary theory:

The role of expectations, especially rational expectations
Solve simple rational expectations models
Analyze the rudimentary new Keynesian dynamic stochastic general equilibrium models
Theories of the transmission mechanism of monetary policy

1. Identify the current issues in the conduct of monetary policy.
2. Demonstrate a general understanding of the causes and consequences of financial crises with a focus on the financial crisis of 2007-2009.
3. Identify and evaluate the principal issues regarding financial regulation.

International Trade Theory and Applications

Microeconomic analysis of why nations trade, who wins and loses from trade, and the costs and benefits of various trade policies.

ECON 458

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 388; or ECON 380 & POLI 328
Taught	

Course Outcomes

Econ 458 students will be able to

1. Discuss why all kinds of nations-rich and poor, large and small-gain from international trade.
2. Demonstrate an understanding of comparative advantage and how it creates gains from trade.
3. Analyze the Ricardian model of trade and thereby learn how different technologies in different nations create comparative advantage and gains from trade.
4. Analyze the Heckscher-Ohlin model of trade and thereby learn: 1) How different factor endowments in different nations create comparative advantage and gains from trade, and 2) Why some people lose from trade even though nations as a whole gain from trade.
5. Discuss economies of scale and how they can generate gains from trade.
6. Discuss how trade generates extra gains by reducing market power.
7. Demonstrate an understanding of the main causes and effects of direct foreign investment.
8. Demonstrate an understanding of the main causes and effects of international migration.
9. Discuss how various trade policies affect national welfare and why such policies help some while hurting others.
10. Discuss the politics of trade.

International Monetary Theory

Monetary and macroeconomic aspects of international relations dealing primarily with short-run balance-of-payments disequilibrium and adjustments.

ECON 459

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 381 & ECON 388; or ECON 380 & ECON 381 & POLI 328
Taught	Fall

Course Outcomes

Econ 459 students will be able to

1. Demonstrate a familiarity with the key issues in two broad fields:

International Finance, particularly exchange rate behavior,
Open Economy Macroeconomics.

1. Discuss the nature of the foreign exchange market, including:

It's market organization
The role of vehicle currencies
The instruments traded
The role of arbitrage.

1. Understand and use models of exchange rate behavior:

Covered and uncovered interest rate parity
Long-run monetary and equilibrium models.

1. Understand financial portfolio theory to the extent that it is useful in explaining exchange rate behavior, including:

The determination of risk premia
How it may explain the "forward bias" puzzle.

1. Discuss the history of the international financial system since the late 1700's.
2. Discuss the international aspects of the national income and product accounts, along with the balance of payments accounts.
3. Apply simple dynamic models of consumption smoothing to the current account.

Top

Economics of Education

Evaluation of education policy from an economic perspective, focusing on the benefits and costs of policy outcomes. Introduction to quantitative methods used by empirical education researchers.

ECON 461

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 388
Note	Concurrent enrollment accepted for Econ 388; see professor.
Taught	Fall, Winter

Course Outcomes

Econ 461 students will be able to

1. Evaluate education policy from an economics perspective
    - Incorporate costs and benefits in education policy analysis
    - Identify unintended consequences associated with alternative policy options
    - Base analysis on research literature findings.
1. Demonstrate an understanding of the theoretical underpinnings of the field
    - Education production
    - Human Capital formation
    - Role of incentives.
1. Speak fluently and intelligently about current issues in education policy, including
    - US and International policy
    - Teacher labor markets
    - K-12 education policy
    - Higher education.
1. Evaluate the economics of education research literature
    - Know the seminal papers in the field, and how they shaped the discipline
    - Know the current "cutting edge" papers and how they are pushing the frontiers of knowledge.
1. Demonstrate an understanding of the quantitative methods and research tools that empirical education economists use to conduct research, including
    - Cross sectional and panel data models
    - Methods to account for selection bias
    - The importance of obtaining causal effects.

Top

Economics of the Labor Market

Economic analysis and institutional background of labor markets in developed countries, particularly the United States. Typical topics include labor supply and demand analysis, determination of wages and employment, investment in education, wage differences by gender and race, immigration, and unions.

ECON 463

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 388
Taught	Winter

Course Outcomes

Econ 463 students will be able to

1. Demonstrate an understanding of standard optimization models to set up and solve the labor supply problem facing the individual and the labor demand problem facing the firm and show the important comparative statics results of both models. Students will understand how these models produce the neoclassical market framework and be able to solve problems using that framework.
2. Solve and use other microeconomic optimizing models of agent behavior, such as models of job search, human capital choices, labor supply, and demand in risky occupations, union wage setting, and behavior under alternative compensation schemes.
3. Demonstrate an understanding of the basic institutional structure of the U.S. labor market, including broad trends in labor supply behavior and wages and the institutional details and likely labor market effects of major government programs.
4. Read and discuss high quality empirical research on labor economic topics and explain how these results interrelate to the predictions of formal economic models.
5. Complete an empirical project demonstrating competence in basic econometric techniques.
6. Identify some of the ways in which government policy choices affect labor market outcomes

Health Economics

Economic models of health-care markets, including the supply and demand for health and health care, insurance, market imperfections, public-sector involvement, and regulation.

ECON 465

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 382 & ECON 388
Note	Concurrent enrollment accepted for Econ 388; see professor.
Taught	Winter odd years

Course Outcomes

Econ 465 students will be able to

1. Read, understand, and discuss the academic literature in health economics. A daily quiz will be administered to test understanding of the reading.
2. Participate in linking academic research to contemporary policy discussions through class discussion and preparation of occasional class presentations.
3. Complete a major research project in which they either 1) summarize and evaluate the available evidence on a particular policy question, or 2) conduct an original research project where they identify a question, assemble a dataset, thoughtfully apply appropriate empirical methods, and clearly describe their methodology, assumptions, and findings.

Top

Urban Economics

Economic models relating to spatial location of economic activities and development of cities. Application of economic theory to problems and policies associated with housing, urban transportation, congestion, local government finance, and other urban problems.

ECON 468

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 378 & ECON 380; Econ 388 or concurrent enrollment.
Taught	Winter, Spring

Course Outcomes

Econ 468 students will be able to

1. Demonstrate an understanding of the role of transportation costs in determining land uses and land prices.Demonstrate a familiarity with the monocentric city model of land use and its use in understanding the impact of local land use and transportation policies.
2. Apply the basic models of housing demand and the role of filtering in determining the stock of housing in a city.
3. Demonstrate an understanding of the economic concepts of external costs and how these play a role in air pollution and highway congestion. Apply the concept of Pigouvian pricing as a solution to externality problems in the case of highway congestion.
4. Discuss the role of time costs in consumers' choice of transportation mode, and why collection and distribution parts of urban trips are so important in determining the proper design of mass transit systems. Demonstrate an understanding of the role of economies of scale in efficient mass transit design.
5. Use the basic economic model of "rational" crime to predict the impact of various anti-crime policies.

Top

Topics in Economic History

ECON 474

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 380; Econ 388 or concurrent enrollment.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Course to Be Deleted

This course is currently not being taught and will be deleted in an upcoming curriculum year.

Public Economics

Evaluation of the role of government from an economic perspective. Typical topics include taxation, externalities, public goods, corruption, public choice, Social Security, Medicare and Medicaid, education, income redistribution, and crime.

ECON 475

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 378 & ECON 380
Taught	Winter

Course Outcomes

Econ 475 students will be able to

1. Discuss the revenue, expenditure, and debt patterns of the U.S federal government.
2. Analyze how modifying the neoclassical assumptions learned in 380 can affect the welfare implications of markets. In particular, how the welfare implications are affected by

Externalities and Public Goods
Fixed Costs or Increasing Returns
Poorly Enforced Property Rights
Information Problems
Hyperbolic Discounting or Loss Aversion

1. Demonstrate an understanding of the function and incentive effects of the major redistribution programs in the United States.
2. Discuss the efficiency and distributional effects of taxation and the theory of optimal taxation for both income and commodity taxes.
3. Read papers in the public economics literature and

Provide written and oral critiques of the papers
Apply modern tools of econometric analysis in discussing the papers

Industrial Organization

Industrial organization focuses on firm behavior in imperfectly competitive markets. Typical topics include the acquisition and use of market power by firms, strategic interactions among firms, and an introduction to noncooperative game theory.

ECON 476

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 378
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Econ 476 students will be able to

1. Analyze basic models of competition among firms producing homogeneous goods: competition, monopoly, Cournot oligopoly, Bertrand oligopoly, Stackelberg oligopoly.
2. Apply basic game theory including solution concepts for normal and extensive form games.
3. Demonstrate an understanding of extensions to these basic model, including supergames, models of product differentiation, and games of incomplete information.
4. Apply these models to key issues in theoretical and applied industrial organization: mergers, collusion, advertising, R&D competition, antitrust policy, entry accommodation and entry deterrence, and business strategy.
5. Discuss the role of government in the market in determining antitrust policy, patent policy, and regulation.
6. Read, synthesize, and write short review papers on applied or empirical papers from the industrial organization literature.

Political Economics

Economic models of government structure and function: electoral competition, voter participation and cycles, preference aggregation, information aggregation, externalities and public goods, electoral structure, political agency, influence, and bargaining.

ECON 477

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 378 & ECON 382
Taught	Fall

Course Outcomes

Econ 477 students will be able to

- Understand fundamental collective action problems and solutions.
- Identify benefits and limitations of democratic processes.
- Identify parallels between political competition adn market competition.
- Compare the strategic incentives created by alternative votiing rules and other political institutions.
- Identify puzzles that remain unexplained by modern political economic analysis.
- Recognize key assumptions implicit in political debate.

Top

Game Theory and Economics

Application of game theory to study strategic interaction between individuals and organizations. Applications include imperfect competition, insurance markets, and bargaining.

ECON 478

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 378 & ECON 380
Taught	Fall, Winter

Course Outcomes

Econ 478 students will be able to

1. Demonstrate an understanding of the game theoretic method of analysis.
2. Define a Nash Equilibrium and discuss refinements of the Nash Equilibrium Concept.
3. Think abstractly and rigorously about strategic interaction.

Top

Welfare Economics

General equilibrium theorems and considerations that must guide applied economic work and provide quantitative information on the effects of alternative policy measures.

ECON 482

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 378 & ECON 382; or STAT 201 & MATH 313 & ECON 382
Taught	

Course Outcomes

Course To Be Deleted

This course is currently not being taught and will be deleted in an upcoming curriculum year.

Top

Mathematical Economics

Further development of optimization and comparative statics. Differential equations and dynamic analysis.

ECON 486

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 378 & ECON 380; or STAT 201 & MATH 313 & ECON 380
Taught	

Course Outcomes

Course to Be Deleted

This course is currently not being taught and will be deleted in an upcoming curriculum year.

Applied Econometrics

Application of econometric methods, introduction to research design, and evaluation of empirical research. Special attention given to linking economic theory and econometrics, and causal inference.

ECON 488

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 388
Taught	Fall, Winter

Course Outcomes

Econ 488 students will be able to

1. Demonstrate an understanding of the assumptions underlying commonly used empirical approaches for the identification of causal effects, including:

Ordinary least squares
Matching
Interrupted time series
Difference in differences
Fixed effects
Instrumental variables

1. Demonstrate an understanding of the interplay between economic theory and empirical work.
2. Read and understand contemporary academic literature in economics. Students will provide written evaluations of selected academic papers, including a clear description and critique of the empirical methods used.
3. Apply modern empirical methods using data analysis exercises.
4. Complete a research project in which they identify a question, assemble a dataset, thoughtfully apply appropriate empirical methods, and clearly describe their methodology, assumptions, and findings.

Top

Senior Paper

ECON 490

Hours	1.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Students in ECON 490R will

Demonstrate competency of research skills by writing an original, independent research paper that makes a contribution to the literature in an area of economics.

Top

Readings in Economics

ECON 498R

Hours	0.5 - 2.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Instructor's consent.
Note	P/F grade only; maximum of 2 credit hours; 3 hours of reading per week required for each credit hour taken. Not counted toward required major hours.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Students in ECON 498R will

Develop a rigorous understanding of a specific area of economics through intensive study of the research literature.

Top

Advanced Price Theory

Modern theories of consumers, producers, and competitive equilibria.

ECON 580

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 378 & ECON 382
Taught	Fall

Course Outcomes

Econ 580 students will be able to

Use the tools of constrained optimization in analyzing comparative statics results arising in the study of economic phenomena.

Advanced Macroeconomics

Theory of determining national income, employment, inflation, and interest rates. Issues of economic fluctuations, economic growth, and monetary and fiscal policy.

ECON 581

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 381 & ECON 382 & ECON 388
Taught	Fall

Course Outcomes

Econ 581 students will be able to

1. Acquire a toolset for analyzing modern macroeconomic models.
2. Demonstrate an understanding of basic dynamic stochastic general equilibrium (DSGE) macroeconomic modeling, including:

- How to set up a model.
- How to render it stationary, if necessary.
- How to solve for the model's steady state both analytically and numerically.
- How to solve for the model's dynamics using various numerical techniques.
- How to calibrate the model.
- How to simulate the model economy.
- How to generate impulse response functions.
- How to generate data moments.
- How to estimate model parameters using simulated method of moments

1. Use MATLAB and Dynare, software packages widely used in macroeconomic model simulation.
2. Demonstrate an understanding of other macroeconomic models, such as:

- Overlapping generations (OLG) models.
- Continuous-time Ramsey-style models.

1. Estimate and interpret structural vector autoregression (SVAR) empirical models.
2. Demonstrate an understanding of current issues being addressed in macroeconomics research.
3. Be prepared to perform well in the macroeconomics classes in the top Ph.D. programs in economics.

Topics in Mathematical Economics

Advanced topics such as risk and uncertainty, game theory, and capital theory.

ECON 582

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 580
Taught	Winter

Course Outcomes

Econ 582 students will be able to

Economics 582 is a topics course with the goal of showing students the frontier. By its nature, the course exhibits different learning objectives each time it is taught.

Top

Advanced Mathematics for Economists

Advanced mathematical methods that have proved useful in economic modeling.

ECON 586

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 380 & MATH 314
Taught	

Course Outcomes

Course To Be Deleted

This course is currently not being taught and will be deleted in an upcoming curriculum year.

Top

Advanced Econometrics

Theory and practice of formulating, estimating, and analyzing economic models.

ECON 588

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ECON 388
Taught	Winter

Course Outcomes

Econ 588

1. Demonstrate a familiarity with the properties and applications of several families of statistical distributions to econometric problems.
2. Demonstrate an understanding of variations and generalizations of the basic regression model including

Generalized least squares
Generalized autoregressive conditional heteroskedasticity models
Instrumental variables
Seemingly unrelated regression models
Panel data
Hausman specification tests.

1. Demonstrate an understanding of estimation frameworks in econometric models including

Parametric, semiparametric, and non parametric specifications
Maximum likelihood, M-, generalized method of moments, kernel, empirical likelihood, and extremum estimation.

1. Formulate and estimate various nonlinear models.
2. Identify and estimate autoregressive integrated moving average (ARIMA) models and obtain forecasts of economic variables.
3. Demonstrate an understanding of dynamic (and static) structural econometric models including being able to discuss

Reduced form, structural, and transfer function representations
The identification problem
Issues of estimation and statistical inference
Vector autoregression models.

1. Complete a research project in which they formulate a research question, apply appropriate methods to answer the question, and prepare a paper summarizing their results.

Academic Internship: Supervised Management and Training

ECON 599R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Course work pertinent to proposed experience.
Taught	

Course Outcomes

Course To Be Deleted

This course is currently not being taught and will be deleted in an upcoming curriculum year.

Foundations of Education

The purposes of education and schooling in a democracy and the historical, cultural, philosophical, and sociological foundations underlying the development of the American educational system.

EDLF 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Historical and Philosophical Foundations of Education

Teacher candidates understand the major philosophical, historical, and sociological movements in Western education, including the nature of man, external structure, and individual freedom.

Social Foundations of Education

Teacher candidates examine central issues and contexts of education (e.g., wealth and poverty, school and family, alternative delivery systems, school and democracy, school and law, religion and education). They will also explore political and policy issues confronting education, governance and structure of public education, and financial and economic aspects of education.

Personal and Professional Philosophy of Education

Teacher candidates reflect upon and articulate their own views of education and connect these views to their future professional practice and personal educational philosophy.

Moral Foundations of Education

Teacher candidates investigate their own role as professionals engaged in the American proposition that education is a moral responsibility necessary for a civil and prosperous democratic society. They will understand the vision and purposes of the BYU-Public School Partnership and BYU's commitments to public education and its role in American society and will examine the moral commitments of education adopted by the Partnership.

Top

Introduction to International Development Education

Major concepts and research in educational aspects of poverty alleviation and human development. Role of education as foundation of poverty alleviation, expanding human capabilities, and for promoting national development.

EDLF 362

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Education a powerful tool for enlarging opportunity freedom, eliminating inequalities, and for overcoming poverty and other disadvantages.

Education is a powerful tool for creating opportunities, eliminating inequalities, and enabling people to overcome poverty and other disadvantages. Educational development and poverty reduction are, therefore, integrally linked issues in comparative and international education and development research. Students will understand how governments, international governmental organizations (IGOs), international non-governmental organizations (INGOs), and other institutions create as right-holders can create educational opportunities and support educational systems that develop leadership and foster learning and creativity for all people?
These questions and other outcomes explored in this course will enable students to:

- Introduce students to the complexities of the reservoir of diverse intellectual ideas and traditions in education;
- Articulate these understandings in making more thoughtful, responsible and better informed decisions in their own research and practice, and in their own reading and use of research in the field;
- Understand issues of equity and equality of educational opportunities and outcomes for differently situated social groups, especially those who historically have been most discriminated against;
- Synthesize the knowledge and discussions regarding the concept of education in poverty and human development, so as to inform their definition, draw on the extensive policy and academic literatures available to propose relationships between the multidemsionalities of poverty and five related concepts: educational poverty, rights in education and right to education, human rights, and well-being and happiness;
- Acquire a critical methodology that should prepare students for second cycle studies as well as for making contribution as mid-level policy-makers in agencies or practitioners in NGOs.

Theoretical understanding of IDE

Become aware of key theoretical concepts and different understandings on education and development, and the significance of human rights mainstreaming as a pillar in disciplinary and professional divide.

Critical examination of development architectures

Examine strengths and weaknesses of development architectures--particularly in relation to key problems and issues like poverty, exclusion, gender, empowerment and dignity, sustainability, capabilities and functioning and human rights. Learn to question the "Washington Consensus" wisdom and existing systems, structures, and models are working and, if not, what might work instead.

Top

Education, Poverty, and Community Development

Examines the nexus between education, poverty, and socioeconomic development challenges facing developing countries through the perspective of economics, religion, and the state.

EDLF 363

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Understanding development paradigms and critical reflection on poverty and human development

Identify and critically reflect upon issues and theories of poverty and human development
The Specific Objectives of the Course are as Follows:

- Understand the way in which different educational systems, pedagogical approaches, and organizational structures have evolved in a variety of cultures and country contexts;
- Explain the role that education plays in global social, political and economic development;
- Develop the ability to think logically and critically, and to apply knowledge from multiple disciplines to various contexts;
- Develop the ability to reflect on, understand, and respond to complex international and intercultural issues relating to human rights, right to education, rights in education and development; and
- Develop the ability to locate, identify, and use sources of information from multiple disciplines to understand and address issues related to education.
-

Critical reflection on theories

Locate, understand, and critically review development theories and research within their respective disciplines and within the interdisciplinary field of Development Studies

Development analysis

Analyze relevant development phenomena in a complex manner using key concepts and theories studied during the course.

Formulate research questions

Formulate complex research questions regarding development.

Effective communication

Communicate scientific issues and follow the development of knowledge.

Understand development dimensions

Develop a more effective understanding of the economics, social, and political dimensions of educational development within and across national boundaries.

Top

Special Topics in Education

Various topics dealing with educational issues.

EDLF 390R

Hours	1.0 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Seminar Specific

Students will aciheve learning outcomes specified for each special topic as determined by the professor at the beginning of the seminar.

Top

Academic Internship

On-the-job experience and training under the guidance of a mentor.

EDLF 399R

Hours	1.0 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Departmental consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Individualized Learning

Students will engage in an educational internship with learning outcomes individualized to each situation. These learning outcomes will be specified in a contract between professor and student.

Top

Foundations of Education

Introduction to the philosophical, sociological, and historical foundations of American education, with special reference to current issues in U.S. public schooling.

EDLF 452

Foundations of Multicultural Education

Cultural identities in family life, physical attributes, culture, and language. Recognizing prejudice in individuals and institutions. Culturally and linguistically relevant pedagogical frameworks.

EL ED 203

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	Fall, Winter, Spring

Course Outcomes

Critical Dispositions

Recognize and use a moral/spiritual framework as a multicultural educator. Develop critical multicultural dispositions (e.g., self-critique, social awareness, meekness, advocacy). Explore perspectives and ways of knowing multicultural concerns (e.g., gender, sexuality, race and ethnicity, language abilities, immigration, social class, poverty).

Cultural Identities

Examine and understand the various dimensions of cultural identity, including one's own, and apply this knowledge to a process of personal reflection.

Recognize Privilege and Inequity

Recognize and acknowledge racism, discrimination and other forms of inequity and privilege in themselves, in others, and within institutions.

The Cultural Nature of Teaching and Learning

Acknowledge the cultural dynamics (e.g., beliefs, practices, values) at play in school success and classroom teaching. This includes recognizing and overcoming deficit thinking, and the challenges of second language acquisition and cultural adaptations for children of immigrants.

Inclusion

Learn to appreciate and value individual and cultural differences. Recognize how diversity enriches opportunities for learning and engagement within various communities.

Top

Instructional Design and Assessment for all Learners

Curriculum design and assessment theory, strategies, and tools for the K-6 classroom. Fundamental concepts in using assessments to evaluate and support language and literacy development for English learners. Use of formal and informal assessment practices to support the learning of all students.

EL ED 213

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	Fall, Winter, Spring

Course Outcomes

Understand and apply the science of assessment in support of

Teacher candidates will be able to describe, define and apply the principles and science of assessment to determine instructional needs, design and deliver effective instruction and communicate assessment results to appropriate audiences in a multi-tiered system of support.

Instructional Design and Assessment for All Learners

- Teacher candidates will be able to describe, define and apply the principles and science of assessment to determine instructional needs, design and deliver effective instruction and communicate assessment results to appropriate audiences in a multi-tiered system of support.
- Teacher candidates will be able to describe their role and responsibility regarding curriculum standards and ensure that curriculum addresses the needs of diverse students.
- Teacher candidates will be able to synthesize and employ assessment evidence to inform instructional decision-making, interpret data to evaluate instruction, and apply a problem-solving process to address students' cognitive, social-emotional and linguistic learning needs within a multi-tiered system of support.
- Teacher candidates will be able to define, design and employ evidenced-based instructional practices within a multi-tiered system of support.

Define and apply curriculum standards

Teacher candidates will be able to describe their role and responsibility regarding curriculum standards and ensure that curriculum addresses the needs of diverse students.

Use assessment data to define and address student needs

Teacher candidates will be able to synthesize and employ assessment evidence to inform instructional decision-making, interpret data to evaluate instruction, and apply a problem-solving process to address students' cognitive, social-emotional and linguistic learning needs within a multi-tiered system of support.

Multi-tiered system of instructional support

Teacher candidates will be able to define, design and employ evidenced-based instructional practices within a multi-tiered system of support.

Foundations of Literacy Development

Language and literacy development for first and second language learners including theoretical underpinnings, processes, historical foundations, and instructional contexts that support language and literacy development for all K-6 children.

EL ED 323

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Admittance into elementary education program.
Taught	Fall, Winter, Spring

Course Outcomes

Theories and Process of Reading and Writing

Explain, compare and critique theories of reading and writing processes and development with supporting research evidence. (ILA Standard 1.1.1)

Language Processes

Explain and apply first language acquisition processes that support literacy development across elementary years, e.g., cueing systems, vocabulary, teacher talk). (ILA Standard 1.1.2)

Second Language and Literacy Acquisition

Explain, apply, and compare/contrast knowedge about second language literacy development in context. (ILA Standard 1.1.3 & 9)

Literacy Processes

Explain and apply reading and writing development across elementary years, e.g., word recognition, language comprehension, strategic knowledge, spelling, qualities of good writing, and reading/writing connections. (ILA Standard 1.1.2)

Historical Foundations of Literacy Instruction

Identify and synthesize major milestones in literacy instruction.(ILA Standard 1.2.1)

Foundations of Classroom Management

Exploring philosophies of classroom management focusing on promoting child guidance in an engaging and effective K-6 classroom learning environment.

EL ED 324

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EL ED 203
Taught	Fall, Winter, Spring

Course Outcomes

El Ed 324 Course Outcomes

Throughout this course, the students will:

- Compare and contrast management theories and approaches to classroom management.
- Identify ways to prevent management problems.
- Describe practical approaches for management interventions or ways of addressing problems that arise.
- Identify the components of an effective learning environment.
- Identify practices and strategies of a democratic classroom.
- Explore ways to motivate children using effective motivational theories.
- Formulate a personal management philosophy.
- Create a classroom management plan.
- Describe how needs of diverse learners are met in various components of management.
- Identify management approaches that align with the vision of the McKay School of Education and the Educator Preparation Program.

Top

K-2 Practicum Seminar

Prepare for and reflect on the K-2 practicum experience.

EL ED 330

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Concurrent enrollment in El Ed 332.
Taught	Fall, Winter

Course Outcomes

El Ed 330 Course Outcomes

Throughout this course, the students will:

- discuss and make connections between the theoretical knowledge from foundational courses in the elementary education program to the experiences they will have during their K-2 practicum.
- self-evaluate their professional dispositions about teaching and learning.
- be expected to identify and practice professional attitudes about teaching and learning.
- develop planning skills.
- identify best teaching strategies and practices, focusing on K-2 classrooms.
- revisit and update their classroom management plan.
- identify and practice those foundational principles associated with the BYU/Public School Partnership and the McKay School of Education, including Utah Effective Teaching Standards and the Partnership Vision and Commitments.

Top

Practicum in Grades K-2

Applying knowledge from foundational and content courses to teaching in a K-2 setting. Observing, planning, teaching, assessing, and reflecting in a public school setting.

EL ED 332

Hours	2.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	EL ED 324; concurrent enrollment in El Ed 330; FBI fingerprint and background clearance.
Taught	Fall, Winter

Course Outcomes

El Ed 332 Course Outcomes

Throughout this practicum, all practice will be focused on children and classes in grades K-2. Each student will:

- apply appropriate planning skills.
- implement appropriate and effective pedagogy.
- demonstrate high levels of professionalism.

Top

Teaching Literacy in the Primary Grades (K-2)

Instructional practices for teaching children the literacy concepts, skills, and strategies they need to learn in grades K-2. Assessing, monitoring, and evaluating children's literacy knowledge and learning in grades K-2.

EL ED 333

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EL ED 323; Concurrent enrollment in El Ed 332.
Taught	Fall, Winter

Course Outcomes

Assessment

Teacher candidates will be able to administer, score, and interpret a variety of assessments appropriate for use in screening, diagnostic, monitoring, and outcome literacy assessment in primary grades (e.g., running records, Clay's observation survey, phonemic awareness assessment, DIBELS). (See ILA Standard 3)

Literacy Environment

Teacher candidates will be able to identify and evaluate key aspects of an effective literacy environment in a primary grade classroom. (See ILA Standard 5)

Instruction

Teacher candidates will be able to plan and implement primary grade literacy instruction for whole class, small groups, and individual students (e.g., read aloud, shared reading, guided reading, independent reading, shared writing interactive writing, language experience). (See ILA Standard 2)

Learner Development

Teacher candidates will plan and implement primary grade literacy instruction that is linked to student backgrounds across a variety of diverse characteristics. (See ILA Standard 4)

Curriculum

Teacher candidates will use foundational knowledge to design and/or implement instruction that develops primary grade students' word recognition, language comprehension, strategic knowledge and reading/writing connections. (See ILA Standard 2)

Professional Learning

Teacher candidates will examine their dispositions and orientation regarding their own reading and writing and the teaching of reading and writing, and pursue the development of individual professional knowledge and behaviors. (See ILA Standard 6)

Children's Literature

Trends and titles in children's and adolescent literature. Reading and critiquing as well as practical uses of children's literature in both school and home.

EL ED 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Elementary education or early childhood education major status.
Taught	Fall, Winter, Spring

Course Outcomes

Evaluating Children's Books

1. Students will understand and apply criteria in evaluating children's books for quality and function.

Knowledge Base in Children's Literature

2. Students will gain a knowledge base concerning the field of children's literature as contained in the assigned textbook and class lectures.

Language Acquisition in Elementary Education

Processes and variables in native- and second-language development. Fostering efficient acquisition of language, cognitive, and academic skills in second-language environments.

EL ED 343

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	EL ED 203; major status.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Language Acquisition in El Ed

El Ed 343 is currently an inactive course. Learning outcomes will be created when this course is offered.

Top

Content-Based Literacy

Instructional methods, strategies, and materials for integrating curriculum content and language instruction. Teaching, creating, and adapting lesson materials in a multicultural context.

EL ED 344

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	El Ed 343 or concurrent enrollment.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Content-Based Literacy

El Ed 344 is currently an inactive course. Learning outcomes will be created when this course is offered.

Top

Family, School, and Community Partnership

Standards, principles, policies, and processes of collaborating with parents, families, schools, and communities in fostering and sustaining the development of children and youth.

EL ED 345

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	El Ed 344 or concurrent enrollment.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Family, School and Community Partnership

El Ed 345 is currently an inactive course. Learning outcomes will be created when this course is offered.

Elementary Student Teaching

Supervised, full-day experience to develop and demonstrate competence in teaching at the elementary school level. Observations are conducted and feedback provided throughout the experience as the responsibility for teaching increases across the 10-week experience.

EL ED 400R

Hours	1.0 - 12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Prior application; total GPA of 3.00, at least a C grade in all major and minor courses; FBI fingerprint background clearance.
Note	See Education Student Services for application dates.
Taught	Fall, Winter

Course Outcomes

El Ed 400R Course Outcomes

Participating in the Public School Setting
The student teacher will:

- observe and reflect with the intent to improve practice.
- effectively manage children in all facets of a school setting.
- increase his or her responsibility until they are operating as the regular classroom teacher.
- apply knowledge from various content courses as they relate to teaching in an elementary classroom.
- apply knowledge of various pedagogical methods for planning, teaching, and assessing and when they are most appropriate.
- demonstrate high levels of professionalism during their student teaching.
- create a Teacher Work Sample that measures their skills in using contextual factors, planning, assessment, lesson design, interpretation of student performance, and reflection.

Top

Grades 3-6 Practicum Seminar

Prepare for and reflect on the 3-6 practicum experience.

EL ED 440

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	EL ED 332; concurrent with El Ed 442; FBI fingerprint and background clearance.
Taught	Fall, Winter

Course Outcomes

El Ed 440 Course Outcome

Throughout this course, the students will:

- discuss and make connections between the theoretical knowledge from foundational courses in the elementary education program to the experiences they will have during their 3-6 practicum.
- self-evaluate their professional dispositions about teaching and learning.
- be expected to identify and practice professional attitudes about teaching and learning.
- identify contextual factors that impact teaching and learning.
- identify best teaching strategies and practices, focusing on 3-6 classrooms.
- increase planning skills.
- revisit and update their classroom management plan.
- identify and practice those foundational principles associated with the BYU/Public School Partnership and the McKay School of Education, including the Utah Effective Teaching Standards and the Partnership Vision and Commitments.

Practicum in the Elementary Education 3-6 Classroom

Applying knowledge from foundational and content courses to teaching in a 3-6 classroom. Observing, planning, teaching, assessing, and reflecting in a 3-6 public school setting.

EL ED 442

Hours	2.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	EL ED 332; Concurrent enrollment in El Ed 440.
Taught	Fall, Winter

Course Outcomes

El Ed 442 Course Outcomes

Throughout this practicum, all practice will be focused on children and classes in grades 3-6. Each El Ed 442 student will:

- apply principles of effective classroom management and learning environments.
- apply appropriate planning skills.
- implement appropriate and effective pedagogy.
- demonstrate high levels of professionalism.

Top

Teaching Literacy in the Intermediate Grades (3-6)

Information and skills needed to make informed decisions about literacy instruction and evaluation. Establishing an effective 3-6 grade classroom literacy environment.

EL ED 443

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EL ED 333; Concurrent enrollment in El Ed 442.
Taught	Fall, Winter

Course Outcomes

Professional Identity

Teacher candidates will engage in personal reflection to develop a professional identity and engage collaboratively with learners, families, colleagues, community members and demonstrate the highest ethical standards of the teaching profession. (See ILA Standard 6)

Assessment

Teacher candidates will be able to administer, score, and interpret a variety of assessmeents appropriate for use in screening, diagnostic, monitoring, & outcome literacy assessments in intermediate grades. (ILA Standard 3)

Literacy Environment

Teacher candidates will be able to identify and evaluate key aspects of an effective literacy environment in an intermediate classroom. (See ILA Standard 5)

Instruction

Teacher candidates will be able to plan and implement intermediate grade literacy instruction for whole class, small groups, and indivdiual students (e.g., read aloud, shared reading, guided reading, independent reading, shared writing, independent writing). (See ILA Standard 2)

Learner Development

Teacher candidate will plan and implement intermediate grade literacy instruction that is linked to student backgrounds across a variety of diverse characteristics. (See ILA Standard 4)

Curriculum

Teacher candidates will use foundational knowledge to design and/or implement instruction that

develops intermediate grades students' comprehension, fluency, vocabulary, writing, and content area literacy skills. (See ILA Standard 2)

Teaching Social Studies in Grades K-6

The methods, skills, and strategies for teaching social studies in grades K-6. Modeling democratic teaching practices and establishing democratic classrooms to prepare children to assume roles as participatory citizens in a democracy.

EL ED 445

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EL ED 213; Concurrent enrollment in El Ed 442.
Taught	Fall, Winter

Course Outcomes

El Ed 445 Course Outcomes

- Students will demonstrate their understanding of the history, purpose and current status of social studies in the classroom.
- Students will identify and recognize democratic principles and practices in the social studies curriculum, in K-6 classrooms, and in society.
- Students will demonstrate the ability to appropriately plan for teaching social studies.
- Teacher candidates will experience and participate in various strategies appropriate for teaching K-6 social studies.

Top

Teaching Science in Grades K-6

Developing the pedagogical knowledge, skills, and dispositions necessary to teach science to elementary children of various ages, abilities, backgrounds, and exceptionalities.

EL ED 446

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EL ED 213; Concurrent enrollment in El Ed 442.
Taught	Fall, Winter

Course Outcomes

El Ed 446 Course Outcomes

- Teacher candidates will evaluate their personal dispositions, development, and growth toward becoming a teacher of science.
- Teacher candidates will identify and describe purposes for teaching science in K-6 classrooms.
- Teacher candidates will explain what science is and how children learn science, including the knowledge and reasoning skills students must acquire to become proficient in science.
- Teacher candidates will recognize the practices, crosscutting concepts, and core ideas of science and engineering and how they influence science instruction in K-6 classrooms.
- Teacher candidates will plan for science instruction for children of various ages, abilities, backgrounds, and exceptionalities, including how to (a) identify appropriate science content from national standards and state core curricula; (b) apply a variety of appropriate teaching methods and strategies to support science learning; (c) integrate science with other disciplines across the elementary curriculum; and (d) employ appropriate assessment methods and strategies.

Teaching Mathematics in Grades K-6

The teaching and learning of elementary school mathematics guided by current principles relating to mathematics content, social interaction, student thinking, and child development.

EL ED 447

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MTHED 305 & MTHED 306; Concurrent enrollment in El Ed 442.
Taught	Fall, Winter

Course Outcomes

El Ed 447 Learning Outcomes

- Establish mathematics goals that accommodate students' varied mathematical trajectories and align appropriately with state content and practice standards as well as informal and formal assessments of student thinking.
- Select and/or design worthwhile mathematical tasks that include varying levels of cognitive demand, thus increasing access to learning.
- Design, implement, and evaluate inquiry-based lessons as structured by the Launch-Explore-Summarize (Discuss/Debrief) teaching and learning cycles or sequences
- Anticipate student mathematical thinking (for planning lessons and/or units, orchestrating discourse, questioning, etc.)
- Create high levels of mathematical interaction by planning for discussion, questioning, and establishing a supportive classroom environment
- Adapt instruction to address the diverse learning strengths and needs of both groups and individuals
- Assess student learning, both formatively and summatively, using a range of appropriate strategies, and employ the results of assessment in guiding instruction
- Practice professionalism: In commitment to learning to teach, in appearance and demeanor, and in the quality of work submitted.

Top

Independent Readings or Project

EL ED 493R

Hours	0.5 - 4.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	Departmental approval.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Professional Development

Students will explore and demonstrate knowledge in an area of specialization under the direction of a faculty member.

Academic Internship

A full-year classroom teaching internship in the public schools in lieu of El Ed 400, student teaching.

EL ED 496R

Hours	8.0 - 12.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Prior application; requires a total GPA of 3.00, at least a C grade in all major and minor courses; FBI fingerprint background clearance.
Note	See Education Student Services for application dates.
Taught	Fall

Course Outcomes

El Ed 496R Course Outcomes

Participating in the Public School Setting
The intern will:

- reflect with the intent to improve practice.
- establish and maintain an effective learning environment.
- effectively manage children in all facets of a school setting.
- be a full-time teacher for one school year.
- apply knowledge from various content courses as they relate to teaching in an elementary classroom.
- apply knowledge of various pedagogical methods for planning, teaching, and assessing and when they are most appropriate.
- consistently engage collaboratively with colleagues and parents.
- demonstrate high levels of professionalism during their internship.
- create a Teacher Work Sample that measures their skills in using contextual factors, planning, assessment, lesson design, interpretation of student performance, and reflection.

Analysis of Teaching and Learning

EL ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	Does not count toward a graduate degree without prior approval.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Analysis of Teaching and Learning

Inservice course. Inservice teachers will improve their teaching skills as required by their licensure or endorsement program.

Art Education

EL ED 589R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	Does not count toward a graduate degree without prior approval.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Art Education

Inservice course. Inservice teachers will improve their teaching skills as required by their licensure or endorsement program.

Inservice course. Inservice teachers will improve their teaching skills as required by their licensure or endorsement program.

Top

First-Year Writing for International Students

Processes of academic writing, reading, and research for international students who have English as their second language.

ELANG 150

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Fulfills GE First-Year Writing requirement.
Taught	Fall, Winter, Summer

Course Outcomes

Rhetorical Knowledge

Students should demonstrate that they can focus on a well-defined purpose in writing, write clearly for a specified audience, use conventions of format and structure appropriate to the rhetorical situation, and adopt a voice, tone, and level of formality suited to the purpose and audience. They may also learn about and practice the following: responding to the needs of different audiences; responding appropriately to different kinds of rhetorical situations; writing in several genres; and exploring the ways different genres shape writing and reading.

Processes of Writing

Students should develop productive and flexible individual and collaborative writing processes, including prewriting, drafting, revising, editing and proofreading. These processes could include the following: collecting data, finding supporting evidence, and creating good arguments; organizing the material for a paper; writing successive drafts of the same paper; group writing; seeking and using peer responses; revising; editing grammar, usage, and punctuation; and using conventional formats.

Critical Reading

Students should be able to read and evaluate written materials from a variety of genres. They should demonstrate their ability to read critically, which would include some of the following: analyzing and evaluating arguments; identifying authors' claims and main ideas; identifying supporting evidence; identifying premises and unstated assumptions; evaluating logic and logical fallacies; drawing inferences; synthesizing ideas; identifying and evaluating analogies and figurative language; and distinguishing among emotional, ethical, and rational appeals

Processes of Library Research

Students should demonstrate that they can locate and evaluate print and electronic sources and

use these sources to write a documented research paper.

Knowledge of Conventions

Students should demonstrate their knowledge of the following: common formats for different kinds of texts; genre conventions ranging from purpose and structure to tone and mechanics; methods of documenting borrowed information; and conventions of edited syntax, grammar, punctuation, and spelling.

Introduction to the English Language

Overview of English from linguistic point of view, emphasizing structure of English and social, biological, and psychological aspects of language.

ELANG 223

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Acquiring Basic Analytical Tools

Students will have acquired basic analytical tools in core areas of linguistics: phonology, morphology, syntax, semantics, and pragmatics.

Applying Analytical Tools

Students will be able to apply these analytical tools to English language data of various types, such as those involving aspects of variation, acquisition, and historical change.

Empirical Methods in English Linguistics

The use of large collections of texts for teaching and particularly for research, including the study of many different types of linguistic variation.

ELANG 273

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELang 223 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Organizing, Test, Report

Students will be able to organize linguistic data, construct and test hypotheses about it, and report the findings.

Understanding and Applying Research

Students will be able to distinguish empirical from introspective-based research and apply both (either separately or in conjunction with each other) for research topics.

Recognizing and Applying Statistical Measures

Students will be able to recognize and begin to apply statistical measures.

Authentic Linguistic Data

Students will acquire authentic linguistic data from native speakers through appropriately selected computer corpora (collections of texts) as well as through other methods such as interviews, surveys, recordings, etc., and effectively extract the relevant data

Library and Online Research

Students will be able to carry out library and online research to investigate findings by other linguists.

Top

Modern American Usage

Current conventions and effective use of American English.

ELANG 322

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELang 223 or Ling 201 or concurrent enrollment.
Taught	Fall, Winter, Summer

Course Outcomes

Evaluating English Usage

Students will be able to identify and use multiple approaches to evaluating English usage.

Tools for Evaluating English Usage

Students will be able to identify and use the most appropriate tools for each approach.

Evaluating the Validity of Prescriptive Rules

Students will be able to evaluate the validity of prescriptive rules by using these approaches and tools.

Top

History of the English Language

Basic changes from Old English to modern English, including modern American dialects.

ELANG 324

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELang 223 or Ling 201, or concurrent enrollment.
Taught	Fall, Winter, Spring

Course Outcomes

Tracing Linguistic Changes

Students will be able to trace the general phonemic, morphological, syntactic, and semantic changes of English in relation to the major periods of Old English, Middle English, Early Modern English, and Present-Day English.

Linguistic Tools and Resources

Students will be able to identify some of the appropriate linguistic tools and resources that are available to answer specific questions about the history and development of the English language.

Social, Political, and Linguistic Influence on English

Students will be able to explain the important social and political factors as well as linguistic processes that have influenced the development of the English language and some of its varieties, including the current standard variety.

Authentic Historical Texts

Students will be able to apply course concepts and information to the assessment and interpretation of authentic historical texts.

Top

The Grammar of English

Structure of English grammar in various applications.

ELANG 325

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELang 223 or Ling 201 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Analyze and Describe Grammatical Structures

Students will be able to analyze and describe grammatical structures in English at the word, phrase, clause, and sentence levels.

Identify and Label Parts of Speech

Students will be able to identify and label parts of speech in English sentences.

Applying Knowledge to Analyze Texts

Students will be able to apply the knowledge from the previous outcomes towards the analysis of authentic texts.

English Semantics and Pragmatics

Structure of meaning in words, phrases, and discourse. Lexical semantics and the mental lexicon; phrase-level meaning; interaction of situation and meaning.

ELANG 326

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 223; or LING 201
Taught	Fall, Winter

Course Outcomes

Semantic and Pragmatic Concepts

Students will be able to identify and discuss basic semantic and pragmatic concepts such as sense, reference, deixis, perlocution, illocution, entailment, implicature, metaphor, Gricean Maxims, etc.

Analyzing Spoken and Written Texts

Students will be able to apply the above concepts towards the analysis of spoken and written texts, demonstrating their knowledge and understanding in a written paper.

Top

English Phonetics and Phonology

Pronunciation, perception, and interaction of English speech sounds. Dialect variation.

ELANG 327

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 223; or LING 201
Taught	Winter

Course Outcomes

Speech Sounds and Prosodic Patterns

Students will be able to listen analytically to speech and identify a wide range of speech sounds and prosodic patterns found in English.

Transcription Systems

Students will be able to use standard transcription systems to represent English speech sounds and discuss some of the limitations of those systems.

Speech Analysis Software

Students will know how to use speech analysis software to investigate English speech sounds.

Theoretical Principles

Students will understand the theoretical principles underlying the classification and description of English speech sounds and prosodic patterns of English.

Segmental and Prosodic Phonology of English

Students will be able to describe and analyze at an intermediate level major features of the segmental and prosodic phonology of English.

Basic Editing Skills

Editing theory and practice, emphasizing copy editing and basic line editing.

ELANG 350

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 223 & ELANG 322 & ELANG 325
Taught	Fall, Winter, Spring

Course Outcomes

Copy Editing Skills

Students demonstrate copy editing skills by using these skills to improve sample manuscripts in terms of punctuation, spelling, usage, and sentence clarity.

Style and Usage Requirements

Students apply style and usage requirements with flexibility, customized to specific contexts and circumstances.

Empirical Methods

Students deploy empirical methods to investigate patterns of style and usage and make editorial decisions.

Top

Editing Student Journals

Hands-on training and experience in all aspects of editing and publishing student journals.

ELANG 351R

Hours	1.0 - 2.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Practical Experience

Students acquire practical experience in one or more phases of the production of a BYU student journal: manuscript solicitation, evaluation, development, copy editing, layout, production, and promotion.

Seeking out Opportunities to Apply Principles

Students seek out opportunities to apply principles learned in editing classes to improve communication in live settings.

Articulating what They have Learned

Students articulate what they have learned about communication or publication processes in live settings that have enhanced their course learning.

Discourse Analysis

Linguistic analysis of connected speech or written discourse, especially larger linguistic units above the clause level, such as conversational exchanges or written texts.

ELANG 362

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 223; or LING 201
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Conversational and Written Academic Discourse

Students will be able to demonstrate knowledge of the ways that discourse is structured in a variety of genres and registers, including spoken conversational discourse and written academic discourse.

Identify and Evaluate Sources

Students will be able to identify and critically evaluate sources relevant to issues concerning discourse analysis.

Analysis of Authentic English Discourse

Students will be able to evaluate and appropriately apply various methods and approaches to the analysis of authentic English discourse and effectively communicate their findings.

TESOL Listening, Speaking, and Pronunciation

Understanding basic English as a second/foreign language theories and practices for teaching and assessing listening, speaking, and pronunciation.

ELANG 375

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 223; or LING 201
Taught	Fall, Winter

Course Outcomes

Historical Methods and Techniques

Analyze historical methods and techniques in English as a second/foreign language for teaching and assessing listening, speaking, and pronunciation.

Analyze and Adapt Textbook Materials

Analyze and adapt textbook materials designed to promote accuracy and fluency in listening, speaking, and pronunciation.

Observe and Analyze Second Language Instruction

Observe and analyze second language accuracy and fluency instruction in relation to concepts discussed in class.

Assessing Listening, Speaking, and Pronunciation

Identify the roles that langauge acquisition, learner variables, and language learning strategies play in teaching and assessing listening, speaking, and pronunciation.

Evaluate Technology

Evaluate technology aimed at promoting listening, speaking, and pronunciation.

Top

TESOL Reading, Writing, and Vocabulary

Understanding basic processes of literacy development in English as a second or foreign langauge. How knowledge of these processes informs classroom literacy instruction and practices.

ELANG 376

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 223; or LING 201
Taught	Fall, Winter

Course Outcomes

Analyze Basic Theories

Analyze basic theories of second/foreign language literacy and vocabulary acquisition and assessment.

Apply Basic Theories

Apply basic theories to actual classroom literacy and vocabulary instruction.

Observe and Analyze L2 Literacy Instruction

Observe and analyze L2 literacy instruction in relation to concepts discussed in class.

Identify and Critique Online Resources

Identify and critique online resources aimed at literacy and vocabulary development.

Academic Internship: Editing and English Language

On-the-job experience and education related to editing and English language studies.

ELANG 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Practical Experiences

Students acquire practical experience in one or more phases of the production of a professional publication or other document by serving as an intern at that publication or for the document production team: manuscript solicitation, evaluation, development of content, copy editing, layout, and print production.

Seeking out Opportunities to Apply Principles

Students seek out opportunities to apply principles learned in editing classes to improve communication in live settings.

Articulating what they have learned

Students articulate what they have learned about communication or publication processes in live settings that has enhanced their course learning and professional development.

Top

Genre and Substantive Editing

Exploring a different genre of publishing each semester; instruction in substantive editing.

ELANG 410R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 223 & ELANG 322 & ELANG 325
Taught	Fall, Winter, Spring

Course Outcomes

Ethical Issues in Publishing

Students articulate a personal perspective on ethical issues in publishing, such as preserving the author's voice, plagiarism, copyright infringement, the tensions between the editorial and the marketing sides of publishing, the promotion of values and the transmission of our cultural heritage.

Specialized Skills

Students demonstrate specialized skills and the perspective required by at least one specific editing genre (such as magazine publishing, technical communication, fiction, scholarly publishing, or visual information design).

Top

Studies in Language or Editing

Studies in specialized topics about the English language or editing. Topics vary.

ELANG 421R

Hours	1.0 - 6.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Demonstrate Knowledge

Demonstrate knowledge of the chosen topic. In most cases, this will be some kind of linguistic knowledge, such as linguistic structures or linguistic processes.

Top

Editing for Publication

Refining copy editing and substantive editing skills through hands-on work with actual publications; one-on-one feedback and mentoring.

ELANG 430R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	ELANG 350 & ELANG 410R & DIGHT 230
Taught	Fall, Winter, Spring

Course Outcomes

Working in Small Groups

Students demonstrate ability to work in small groups, and to accept and implement mentor feedback, by by producing as a group, and under direction of a faculty mentor, a publication project effectively edited and visually designed.

Basic Editing Skills

Students demonstrate improvement in basic editing skills acquired in previous courses: copy editing, substantive genre editing, and use of electronic tools for editing and layout.

Basic Understanding of Publication Industry

Students demonstrate a basic understanding of the publication industry and the requirements of an effective job search by creating a job application and an editing skills portfolio.

Early Modern English

English language from 1500-1700.

ELANG 447

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 223 & ELANG 324; or LING 201 & ELANG 324
Taught	Winter

Course Outcomes

Identify Characteristics

Students will be able to identify the phonological, morphological, syntactic, lexical, pragmatic, and orthographic characteristics of Early Modern English and how those characteristics are distinguished from Present Day English.

Identify Factors in Development

Students will be able to identify important historical, social, and linguistic factors that influenced the development of the language during the Early Modern Period, including the development of modern prescriptive norms.

Apply Understanding to Contemporary Texts

Students will be able to apply their understanding of Early Modern English to the interpretation of contemporary texts, including passages from the works of Shakespeare and the King James translation of the Bible.

Late Modern English

The English language from 1700-1900, emphasizing diachronic changes.

ELANG 448

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 223 & ELANG 324; or LING 201 & ELANG 324
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Identify Characteristics

Students will be able to identify the phonological, morphological, syntactic, lexical, pragmatic, and orthographic characteristics of Late Modern English and how those characteristics are distinguished from Present Day English.

Identify Factors Influencing Development

Students will be able to identify important historical, social, and linguistic factors that influenced the development of the language during the Late Modern Period, including the development of modern prescriptive norms.

Identify Instances of Language Change

Students will be able to identify processes and instances of language change during the Late Modern English period.

Apply Understanding to Contemporary Texts

Students will be able to apply their understanding of Late Modern English to the interpretation of contemporary texts.

Varieties of English

Regional and social variation in English, especially standard and nonstandard national and world Englishes such as English-based pidgins and creoles.

ELANG 468

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 223; or LING 201
Taught	Fall

Course Outcomes

Basic Terminology and Issues

Students will be able to understand the basic terminology as well as the theoretical and social issues associated with studying varieties of English.

Properties of varieties of English

Students will learn the basic properties of several varieties of English.

Learning to Collect and Analyze Data

Students will learn to collect and analyze data using several data collection methods.

Collecting and Analyzing Data

Students will collect and analyze data on a topic of their choice and present their findings in a research paper.

TESOL Basic Course and Lesson Planning

Design English as a second or foreign language course and lesson plans on principles and knowledge of learning outcomes, assessment plans, methods, materials, classroom management, and learning activities; access and use professional resources.

ELANG 477

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For Fall 2013 & forward admits, ELang 325 & ELang 375 & ELang 376.
Taught	Fall, Winter, Spring

Course Outcomes

Designing an ESL Course

Based on a needs assessment, students will be able to design an ESL course that includes learning outcomes, an assessment plan, a description of what will be taught, how it will be taught (including the roles for teacher and students), and major learning activities.

Develop a Instructional Unit

Students will be able to develop an instructional unit using materials from a textbook that includes learning objectives, a unit plan, and sample lesson plans.

Become More Professional in TESOL

Students will become more professional in TESOL by accessing and using resources including international, national, and local organizations; journals and online resources; job listings; and information about further educational opportunities.

TESOL Practicum

Synthesize and apply the foundational knowledge of the English language systems and competencies in teaching English as a second or foreign language.

ELANG 478

Hours	3.0 Credit, 0.0 Lecture, 3.0 Lab
Prerequisites	ELANG 325 & ELANG 375 & ELANG 376; ELang 223; and ELang 477 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Practical Application of Knowledge and Skills

Students will put the knowledge and skills learned in the TESOL minor classes into use during the practicum at the English Language Center by:
• Observing more experienced teachers in the classroom
• Working with a mentor
• Tutoring in the Self-Access Study Center
• Assisting in the computer lab
• Teaching in the Foundations Prep or Academic Prep classes
• Completing a portfolio of work completed during the practicum

The Senior Course

In-depth study of a limited area of English language. Content varies; requires research and writing.

ELANG 495R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Senior status; English language major status.
Taught	Fall, Winter

Course Outcomes

Course Project

Students will be able to demonstrate how a variety of linguistic concepts, authoritative sources, and methodologies they have previously learned about in other courses may be effectively applied in a focused course project in which the students participate.

Identifying Linguistic Assumptions

Students will be able to identify some of the linguistic assumptions that underlie the approaches and methods they might use in completing the project.

Substantial Paper

By the end of the course, students will have written a substantial paper that describes, explains, and justifies the work they have done and the approach they have used in their project.

TESOL Internship

Individualized work or volunteer experience in a domestic or international setting.

ELANG 496R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	ELANG 477 & ELANG 478
Note	International internships must be coordinated through International Study Programs. All internships require prior departmental approval.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Applying Linguistics and Pedagogical Concepts - All Sections

Apply linguistic and pedagogical concepts learned in other TESOL minor courses in real-world situations.

Confidence and Preparation in Teaching

Develop feelings of confidence and preparedness in teaching English as a second language.

Critical Reflection

Demonstrate critical reflection of their own teaching beliefs and practices.

Professional Conduct, Practice, and Options

Become familiar with professional conduct, practice, and employment options in the TESOL industry.

English Spelling

ELANG 521R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 223; or LING 201; or equivalent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Extensive Reading

By the end of the course, students will have read extensively on a topic determined by the instructor.

Principal Issues

Students will be able to identify and outline some of the principal issues and contextual matters related to the designated topic area as well as to identify the principal sources and methods for resolving questions related to that topic area.

Substantial

By the end of the course, students will have prepared a substantial paper or project that demonstrates their mastery of material related to a specific issue or question within the topic area.

Studies in Language

Topics vary.

ELANG 521R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 223; or LING 201; or equivalent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Principal Issues

Students will be able to identify and outline some of the principal issues and contextual matters related to the designated topic area as well as to identify the principal sources and methods for resolving questions related to that topic area.

Extensive Reading

By the end of the course, students will have read extensively on a topic determined by the instructor.

Substantial

By the end of the course, students will have prepared a substantial paper or project that demonstrates their mastery of material related to a specific issue or question within the topic area.

Language Policy and Planning in English Language Contexts

Theories and practices of governing entities as they formulate policies relating to the status and codification of the English language.

ELANG 522

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 223; or LING 201; or equivalent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Language Planning Theories and Practices

Students will be able to apply fundamental language planning theories and practices toward solving real-world English language macro and micro planning problems.

Representative Texts and Practices

Students will be able to understand, interpret, explain, analyze, and assess representative texts and practices in English language planning and policy development.

Research

Students will be able to conduct research using appropriate language planning and policy theory and practice models in English language contexts.

History of the Book

History and development of the book, including modern methods and practices.

ELANG 524

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Describing the history of the Book

Students will be able to describe the history of the book and the reasons it has developed the way it has.

Book Construction and Production

Students will be able to describe and show how the book (the codex, in particular) is physically constructed and produced.

Scripts and Fonts

Students will be able to describe the development of scripts and fonts and the reasons they have changed over time.

Making a Book Beautiful

Students will be able to describe what goes into making a book look beautiful (design, typography, construction, usefulness, etc.).

Text Change

Students will be able to describe the fundamentals that underlie how texts change and develop over time, including the kinds of transmission errors that occur.

Old English 1

Old English grammar and vocabulary; traditional syntactical patterns in various types of Old English prose and poetry.

ELANG 525

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 324; or equivalent.
Taught	Fall odd years

Course Outcomes

Old English Texts

Students will be able to read Old English texts with the aid of a glossary and grammar and know how to contextualize the content of the texts with Anglo-Saxon culture.

Grammar and Structure

Students will have learned the basic grammatical and syntactic structures of Old English.

Differences between Old English and Present-day English

Students will be able to describe the differences between Old English and Present-day English and note the changes that occurred between the two stages of English.

Major Dialects and Genres of Old English Writings

Students will be able to describe the major dialects and genres of Old English writings.

Middle English

Detailed study of the principal dialects of Middle English, as illustrated in the literature of the period.

ELANG 526

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 324; or equivalent.
Taught	Fall even years

Course Outcomes

Reading Middle English Texts

Students will be able to read a Middle English text, with a little help from a glossary or dictionary.

Middle English Differences

Students will be able to identify some of the most important ways that Middle English differs from Present-day English and Old English and tell how the language is in the process of changing in Middle English.

Major Dialect Differences in Middle English

Students will be able to identify the major dialect differences in Middle English.

Language Contact and Sociolinguistics in Middle English

Students will be able to explain concepts of language contact and sociolinguistics as exemplified by Middle English.

Early Modern English

English language from about 1500 to 1800, with special emphasis on language of Shakespeare and the King James Bible.

ELANG 527

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 324; or equivalent.
Taught	Winter

Course Outcomes

Language Development

Students will be able to identify important historical, social, and linguistic factors that influenced the development of the language during the Early Modern Period, including the development of modern prescriptive norms.

Early Modern English Differences

Students will be able to identify the phonological, morphological, syntactic, lexical, pragmatic, and orthographic characteristics of Early Modern English and how those characteristics are distinguished from Present Day English.

Interpretation of Contemporary Texts

Students will be able to apply their understanding of Early Modern English to the interpretation of contemporary texts, including passages from the works of Shakespeare and the King James translation of the Bible.

Top

Varieties of English

Regional and social variation in English, especially standard and nonstandard national and world Englishes, including English-based pidgins and creoles.

ELANG 528

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELang 223, 324; or equivalents.
Taught	

Course Outcomes

knowledge

Students will deepen their understanding of varieties of English.

Structure of Modern English

English syntax through modern grammars; theories underlying those grammars.

ELANG 529

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 325; or instructor's consent.
Taught	Spring odd years

Course Outcomes

Lexical and Structural Classes

Students will be able to identify the various characteristics, features, and behaviors of the lexical and structural classes, as well as the larger phrase, clause, and sentence types within the English language.

Reference Works and Resources

Students will be able to identify some of the important reference works and resources that are available to answer questions about English grammatical structure and how they might appropriately be applied.

Grammatical Knowledge

Students will be able to demonstrate how grammatical knowledge can be consciously applied in a variety of analytical and applied language tasks.

Language and Literature

Literature from a language perspective; applying linguistic constructs to literary language; examining literary style; linguistic analysis of unfamiliar texts.

ELANG 535

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 223; or LING 201; or equivalent.
Taught	Summer Contact Department

Course Outcomes

Literary Text Analysis: Poetic Formulas

Students will be able to analyze literary texts using poetic formulas, including simple and complex figures.

Philological Principles

Students will have become acquainted with important philological principles.

Literary Text Analysis: Philological Criticism

Students will be able to analyze literary texts using philological criticism, including contextual relations.

Online Corpora and Literary Text Analysis

Students will understand how an online corpus might be used effectively to analyze literary texts.

Creating Literary Texts

Students will be able to create literary texts using language features identified within the course.

Top

Old English 2

Additional reading in Old English, emphasizing sound changes, dialects, and textual production.

ELANG 548

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ELANG 525
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Old English Language Fluency

By the end of the course students will have achieved a greater fluency within the Old English language.

Old English Heroic Verse

Students will be able to identify the features in Beowulf that exemplify the conventions of Old English heroic verse and the larger cultural context of the heroic society.

Beowulf Translation

Students will have translated the entire epic poem, Beowulf.

Contrasting Old English Lexical Uses

Students will be able to provide examples of contrasting Old English lexical uses, including ones involving metaphor and synonymy among words within the poem as well as differences between the lexical forms in the poem and other Old English texts.

Top

Introduction to Management

Intensive introduction to management thought and practice.

EMBA 500

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Orientation

Students will know how to navigate through the EMBA program

Introduction

Students will understand the program objectives and be introduced to the core management disciplines

Leadership

Students will identify their core strengths and begin a plan for develping as leaders.

Top

Corporate Financial Reporting

Analyzing financial accounting and reporting issues used by prospective managers.

EMBA 504

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Please contact the individual department for outcome information.

Leadership 1

Understanding and building individual leadership skills in career management and communications.

EMBA 505

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Knowledge

Students will deepen their understanding of leadership

Top

Entrepreneurial Management

Building the skills of entrepreneurial management; focusing on finding opportunities, people, and deals to create new value in new ventures and existing firms.

EMBA 506

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter

Course Outcomes

Creating Value

Discover opportunities for creating value through new ventures

Business Models

Discover and prove winning business models

Top

Leadership: Identifying and Developing Convictions, Strengths, and Key Competencies

Exploring current topics and issues in leadership and management. Identifying convictions and strengths necessary for effective leadership in contemporary business settings. Creating a plan for developing key competencies.

EMBA 508

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Analyze Your Organization's Culture

Analyze and assess the culture of your organization for the purpose of leading or influencing cultural change.

Craft Your Own Story

Articulate a coherent and compelling story of your professional journey

Share Effective Messages with Your Organization

Introduce and manage organizational messages so that they positively influence people's perceptions and behavior.

Identify Your Signature Strengths and Competencies

Identify and describe your signature strengths and competencies and make them the focus of professional development efforts.

Top

Operations Management

Examining issues and tools in production and operations management. Specific tools for forecasting, planning, inventory control, and project management presented and developed.

EMBA 530

Hours	1.5 Credit, 1.5 Lecture, 0.0 Lab
Prerequisites	None
Taught	Spring

Course Outcomes

Assessing operational effectiveness

Design and conduct an in-site assessment of a manufacturing facility's overall operations.

Linking operational effectiveness to org strategy

Describe how well a specific facility's operational effectiveness is linked to the organization's overall strategy.

Top

Operations Management

Examining issues and tools in service operations, production, and operations management. Presenting and developing specific tools for forecasting, planning, inventory control, and project management.

EMBA 531

Hours	3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Quantitative analysis of operations processes

demonstrate mastery of basic quantitative skills required to analyze core processes.

Framing operational issues effectively

Demonstrate the ability to develop a point of view about an operational challenge and argue persuasively for it in a professional setting.

Human Resource Management

Analyzing individual, group, and organizational variables that facilitate or inhibit effective organizational functioning. Topics include motivation, rewards, leadership, conflict, decision making, structure, evaluation, and change.

EMBA 545

Hours	3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Conducting job interviews

Design and conduct an effective employment interview

Motivating an effective workforce

Demonstrate a working knowledge of sound principles and practices applicable to motivating people in the workplace.

Managing teams and work groups

Demonstrate a working knowledge of sound principles and practices applicable to creating and managing an effective team or work group.

Managing change effectively

Demonstrate an understanding of effective principles and tools used in managing change.

Top

Weidman Center Global Internship

Provides students international technical work experience under the guidance of an industry supervisor.

ENG T 199R

Hours	0.5 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Consent of Weidman Center Director.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Life Long Learning

Upon completing this course students will have gained practical and possible global experience that will aid them in future engineering careers.

Top

Foundations of Global Leadership

Foundational principles and practices of individual and organizational leadership in a global context from an integrated moral, technical and social perspective. Emphasis on developing integrity, valuing and leveraging diversity, acquiring and applying leadership skills.

ENG T 231

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Also available spring term as a study abroad option.
Taught	Fall, Winter, Spring

Course Outcomes

1. Leadership and ethical implications

Able to define integrity, and demonstrate understanding of how it applies to their lives and how to develop it through practice.

2. Leadership and ethical implications

Able to demonstrate familiarity with the code of ethics that corresponds to their profession.

3. Leadership with sound reasoning and innovative thinking

Able to describe a procedure for making and implementing ethical decisions and effectively apply the procedure to ethical problems of practical interest.

4. Leadership with self-awareness and striving to improve

Able to understand and use a model to describe their own personality type and/or preferences.

5. Leadership with self-awareness and striving to improve

Able to describe what it means to be self-aware and how self-awareness applies to leadership, ethical behavior and global awareness.

6. Leadership by developing and practicing interpersonal ski

Able to define and effectively practice key interpersonal skills and indicate how they can be cultivated.

7. Leadership and teamwork

Able to describe a team development process.

8. Leadership and teamwork

Able to value the diversity that individuals bring to a team setting and use those skills to improve team performance.

9. Leadership and vision

Able to formulate a strategy and develop a plan, consistent with a vision, to accomplish a team project

10. Leadership and global economy

Able to define globalization, put it in an historical context and identify some key positive and negative outcomes attributed to globalization.

11. Leadership and impact of culture

Able to develop an appreciation for other cultures and an understanding of how cultural factors and other forms of diversity influence communication, teamwork, and the practice of technical disciplines across the globe.

12. Leadership and global concerns

Able to demonstrate technical understanding of a few global issues and think critically regarding the wise use of technology relative to these issues.

Top

Engineering Math Refresher

Review of basic techniques of algebra, trigonometry, differential calculus, integral calculus, and series and sequences in preparation for engineering mathematics, ordinary differential equations, and multivariable calculus.

ENG T 295R

Hours	0.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Math Refresher

Upon completion of this course students will be better prepared to continue their education in the College of Engineering and Technology.

Globalization in Engineering and Technology

Definition of globalization and the driving forces. How globalization is changing the practice of engineering and the development of technology. Study through classroom and industrial site visits.

ENG T 480

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Engineering or technology major enrolled in upper-division major courses; instructor's consent.
Taught	Spring
Offered	Study Abroad.

Course Outcomes

Globalization and Engineering

The students' knowledge of globalization as it relates to the practice of engineering, innovation, manufacturing, and research in their chosen field.

Globalization and Culture

The students' knowledge of globalization as it affects the environment, international trade and finance, and cultures.

Students and Globalization

The students' ability to argue the major points related to globalization (listed in the two points above). In each case, there are multiple views on the subject which they should be familiar with.

Culture and Engineering Practices

The students' ability to discuss foreign engineers regarding globalization and their companies' activities in the foreign country.

Global Engineering Outreach Projects

Humanitarian-based engineering and technology project development involving multi-disciplinary teams.

ENG T 497R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Engineering or technology major enrolled in upper-division major courses; instructor's consent.
Taught	Fall, Winter

Course Outcomes

Problem Solving

Gain experience in the design process that includes innovative problem solving skills applied to the design and implementation of global projects in developing regions of the world in the context of real needs, constraints, and opportunities.

Global Engineering

Demonstrate an appreciation for global aspects of engineering, including social and technical constraints related to design and the importance of sustainability.

Teamwork and Leadership

Demonstrate effective teamwork and leadership skills and an appreciation for other disciplines both within and outside of engineering as they work together on interdisciplinary teams.

Communication

Demonstrate effective oral and written communication skills in the reporting of work, particularly to entities or individuals in countries in which projects are implemented.

Social Innovation

Gain experience in how to be involved in social innovation as they progress through their careers.

Special Topics in Engineering and Technology

Special topics in engineering and technology that relate to current research areas or issues related to industry.

ENG T 595R

Hours	0.5 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Special Topics

Learn and apply concepts and/or prictices in a specialized area.

College Writing and Reading

Principles of expository writing and critical reading with an emphasis on library-based research.

ENGL 115

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Fulfills General Education First-Year Writing requirement.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical reading

1. Critically read texts. This includes
o analyzing how a text functions in a specific situation, community, or public;
o analyzing the nuances of language (diction, figures of speech, tone, etc.);
o identifying and evaluating the elements of an argument-claims, reasons, assumptions, and ethical, emotional, and logical appeals.

Rhetoric

Use rhetoric responsibly to compose texts in a variety of genres for specific audiences and purposes.

Composing

Write coherent and unified texts (effective introductions, clear theses, supporting details, transitions, and strong conclusions) using a flexible and effective writing process, including prewriting, drafting, revising, and editing.

Style

Use style-diction, figurative language, tone, grammar, punctuation, spelling, mechanics-genre, conventions, and document design correctly and for rhetorical effect.

Research

Navigate the library to locate primary and secondary sources, evaluate the appropriateness and credibility of those sources, and effectively incorporate and accurately document outside sources in a research paper.

Academic Preparation for English Majors

Overview of the English major for the beginning student: curriculum, faculty, academic resources.

ENGL 198

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Term 1, Winter Term 1

Course Outcomes

Major Requirements

To familiarize you with English major requirements and expectations.

University Resources

To introduce you to department, college, and university resources that will support you throughout your BYU career and help you in your search for internships.

Customized Undergraduate Career

To assist you in tailoring your undergraduate studies to meet your post-BYU plans.

Academic and Professional Skills

To encourage your identification and cultivation of the skills you need to reach both academic and professional goals.

Top

Honors Masterpieces of World Literature 1

Major world civilizations from antiquity through the early Italian Renaissance, approached through literature and emphasizing socioeconomic, religious, polilt ical, intellectual, and aesthetic developments.

ENGL 201

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Please contact the individual department for outcome information.

Masterpieces of World Literature 1

Major world civilizations from antiquity through the early Italian Renaissance, approached through literature and emphasizing socioeconomic, religious, political, intellectual, and aesthetic developments.

Rhetoric and Civilization 2

Western civilization from the Renaissance to the present emphasizing rhetoric; the arts of language and their role in shaping institutions, values, and beliefs.

ENGL 212

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring Contact Department
Offered	Honors also.

Course Outcomes

Effective Writing and Communication

Demonstrate your understanding of the texts through written and oral assignments as well as through papers and essay exams.

Understanding Vocabulary and Canons of Rhetoric

Understand the vocabulary and canons of rhetoric so that you can use the art of rhetoric effectively in listening to, reading, and analyzing the discourse of others, and in speaking and writing clearly and persuasively.

Understanding Texts

Demonstrate your understanding of the texts through written and oral assignments as well as through papers and essay exams.

Careful and Critical Reading

Read carefully and critically primary texts from people and periods in history that have shaped the civilization we now have-particularly our intellectual traditions and values, but also our political, social, educational, and religious institutions.

Creative Writing

Introductory instructions in the writing of poetry, the short story, and the essay.

ENGL 218R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Effort, Discipline, and Knowledge

Demonstrate effort and discipline in their creative work as well as a knowledge of various creative genres and their conventions.

Reading Literary Models Analytically

Read literary models analytically, with an eye to authorial intention and technique and be able to articulate the same.

Grammar, Punctuation, and Style

Use correct grammar, punctuation, and an appropriate style in their writing.

Successful Writing using Literary Models

Write a successful poem, short story, or essay using literary models and following explicit instructions from the teacher.

Revising, Editing, and Sharing

Revise intelligently, edit carefully, and share one's work with others in the class.

Composing Personal History

Composing personal history through writing, mementos, oral history, chronologies, letters, documents, journals, and other mediums.

ENGL 220

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Independent Study also.
Taught	Winter

Course Outcomes

Preserving Family History

Students will be able to use technologies (paper, print, and digital media) effectively for composing, editing, and preserving family history.

Writing Narrative

Students will be able to write, revise, and edit narratives, sketches, and memoirs effectively.

Interviewing

Students will use methods of interviewing and researching effectively.

Top

Studies in Literature

Introduction to various literary themes, forms, and/or authors.

ENGL 230

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Does not fulfill English major requirements.
Taught	Fall, Winter
Offered	Independent Study also.

Course Outcomes

Critical Reading Strategies

Demonstrate basic proficiency in reading and interpreting fiction, drama, and poetry.

Effective Writing and Communication

Demonstrate your understanding of literature through written and oral assignments , including papers and exams.

Ethical and Aesthetic Contexts

Be able to discuss the ethical and aesthetic implications of choosing particular reading strategies including those that center on texts, genres, authors, readers.

Shakespeare

Careful reading and discussion of six to eight major plays.

ENGL 232

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Does not fulfill English major requirements.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department
Offered	Independent Study also.

Course Outcomes

Critical Reading Strategies

Demonstrate basic proficiency in reading and interpreting Shakespeare's plays.

History, Context, Genres and Themes, and Ethics

Explain the historical and literary contexts, genres and themes, and ethical dimensions of Shakespeare’s representative works.

Effective Writing and Communication

Demonstrate your understanding of Shakespeare through written and oral assignments , including papers and exams.

Top

Studies in American Literature

Selected readings in American literature.

ENGL 235

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring Contact Department

Course Outcomes

Critical Reading Strategies

Demonstrate basic proficiency in reading and interpreting American literature.

Effective Writing and Communication

Demonstrate your understanding of American literature through written and oral assignments, including papers and exams.

History, Context, Genres and Themes, and Ethics

Explain the historical and literary contexts, genres and themes, and ethical dimensions of representative works of American literature.

Top

Studies in English Literature

Selected readings in English literature.

ENGL 236

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None

Course Outcomes

Critical Reading Strategies

Demonstrate basic proficiency in reading and interpreting English literature.

Effective Writing and Communication

Demonstrate your understanding of English literature through written and oral assignments, including papers and exams.

History, Context, Genres and Themes, and Ethics

Explain the historical and literary contexts, genres and themes, and ethical dimensions of representative works of American literature.

Top

The Bible as Literature

Introduction to the literary forms and aesthetic strategies of the Bible.

ENGL 238

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Reading

We will discover together better ways to read the Bible with the sensitivity and awareness that its superb artistry and unparalleled insight warrant, reconstructing from the textual evidence more of what is expressed and implied in this book that is the seedbed of our literature and much of our language.

Genres

We will familiarize ourselves with biblical genres and conventions ranging from parable to proverb, from typology to type scene, from paradox to parallelism in order to enhance our ability to read ourselves into biblical statements.

Personal Application

We will apply the advantages of the reading practices we discover through our Bible reading-such techniques as reading between the lines, thinking against the grain, likening to ourselves-to texts beyond the Bible, ideally as far as into daily life. We will learn to apply biblical insights to ourselves through practice in likening scriptural narrative and poetry and *wisdom* to our own experience.

Critical and Historical Contexts

We will expand our perceptions of biblical texts by viewing them through a wide spectrum of critical approaches and by investigating their implications through the lens of their historical context.

Written Analysis

We will enhance our ability to express our hard-earned individual insights into biblical texts by writing research-intensive essays and answering probing literary questions about the Bible.

Life-long Learning

We will in all these ways make the Bible "a source of practical wisdom, spiritual insight, and aesthetic pleasure, a vital perspective upon history and the diversity of human experience, and a guide for making ethical choices in our daily lives" not just for this class but forever, initiating a

process of study of the Bible that at its best is as long and as deep as life.

Top

Introduction to English Studies

Introduction to the discipline of English studies, including the fundamental concepts and practice of literary analysis and critical theory.

ENGL 251

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	Engl 251 fulfills the GE Letters requirement only for English majors and minors. Other students will not receive GE Letters credit for this course.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Reading Approaches

Students will learn foundational approaches to reading literary, critical, and theoretical texts.

Disciplinary Questions

Students will identify and classify fundamental issues and questions related to literary analysis.

Literary Analysis

Students will produce readings of literature that employ this lexicon, demonstrate these reading approaches, and engage these fundamental issues and questions.

Literary-critical Lexicon

Students will demonstrate mastery of a basic literary-critical lexicon.

Top

Literature of the Latter-Day Saints

Fiction, poetry, drama, folklore, essay, etc., emerging from and reflecting upon the LDS experience from Joseph Smith to the present.

ENGL 268

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Critical Reading Strategies

Demonstrate basic proficiency in reading and interpreting LDS literature

History, Context, Genres and Themes, and Ethics

Explain the historical and literary contexts, genres and themes, and ethical dimensions of representative works of LDS literature.

Effective Writing and Communication

Demonstrate your understanding of LDS literature through written and oral assignments, including papers and exams.

Top

Exploration of Teaching

Field-based initial teaching experience directed at helping prospective teachers experience demands and opportunities associated with teaching secondary students.

ENGL 276R

Hours	3.0 Credit, 4.0 Lecture, 0.0 Lab
Prerequisites	Successful application into the program; FBI fingerprint and background clearance.
Taught	Fall, Winter

Course Outcomes

Learning Styles

Evaluate a variety of learning styles.

Instructional Resource File

Create an instructional resource file.

Newletter, Bulletin Board, and Resource Aid

Create school newsletter, bulletin board display and an instructional resource aid.

Lesson Recording and Analysis

Video record one lesson to view and analyze and review with peers.

Moral Dimensions of Teaching

Analyze case study incidences regarding the moral dimensions of teaching.

Lesson Plans

Generate lesson plans in relation to observations, school cultures, district and state mandates, and contemporary educational theory.

British Literary History 1

Development of ideas, movements, genres, and styles in early English literature as illustrated through representative texts.

ENGL 291

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251; or concurrent enrollment.
Taught	Fall, Winter, Spring Contact Department
Offered	Independent Study also.

Course Outcomes

Representative Authors, Genres, Works, and Movements

Identify and discuss representative authors, genres, works, and movements during the medieval and early modern periods.

Historical Development and Cultural Context

Through writing, exams, and other activities, demonstrate an understanding of the historical development and cultural context of literature written in English before 1789.

British Literary History 2

Development of ideas, movements, genres, and styles in later English literature as illustrated through representative texts.

ENGL 292

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251; or concurrent enrollment.
Taught	Fall, Winter, Summer Contact Department
Offered	Independent Study also.

Course Outcomes

Historical Development and Cultural Context

Through writing, exams, and other activities, demonstrate an understanding of the historical development and cultural context of literature written in the British tradition after 1789.

Representative Authors, Genres, Works, and Movements

Identify and discuss representative authors, genres, works, and movements in the Romantic, Victorian, and modern periods.

American Literary History

Development of ideas, movements, genres, and styles in American literature as illustrated through representative texts.

ENGL 293

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251; or concurrent enrollment.
Taught	Fall, Winter, Spring Contact Department
Offered	Independent Study also.

Course Outcomes

Representative Authors, Works, and Movements

Identify, contextualize, and explain representative authors, works, and movements in American literature.

Historical Development

Through writing, exams, and other activities, demonstrate an understanding of the historical development and cultural context of American literature.

Transatlantic Literary History

This course explores British and American literary history from the eighteenth through the twenty-first centuries by studying key figures, movements, genres, events, themes, and ideas through the lens of transatlantic literary exchange.

ENGL 294

Hours	6.0 Credit, 6.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251; or concurrent enrollment.
Taught	Winter

Course Outcomes

Representative Authors, Works, and Movements

Identify and discuss representative authors, works, and movements in the transatlantic literary tradition.

Historical Development and Cultural Context

Through writing, exams, and other activities, demonstrate an understanding of the historical development and cultural context of the transatlantic literary tradition.

Top

Writing Literary Criticism

How to address an academic audience, support arguments, and engage effectively in critical conversations about literature.

ENGL 295

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	English major status.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Research

Students will:
1) find and interpret credible research sources
2) integrate them purposefully in support of their own literary analysis
3) document these sources correctly using MLA format.

Professionalization

Students will effectively employ the appropriate conventions of style, form, and tone in literary scholarship in written and oral communications.

Writing

Students will construct a conference length (8-10 page) paper employing purposeful rhetorical moves to develop a coherent and logical argument that makes a significant literary claim.

Process

Students will mature as writers as they devise productive and flexible individual and collaborative processes of writing, including methods for gathering evidence, organizing their argument, prewriting, drafting, revising, editings, proofreading, and peer reviewing.

Top

English Literature in a Cultural Setting

ENGL 300R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Note	For Study Abroad students only.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Writing in Geographical Context

Be able to write coherently and persuasively about the artistic works studied and visited during the course.

Literary History

Possess a sound understanding of British literary history, demonstrating a general awareness of major literary periods, authors, and sites.

Literary Analysis

Be able to analyze the principal texts from the course carefully and in some detail.

Contextual Understanding

Be capable of accurately and intelligently relating artistic works to the main historical, aesthetic, and philosophical trends of their times.

Top

Critical Reading

Multidisciplinary approaches to literacy. Strategies and contexts for critical reading and thinking.

ENGL 305

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Course not offered

This course is not offered regularly.

Top

Travel Writing

Theory and practice of writing about travel experience.

ENGL 306

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	None
Note	For Study Abroad or Travel Study students only.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Course not offered

This course is not offered regularly.

Honors Writing and Tutoring

Instruction in advanced writing and peer tutoring. Students will learn to design and present ideas to be successfully understood by specified audiences; write coherent and unified texts; use various methods of invention, organization, and style; utilize the library and electronic resources; evaluate and comment on the writing of others. Students will learn to understand not only their own writing process but help tutees do the same; communicate orally in class and in one-on-one conferences; master composition and peer tutoring theory and practice.

ENGL 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	

Course Outcomes

Theoretical Foundations

Understand theoretical foundations of peer tutoring and composition pedagogy.

Tutoring Skills

Develop skill and flexibility in employing a variety of methods and strategies to help students of varying abilities and personalities understand and apply principles of writing effectively and thereby improve as writers

Professional Conversations

Engage in professional conversations about writing, tutoring writing, writing centers, and writing fellows programs, whether through research and writing, participating in local, regional, or national conferences, or publishing in relevant venues.

Writing and Tutoring

Instruction in advanced writing and peer tutoring. Students will learn to design and present ideas to be successfully understood by specified audiences; write coherent and unified texts; use various methods of invention, organization, and style; utilize the library and electronic resources; evaluate and comment on the writing of others. Students will learn to understand not only their own writing process but help tutees do the same; communicate orally in class and in one-on-one conferences; master composition and peer tutoring theory and practice.

ENGL 310

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	WRTG 150
Taught	Fall, Winter

Course Outcomes

Theoretical Foundations

Understand theoretical foundations of peer tutoring and composition pedagogy.

Tutoring Skills

Develop skill and flexibility in employing a variety of methods and strategies to help students of varying abilities and personalities understand and apply principles of writing effectively and thereby improve as writers.

Professional Conversations

Engage in professional conversations about writing, tutoring writing, writing centers, and writing fellows programs, whether through research and writing, participating in local, regional, or national conferences, or publishing in relevant venues.

Top

Honors Writing About the Arts and Humanities

Writing for both academic and mass audiences about the functions, meanings, values, and qualities of art and the humanities. Library research paper.

ENGL 311

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	First-year writing, junior or senior status.
Note	Carries GE Advanced Written and Oral Communication credit.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Process

Employ informed and flexible processes for writing and speaking, including creating and/or finding ideas, evidence, and data to write about; planning and drafting; revising; editing; and designing or presenting a message so that it is successfully understood by a specified audience.

Structure

Write coherent and unified texts, including effective introductions, clear thesis statements, supporting details, transitions, and strong conclusions.

Rhetorical Situation

Use various methods of invention, organization, and style to adapt written and oral forms of communication to a specific rhetorical situation.

Sources

Utilize the library and electronic resources to locate relevant information, assess its reliability and usefulness, and effectively and ethically incorporate it into their own writing by following an appropriate style of documentation.

Peer Revision

Effectively evaluate and comment on the writing of others to facilitate revision.

Style

Write in a correct, clear, and graceful prose style.

Audience

Write and speak effectively about the arts to academic and general audiences and for a variety of purposes.

Critical Reading

Critically read and evaluate different artistic mediums as well as scholarship in the humanities.

Top

Writing About the Arts and Humanities

Writing for both academic and mass audiences about the functions, meanings, values, and qualities of art and the humanities. Library research paper.

ENGL 311

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	First-year writing, junior or senior status.

Write in a correct, clear, and graceful prose style.

Library

Successfully complete the library tour, tutorial, and tests (if not completed as part of the first-year writing requirement). Successfully complete a library mini-course taught for their major area

and demonstrate the ability to use the library effectively.

Tables and Figures

Demonstrate the ability to create, number, and label tables and figures.

Revision

Effectively evaluate and comment on the writing of others to facilitate revision.

Top

Writing in the Social Sciences

Writing characteristic of disciplines that inquire into human behavior and institutions; correspondence, proposals, library paper, empirical research, and reviews.

ENGL 315

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	First-year writing, junior or senior status.
Note	Carries GE Advanced Written and Oral Communication credit.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department
Offered	Honors also.

Course Outcomes

Process

Employ informed and flexible processes for writing and speaking, including: creating and/or finding ideas about which to write; collecting evidence and data; planning and drafting; revising; editing; and designing or presenting a message so that it is successfully understood by a specified audience.

Structure

Write coherent and unified texts, including effective introductions, clear thesis statements, supporting details, transitions, and strong conclusions.

Rhetorical Situation

Use various methods of invention, organization, and style to adapt written and oral forms of communication to specific rhetorical situations.

Sources

Utilize the library and electronic resources to locate relevant information, assess its reliability and usefulness, and effectively and ethically incorporate it into their own writing by following an appropriate style of documentation.

Style

Write in a correct, clear, and graceful prose style.

Library

Successfully complete the library tour, tutorial, and tests (if not completed as part of the first-year writing requirement). Successfully complete a library mini-course taught for their major area and demonstrate the ability to use the library effectively.

Tables and Figures

Demonstrate the ability to create, number, and label tables and figures.

Revision

Effectively evaluate and comment on the writing of others to facilitate revision.

Top

Honors Technical Communication

Effective processes of written, oral, and visual technical communication, including collaborative processes. Writing for academic and professional audiences.

ENGL 316

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	First-year writing, junior or senior status.
Note	Carries GE Advanced Written and Oral Communication credit.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Process

Top

Writing Creative Nonfiction

Creations of style and technique in prose nonfiction; discipline and practice of the writer.

ENGL 317R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 218R; or instructor's consent.
Taught	Fall, Winter

Course Outcomes

Effort, Discipline, and Knowledge

Demonstrate effort and discipline in crafting creative nonfiction and display a knowledge of its conventions.

Reading Literary Models Analytically

Read creative nonfiction models analytically, with an eye to authorial intention and technique and be able to articulate the same.

Grammar, Punctuation, and Style

Use correct grammar, punctuation, and an appropriate style in creative nonfiction.

Successful Writing using Literary Models

Write a variety of essays using literary models and following explicit instructions from the teacher.

Revising, Editing, and Sharing

Revise intelligently, edit carefully, and share one's work with others in the class.

Top

Writing Fiction

Creation of style and technique in prose fiction; discipline and practice of the writer.

ENGL 318R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 218R; or instructor's consent.
Taught	Fall, Winter

Course Outcomes

Effort, Discipline, and Knowledge

Demonstrate effort and discipline in crafting fiction and display a knowledge of its conventions.

Reading Literary Models Analytically

Read fiction models analytically, with an eye to authorial intention and technique and be able to articulate the same.

Grammar, Punctuation, and Style

Use correct grammar, punctuation, and an appropriate style in fiction.

Successful Writing using Literary Models

Write a variety of fiction using literary models and following explicit instructions from the teacher.

Revising, Editing, and Sharing

Revise intelligently, edit carefully, and share one's work with others in the class.

Top

Writing Poetry

Creation of style and technique in poetry; discipline and practice of the poet.

ENGL 319R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 218R; or instructor's consent.
Taught	Fall, Winter
Offered	Independent Study also.

Course Outcomes

Effort, Discipline, and Knowledge

Demonstrate effort and discipline in crafting poetry and display a knowledge of its conventions.

Reading Literary Models Analytically

Read poetry models analytically, with an eye to authorial intention and technique and be able to articulate the same.

Grammar, Punctuation, and Style

Use correct grammar, punctuation, and an appropriate style in poetry.

Successful Writing using Literary Models

Write a variety of poems using literary models and following explicit instructions from the teacher.

Revising, Editing, and Sharing

Revise intelligently, edit carefully, and share one's work with others in the class.

Writing for Children and Adolescents

Theory and practice of writing prose and verse for youth readership. Specific attention to requirements of picture books, middle-grade novels, and young adult stories.

ENGL 320R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 218R
Taught	Fall, Winter
Offered	Independent Study also.

Course Outcomes

Effort, Discipline, and Knowledge

Demonstrate effort and discipline in crafting prose and verse for a young readership and display a knowledge of relevant conventions.

Reading Literary Models Analytically

Read models for picture books, middle-grade novels, and young adult stories analytically, with an eye to authorial intention and technique and be able to articulate the same.

Grammar, Punctuation, and Style

Use correct grammar, punctuation, and an appropriate style in genres for younger readers.

Successful Writing using Literary Models

Write a variety of pieces for younger readers using literary models and following explicit instructions from the teacher.

Revising, Editing, and Sharing

Revise intelligently, edit carefully, and share one's work with others in the class.

Top

English Department Reading Series

Weekly readings of poetry, essays, and fiction by distinguished creative writers.

ENGL 321R

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Processing Literary Models Analytically

Analyze poetry, fiction, and creative nonfiction presented orally, with an eye to authorial intention and technique and be able to articulate the same.

Top

Fundamentals of Rhetoric

Historical study of rhetorical theory and criticism, emphasizing both fundamentals and key debates extending from classical to contemporary views and practices.

ENGL 322

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

History of Rhetoric

Identify issues debated in the history of rhetoric and trace how positions in the debates change among various theorists and time periods.

Rhetorical Theories

Explain and apply principles from rhetorical theories to explicate, evaluate, and create effective theories/ curricula and effective spoken and written texts.

Debates in the History of Rhetoric

Students will be able to identify issues debated in the history of rhetoric and trace how positions in the debates change among various theorists and time periods.

Analysis

Students will be able to explain and apply principles from rhetorical theories to explicate, evaluate, and create both effective theories/ curricula and effective spoken/ written texts.

Top

Writing with Style

Developing stylistic competency and range in nonfiction writing, especially at the sentence and paragraph levels.

ENGL 324

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Writing

Students will use grammar, punctuation, figures, and various styles as appropriate to differing purposes, audiences, occasions, and genres.

Explication

Students will explicate the meanings and evaluate the quality of a text's style.

Visual Rhetoric

Rhetorical perspectives on the theory, criticism, and production of images and other visual texts, including visual elements of literary texts.

ENGL 325

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department

Course Outcomes

Research and Theory

Discuss current research and theory regarding the presentation of visual information.

Rhetorical Discourse

Explain the purposes, modes, and persuasive effect that visual communication has in various forms of rhetorical discourse.

Design Vocabulary and Visual Conventions

Use current design vocabulary and demonstrate an understanding of accepted visual conventions.

Visual Texts in Multiple Media

Identify, analyze, create, and critique visual texts in multiple media, using the appropriate terminology and theories.

Content, Organization, and Style

Make decisions regarding content, organization, and style in a variety of visual genres.

Visual Discourse Considerations

Articulate ethical, cultural, technical, and legal considerations implicit in visual discourse.

Digital Culture

Analyzing the virtual rhetorical spaces and culture created by digital technologies, focusing on interactivity, social networking, and media convergence.

ENGL 326

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department

Course Outcomes

Digital Media

Students will understand the role of digital media within the context of English studies, particularly in literature, rhetoric (persuasion and public address), and education.

Rhetorical Participation

Students will be savy participants in the digital realm by using sound rhetorical practices for audience creation, ethical appeal, and privacy issues.

Studies in Rhetoric

Special topics in rhetorical history, theory, and criticism.

ENGL 327R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter Contact Department

Course Outcomes

Rhetorical Principles

From a more specialized focus on particular questions, theorists, practices, or genres in rhetoric, students will be able to explain and use rhetorical principles and practices to explicate, evaluate, and create a broad array of effective spoken and written texts.

Rhetorical Evaluation

From a more specialized focus on particular questions, theorists, practices, or genres in rhetoric, students will be able to evaluate the quality of rhetorical theories and practices.

Studies in Composing

Special topics in composing in different media (visual, digital, aural) and genres for a range of purposes and audiences.

ENGL 328R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter Contact Department

Course Outcomes

Principles and Practices

From a more specialized focus on particular questions, theorists, practices, or genres in the field of composition studies, students will be able to explain and use rhetorical principles and practices to explicate, evaluate, and create effective spoken and written texts in multiple genres and media.

Evaluation

From a more specialized focus on particular questions, theorists, practices, or genres in the field of composition studies, students will be able to evaluate the quality of composition theories and practices.

Top

Teaching Grammar and Usage in Secondary Schools

Language issues, particularly grammar, usage, and pedagogy, for students preparing to teach English at the secondary level.

ENGL 329

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 276R
Note	Required before student teaching.
Taught	Fall, Winter

Course Outcomes

Understanding Grammar

Students will be able to understand and explain the basic principles of English grammar and usage.

Teaching Grammar

Students will be able to design and implement effective instruction of English grammar and usage.

Top

Literary English: History and Style

Developing a framework of English linguistic history; characterizing a style of literary text through analysis of register, diction, and syntactical patterns; and developing an appreciation of how linguistic texture of texts creates meaning.

ENGL 330

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295; Engl 291; either Engl 292 & 293, or Engl 294.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Language Change

Students will develop a framework of English linguistic history; they will be able to trace changes in morphological, syntactical, lexical stratification, and stylistic patterns from Old English to Present Day English.

Stylistic Analysis

Students will learn how to characterize a style of a literary text through analysis of register, diction, and syntactical patterns.

Meaning of Linguistic Textures

Students will develop an appreciation of how the linguistic texture of texts creates meaning.

The English Novel

Novels selected according to time period or theme from the past three centuries.

ENGL 333

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 292 & ENGL 295; or ENGL 294 & ENGL 295; Engl 291. (Engl 293 may also be a prerequisite option.)
Taught	Fall

Course Outcomes

Critical Analysis

Analyze selected British novels in order to create a foundation for the further study of literature.

Resesarch Strategies

Form a research strategy appropriate to the study of British novels, independently locate relevant digital and print sources, and draw upon these sources to develop a focused and effective written argument about a British novel(s).

Development of the Novel

Explain the general formal and historical development of the British novel and define a coherent approach to the study of British novels.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

The American Novel

Representative novels of the American tradition from the late eighteenth century to the present.

ENGL 336

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 293 & ENGL 295; or ENGL 294 & ENGL 295; Engl 291. (Engl 292 may also be a prerequisite option.)
Taught	Winter
Offered	Independent Study also.

Course Outcomes

Research Strategies

Form a research strategy appropriate to the study of American novels, independently locate relevant digital and print sources, and draw upon these sources to develop a focused and effective written argument about an American novel(s).

Historical Development

Provide an overview of the historical development of the American novel and name broadly defined thematic concerns of representative American novelists.

Literary Cultures

Demonstrate orally and in writing an understanding of the variety of cultures--including literary cultures--comprising American literary history.

Interpretive Skills

Demonstrate through writing assignments, in-class discussions, and exam performance sharpened aesthetic enjoyment, analytical and critical confidence, and research and writing capacity.

Top

Advanced Studies in Contemporary Creative Non-Fiction

ENGL 337R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Analysis

Read critically and analyze selected literary texts selected with a specific genre focus.

Research Strategies

Form a research strategy appropriate to the texts and genre studied in the course, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument about the texts studied.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Advanced Studies in Contemporary Drama

ENGL 337R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Analysis

Read critically and analyze selected literary texts selected with a specific genre focus.

Research Strategies

Form a research strategy appropriate to the texts and genre studied in the course, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument about the texts studied.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Advanced Studies in Contemporary Fiction

ENGL 337R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Analysis

Read critically and analyze selected literary texts selected with a specific genre focus.

Research Strategies

Form a research strategy appropriate to the texts and genre studied in the course, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument about the texts studied.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Advanced Studies in Contemporary Poetry

ENGL 337R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Analysis

Read critically and analyze selected literary texts selected with a specific genre focus.

Research Strategies

Form a research strategy appropriate to the texts and genre studied in the course, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument about the texts studied.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Advanced Studies in Genre

Advanced studies in fiction, drama, poetry, or creative nonfiction.

ENGL 337R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Analysis

Read critically and analyze selected literary texts selected with a specific genre focus.

Research Strategies

Form a research strategy appropriate to the texts and genre studied in the course, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument about the texts studied.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Literary Studies of the Bible

Scholarly engagement with the aesthetic forms and cultural context of Biblical texts.

ENGL 338

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 291 & ENGL 295
Taught	Winter Contact Department
Offered	Independent Study also.

Course Outcomes

Critical Analysis

Read critically and analyze Biblical texts using methods of analysis typically used in the study of literature.

Biblical Scholarship

Learn basic principles informing scholarly approaches to the Bible as literature, including questions of textual history, genre, and translation.

Interpretation

Gain familiarity and facility with a range of interpretive methods.

Research Strategies

Form an appropriate research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective and informed work of biblical criticism.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Studies in Nonfiction

Critical study of creative nonfiction including the essay, memoir, travel writing, nature writing, autobiography, and other sub-genres.

ENGL 339

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall

Course Outcomes

knowledge

Students will demonstrate an advanced level of knowledge in a chosen specialty area

Top

English Drama: Beginnings to 1800, Excluding Shakespeare

Selected plays from medieval, Tudor, Stuart, Restoration, and 18th-century drama.

ENGL 341

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 291 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Development of English Drama

Understand in general, and in several details, the development of drama in England, and, in your writing, intelligently discuss major developments, continuities, or turning points.

Interpretation

Demonstrate a sure knowledge of the plays we read, and be able to interpret those plays.

Textual Analysis

Explain the significance of specific passages and elements of each play.

Theoretical Application

Relate selected theoretical ideas to your understanding of the plays we read.

Top

Modern American Drama

ENGL 343

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Analysis

Read critically and analyze selected dramatic texts along with critical and/or interpretative texts.

Research Strategies

Form a research strategy appropriate to the study of drama, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument about the texts studied.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Modern British Drama

ENGL 343

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Analysis

Read critically and analyze selected dramatic texts along with critical and/or interpretative texts.

Research Strategies

Form a research strategy appropriate to the study of drama, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument about the texts studied.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Modern English and American Drama

ENGL 343

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Analysis

Read critically and analyze selected dramatic texts along with critical and/or interpretative texts.

Research Strategies

Form a research strategy appropriate to the study of drama, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument about the texts studied.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Literature and Film

Emphasis on film as an interpretation of texts. Includes International Cinema.

ENGL 345

Hours	3.0 Credit, 3.0 Lecture, 0.5 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall

Course Outcomes

Research Paper

Write a research paper using proper MLA guidelines that is situated in the context of recent scholarship in the field.

Effective Research Strategy

Form a research strategy. Independently identify and locate relevant print and digital sources, and incorporate these sources into a well-formed argument.

Technical Contexts

Learn the vocabularly of cinematic technique and read films in terms of both technical and theoretical aspects.

Adaption Theory

Learn and apply adaptation theory, in terms of both literature and film and other media.

Top

(Engl-ClCv) Greek and Roman Classics and the English Tradition

Major works by such authors as Homer, the Greek and Roman tragedians, Thucydides, Vergil, and Petronius in English translation, emphasizing their influence on English and American literature.

ENGL 355

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Winter Contact Department

Course Outcomes

Comprehension

Successful students will demonstrate, through essays, written examination, and class discussion, a sound incipient understanding of the themes, situations, characters, formal structures, and contexts of representative classical and English texts.

Critical Reading

Read critically and analyze selected classical texts in translation in the context of English literature.

Criticism

Successful students will demonstrate, through essays and written examination, the ability to practice literary criticism in the field of classical reception.

Produce Polished and Competent Formal Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Literary History

Successful students will demonstrate, through exams and essays, an incipient understanding of some of the ways that classical literature and culture has shaped, and continues to shape, the development of English literature.

Appreciation

Successful students will have developed an informed sense of the quality of the texts, of their beauty (or not), of their relevance (or not) to life as a whole, and similar range of experiences which

may or may not be demonstrable through academic evaluation.

Top

Myth, Legend, and Folktales

Major mythic and legendary works that provide background for the literary tradition.

ENGL 356

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall

Course Outcomes

Critical Analysis

Students will be able to read critically and analyze major and selected minor texts and trends in myth, legend, and folktale over time and place.

Research and Writing Strategies

Students will be able to form research strategies and write critical and informational papers that reflect their use and application of these topics.

Comparative Method

Students will be able to critically identify the commonalities and difference in myth, legend, and folktale.

Top

African American Literature

ENGL 358R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Analysis

Read critically and analyze selected literary texts related to the general history or a specific dimension of African American literature.

Interpretive Contexts

Demonstrate a knowledge of the history, nature, aesthetics, and broadly defined thematic concerns of African American literature as a literary tradition situated within such broader contexts as American culture and the cultures of the black diaspora.

Research and Writing Skills

Form an appropriate research strategy, independently locate relevant digital and print sources, and draw upon these to develop a focused and effective written argument. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Asian American Literature

ENGL 358R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Texts and Themes

In their research writing, formal writing, class discussion participation, and exam performance, students will demonstrate a familiarity with representative Asian American authors and texts and with Asian American character, cultures, themes, and issues.

Identity and Culture

Relying on a rather broad understanding of the term "Asian American," students will-through class discussion participation and all class writing assignments-show a maturing understanding of what "being American" does and does not constitute for Asian Americans and will suggest ways in which Asian American immigrants, culture, and art have influenced wider American culture.

Ethical Relation

Through semester-end self-evaluations and through final examination performance, students will demonstrate an increased appreciation for their own identities, a preparedness to read Asian American literature throughout their lives, and a deeper sense of their responsibilities to fellow Latter-day Saints around the world

Top

Ethnic Literatures

Study of literary texts representative of a thoughtfully focused dimension of a given ethnic group.

ENGL 358R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Literary Analysis

By reading a variety of examples of literature written both by and about a given ethnic group, students expand their familiarity with a distinctive subset of American literature and its links to other cultures and post-colonial literary traditions.

Interpretive Context

Through various classroom activities and assignments, students demonstrate understanding of the history, aesthetics, and thematic concerns of the ethnic literature in the broader contexts of American literature.

Research Strategy

Students form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective and polished written argument centered on an aspect of the ethnic literature.

Professional Writing and Stylistics

Students produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Jewish American Literature

ENGL 358R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Literary Analysis

Read critically and analyze selected literary texts representative of the general history or of a thoughtfully focused dimension of Jewish Americans.

Professional Writing and Stylistics

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Effective Research Strategy

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument.

Literary History

Demonstrate knowledge of the history, nature, aesthetics, and broadly defined thematic concerns of Jewish-American literature and its relation to broader American culture.

Top

Latino/a American Literature

ENGL 358R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Literary Analysis

By reading a selected literary texts representative of the general history or of a thoughtfully focused dimension of Latin American literature, students will expand their ability to critically analyze American literary texts and genres.

Interpretive Contexts

Demonstrate a knowledge of the history, nature, aesthetics, and broadly defined thematic concerns of Latin American literature. Compare and contrast Latin American literature with "mainstream" American literature.

Research and Writing Skills

Form an appropriate research strategy, independently locate relevant digital and print sources, and draw upon these to develop a focused and effective written argument. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Native American Literature

ENGL 358R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Literary Analysis

By reading a variety of example of literature written both by and about Native Americans over the last four centuries, students will expand their familiarity with a disinctive subset of American literature and its links to other cultures and post-colonial literary traditions.

Professional Writing and Stylistics

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Effective Research Strategy

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective and polished written argument centered on an aspect of Native American literature.

Intertpretive Contexts

Students will, through classroom discussion, exams, and written assignments, demonstrate a sure knowledge of the history, aesthetics, and thematic concerns of Native American literatures in the broader contexts of American literature.

Top

The Short Story

Critical study of American, English, and European short stories, emphasizing those of the twentieth century.

ENGL 359

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Critical analysis

Analyze selected short stories to develop the skills of literary criticism.

Genre analysis

Explain the conventions and historical development of the short story genre.

Research

Form a research strategy appropriate to the study of short stories by independently locating relevant print and digital sources and drawing upon these sources to develop a focused and effective written argument about selected short stories

Scholarly writing

Produce a polished research paper following MLA formatting and citation guidelines

Top

American Literature to 1800

Major and selected minor writers and literary trends from the colonial and early national periods.

ENGL 360

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 293 & ENGL 295; or ENGL 251 & ENGL 294 & ENGL 295
Taught	Fall

Course Outcomes

Developing an Effective Written Argument

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument.

Critical Reading and Analysis

Read critically and analyze major and selected minor texts and literary trends from the colonial and early national periods of American literature.

Produce Polished, Compentent, Formal Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

American Literature 1800 - 1865

Major and selected minor writers and literary trends from 1800 to 1865.

ENGL 361

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 293 & ENGL 295; or ENGL 251 & ENGL 294 & ENGL 295
Taught	Fall

Course Outcomes

Developing an Effective Written Argument

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument.

Critical Reading and Analysis

Read critically and analyze major and selected minor American texts and literary trends from the period of 1800 to 1865.

Produce Polished, Competent, Formal Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

American Literature 1865 - 1914

Major and selected minor writers and literary trends from 1865 to 1914.

ENGL 362

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 293 & ENGL 295; or ENGL 251 & ENGL 294 & ENGL 295
Taught	Winter
Offered	Independent Study also.

Course Outcomes

Developing an Effective Written Argument

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument.

Critical Reading and Analysis

Read critically and analyze major and selected minor texts and literary trends from the period of 1865 to 1914.

Produce Polished, Competent, Formal Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

American Literature 1914 - 1960

Major and selected minor writers and literary trends from 1914 to 1960.

ENGL 363

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 293 & ENGL 295; or ENGL 251 & ENGL 294 & ENGL 295
Taught	Fall
Offered	Independent Study also.

Course Outcomes

Critical Literary Analysis

Read critically and analyze major and selected minor texts and literary trends from the period of 1914 to 1960.

Effective Research Strategy

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument.

Professional Writing and Stylistics

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Literature and Cultures of the American West

Literature and cultural representations of the American West and the frontier.

ENGL 364

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 293 & ENGL 295; or ENGL 251 & ENGL 294 & ENGL 295
Taught	Fall

Course Outcomes

One

Students will be able to cite major texts of western American literature and theory to support logical arguments about western literature and culture.

Two

Students will be able to place a variety of western literary texts within historical, religious, environmental, social, and literary contexts, considering the American West as a distinct US region and as an engine in the construction of broader American and international cultures.

Three

Students will be able to persuasively communicate their mastery of major historical and conceptual themes and issues that are distinctive to the study of the American West demonstrating competence with written conventions of the field.

Critical Reading and Theory

Read critically and analyze in the context of appropriate literary and cultural theories major and selected minor texts and associated with the American West.

Research and Writing

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the literature and cultures of the American West.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

American Literature 1960 to Present

Major and selected minor writers and literary trends from 1960 to the present.

ENGL 365

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 293 & ENGL 295; or ENGL 251 & ENGL 294 & ENGL 295
Taught	Winter

Course Outcomes

Effective Research Strategy

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument.

Critical Literary Analysis

Read critically and analyze major and selected minor texts and literary trends from the period of 1960 to the present.

Professional Writing and Stylistics

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Studies in Poetry

Topics vary.

ENGL 366

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Winter
Offered	Independent Study also.

Course Outcomes

Read Critically

Read critically and analyze selected poetry written in English.

Research

Form a research strategy, independently locate relevant digital and print sources about poetry, and draw upon these to develop an effective written argument.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

American Regional Literature

Literature and cultural representations of a given American region.

ENGL 367R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 293 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Critical Analysis

Read critically and analyze selected literary texts representative of the general history or of a thoughtfully focused dimension of a given American region.

Literary History and Context

Demonstrate knowledge of the history, nature, aesthetics, and broadly defined thematic concerns of the literature at the center of this course.

Top

Southern American Literature

Literature and cultural representations of a given American region.

ENGL 367R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 293 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Urban Literature

Literature and cultural representations of a given American region.

ENGL 367R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 293 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Literature of the Latter-day Saints

Fiction, poetry, drama, folklore, personal essay, and other literature emerging from the LDS experience and expressing various perspectives on it.

ENGL 368

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Literary Analysis

Identify, locate, read critically, and analyze major and selected minor texts and associated with the Latter-Day Saints.

Literary Periods and Genres

Accurately characterize historical periods of LDS literary expression and be able to identify and offer examples of a range of LDS literary genres. Articulate the relevance of LDS literature in the past and present, and connect LDS literary expression to the LDS church, its theology, and to the everyday lives of church members.

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

British Literature to 1500: The Medieval Period

Principal works, mainly in translation, from Britain's medieval period.

ENGL 371

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 291 & ENGL 295
Taught	Winter

Course Outcomes

Critical Literary Analysis

Read critically and analyze literature of Britain's medieval period to 1500.

Literary Contexts

Accurately characterize historical issues and genres of the medieval period.

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

British Literature 1500 - 1603: The Early Renaissance

Drama, poetry, and prose of the early Renaissance.

ENGL 372

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 291 & ENGL 295
Taught	Fall Contact Department

Course Outcomes

Critical Literary Analysis

Read critically and analyze literature of Britain's early Renaissance period (1500 to 1603).

Literary Contexts

Accurately characterize historical issues and genres of the early Renaissance period.

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

British Literature 1660 - 1789: The Enlightenment

Poetry, prose, and drama of the Restoration and eighteenth century.

ENGL 373

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 291 & ENGL 295
Taught	Fall

Course Outcomes

Critical Literary Analysis

Read critically and analyze literature of Britain's Restoration period and eighteenth century (1660 to 1789).

Literary Contexts

Accurately characterize the historical issues and genres of the Restoration period and eighteenth century.

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

British Literature 1789 - 1832: The Romantic Period

Poetry, prose, and drama from Britain's Romantic period.

ENGL 374

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 292 & ENGL 295; or ENGL 251 & ENGL 294 & ENGL 295
Taught	Fall
Offered	Independent Study also.

Course Outcomes

Critical Literary Analysis

Read critically and analyze literature of Britain's Romantic period (1789 to 1832).

Literary Contexts

Accurately characterize historical issues and genres of the Romantic period.

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

British Literature 1832-1900: The Victorian Period

Poetry, prose, and drama from Britain's Victorian period.

ENGL 375

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 292 & ENGL 295; or ENGL 251 & ENGL 294 & ENGL 295
Taught	Winter

Course Outcomes

Critical Literary Analysis

Read critically and analyze literature of Britain's Victorian period (1832 to 1900).

Literary Contexts

Accurately characterize historical issues and genres of the Victorian era.

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

British Literature 1900 - 1950: The Modern Period

Poetry, prose, and drama from Britain's modernist period.

ENGL 376

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 292 & ENGL 295; or ENGL 251 & ENGL 294 & ENGL 295
Taught	Winter

Course Outcomes

Critical Literary Analysis

Read critically and analyze literature of Britain's Modern period (1900 to 1950).

Literary Contexts

Accurately characterize historical issues and genres of the Modern period.

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Teaching English in Secondary Schools

Theories and methods of teaching English and language arts to secondary school students.

ENGL 377

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 276R; concurrent enrollment in Engl 379.
Note	To be taken immediately before student teaching or interning.
Taught	Fall, Winter

Course Outcomes

Lesson Planning

Students will be able to write effective lesson plans with clear objectives and appropriate activities and assessments that promote and measure the desired learning for a variety of learners in an English/language arts classroom.

Unit Planning

Students will be able to develop a unit plan that shows the ability to integrate all areas of language arts; to correlate unit goals, activities, and assessments; and to show understanding of current best practice.

Professionalism

Students will be able to establish patterns for future professional practices by accessing and evaluating ideas in professional journals and conference presentations.

Context and Assessment

Students will be able to show how context influences good instructional decisions and how a variety of assessments can foster student learning as well as measure it for diverse students.

Reflection

Students will be develop their ability to improve as teachers in the future by reflecting on their teaching experiences through both talk and writing.

Read Critically

Students will be able to analyze readings to extract main ideas, synthesize readings with their own ideas/experiences and those of others in the classroom, and reach well-supported conclusions.

Top

Teaching Literature and Reading in Secondary Schools

Theories and methods of teaching literature, reading, and related literacy skills in secondary English classes.

ENGL 378

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 276R
Recommended	Completion of all English major courses.
Note	Required before student teaching.
Taught	Fall, Winter

Course Outcomes

Principles of Reading and Literature

Students will be able to explain the basic principles of reading and literature.

Pedagogy and Diagnosis

Students will be able to design and implement effective reading strategies that reinforce basic principles of reading and that enhance the understanding and appreciation of literature.

Practicum in Secondary English Teaching

Applying content and methods learned in Engl 377 in a school classroom.

ENGL 379

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	ENGL 276R; concurrent enrollment in Engl 377.
Taught	Fall, Winter

Course Outcomes

Contextual Factors in School Setting

Students will be able to analyze contextual factors in a school setting and discern instructional implications that arise from these factors.

Learning Objectives

Students will write appropriate and effective learning objectives that are correlated with state standards and that serve to facilitate learning.

Develop Assessments

Students will be able to develop assessments that measure the learning described in an objective.

Make Adjustments

Students will plan for and make adjustments in their teaching, objectives, and assessments based on students' needs and classroom context.

Establish Presence

Students will establish a teacher's presence in their teaching classrooms.

Reflect and Critique

Students will reflect on and critique their own planning and teaching performance.

Top

British Literature 1950 - Present: The Contemporary Period

Poetry, prose, and drama from Britain and the Commonwealth since 1950.

ENGL 380

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 292 & ENGL 295; or ENGL 251 & ENGL 294 & ENGL 295
Taught	Winter

Course Outcomes

Critical Literary Analysis

Read critically and analyze literature from Britain and the Commonwealth since 1950.

Literary Contexts

Accurately characterize historical issues and genres of the United Kingdom since 1950.

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Chaucer

Intensive study of Chaucer's literature and language from medieval and modern perspectives.

ENGL 381

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 291 & ENGL 295; Either Engl 292 & 293, or Engl 294.
Taught	Winter Contact Department

Course Outcomes

Literary Contexts

Explain the historical and literary contexts, genres and themes, and ethical dimensions of Chaucer's representative works.

Critical Reading Strategies

Develop reading strategies that explore how texts are constructed to present a set of arguments (historical, aesthetic, etc) and use those critical reading skills to interpret the texts' concerns and to trace interrelationships among them.

Secondary Scholarship

Demonstrate familiarity with key secondary scholarship about and critical perspectives of Chaucer's works.

Scholarly Research

Perform scholarly research on Chaucer's works by identifying and evaluating relevant primary and secondary sources, by formulating arguments conversant with these sources, and by articulating those arguments in formal academic writing.

Shakespeare

Intensive reading, discussion, and (in some sections) viewing of plays from the comedy, tragedy, romance, and history genres.

ENGL 382

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 291 & ENGL 295; Either Engl 292 & 293, or Engl 294.
Note	For English majors and minors.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department
Offered	Independent Study also.

Course Outcomes

Literary Contexts

Explain the historical and literary contexts, genres and themes, and ethical dimensions of Shakespeare's representative works.

Critical Reading Strategies

Develop reading strategies that explore how texts are constructed to present a set of arguments (historical, aesthetic, etc) and use those critical reading skills to interpret the texts' concerns and to trace interrelationships among them.

Secondary Scholarship

Develop familiarity with key secondary scholarship about and critical perspectives of Shakespeare's works.

Scholarly Research

Perform scholarly research on Shakespeare's works by identifying and evaluating primary and secondary sources, by formulating arguments conversant with these sources, and by articulating those arguments in formal academic writing.

Milton

Analysis of poetry and selected prose, including detailed study of such work as Paradise Lost, Paradise Regained, and Samson Agonistes.

ENGL 383

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 291 & ENGL 295; Either Engl 292 & 293, or Engl 294.
Taught	Winter Contact Department

Course Outcomes

Literary Contexts

Explain the historical and literary contexts, genres and themes, and ethical dimensions of Milton's representative works.

Critical Reading Strategies

Develop reading strategies that explore how texts are constructed to present a set of arguments (historical, aesthetic, etc) and use those critical reading skills to interpret the texts' concerns and to trace interrelationships among them.

Secondary Scholarship

Demonstrate familiarity with key secondary scholarship about and critical perspectives of Milton's works.

Scholarly Research

Perform scholarly research on the major author's works by identifying and evaluating relevant primary and secondary sources, by formulating arguments conversant with these sources, and by articulating those arguments in formal academic writing.

Top

American Authors

ENGL 384R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295; Engl 291; either Engl 292 & 293, or Engl 294.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Please contact the individual department for outcome information.

Top

Early British Authors

ENGL 384R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295; Engl 291; either Engl 292 & 293, or Engl 294.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Critical Thinking

Develop reading strategies that explore how texts are constructed to present a set of argument (historical, aesthetic, etc.) and use those critical reading skills to interpret the texts' concerns and to trace interrelationships among them.

History, Context, Genres, Themes, and Ethics

Explain the historical and literary contexts, genres and themes, and ethical dimensions of the major author's life and representative works. (A section of the major exam on each author will ask you to discuss these dimensions.)

Critical Thinking

Explain the historical and literary contexts, genres and themes, and ethical dimensions of the major author's life and representative works. (A section of the major exam on each author will ask you to discuss these dimensions.)

Top

Later British Authors

ENGL 384R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295; Engl 291; either Engl 292 & 293, or Engl 294.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Literary Contexts

Explain the historical and literary contexts, genres and themes, and ethical dimensions of the major author's life and representative works.

Secondary Scholarship

Demonstrate familiarity with significant secondary scholarship and critical perspectives on the major author's life and works.

Scholarly Research

Perform scholarly research on the major author's works by identifying and evaluating relevant primary and secondary sources, by formulating arguments conversant with these sources, and by articulating those argument in formal academic writing.

Major Authors

Topics vary.

ENGL 384R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295; Engl 291; either Engl 292 & 293, or Engl 294.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Critical Thinking

Develop reading strategies that explore how texts are constructed to present a set of argument (historical, aesthetic, etc.) and use those critical reading skills to interpret the texts' concerns and to trace interrelationships among them.

Top

British Literature 1603 - 1660: The Late Renaissance

Drama, poetry, and prose of the late Renaissance.

ENGL 385

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 291 & ENGL 295
Taught	Fall Contact Department

Course Outcomes

Critical Literary Analysis

Read critically and analyze literature written in Britain in the later Renaissance period between 1603 and 1660.

Literary Contexts

Accurately characterize historical issues and genres of the late Renaissance period.

Research and Writing Skills

Develop reading strategies that explore how texts are constructed to present a set of arguments (historical, aesthetic, etc) and use those critical reading skills to interpret the texts' concerns and to trace interrelationships among them.

Top

Transnational/Transatlantic Literature

Period-specific courses using transnational models for literary analysis.

ENGL 390R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295; Engl 291; either Engl 292 & 293, or Engl 294.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

knowledge

Students will demonstrate an advanced level of knowledge in a chosen specialty area

Top

Transnational/Transatlantic Literature Before 1800

Period-specific courses using transnational models for literary analysis. Read selected texts in a transatlantic context and in the light of applicable theoretical approaches. Identify and locate appropriate research sources for the study of transatlantic literatures. Incorporate these sources into a research paper and other possible assignments. Produce polished writing free from distracting errors and in accordance with MLA formatting and citation guidelines.

ENGL 390R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295; Engl 291; either Engl 292 & 293, or Engl 294.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Students will demonstrate an advanced level of knowledge in a chosen specialty area

Top

Transnational/Transatlantic Literature from 1800-1900

Period-specific courses using transnational models for literary analysis. Read selected texts in a transatlantic context and in the light of applicable theoretical approaches. Identify and locate appropriate research sources for the study of transatlantic literatures. Incorporate these sources into a research paper and other possible assignments. Produce polished writing free from distracting errors and in accordance with MLA formatting and citation guidelines.

ENGL 390R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295; Engl 291; either Engl 292 & 293, or Engl 294.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Knowledge

Students will demonstrate an advanced level of knowledge in a chosen specialty area

Transnational/Transatlantic Literature from 1900-Present

Period-specific courses using transnational models for literary analysis. Read selected texts in a transatlantic context and in the light of applicable theoretical approaches. Identify and locate appropriate research sources for the study of transatlantic literatures. Incorporate these sources into a research paper and other possible assignments. Produce polished writing free from distracting errors and in accordance with MLA formatting and citation guidelines.

ENGL 390R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295; Engl 291; either Engl 292 & 293, or Engl 294.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Reading

Read selected texts in a transatlantic context and in the light of applicable theoretical approaches.

Research

Identify and locate appropriate research sources for the study of transatlantic literatures. Incorporate these sources into a research paper and other possible assignments.

Effective Writing

Produce polished, competent, formal writing, including a research paper, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Introduction to Folklore

Major types of folklore (e.g., myth, legend, folktale, folksong, custom, and belief); practical experience in collecting folklore.

ENGL 391

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Persuasive Analysis of Folklore Texts

Create and share a persuasive analysis of folklore texts in context by using "logical reasoning and critical analysis."

Categories of Folklore, Folk Narrative, Folk Groups

Identify and remember three categories of folklore, four types of folk narrative, and eight folk groups.

Folkloristic Observations

Produce several brief folkloristic observations, and document those observations using established formats.

Recording and Achiving Local Traditions

Understand some methods of recording and archiving local traditions using "moral discrimination, creative imagination, and independent thought."

Prepetuating or Extinguishing Traditional Practices

Explain the choices and forces that help perpetuate or extinguish traditional practices, both locally and globally.

Theory of Folklore

Identify the shaping functions and theory of folklore.

Fieldwork Project

Produce a focused fieldwork project which includes, among other requirements, an essay, collection, and consent forms created according to the William A.Wilson Folklore Archive.

Top

American Folklore

American folk art and literature and the historical and cultural circumstances from which they developed.

ENGL 392

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251
Taught	Winter

Course Outcomes

Categories of Folklore, Folk Narrative, and Folk Groups

Identify and remember 3 categories of folklore; 4 types of folk narrative; 8 folk groups.

Documenting Folklore

Document folklore using established formats and understand some methods of recording and archiving local traditions in order to "analyze rigorously" American texts and artifacts in context and in terms of how "the American experience has been, and continues to be, constructed and transmitted."

Differing World views

Relate worldview with the performance of traditions, comparing similarities and differences of groups with differing worldviews and obtaining a wider view of American history and diversity.

Intelligent Reasoning

Reason intelligently in oral and written discourse while allowing that traditions are meaningful to participants in places and times different from your present circumstances.

Connecting Folklore Studies

Work independently to connect folklore studies with other course work and life experiences and goals.

Perpetuating or Extinguishing Traditional Practices

Get excited about personal, group, and aesthetic dynamics in the performance of traditions and "question ethically" the choices and forces that help perpetuate or extinguish traditional practices, both locally and globally.

Studies in Folklore

Focused themes and topics in folklore. Topics may include regional or transnational folklore, folklore genres, folk groups, ethnographic research, cross-disciplinary issues, and history of folklore studies.

ENGL 393R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 391
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Analyze

Analyze the assigned texts and artifacts in the context of the course's theme and topic.

Identify

Identify basic elements of folklore, types of folk narrative, and folk groups.

Relate

Relate the worldviews of the folk groups being studied with the performance of their traditions by comparing similarities and differences of groups with differing worldviews and obtaining a wider view of their diverse histories.

Communicate

Reason intelligently in oral and written discourse about how traditions are meaningful to participants in places and times different from students' present circumstances. Celebrate personal, group, and aesthetic dynamics in the performance of traditions and "question ethically' the choices and forces that help perpetuate or extinguish traditional practices, both locally and globally.

Connect

Connect folklore studies with other course work and life experiences and goals.

Applied English

Applying skills developed in the English major to a professional setting.

ENGL 394R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Translate

Students will complete an internship, project, or other work-based experience that enables them to translate their communication, research, collaborative, and/or analytical skills to a professional (or simulated professional) environment.

Narrate

Students will engage in reading and writing assignments (including a culminating assignment) that allow them to reflect on and articulate the value of their English-major skills to an non-academic audience (prospective employers, community groups, etc.).

Studies in Literature

Topics vary.

ENGL 395R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295; Either Engl 292 & 293, or Engl 294.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department
Offered	Independent Study also.

Course Outcomes

Critical Literary Analysis

Identify, locate, read critically, and analyze major and selected minor texts and associated with the literature of the class theme.

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Studies in Women's Literature

Female-authored literary texts and literary theory concerning women.

ENGL 396

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Note	A core class for the women's studies minor.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Reading

Read critically and analyze selected literary texts representative of the general history or of a thoughtfully focused dimension of women's literature.

Literary Contexts

Demonstrate a knowledge of the history, nature, aesthetics, and broadly defined thematic concerns of the literature at the center of the course. Compare and contrast women's literature in question with larger or "mainstream" British or American literature.

Research and Writing Skills

Form an appropriate research strategy, independently locate relevant digital and print sources, and draw upon these to develop a focused and effective written argument. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

African Literature

Study of the literature of a given world region or culture.

ENGL 397R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Knowledge

Students will gain a deep understanding of African Literature.

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Australian Literature

Study of the literature of a given world region or culture.

ENGL 397R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Literary Analysis

Read critically and analyze selected literary texts representative of the general history or of a thoughtfully focused dimension of Australia.

Research Strategy

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the literature and cultures of Australia.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Canadian Literature

Study of the literature of a given world region or culture.

ENGL 397R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Literary Analysis

Read critically and analyze selected literary texts representative of the general history or of a thoughtfully focused dimension of Canada.

Research Strategy

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the literature and cultures of Canada.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Caribbean Literature

Study of the literature of a given world region or culture.

ENGL 397R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Top

Hemispheric Literatures

Study of the literature of a given world region or culture.

ENGL 397R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Irish Literature

Study of the literature of a given world region or culture.

ENGL 397R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research Strategy

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the literature and cultures of Ireland.

Literary Analysis

Read critically and analyze selected literary texts representative of the general history or of a thoughtfully focused dimension of Ireland.

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

New Zealand Literature

Study of the literature of a given world region or culture.

ENGL 397R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Literary Analysis

Read critically and analyze selected literary texts representative of the general history or of a thoughtfully focused dimension of New Zealand.

Research Strategy

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the literature and cultures of New Zealand.

Top

Post-Colonial Literature

Study of the literature of a given world region or culture.

ENGL 397R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research and Writing Skills

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the material studied in the class. Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Scottish Literature

Study of the literature of a given world region or culture.

ENGL 397R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Writing

Produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Literary Analysis

Read critically and analyze selected literary texts representative of the general history or of a thoughtfully focused dimension of Scotland.

Research Strategy

Form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument pertinent to the literature and cultures of Scotland.

South-Asian Literature

Study of the literature of a given world region or culture.

ENGL 397R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Themes & Texts

In their research writing, formal writing, class discussion participation, and exam performance, students will demonstrate a familiarity with representative South Asian authors and texts and, allowing for regional and cultural uniqueness, with what might broadly be defined as South Asian character, cultures, themes, and issues.

Identity and Culture

Through class discussion participation and all class writing assignments, students will show a maturing understanding of what differentiates representative South Asian writers, texts, and cultures from one another; simultaneously, they will suggest ways in which individual authors and texts have influenced broadly defined South Asian culture and literature.

Ethical Relation

Through semester-end self-evaluations and through final examination performance, students will demonstrate an increased appreciation for their own identities, a preparedness to read South Asian literature throughout their lives, and a deeper sense of their responsibilities to fellow Latter-day Saints around the world

Top

World Literatures in English

Study of the literature of a given world region or culture.

ENGL 397R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Research and Writing Skills

Students form an appropriate research strategy, independently locate relevant digital and print sources, and draw upon these to develop a focused and effective written argument. They produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Literary Analysis

By reading a variety of examples of a particular world literature, students analyze representative world authors and texts, attune to regional and cultural uniqueness with what might broadly be defined as the region's character, cultures, themes, and issues.

Interpretive Contexts

Through classroom activities and assignments, students demonstrate maturing understanding of what differentiates representative world writers, texts, and cultures from one another; simultaneously, they suggest ways in which individual authors and texts have influenced broadly defined world culture and literature.

Ethical Relation

Through classroom activities and assignments, students articulate an increased appreciation for their own identities, a preparedness to read the world literature throughout their lives, and a deeper sense of their responsibilities to fellow Latter-day Saints around the world.

Career Preparation for English Majors

Overview of post-BA options for the English major: graduate and professional programs, career resources, internship opportunities, job acquisition preparation.

ENGL 398

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	ENGL 198 & ENGL 295
Taught	Fall Term 2, Winter Term 2

Course Outcomes

Post-baccalaureate Plans

To assist you in selecting a possible career or graduate program.

Post-baccalaureate Applications

To introduce you to the process of applying to graduate and professional programs.

Employment Resources

To introduce you to department, college, and university resources in support of your search for employment.

Professional Skills

To teach you techniques and strategies for effective networking, resume/cover letter writing, and job interviewing.

Academic Internship

On-the-job training.

ENGL 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Consent of cooperative education coordinator.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Skills

Students will track their progress as they develop the skills and expertise required by their internship.

Career Consideration

Students will consider the positives and negatives of a career in the area of their internship.

Professionalization

Students will recognize the portability of the skills they have developed English majors and the value of these skills in the marketplace.

Top

Portfolio Capstone for Writing and Rhetoric Minors

Producing a portfolio of writing projects by writing and rhetoric minors.

ENGL 400

Hours	1.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	ENGL 322 & ENGL 324; An advanced writing course.
Note	Engl 400 should be taken during the last semester of the minor.
Taught	Fall, Winter, Spring Contact Department

Course Outcomes

Interpretation, Evaluation, and Composition

Students will demonstrate their degree of rhetorical competency by submitting the revision of three texts from multiple genres that represent their best use of interpretive, evaluative, and composing skills, texts they originally created during their minor course work, but have revised during this capstone course.

Reflective Essay

Students will demonstrate their degree of meta-cognitive understanding of rhetorical theories, principles and practices by submitting a critical reflective essay that: 1) describes how they define rhetoric as a theoretical concept and why, 2) briefly compares/ contrasts their definition with others that have been espoused throughout rhetoric's history, 3) define's rhetoric's relationship with ethics and explains how to determine "appropriateness," 4) identifies the skills, abilities, and critical judgment they have developed through their study and can now take with them into their future professional, civic and family life, 5) and explains how they have applied rhetorical principles in the personal, professional, (or academic), and public life and will do so in the future.

Top

Creative Writing Minor Capstone

Students produce a portfolio of writing projects from their work in the creative writing minor.

ENGL 401

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	ENGL 317R; or ENGL 318R; or ENGL 319R
Note	Engl 320R is also a valid prerequisite choice. See instructor to obtain a permission-to-add code.
Taught	Fall, Winter

Course Outcomes

Demonstrate and Apply Major Concepts

Students will demonstrate the concepts they have learned throughout their program in a capstone project.

Top

Advanced Creative Writing Practice and Theory

Exploring advanced principles of creative writing craft and theory in poetry, fiction, or creative nonfiction.

ENGL 419R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Engl 317R or 318R or 319R, or Engl 320R.
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Reading Literary Models Analytically

Read creative writing models analytically and synthetically, with an eye to authorial intention and technique as well as be able to articulate the same.

Reading Critical Theory Models Analytically

Read critical theory models analytically and synthetically and apply critical theories to literary texts.

Successful Writing using Literary and Critical Theory Models

Write creative and critical texts using literary and critical models and following explicit instructions from the teacher.

Revising, Editing, and Sharing

Revise intelligently, edit carefully, and share one's work with others in the class.

Creative Writing Projects in Creative Nonfiction

Individual major creative writing projects: novel, novella, play, poetry collection, short stories, or essays.

ENGL 419R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 317R; or ENGL 318R; or ENGL 319R
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Production

Produce both the print and the on-line versions on schedule.

Community

Develop camaraderie with the other staff members.

Top

Creative Writing Projects in Fiction

Individual major creative writing projects: novel, novella, play, poetry collection, short stories, or essays.

ENGL 419R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 317R; or ENGL 318R; or ENGL 319R
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Production

Produce both the print and the on-line versions on schedule.

Community

Develop camaraderie with the other staff members.

Creative Writing Projects in Poetry

Individual major creative writing projects: novel, novella, play, poetry collection, short stories, or essays.

ENGL 419R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 317R; or ENGL 318R; or ENGL 319R
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Production

Produce both the print and the on-line versions on schedule.

Community

Develop camaraderie with the other staff members.

Top

Creative Writing Projects: Writing for Children and Adolescents

Individual major creative writing projects: novel, novella, play, poetry collection, short stories, or essays.

ENGL 419R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 317R; or ENGL 318R; or ENGL 319R
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

knowledge

Students will demonstrate an understanding of writing for children and adolescence.

Inscape Editing

Individual major creative writing projects: novel, novella, play, poetry collection, short stories, or essays.

ENGL 419R

Hours	3.0 Credit, 3.0 Lecture, Arr Lab
Prerequisites	ENGL 317R; or ENGL 318R; or ENGL 319R
Taught	Fall Contact Department, Winter Contact Department

Course Outcomes

Production

Produce both the print and the on-line versions on schedule.

Community

Develop camaraderie with the other staff members.

Literature for Adolescents

Wide range of literature written for or read by teenagers.

ENGL 420

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295; or instructor permission.
Note	Required before student teaching.
Taught	Fall, Winter, Spring Contact Department

Course Outcomes

Learning the field

Students will become familiar with a broad range of Young Adult books, authors, and genre.

History and theory

Students will become familiar with a broad range of Young Adult books, authors, and genre.

Using YA literature

Students will learn how to select appropriate quality YA books for classroom, school, and personal use.

Scholarship in YA literature

Students will demonstrate an in-depth knowledge of YA literature and its scholarship.

Teaching Composition in Secondary Schools

Theories and methods of teaching writing to secondary school students.

ENGL 423

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 276R
Note	Required before student teaching.
Taught	Fall, Winter

Course Outcomes

Effective Assessments

Students will be able to design effective assessments for a variety of writing tasks and articulate a philosophy for grading.

Reflective Practice

Students will develop their abilities to be reflective practitioners who evaluate their own writing, writing processes, and instructional practices.

Literary Theory and Criticism 1: The Critical Tradition

Historical survey from Plato to the early twentieth century.

ENGL 451

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295; Engl 291; either Engl 292 & 293, or Engl 294.
Taught	Fall, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Reading

Students will analyze and demonstrate a sound knowledge of a selection of primary and secondary documents related to the historical development of literary theory.

Research and Writing Skills

Students will form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument, and they will produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Literary Theory and Criticism 2: Contemporary Criticism

Introduction to issues in twentieth-century literary criticism.

ENGL 452

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 251 & ENGL 295; Engl 291, Engl 295; and either Engl 292 & 293 or Engl 294.
Taught	Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Critical Reading

Students will analyze and demonstrate a sound knowledge of a selection of primary and secondary documents related to contemporary literary theory.

Research and Writing Skills

Students will form a research strategy, independently locate relevant digital and print sources, and draw upon these to develop an effective written argument, and they will produce polished, competent, formal writing, free from distracting errors in mechanics, syntax, and formatting, and in accordance with MLA formatting and citation guidelines.

Secondary English Student Teaching

Capstone, field-based, semester-long experience in teaching secondary students; demonstrating proficiency in all program standards.

ENGL 476

Hours	12.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Completion of all course work or departmental approval; requires a major GPA of 2.85; at least a C- in Engl 377. Concurrent enrollment in Engl 479.
Taught	Fall, Winter

Course Outcomes

Student Teaching

Student teachers will successfully complete his or her student teaching.

Core Guidelines

Student teachers will successfully demonstrate their ability to teach using state core guidelines and also their ability to plan and use effective units.

Classroom Management

Student teachers will learn and practice effective classroom management skills.

Professionalism

Student teachers will practice and demonstrate professional educational behavior.

Secondary Student Teaching Seminar

Issues experienced during secondary student teaching practicum.

ENGL 479

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	ENGL 377 & ENGL 378; concurrent enrollment in Engl 476 or 496R.
Taught	Fall, Winter

Course Outcomes

Application

Students teachers and interns will be able to apply the topics presented in the seminar to their own teaching experience. University supervisors will observe the various applications such as classroom management, managing the paper load, using young adult literature, supporting English Language Learners, etc.

Teacher Work Sample

Student teachers and interns will be able to produce a full, 7-part reflective Teacher Work Sample to demonstrate their understanding and effectiveness as a classroom teacher.

Ability to Teach

Student teachers and interns will demonstrate their ability to teach using state core guidelines and also their ability to plan and use effective units.

Enter Material Evidence

Student teachers and interns will be able to correctly and in a timely manner enter the required material evidence of their semester's performance and teaching on the Education Department's LiveText (or whatever system is in place at the required time).

Top

Directed Research in English

Directed research for ORCA grant recipients, research assistants, and other undergraduate students pursuing research projects.

ENGL 480R

Hours	1.0 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Department chair's consent.
Taught	Fall, Winter

Course Outcomes

Directed Research

Complete directed research as designed by your faculty mentor.

Top

Individual Readings in English

Language and/or literature beyond what is offered in the curriculum.

ENGL 490R

Hours	0.5 - 3.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Department chair's consent.
Note	May not be substituted for another catalog course.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Individual Readings

Complete readings and assignments as designed by your faculty mentor.

Top

The Senior Course

In-depth study of a limited area of literature, language, or criticism. Content varies; requires research and writing.

ENGL 495

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ENGL 382; or ENGL 383; or ENGL 384R; senior status.
Note	Engl 381 is also a valid prerequisite choice. See the Humanities Advisement Center to obtain a permission-to-add code.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Literary Criticism

Students will
(1) gain a broader and deeper understanding of a particular disciplinary topic or issue,
(2) become familiar with the critical conversation about this area,
(3) develop sufficient competency in research and writing to make a contribution to the critical conversation about this area.

Capstone Project

Students will develop an independent research project and craft an argument with the supervision of the instructor. Their projects will produce original and sophisticated pieces of literary criticism that situate their arguments in the context of the critical conversation about the disciplinary topic and issue and are suitable for submission to an undergraduate journal. Students should develop their project with a real audience in mind--a particular journal or graduate admission committee, and for the guidelines for length (generally between 15-20 pages) listed in their submission instructions. Students should substantially revise a complete draft of their paper in personal consultation with the instructor.

Top

Secondary English Teaching Internship

Capstone, field-based, year-long experience in teaching secondary students; demonstrating proficiency in all program standards.

ENGL 496R

Hours	12.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Completion of all course work or departmental approval; requires a major GPA of 2.85; at least a C- grade in Engl 377. Concurrent enrollment in Engl 479.
Taught	Fall, Winter

Course Outcomes

Internship

Interns will successfully complete his or her assigned internship.

Core Guidelines

Interns will successfully demonstrate their ability to teach using state core guidelines and also their ability to plan and use effective units.

Classroom Management

Interns will learn and practice effective classroom management skills.

Professionalism

Interns will practice and demonstrate professional educational behavior.

Top

Honors Thesis

ENGL 499R

Hours	0.5 - 6.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Honors Thesis

Complete your honors thesis with the aid of your thesis advisor.

Top

Advanced Scholarly Writing

Workshop for potential graduate students, graduate students, and professionals in all disciplines in preparing the thesis, dissertation, book chapter, and article.

ENGL 515R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Course not offered

This course is not offered regularly.

Top

Advanced Technical Writing

Advanced concepts, including literature of technical writing, liaison with technical staff, communication networks, rhetoric of graphics, and teaching and freelancing technical writing.

ENGL 516

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Engl 316 or instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Technical Conference Paper for Presentation

English 516 students will resourcefully incorporate major texts, issues, and debates in technical writing (including subjects like the literature of technical writing, communication networks, the rhetoric of graphics,technical writing pedagogy, and freelancing as a technical writer)into the formation of a conference-length conference paper suitable for professional presentation.

Top

Studies in Theme and Form

Topics vary: literature and film, myth and archetype, science fiction, etc.

ENGL 520R

Hours	0.5 - 3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Current Issues in Theme and Form

Students in English 520R will identify and critique major texts, issues, and debates from the study of various topics of theme and form (including topics like literature and film, myth and archetype, science fiction, etc.).

Conference-Length Paper

Students will produce a conference-length paper on these topics suitable for professional presentation.

Directed Readings

Individual readings beyond what is offered in the curriculum.

ENGL 590R

Hours	1.0 - 3.0 Credit, Arr Lecture, 0.0 Lab
Prerequisites	Graduate advisory committee approval.
Note	Primarily available for English graduate students in Study Abroad programs.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Conference-Length Paper from Individualized Readings

Students in English 590R will, subject to the approval of a course contract by the department graduate studies committee,studyunder a faculty member's supervision individualized readings beyond what is offered in the curriculum. This study should help the study to resourcefully incorporate major texts, issues, and debates from these readings into the formation of a conference-length conference paper suitable for professional presentation.

Academic Internship

On-the-job training.

ENGL 599R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Department chair's consent.
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Skills

Students will track their progress as they develop the skills and expertise required by their internship.

Face Challenges

Students will meet the challenges of their internship.

Career Consideration

Students will consider the positives and negatives of a career in the area of their internship.

Recognize Skills

Students will recognize the portability of the skills they have developed English majors and the value of these skills in the marketplace.

Internship in Professional Community

ENGL 599R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring Contact Department, Summer Contact Department

Course Outcomes

Skills

Students will track their progress as they develop the skills and expertise required by their internship.

Face Challenges

Students will meet the challenges of their internship.

Career Consideration

Students will consider the positives and negatives of a career in the area of their internship.

Recognize Skills

Students will recognize the portability of the skills they have developed English majors and the value of these skills in the marketplace.

Advanced Academic English for International Students

Integrated skills course for nonnative English speakers, primarily focused on academic listening, speaking, and the basic skills needed for success at an American university.

ESL 301

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	For bilingual foreign students.
Taught	Fall

Course Outcomes

Gain English listening/speaking skills critical to success

Gain English listening and speaking skills critical to success in American academic, university settings

Participate in English academic settings

Participate and communicate in English in academic settings clearly, confidently, and effectively.

Give effective oral presentations in English

Give oral presentations of various kinds in English effectively in academic settings.

Take effective notes in academic settings.

Listen to academic lectures and take effective notes

Understand cultural, academic differences

Explain cultural differences in academic settings

Advanced English Pronunciation for International Students

Improving the speaking ability of nonnative English students, emphasizing rhetorical and communication strategies, pronunciation, stress, rhythm, intonation, and fluency.

ESL 302

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For bilingual foreign students.
Taught	Winter

Course Outcomes

Increased awareness of English pronunciation patterns

Non-native English-speaking students will develop an increased awareness of English pronunciation patterns

Strategies to improve the ability to pronounce English corre

ESL students will improve their knowledge of strategies to learn to pronounce English and ability to pronounce English correctly in the following areas: a. Vowels and consonants, b. Syllables and word endings, c. Intonation, d. Stress, e. Rhythm, and f. Linking.

College Reading and Study Skills for International Students

Learning strategies to improve reading speed and to understand materials used in university classes.

ESL 303

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For bilingual foreign students.
Note	Should be taken during the first year (for nonnative English speakers).
Taught	Winter

Course Outcomes

University-level reading skills in English

Non-native English-speaking students will acquire or improve the skills they need to read and understand university-level materials.

Build vocabulary and other reading skills in English

Students will build increased English vocabulary, comprehension, inference, and critical thinking and evaluation, among other skillls

Top

Academic Writing for International Students

Learning how to write essays, reports, and research papers acceptable in an American university

ESL 304

Hours	3.0 Credit, 3.0 Lecture, 1.0 Lab
Prerequisites	For bilingual foreign students.
Note	Should be taken before ELang 105 or Engl 150.
Taught	Fall, Winter, Spring

Course Outcomes

Independence and awareness in English writing skills

Non-native English-speaking students will become more independent in their English writing and study skills and more aware of their writing ability

Critical and creative thinking

Students in this course will learn to think critically and creatively.

Critical and creative thinking

Students in this course will learn to think critically and creatively.

Writing processes

Students will demonstrate the ability to use various processes as they write

Documented research writing

Students will be able to locate information in a major university library and write a documented research paper based on that information.

Read/write in university genres

Students will gain the ability ro read and write in genres common in university coursework.

Top

Applied Grammar for International Students

Increasing correct grammar use in academic writing.

ESL 305

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	For international students.
Recommended	Concurrent enrollment in ESL 304 or ELang 105.
Taught	Fall, Winter

Course Outcomes

Academic writing tasks

Non-native English-speaking students will gain the ability to respond appropriately to a variety of academic writing tasks in English.

Appropriate, varied, and accurate vocabulary usage

Demostrate the ability to select appropriate and varied English vocabulary related to assigned topics with accuracy in word choice and form.

Independently correct English grammar errors

Demonstrate the ability to recognize and independently correct grammar errors.

Introduction to European Studies

Introduction to the major, the core disciplines involved and integrated in European studies, and European studies as a discipline.

EUROP 200

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Understanding of Field

Students will gain a basic understanding of the definition, history, and purpose of European Studies.

Disciplinary Knowledge

Students will become familiar with the major disciplines involved with European Studies and be able to define -- and know when to engage -- various disciplinary methods.

General Knowledge

Students will gain an understanding of many of the major topics and issues of European Studies.

Major Orientation

Students will develop some ideas about how to orient their subsequent studies within the major.

Current Affairs

Students willdevelop the habit of reading international news in order to keep abreast of European affairs and to cross-check perspectives from country to country.

Research

Students willlearn how to locate, use, and cite high-quality and reliable resources from the library and online and use that research in the creation of a substantive research paper.

European Studies

Social sciences core course approved for Study Abroad programs in London, Vienna, Paris, and other locations.

EUROP 336R

Hours	0.5 - 6.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	

Course Outcomes

Historical Knowledge

Students will demonstrate a sound, general understanding of the historical development of modern Britain. Students will be familiar with all major historical periods: pre-Roman, Roman, Anglo-Saxon, Norman/medieval, Tudors/Enlightenment, Stuarts/civil war/revolution, Hanoverian/Georgian, Victorian/imperial, 20th century/world wars/postwar. But not all periods will be covered equally, and different classes will have different emphases.

Analysis of Sites and Monuments

Students will demonstrate the ability accurately and intelligently to discuss how historical sites in London and throughout Britain relate to key historical developments in British history. Site visits will be directly tied to class discussions and writing assignments.

Integration of Knowledge

Students will demonstrate a general understanding of how the history of Britain is reflected in other elements of the study abroad experience, such as literature and humanities course work, museum visits, performances, and visits to cultural sites.

Comparative Political Understanding

Students will demonstrate general understanding of the similarities and differences between the British and American political systems (e.g., constitutional monarchy, written vs. unwritten constitutions, presidents vs. prime ministers, etc.).

Global Awareness

Students will demonstrate awareness of British contact with and assimilation of non-western cultures (e.g., imperialism, decolonization, immigration).

Top

Senior Seminar in European Studies

Interdisciplinary study of an issue central to European studies; topics vary.

EUROP 490R

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EUROP 200; Senior status or program coordinator's consent.
Taught	Winter

Course Outcomes

Knowledge and Analytic Understanding

Students will gain an in-depth understanding of an issue central to European Studies and be able to articulate that understanding using theories, concepts, research materials, and ideas from the perspectives of more than one European-Studies-related discipline.

research and writing

Students will identify a valid research topic and research that topic using appropriate disciplinary methods, and they will write a cogent, scholarly essay in which they report the results of their research.

targeted understanding

Students will understand the relationship of the course's central issue to their country or countries of interest.

Top

Science of Wellness

A comprehensive study of the science of wellness of the whole individual. The science of wellness draws principles from exercise sciences, biological sciences, behavioral and social sciences. The research from psychoneuroimmunology (PNI) supports specifically the holistic wellness paradigm whose focus is that every aspect of each human being, the body, mind and spirit, are involved in all wellness activities and all wellness activities affect the whole individual. Students will discover this new paradigm and experience the blending of the sciences to support the integrated nature of our being.

EXSC 221

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Discover New Paradigm

Discover the significance of the wellness paradigm shift from physical, mental, social, emotional and spiritual as dimensions of wellness to them being dimensions of human nature. Have a working comprehension of the science of wellness.

Harmonious Integration of Human Life

Demonstrate an understanding of the sacredness of the human body and the contribution wellness can make to the harmonious integration of the composite nature of human life-body, mind and spirit.

Behavior Change Models

Understand several behavior change models and the advantages of each.

Research on the Integrated Nature of Human Life

Give examples of wellness research demonstrating the integrated nature of human life and associated wellness principles.

Quality of Life

Recognize that understanding the science of wellness has the potential to improve the quality of your life and that of your family, friends and community.

Epigenetics and Wellness

Recognize the ramifications of epigenetics for your wellness now and in the future and also the future wellness of others.

Written Record of Wellness Experiences

Articulate your own comprehension of the science of wellness and the meaning it has to you through a written record of your wellness experiences throughout the course.

Top

Philosophical and Ethical Issues in Exercise Sciences

Philosophical and ethical issues common to exercise sciences majors. Concept of mind, body, spirit.

EXSC 302

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Tenets of Philosophy Concerning Multicultural Traditions

Learn contemporary tenets of philosophy that will serve as a basis for understanding important ideas in our own cultural tradition as well as that of others.

Philosophical Worldviews

Comprehend philosophical worldviews to facilitate respectful relationships with others.

Beliefs and Values

Pursue truth, think clearly and communicate effectively one’s own beliefs and values; deepen one’s understanding of the nature of being.

The Gospel of Jesus Christ

Comprehend and apply the truths of the gospel of Jesus Christ. Reflect devout love of God and a loving, genuine concern for the welfare of others in the learning environment.

Spirituality

Acquire/reinforce a profound respect for the divine nature of one's own life, a reverence for one's value, the purpose of one's life and a desire to live a healthy lifestyle.

Valuing the Entire Self

Articulate one's valuing of the entire self, bodymindspirit, with particular focus on the meaning and importance of the physical body.

Formulating Personal and Professional Philosophy

Strengthen the formulation of one's own personal and professional philosophy establishing clear standards of integrity. Improve the communication of one's beliefs, written and verbal.

Ethical Analysis and Behavior

Analyze contemporary issues from an ethical standpoint. Demonstrate one's own professional ethical behavior, think critically and take an informed position on an issue.

Basic Athletic Training

Recognition, evaluation, and care of athletic injuries. Techniques in taping, preventing, and rehabilitating injuries.

EXSC 320

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PDBIO 220; Some majors require concurrent enrollment in ExSc 321. Check MAP requirements for major.
Taught	Fall, Winter, Spring

Course Outcomes

Responsibilities, Roles, and Tasks

Review general responsibilities, roles, and tasks of athletic trainers, physical therapists, and other allied health professionals involved in sports medicine.

Musculoskeletal Injuries

Learn assessment, first aid, and treatments for common musculoskeletal injuries.

Injury Prevention

Examine methods of injury prevention including conditioning principles, environmental hazards, and protective equipment.

Resources

Learn and utilize resources available to sports medicine professionals.

Application

Apply knowledge to practical situations.

Top

Basic Athletic Training Lab

EXSC 321

Hours	0.5 Credit, 0.0 Lecture, 0.5 Lab
Prerequisites	Concurrent enrollment in ExSc 320.
Note	Fee.
Taught	Fall, Winter, Spring

Course Outcomes

Taping

Demonstrate competency and proficiency in taping the ankle, foot, lower leg, knee, thigh/hip, shoulder, elbow, wrist, thumb, and finger joints.

Wrapping

Demonstrate competency and proficiency in wrapping the ankle, foot, lower leg, thigh/hip, shoulder, elbow, wrist, thumb, and finger joints.

Wound Care Management

Demonstrate competency and proficiency in wound care management.

Injury Evaluation

Demonstrate competency and proficiency in injury evaluation.

Injury Treatment Management

Demonstrate competency and proficiency in injury treatment management.

Spineboarding and Splinting

Demonstrate competency and proficiency in spineboarding and splinting.

Body, Mind, Spirit

Sacredness of the body and its meaningfulness to the whole being. Comparative approach utilizing ideas from the restored gospel and Western and Eastern philosophy (nature of being).

EXSC 349

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Independent Study only. Honors also.

Course Outcomes

Critical Thinking Regarding the Nature of Being

Enhance understanding of the divine nature of human life.

Body, Mind, Spirit Integration

Apply concepts from discussion and reading to live life as a fully integrated being, body mind and spirit.

Inherent Worth of Each Soul, Body and Spirit

Enhance reverence for the inherent worth of one's own life including body and spirit and for each other individual.

Philosophy Behind a Wellness Lifestyle

Identify attitudes and behaviors that contribute to your wellness and those that will assist others in living a healthy lifestyle.

Honors Body, Mind, Spirit

Sacredness of the body and its meaningfulness to the whole being. Comparative approach utilizing ideas fom the restored gospel and Western and Eastern philosophy (nature of being).

EXSC 349

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	
Offered	Independent Study only.

Course Outcomes

Critical Thinking Regarding the Nature of Being

Enhance understanding of the divine nature of human life.

Body, Mind, Spirit Integration

Apply concepts from discussion and reading to live life as a fully integrated being, body mind and spirit.

Inherent Worth of Each Soul, Body and Spirit

Enhance reverence for the inherent worth of one's own life including body and spirit and for each other individual.

Philosophy Behind a Wellness Lifestyle

Identify attitudes and behaviors that contribute to your wellness and those that will assist others in living a healthy lifestyle.

Kinesiology and Biomechanics

EXSC 362

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Math 110 or higher.
Recommended	Phscs 105 or 121; PDBio 220.
Taught	Fall, Winter, Spring

Course Outcomes

Physical Laws and Human Performance

Demonstrate application of physical laws to human performance.

Kinematics of Human Motion

Calculate kinematics of human motion.

Projectile Motion Equations

Show comprehension of projectile motion equations.

Changes of Motion

Determine changes of motion due to forces.

Fluids Generating Force

Demonstrate understanding of how fluids generate force.

Top

Scientific Bases of Sport: Kinesiology

Kinesiology and biomechanics for physical education/coaching minor.

EXSC 365

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Physical Laws and Human Performance

Students will demonstrate how to apply physical laws to human performance. Included physical laws deal with: Linear motion, projectile motion, forces, impulse and momentum, fluid mechanics, and tissue mechanics.

Personal Training Strategies

The art and science of personal fitness training for healthy adults, utilizing safe and effective techniques to develop and maintain optimal functional fitness (proper posture, balance, joint mobility, and stability), and optimal physical fitness (cardiorespiratory endurance, flexibility, muscular strength, and power).

EXSC 385

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	PDBio 220.
Taught	Fall, Winter

Course Outcomes

Essential Concepts and Principles of Functional Fitness

Explain and apply the essential concepts and principles of human movement science, anatomy, exercise physiology; biomechanics, motor learning; functional fitness assessment; stability training, mobility training, core training, balance training, reactive training, resistance training, cardiorespiratory training; exercise programming; nutrition and weight management; safety and injury prevention in an understandable and accurate way

Preparing to Certify as a CPT

Prepare to certify as a Certified Personal Trainer (CPT) through the National Academy of Sports Medicine (NASM)

Lifestyle and Chronic Disease Prevention

Current scientific evidence demonstrating how lifestyle affects disease processes. Healthy lifestyle concepts specifically needed by wellness professionals, health educators, and health promotion practitioners; influence of unhealthy lifestyle as basis for chronic diseases, i.e., cardiovascular disease, cancer, and diabetes.

EXSC 387

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Healthy Lifestyles

Develop an awareness of what constitutes a healthy lifestyle

Interpretation of Statistical Techniques

Understand the use and interpretation of statistical techniques used in scientific papers on health and lifestyle

Scientific Literature

Become familiar with the scientific literature that supports healthy living

Gaining Knowledge to Help Others

Gain knowledge needed to help others adopt and maintain a healthy lifestyle

Advanced Musculoskeletal Human Anatomy (includes lab)

Advanced examination of structure and function of skeletal, articular, muscular, and peripheral nervous systems with clinical applications; cadaver lab included.

EXSC 390

Hours	4.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	PDBIO 220; Majors Only
Recommended	ExSc 362 or equivalent.
Taught	Fall, Winter, Spring

Course Outcomes

Anatomical Terms

Upon completion of this class students will be able to accomplish the following:

Be familiar with the anatomical terms and their meanings for the human skeletal, peripheral nervous, articular, and muscular systems in relation to movement and orthopaedics.

Movement

Identify and discuss the structures, functions and inter-relationships of the human skeletal, peripheral nervous, articular, and muscular systems with respect to movement.

Top

Athletic Training Clinical Education 1

Classroom and field experience. Orientation to athletic training program and clinical expectations. Modules include emergency care, taping skills, and basic modalities.

EXSC 394

Hours	2.0 Credit, 1.0 Lecture, 5.0 Lab
Prerequisites	Athletic training major status.
Taught	Fall, Winter

Course Outcomes

Administrative Roles and Policies of Various Health Care Organizations

After completing this course, the student will be able to understand the administrative roles and policies of various health care organizations including: CAATE, NATA, BOC

Accurate Record Keeping Skills

Demonstrate the skills necessary for accurate record keeping including SOAP notes and correct documentation of HOPS

Purchasing Policies

Understand purchasing policies for supplies

Emergency Action Plans

Correctly devise and implement emergency action plans

Emergency Conditions

Demonstrate the necessary skills for care of emergency conditions

Treating Open Wounds

Demonstrate care and necessary skills for treating open wounds

Therapeutic Modalities

Demonstrate correct use, including indications and contraindications for therapeutic modalities including: Hot Packs, Ultrasound, Cryotherapy, Electrical stimulation

Evaluating Lower Extremities

Demonstrate correct evaluation techniques of lower extremities including: Foot, Ankle, Lower Leg, Knee, Hip

Athletic Training Clinical Education 2

Classroom and field experience. Modules include taping skills, assessment, and modalities.

EXSC 395

Hours	2.0 Credit, 1.0 Lecture, 5.0 Lab
Prerequisites	EXSC 394
Taught	Fall, Winter

Course Outcomes

Rehabilitation Skills

Demonstrate rehabilitation skills, including aquatic therapy, joint mobilizations, proprioception, neuromuscular control, and agility exercises.

Taping and Bracing

Demonstrate competency and clinical proficiency in taping and bracing.

Evaluation Skills of Caring for Upper Extremity Injuries

Demonstrate the skills necessary to properly evaluate and care for upper extremity injuries including shoulder, elbow, forearm, wrist, hand, head and face, and thorax and abdomen.

Alter G Machine and Rebounder

Demonstrate the use of the following rehabilitation tools: Alter G machine and Rebounder

Top

Exercise and Wellness Internship

On-the-job experience for exercise and wellness majors.

EXSC 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	Internship coordinator's consent.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Work-Related Experience

Gain work-related experience through one or more internship experiences

Stress Management

Teaches students the basic principles, theories, and relaxation techniques to effectively manage personal stress. Students gain a greater understanding of the mind-body relationship, learn to employ a holistic approach to stress, and adopt effective cognitive, coping, and relaxation techniques. Ultimately, students experience a more effective approach to optimal lifelong health.

EXSC 410

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Physiological Mechanisms

Master the basic understanding of the physiological mechanisms responsible for the fight-or-flight response and subsequent manifestations of various symptoms of target organ dysfunctions. Be able to apply this understanding to stress management and disease prevention.

Mind, Body, and Spirit

Understand and discuss the holistic nature (mind-body-spirit) of stress management and comprehend the mind-body connection of the stress and disease process.

Recognizing Potential Stressors

Be able to recognize potential stressors and develop strategies to prevent (or reduce the magnitude of) these stressors from eliciting a stress response.

Strategies

Be able to develop strategies to reduce daily stressors.

Relaxation Techniques

Understand the principles behind the various relaxation techniques and be able to apply these techniques to managing stress.

Top

Advanced Athletic Training Lab

Advanced athletic training skills, including taping, bracing and splinting, custom-fitted equipment, massage and stretching techniques, and emergency splinting and transport.

EXSC 414

Hours	1.0 Credit, 0.0 Lecture, 2.0 Lab
Prerequisites	Athletic training major status.
Taught	Fall, Winter

Course Outcomes

CAATE Competencies

At the end of this course, the student will demonstrate competency in each of the following CAATE competencies:
Select and fit appropriate standard protective equipment on the patient for safe participation in sport and/or physical activity. This includes but is not limited to: Shoulder Pads, Helmet/Headgear, Footwear, Mouthguard, Prophylactic Knee Brace, Prophylactic Ankle Brace, Other Equipment (as appropriate)

Special Protective Procedures and Devices

Select, fabricate, and apply appropriate preventive taping and wrapping procedures, splints, braces, and other special protective devices. Procedures and devices should be consistent with sound anatomical and biomechanical principles.

Environmental Data

Obtain, interpret, and make decisions regarding environmental data. This includes, but is not limited to, the ability to formulate and implement a comprehensive, proactive emergency action plan specific to lightning safety

Apply and Document Special Tests and Instruments

Apply commonly used special tests and instruments (e.g., otoscope, stethoscope, ophthalmoscope, peak flowmeter, chemical "dipsticks" [or similar devices]) and document the results for the assessment of: Vital signs including respiration (including asthma), pulse and circulation, and blood pressure.

Emergency Treatment Strategies

Implement appropriate emergency treatment strategies including, but not limited to, establishing and maintaining an airway in a patient wearing shoulder pads, headgear or other protective equipment and/or with a suspected spine injury.

Techniques for Therapeutic Exercises

Instruct the patient in proper techniques of commonly prescribed therapeutic exercises.

Risk Management Plans for Safe and Efficient Health Care Facilities

Develop risk management plans, including facility design, for safe and efficient health care facilities.

Risk Management Plan for Security and Protection

Develop a risk management plan that addresses issues of liability reduction; security, fire, and facility hazards; electrical and equipment safety; and emergency preparedness.

AT Policies and Procedures within a Health Care Facility

Develop policy and write procedures to guide the intended operation of athletic training services within a health care facility.

Top

Therapeutic Modalities

Hydrotherapy, massage, traction, radiant energy, heat, cold, and electrotherapy.

EXSC 415

Hours	3.0 Credit, 2.0 Lecture, 2.0 Lab
Prerequisites	Athletic training major status.
Taught	Fall, Winter

Course Outcomes

Cryotherapy

The student will demonstrate the ability to properly select the appropriate parameters, prepare, and apply a(n): cold whirlpool treatment, controlled cold therapy unit, ice bag, vapo-coolant spray, ice immersion, ice massage, contrast bath, cryokinetics

Thermotherapy

The student will demonstrate the ability to properly select appropriate parameters, prepare, and apply a(n): moist heat pack, paraffin treatment, warm whirlpool treatment, fluidotherapy, diathermy, infrared

Electrotherapy

The student will demonstrate the ability to properly select appropriate parameters, prepare, and apply a(n): sensory-level pain control treatment, noxious-level pain control treatment, motor-level pain control treatment, muscle re-education treatment, muscle pumping treatment, acute edema treatment, chronic edema treatment, muscle spasm treatment, muscle splinting treatment, muscle atrophy retardation treatment, iontophoresis treatment, MENS treatment

Electrical Stimulation Units

The student will demonstrate proficiency in the setup and application of the following types of electrical stimulation units: Monophasic stimulator (e.g., high volt stimulation), Biphasic stimulator (e.g., TENS, NMES), Direct current (e.g., iontophoresis), Alternating current (e.g., interferential, NMES)

Ultrasound

The student will demonstrate the ability to properly select appropriate parameters, prepare, and apply a: thermal direct/indirect ultrasound treatment, nonthermal direct/indirect ultrasound, treatment, combination electric-stimulation/ultrasound, treatment, phonophoresis treatment

Traction

The student will demonstrate the ability to properly select appropriate parameters, prepare, and

apply: mechanical traction, manual traction, positional traction

Intermittent Compression

The student will demonstrate the ability to properly select appropriate parameters, prepare, and apply intermittent compression.

Massage

The student will demonstrate the ability to prepare and apply a massage treatment. The student will demonstrate the ability to properly perform massage strokes: effleurage, petrissage, friction, tapotement, vibration

Top

Injury Evaluation: Lower Extremities

Basic principles of injury evaluation; evaluation techniques specific to lower-extremity injuries.

EXSC 416

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Athletic training major status.
Taught	Fall, Winter

Course Outcomes

Instructing and Interpreting Fitness Tests

Instruct the patient how to properly perform fitness tests to assess his or her physical status and readiness for physical activity. Interpret the results of these tests according to requirements established by appropriate governing agencies and/or a physician. These tests should assess: Muscular Endurance, Agility, Speed.

Appropriate Fitness Programs for Patients

Develop a fitness program appropriate to the patient's needs and selected activity or activities that meet the requirements established by the appropriate governing agency and/or physician for enhancing: Cardiovascular Endurance, Speed

Inspection/Observation of Clinical Signs Associated w/ Common Injuries

Perform inspection/observation of the clinical signs associated with common injuries including deformity, posturing and guarding, edema/swelling, hemarthrosis, and discoloration.
Palpate the bones and soft tissues to determine normal or pathological characteristics.
Measure the active and passive joint range of motion using commonly accepted techniques, including the use of a goniometer and inclinometer.
Grade the resisted joint range of motion/manual muscle testing and break tests.
Apply appropriate stress tests for ligamentous or capsular stability, soft tissue and muscle, and fractures.
Apply appropriate special tests for injuries to the specific areas of the body as listed above.
Assess neurological status, including cranial nerve function, myotomes, dermatomes and reflexes, and circulatory status.
Document the results of the assessment including the diagnosis.

Patient's Prior and Present Medical History

Obtain a medical history of the patient that includes a previous history and a history of the present

condition.
Perform a visual observation of the clinical signs associated with common injuries and/or illnesses including deformity, edema/swelling, discoloration, and skin abnormalities.
Palpate the bones and soft tissues, including the abdomen, to determine normal or pathological characteristics.

Top

Injury Evaluation: Upper Extremities and Trunk

Injury evaluation techniques specific to the upper extremities and trunk.

EXSC 417

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EXSC 416
Taught	Fall, Winter

Course Outcomes

Mechanisms of Common Injuries in Various Sports

Upon completion of this course, the student will understand and be able to explain and/or demonstrate by performance on an exam: Mechanisms of common injuries in various sports.

Evaluation and Diagnostic Terminology

Basic principles of evaluation and diagnostic terminology.

Upper Extremity Injuries

Signs and symptoms of upper extremity injuries.

Injury Evaluation

Specific steps in injury evaluation.

Evaluation Techniques for Upper Extremity Injuries

Evaluation techniques, including special tests, used to identify and assess degree of disability of the upper extremity.

Manual Muscle Testing

Proficiency in performing manual muscle testing of the upper extremity.

Girth and Goniometric Measurements

Proficiency in performing girth and goniometric measurements of the upper extremity.

On-the-Field/Off-the-Field Injury Management

Basic on-the-field/off-the-field injury management.

Rehabilitation of Orthopedic Injuries

Basic principles, techniques, and progression of orthopedic/musculoskeletal rehabilitation.

EXSC 418

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EXSC 415
Taught	Fall, Winter

Course Outcomes

Tissue Healing

Understand tissue healing and how therapeutic exercise affects tissue healing.

Functional Progression

Understand the concept of functional progression and how it guides individual rehabilitation protocols. Rehabilitation is not a recipe that fits all people.

Therapeutic Exercise, ROM, and Manual Therapy Techniques

Apply and understand therapeutic exercise, range of motion, and manual therapy techniques to enhance the goals within a rehabilitation plan for athletic injury.

Goals of Rehabilitation

Synthesize the different goals of rehabilitation to be combined for any injury and condition to return the patient to full activity.

Medical Issues in Athletic Training

Discussion of current medical issues in athletic training with guest lectures by medical specialists.

EXSC 419

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	ExSc 417 or concurrent enrollment.
Taught	Winter

Course Outcomes

Exposure to a Variety of Medical Conditions

Advanced seminar type class for exposure to a variety of medical conditions, given from MD's point of view.

Common Athlete Illnesses

Learn a medical doctor's approach to illnesses which athletes commonly experience.

Athletic Trainer's Responsibility

Integrate the athletic trainer's responsibility as it pertains to a team approach with the physician.

Top

Administration of Athletic Training Programs

Management and administration of athletic training facilities and staff members.

EXSC 423

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	EXSC 415
Taught	Fall, Winter

Course Outcomes

Planning, Coordinating, and Supervising

Explain the importance of planning, coordinating, and supervising in the administration of an athletic training room/program.

Budgeting Systems

Explain various budgeting systems and develop budgets for high school and collegiate athletic training programs

Athletic Training Facilities

Design athletic training facilities to meet specific needs.

State Regulation and 3rd Party Reimbursement

Explain the significance of state regulation for the athletic training profession and its relationship to third party reimbursement.

The Impact of Insurance and 3rd Party Reimbursement

Explain the impact that insurance and third party reimbursement has on athletic training.

Emergency Plans

Be able to develop emergency plans for athletic training settings.

Negligence

Explain the elements of negligence and understand legal issues facing athletic trainers, as well as the role of risk management.

Preparticipation Exams

Explain how to efficiently and effectively organize preparticipation exams.

Personnel Management

Explain key concepts in personnel management, including communication, motivation, evaluations, etc.

Technology and Information Management

Explain the role of technology and information management in athletic training settings.

Leadership Skills

Develop and incorporate individual leadership skills; as well as increase personal awareness, gain self-confidence, and foster cohesive and caring relationships.

Top

Worksite Health Promotion

Managing, designing, marketing, implementing, assessing, and administering health promotion programs in a worksite setting.

EXSC 455

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	EXSC 387 & EXSC 463
Taught	Fall, Winter

Course Outcomes

Health Promotion Concept

Be able to demonstrate an understanding of the health promotion concept, historical background of worksite health promotion programs, and the rationale for companies to provide a health promotion program. This objective will be accomplished through class lecture/discussion and students will be evaluated through quizzes and exams.

Components of Worksite Health Promotion Programs

Better understand each of the following components in the design and execution of a worksite health promotion program: determining needs and interests of employers and employees, writing vision/mission/goal statements, best practices, creating a company culture of wellness, launching a program, incentives/rewards, and company wellness policies. This will be accomplished through lectures and a semester project.

Health Assessments

Increase understanding of effective health assessments and how to interpret the assessments. This will be accomplished through lectures and evaluated through quizzes and exams.

Evaluating Programs

Increase understanding of how to effectively evaluate programs. This will be accomplished through lectures and evaluated through quizzes and exams.

Essential Elements

Be able to demonstrate the essential elements of common worksite health promotion programs, such as, physical activity, nutrition, weight management, medical self-care, stress management, substance abuse/tobacco control, and back care programs. This will be accomplished through lectures and class presentations.

Practical Experience

Gain practical experience and learn from experts in the field. This will be accomplished through the

following: 1) each student will critique an existing worksite wellness program and present the findings to the class, 2) approximately 5 class periods will be devoted to studying transcripts of various interviews with experts in the field, and 3) 5 class periods will include visiting lecturers who are currently working in the field.

Worksite Health Promotion Program

Develop a worksite health promotion program through a semester class project.

Health Displays

Have the opportunity to work in conjunction with a team to develop a health display to be presented to the class.

Top

Orthopaedic Impairments and Therapeutic Exercise

Fundamentals of body mechanics and therapeutic exercise, coupled with kinesiological principles for detection and correction of basic neuromusculoskeletal anomalies.

EXSC 460

Hours	3.0 Credit, 3.0 Lecture, 2.0 Lab
Prerequisites	PDBIO 220 & EXSC 390
Taught	Fall, Winter, Spring

Course Outcomes

Basic Orthopedic Terminology

Upon completion of this class students will be able to accomplish the following: Demonstrate an understanding of basic orthopedic terminology dealing with posture, movement and pathology.

Osteokinematic and Arthrokinematic Movement

Demonstrate an understanding of traditional, osteokinematic and arthrokinematic movement

Therapeutic Exercise

Demonstrate an understanding of therapeutic exercise particularly active-resistive exercise and manual muscle testing and manual passive exercise and stretching.

Postural Evaluation

Be able to perform a postural evaluation, both grossly and at individual joints

Etiology

Demonstrate an understanding of the etiology, clinical significance and treatment of congenital and acquired orthopedic impairments of the upper and lower extremities and trunk.

Writing Therapeutic Exercise Programs

Where applicable, be able to write a therapeutic exercise program for the orthopedic impairments discussed in class.

Normal and Pathologic Gait

Demonstrate an understanding of normal and pathologic gait

Top

Exercise Physiology

The function of the physiological systems and their responses to acute and chronic exercise.

EXSC 463

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PDBIO 305; or PDBIO 362
Recommended	Concurrent enrollment in ExSc 464.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Appreciation for How the Human Body Functions

Describe how the human body functions and maintain homeostasis during the increased metabolic demands of exercise.

Nervous System

Describe the function of sympathetic, parasympathetic, and somatic motor neurons, including differences in structure, neurotransmitters, receptors and efferent organs.

Depolarization of Skeletal Muscle

Describe the depolarization of skeletal muscle beginning at the spinal cord and ending with the contraction of the muscle fiber.

Skeletal Muscle Fiber Types

Describe the anatomical, physiological, and functional differences between the three types of human skeletal muscle fibers.

Cardiovascular System

Describe the normal anatomy and physiology of the heart, blood, and blood vessels; describe the normal function of the cardiovascular system at rest and during exercise.

Transportation and Diffusion of O2 and CO2

Describe the transportation and diffusion of O2 and CO2 through the pulmonary and systemic circuits at rest and during exercise.

Anaerobic and Aerobic Metabolic Pathways

Describe the substrates used, amount and rate of ATP resynthesized, metabolic end products, and control of anaerobic and aerobic metabolic pathways.

System Interaction

Describe the interaction of the nervous, muscle, cardiovascular, pulmonary, and metabolic systems at rest and during exercise.

Adaptation to Physical Conditioning

Describe the responses to acute bouts of exercise and the mechanisms of the observed response, and the physiological adaptations which occur as a result of physical conditioning.

Principles of Physical Conditioning

Describe the physiological rationale for applying the eight principles of physical conditioning to improve health, fitness, and performance.

Top

Exercise Physiology Lab

Introduction of laboratory and field methods; applying principles of exercise physiology to assessing physical fitness and physiological responses to exercise.

EXSC 464

Hours	0.5 Credit, 0.0 Lecture, 1.0 Lab
Prerequisites	ExSc 463 or concurrent enrollment.
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Applying Knowledge of Exercise Physiology

The purpose of this class is to apply knowledge of exercise physiology to the assessment of the five components of health related physical fitness. The labs are the means to review and apply the physiology of exercise and to develop and practice fundamental skills related to the assessment of physical fitness.

Problems in Exercise Prescription

Applying knowledge of human physiology in developing appropriate exercise programs for individuals with a variety of needs and fitness levels; using the powerful effects of exercise to improve health, enhance enjoyment of life, and achieve the winning edge.

EXSC 468

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	EXSC 463
Taught	Fall, Winter

Course Outcomes

Preparticipation Screening

Conduct preparticipation screening to minimize the risk in exercise prescription.

Assessments

Select appropriate cardiorespiratory fitness, muscular strength/endurance, and flexibility assessments to tailor exercise prescription and provide personal feedback during goal attainment.

Programs for Healthy Adults

Create a personalized activity or exercise program that will enable an apparently healthy individual to accomplish a specific physical, health, or performance goal.

Adapted Programs

Tailor exercise programs to individuals with controlled chronic disease or musculoskeletal limitations.

Programs for All Ages

Prescribe life-stage-appropriate exercise programs for individuals across the lifespan.

Motivation

Motivate successful behavior change in others and promote continued progress toward their personal goals.

Top

Functional Neuroanatomy

Function, assessment, and rehabilitation of sensory and motor systems.

EXSC 470

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	PDBIO 220 & EXSC 390
Taught	Winter

Course Outcomes

Neuroanatomy

Describe the functional unit of the nervous system.
Describe the pathways of three different messenger neurons.
Explain glia.
List the 4 regions of the nervous system.
List the structures that make up the brain stem.
Identify and label the circle of Willis and associated arterial supply
Explain the composition of white vs. gray matter.
Describe and identify spinal cord anatomy and explain the DRG (dorsal root ganglion) and ventral rami
Describe and draw the gray and white matter in the spinal cord.
List and identify the cranial nerves attached to the Pons
List and identify all cranial nerves and explain which are sensory, motor or mixed.
Describe the function of the cerebellum.

Neuroanatomical Terms

Upon completion of this class students will be able to accomplish the following:
Be familiar with the neuroanatomical terms and their meanings for the central nervous system and peripheral nervous system in relation to systems and function.
Be familiar with terminology of specific diseases and dysfunctions in relation to signs/symptoms and classic descriptions
Be familiar with the terminology of electrophysiologic testing of the peripheral nervous system as it relates to normal and abnormal function.

Somatosensory & Motor Microanatomy

Students will be able to identify and discuss the structures, pathways and functions of independent somatosensory and motor tracts as they relate to motor function, coordination, movement and sensory integration.

Top

Obesity and Weight Management

Review of the scientific literature surrounding obesity and weight management, primarily the causes and consequences of this growing epidemic.

EXSC 480

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ExSc 463 or concurrent enrollment.
Taught	Fall, Winter

Course Outcomes

Historical Framework

Demonstrate an understanding of the historical framework and prevalence of overweight/obesity in adults and children.

Etiology and Health Risks

Understand the etiology and health risks related to overweight/obesity.

Economic Costs and Social Consequences

Describe the economic costs and social consequences associated with overweight/obesity.

Energy Balance

Demonstrate an understanding of the principles of energy balance.

Methods of Assessment

Understand methods of assessing overweight/obesity, body composition, diet, and physical activity.

Methods of Treatment

Demonstrate an understanding of various methods of treating overweight/obesity including: diet, physical activity, behavioral, pharmacological, and surgical interventions.

Interventions

Demonstrate an understanding of pediatric, family and public interventions to prevent or attenuate the rise in obesity.

Applying Weight Management Strategies

Have a personal experience applying weight management strategies.

How Learning Objectives Will Be Achieved

These learning objectives will be achieved through class lectures, student projects, scientific readings, and in-class activities. Students will be evaluated through written exams, quizzes and projects.

Exercise and Wellness Certification Preparation

Review of exercise and wellness certification competencies and curriculum with preparation for professional certification.

EXSC 485

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Senior status.
Taught	

Course Outcomes

Essential Concepts and Principles of Pathophysiology

Explain and apply the essential concepts and principles of pathophysiology; exercise physiology; health appraisal and fitness testing; exercise programming; nutrition and weight management; anatomy and biomechanics; human behavior and psychology; human development and aging; and safety and injury prevention in an understandable and accurate way

Preparing to Certify as an HFS

Prepare to certify as a Health and Fitness Specialist (HFS) through the American College of Sports Medicine (ACSM)

Athletic Training Clinical Education 3

Classroom and field experience. Modules include injury assessment and management, rehabilitation skills, and knowledge of general medical conditions.

EXSC 494

Hours	2.0 Credit, 1.0 Lecture, 5.0 Lab
Prerequisites	EXSC 395
Taught	Fall, Winter

Course Outcomes

Administrative Policies and Procedures

After completing this course, the student will be able to: Understand and apply administrative policies and procedures.

General Medical Assessment Skills

Demonstrate general medical assessment skills.

Care and Prevention

Understand how to care for and prevent various general medical (respiratory, cardiac, gastric, genitourinary) pathologies.

Athletic Training Clinical Education 4

Classroom and field experience. Modules include injury assessment and management, rehabilitation skills, nutrition, and dermatology.

EXSC 495

Hours	2.0 Credit, 1.0 Lecture, 5.0 Lab
Prerequisites	EXSC 494
Taught	Fall, Winter

Course Outcomes

Pharmacology

After completing this course, the student will: Demonstrate understanding of pharmacology, pharmacological processes, and the university's medication policies and procedures.

Basic Nutrition Guidelines

Demonstrate knowledge of basic nutrition guidelines for athletes.

Eating Disorders

Demonstrate knowledge of eating disorders and disordered eating and possess the ability to intervene with athletes who suffer from such disorders.

Upper and Lower Extremity Injuries

Demonstrate the skills necessary to properly evaluate, care for, rehabilitate, and prevent upper and lower extremity injuries.

General Medical Pathologies

Demonstrate the skills necessary to properly evaluate, care for, and prevent various general medical (common syndromes and diseases, dermatology) pathologies. Full evaluation and treatment from on-the-field to return-to-play.

Top

Academic Internship: Practicum

Academic and practical application of skills for athletic trainers.

EXSC 496R

Hours	0.5 - 8.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	ExSc 320 and instructor's consent.
Taught	Fall, Winter, Spring

Course Outcomes

Application

Students will use the skill and knowledge they have learning in their program in an academic internship.

Athletic Training Internship

EXSC 496R

Hours	0.5 - 8.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring

Course Outcomes

Clinical Education

The internship is clinical education beyond the four required semesters in the athletic training program. Students will gain additional experience through clinical training in order to prepare as a practitioner in medicine.

BOC Exam Preparation

Students will learn skills that further prepare them for successful completion of the BOC examination.

Goal Setting

Through goal setting, students will prepare for a lifetime of learning in the profession. Students will set skill acquisition goals and plans for continued education.

Graduate School

Students will use the internship course to explore options for graduate schools and seek information relative to additional educational goals.

Top

Undergraduate Research and Study

Individual research and study in any area of exercise science.

EXSC 497R

Hours	0.5 - 4.0 Credit, 0.0 Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Mentored Student Learning

To provide the undergraduate student with a mentored learning experience specifically in exercise science related research

Top

Capstone Experience in Athletic Training

Synthesizing and integrating student classroom and clinical experiences in preparation for BOC examination resulting in certification of allied health professionals.

EXSC 498

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	Senior standing in athletic training education program.
Note	Course should be taken last semester prior to graduation.
Taught	Fall, Winter

Course Outcomes

BOC Exam Registration Process

Explain, describe and complete the BOC exam registration process.

Exam Preparation Schedule

Design and follow athletic training content exam preparation schedule.

Possibilities of Practice in AT

Understand the possibilities of practice in Athletic Training.

Significance of BOC Certification

Explain the significance of BOC certification and state regulation for the athletic training profession.

Deficiencies in Knowledge and Skills

Define deficiencies in your athletic training education knowledge and skills.

Emergency Plans

Develop and implement emergency plans in the practice of athletic training.

Legal Issues

Explain legal issues facing athletic trainers.

Technology and Information Management

Explain the role of technology and information management in athletic training settings.

Requirements to Maintain BOC Certification

Understand the requirements to maintain BOC certification.

Motto

BOC Exam Preparation = Professional Practice Preparation

NATA Education Council Competencies

Have completed all NATA Education Council competencies.

Top

Sports Medicine Pathology and Pharmacology

Sports medicine pathologies and related pharmacology for a variety of sports medicine/allied health care professions.

EXSC 501

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	ExSc 320, PDBio 305; or equivalents.
Note	Meets required NATA athletic training educational competencies.
Taught	Fall, Winter

Course Outcomes

Basic Knowledge of Human Anatomy and Physiology

After completing this course, the student will: Synthesize basic knowledge of human anatomy and physiology to develop knowledge of the causes, pathophysiology, and clinical features of the various conditions affecting the body. Considering you have completed a physiology course you will be required to recall that information.

Pharmacokinetics and Pharmacodynamics Principles

Understand basic pharmacokinetics and pharmacodynamics principles.

Administration of Prescription and Nonprescription Drugs

Describe proper maintenance and documentation of records for the administration of prescription and nonprescription drugs.

Routes Used to Administer Medications

Understand advantages and disadvantages of common routes used to administer medications.

Pharmacological Intervention

Analyze relationships between inflammation, repair, regeneration, and healing as they relate to pharmacological intervention.

Reference Sources for Pharmacological Information

Utilize reference sources for pharmacological information.

Patient Info for Prescription and Nonprescription Agents

Synthesize patient information for prescription and nonprescription agents associated with the treatment and relief of symptoms from illnesses and injuries.

Clinical Use of Various Prescription and Nonprescription Agents

Understand clinical use of various prescription and nonprescription agents associated with the treatment and relief of symptoms from illnesses and injuries.

Clinico-Pathological Signs and Symptoms

Evaluate clinico-pathological signs and symptoms for specific medical conditions that assist the sport medicine/allied health care clinician in correlating findings in determining the course of action for illness and disease.

Current Banned-Drug Lists

Identify sources of current banned-drug lists published by various associations.

Drug Testing and Screening Program

Describe basic concepts of organizing and coordinating a drug testing and screening program.

Top

Orthopaedic Pathomechanics

Advanced analysis of neuromusculoskeletal deformities and/or injuries. Therapeutic exercise and the use of orthoses.

EXSC 560

Hours	2.0 Credit, 2.0 Lecture, 1.0 Lab
Prerequisites	ExSc 460 or equivalent.
Taught	Fall

Course Outcomes

Joint Anatomy

Students will be able to describe the anatomy and movement mechanics of selected joints for class

Orthopedic Evaluations

Students will be able to demonstrate orthopedic evaluative techniques to evaluate dysfunctional mechanics

Joint Evaluations

Students will be able to evaluate each selected joint for pathologic mechanics and movement dysfunction

Dysfunction Structures

Students will be able to differentiate the anatomical structures relating to joint dysfunction through use of specialized manual tests

Top

Introduction to Civic Engagement Leadership

Introduction to community involvement, public service, and leadership through lectures from external speakers and discussion of civic engagement.

FHSS 200

Hours	1.0 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Service

Educate students on the value of public engagement and service.

Leadership

Train students to become leaders in public service and positive "change agents" in their nations and communities.

Top

Civic Engagement Leadership

Promote leadership in civic engagement through discussion of community involvement and public service, lectures from external speakers, and development of a hands-on project involving some form of public service.

FHSS 400

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	FHSS 200; or instructor's consent.
Taught	Fall

Course Outcomes

Service

Educate students on the value of public engagement and service.

Leadership

Train students to become leaders in public service and positive "change agents" in their nations and communities.

Knowledge

Help students understand how academic research on civic engagement helps explain why people become engaged, how civic engagement organizations have adapted to changing conditions, the role of various social factors in civic engagement (income, education, religion, race, gender, etc.), and the effects of civic engagement on individuals and organizations.

Experience

Provide models for public engagement and service among faculty, fellow students, and campus visitors with experience and expertise in various facets of civic engagement.

Personal Finance

Practical course in money management and utilizing savings.

FIN 200

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Financial Perspective

Understand a point-of-choice orientation to retirement planning and financial storehouse accumulation and maximum sharing opportunities.

Planning Strategies

Utilize personal planning strategies that are behaviorally, spiritually, and financially efficient.

Wealth Accumulation

Focus on wealth accumulation potential of personal resource management.

Technologies

Use state-of-the art financial technology and information sources.

Analysis

Learn investment tools, theory, and techniques that maximize potential return while minimizing downside risk.

Application

Be able to protect financial assets from creditors and taxes.

Estate Plan

Develop an estate plan that produces legacy that thrives as assets are passed to future generations.

Principles of Finance

Financial management from the viewpoint of the business manager emphasizing profitability, liquidity, and long-range financial planning.

FIN 201

Hours	3.0 Credit, 3.0 Lecture, 1.5 Lab
Prerequisites	None
Recommended	Acc 200.
Taught	Fall, Winter, Spring

Course Outcomes

Understand Finance

Become proficient in the subject matter of the degree.

Basic Financial Tools

Apply basic financial tools to evaluate the results of current operations and potential investment projects.

Financial Analysis

Articulate how financial analysis can be used to influence decision making in a business environnment.

Financial Analysis Limitations

Identify the limitations of financial analysis.

Finance Career Orientation and Planning

Student orientation and preparation for careers in finance.

FIN 320

Hours	0.5 Credit, 1.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into the Finance major.
Note	Must be taken first semester in Marriott School.
Taught	Fall

Course Outcomes

Resources Available

Introduce students to the resources, services, and opportunities available in the Marriott School and provide skills that will help them in their job search

Career Plan Development

Create a Career Plan that will direct students to their “first job” and “future career” and research sources to help narrow down their interests into a future career

Academic Alternatives

Explain the various emphases and programs in the Marriott School and the opportunities that each one offers

Job Search

Direct students in creating a resume, refining interviewing skills, and understanding the importance of networking.

Finance Mentor Program

Discussions with outside finance mentors about career opportunities.

FIN 321

Hours	0.5 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Acceptance into the Finance major.
Note	Must be taken first semester in Marriott School.
Taught	Winter

Course Outcomes

Networking Importance

Understand the importance of networking as they interact with professionals in the student's area of interest as well as learn from the perspective of a business professional.

Networking Skills

Develop the skill of networking and learn the value of mentoring as they interact with the mentor in an interview experience and discuss various topics with the mentor.

Advanced Financial Management

Capital budgeting, cost of capital, capital structure/dividends, mergers and acquisitions, and current financial problems.

FIN 401

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	Fall

Course Outcomes

Financing for a Corporation

Students will understand how to provide financing for a corporation. This includes being able to forecast the company's needs for funds and being able to choose effectively from among many different sources of funds.

Effective Usage of Corporate Funds

Students will understand how to select the best use for funds that the corporation has. This includes being able to assess how much cash is generated from a project, being able to assess the risk involved with different investments, and being able to determine when funds should be returned to shareholders.

Spreadsheet Models

Students will be able to use spreadsheet models effectively to help make financing and investment decisions.

Communication Abilities

Students will improve their ability to communicate ideas orally and in writing.

Top

Managerial Finance for Non-Finance Majors

Overview of financial management issues including capital budgeting, cost of capital, capital structure/dividends, and long-term financial planning.

FIN 402

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	FIN 201; or BUS M 201; or ACC 401; Major status.
Note	For non-finance majors.
Taught	Fall, Winter

Course Outcomes

Performance Evaluation of a Firm

Use fundamental analysis to conduct a firm performance evaluation.

Financial Forecasting

Construct a financial forecast for a firm.

Solving Financial Problems

Employ time value of money to solve complex finance problems.

Bonds and Stocks

Value bonds and stocks.

Capital Budgeting

Make corporate investment decisions using capital budgeting.

Cost of Capital

Compute the cost of capital for a firm.

Firm Valuation

Know how to value a firm.

Excel Proficiency

Effectively use Excel in all previous learning outcomes.

Top

Risk Management

Management of risk exposures in a business setting. The process of identifying, measuring, and dealing with risk. Coverage includes both traditional insurable risks and financial risks.

FIN 407

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	

Course Outcomes

Risk Quantification

Students will be abel to quantify risk in terms of statistical measures.

Risk Management Tools

Students will be able to apply project finance tools to risk management decisions.

Equity Financial Modeling and Valuation

Hands-on opportunity to work with security markets and perform security analysis. Builds on theory of investment development in Fin 410.

FIN 409

Hours	3.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	FIN 410
Taught	Fall, Winter

Course Outcomes

Types of Financial Analysis

Demonstrate an understanding of the types of analysis most prevalent in the finance industry (including industry analysis and company analysis).

Real-world Application

Apply financial concepts and theories to real-world companies.

Financial Research

Conduct company financial research, analysis, reporting, and valuation.

Security Analysis

Demonstrate a grasp of key areas of security analysis.

Presenting Findings

Present financial analysis and recommendations to the Asset Management team members and GFA Portfolio Managers.

Top

Investments

Security markets, security analysis, and portfolio management.

FIN 410

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 301; or FIN 201; or BUS M 201; Finance major status.
Taught	Fall

Course Outcomes

Equity and Debt Securities

Learn about equity and debt securities and the markets in which they trade.

Measuring Risk and Returns

Be able to use quantitative approaches to measure risk and returns in a portfolio setting.

Portfolio Creation

Be able to create an “efficient” portfolio with optimal risk-return characteristics.

Calculating Expected Returns

Be able to calculate the expected returns using the CAPM and to describe other common asset pricing models.

Calculating Value

Be able to calculate an estimate of firm or share value using both discounted cash flow techniques and relative valuation.

Top

Financial Derivatives

Current investment literature, efficient markets, modern portfolio theory, capital assets pricing, options pricing theory with a focus on derivatives and fixed income strategies.

FIN 411

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	FIN 410
Taught	Winter

Course Outcomes

Global Macro Analysis

Understand and be capable of discussing global macro analysis.

Industry Analysis

Be capable of analyzing an industry/company.

Company-Level Financial Analysis

Analyze and present the financial needs of a company.

Top

Investments Academy

Applying financial principles to practical investment problems; insights into the investment banking profession.

FIN 412

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Finance major status.
Recommended	Fin 410.
Taught	Fall, Winter

Course Outcomes

Follow Markets

Learn to follow and evaluate markets like professional investors.

Communication Skills

Improve analytic communication skills both orally and written.

Real Estate Finance and Investment

Terminology, concepts, principles, and analytical techniques related to financing of and investment in real estate.

FIN 413

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 401; or FIN 401; Finance junior core.
Taught	Fall, Winter

Course Outcomes

Real Estate Concepts

Identify, describe, and understand important property rights, legal descriptions, and real estate contracts.

Alternative Mortgage Finance Products

Become acquainted with and understand the characteristics and attributes of alternative mortgage finance products and calculate effective interest rates.

Real Estate Analytical Skills

Become proficient in the analytical skills required in the real estate industry, including: investment analysis, and valuation techniques.

Ethical Dilemmas

Evaluate ethical dilemmas in real estate.

Top

Real Estate Development

Applying financial and real estate principles to practical property investments; insights into the real estate profession.

FIN 414

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Recommended	Fin 413.
Taught	Fall, Winter

Course Outcomes

Development Process

Students will be able to identify, describe, and understand the development process.

Development Potential

Students will be able to correctly evaluate the development potential of alternative property types.

Development Proposals

Students will be able to present a real estate development proposal in both written and oral form.

Top

Portfolio Management

Team management of actual investment portfolio. Responsibility for economic forecasts, security selection, and portfolio strategy.

FIN 415R

Hours	1.5 Credit, 1.0 Lecture, 0.5 Lab
Prerequisites	BUS M 409; or FIN 409
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

Analysis for Investment Bankers

Exploring the skills used by investment bankers including industry analysis, financial statement analysis, and valuation; the underwriting issues such as security characteristics, embedded options, swaps, convertibles, and other hybrid securities.

FIN 417

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Finance junior core.
Taught	Winter

Course Outcomes

Features, Risks and Uses of Banking Instruments

Be conversant with the features, risks and use of bank instruments, money market securities, bonds, equities, debentures, loan covenants and agreements, equity-linked debt, and asset securitization notes.

Cash Flow Analysis

Perform cash flow forecast and discounted cash flow analysis.

Business Appraisal

Complete a basic business appraisal.

Banking Topics

Be conversant on a variety of topics: pension funds, financial engineering, various new financial innovations, mergers, acquisitions, and current topics from the Wall Street Journal.

Financial Planning

Applying financial principles to household decision making, stressing integration between areas. Income tax and estate planning, retirement, investments, portfolio management, and risk management.

FIN 418

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 201; or FIN 201; or BUS M 520; Any business major status.
Taught	Fall, Winter
Offered	Independent Study also.

Course Outcomes

Framework Development

Develop and use a framework for financial planning.

Teaching Financial Responsibility

Develop a methodology to help teach these principles to family and friends.

Personal Financial Plan

Use this knowledge and information to create their own Personal Financial Plan. Key goals include:
a. Know what you want out of life—write it down,
b. Develop and live on a budget—live on less than you make,
c. Pay the Lord first, yourself second--and invest your money wisely, and
d. Learn to give—if you can't learn to give when you are poor, you will not learn when you are rich.

International Corporate Finance

Financial aspects of multinational corporations operating within an international environment; direct foreign investment, foreign exchange regulations, capital markets, etc.

FIN 432

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	BUS M 401; or FIN 401; Finance junior core.
Taught	Fall, Winter

Course Outcomes

Foreign Exchange

Determine how foreign exchange impacts a company and develop alternatives for dealing with it.

Entering the International Arena

Analyze the added levels of complexity when a company enters the international arena regarding: risks, culture, currencies, laws, markets, etc.

Evaluating Available Financing

Evaluate various sources of financing available to the global firm.

International Investment Decisions

Determine appropriate cash flows and decision criteria used in making international investment decisions.

Government Actions

Understand how government actions influence FX rates and how to gain information from balance of payment data.

Top

Money, Banking, and Business

Economic analysis of effects of money, banking, and financial institutions on business decisions and aggregate economic activity.

FIN 453

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Major status.
Taught	Fall

Course Outcomes

Understanding Banking Concepts

Understand interest rates, rate determination and discounted present value.

Stocks and US Treasuries

Understand differential spot, forward & derivatives, futures and options markets, with specific application to stocks and US Treasuries.

Financial Intermediaries

Understand the function and management of financial intermediaries.

Aggregate Economics

Understand basic aggregate economics: actual and potential supply and actual demand and their implication for growth, employment and inflation.

Trade and Exchange Rates

Understand trade and exchange rates.

Top

Pre-PhD Finance Seminar

Introduction to asset pricing theory using both analytical and numerical methods. Coverage includes the Capital Asset Pricing Model and Stochastic Discount Factor models. The empirical method of Generalized Method of Moments (GMM) is also introduced.

FIN 485

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall

Course Outcomes

Asset Pricing

Students will be able to understand the fundamental theorem of asset pricing and the consumption-based asset pricing model.

Empirical Identification

Students will be able to understand the issues surrounding identification in empirical research.

Simple Stochastic Processes

Students will be able to specify a simple stochastic process for dividends and solve the corresponding PDE for price.

Black-Scholes

Students will be abel to derive the Black-Scholes PDE.

Market Efficiency

Understand basic principles of market efficiency.

Portfolio Optimization

Understand the mean-variance mathematics as it relates to portfolio optimization.

Asset Pricing

Understand factor models and be able to implement time series and cross-sectional tests of asset pricing models used in financial research.

Top

Capital Markets Academy

Teams work on live, market-sensitive projects for financial services organizations, including private equity, private wealth, insurance companies, and asset management.

FIN 487R

Hours	3.0 Credit, 1.0 Lecture, 2.0 Lab
Prerequisites	None
Taught	Fall, Winter

Course Outcomes

Application

Students will participate in the Capital Markets Academy.

Topics in Finance

Current finance-related topics varying by semester and section.

FIN 490R

Hours	0.5 - 3.0 Credit, Arr Lecture, Arr Lab
Prerequisites	None
Taught	Fall, Winter, Spring, Summer

Course Outcomes

Knowledge

Students will deepen their understanding of topics in finance.

Top

Business Finance

Short-term financing of a business operation. Developing techniques for financial planning, such as analysis of ratios, profitability, and liquidity.

FIN 520

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	MAcc or MISM major status.
Taught	Fall, Winter

Course Outcomes

Please contact the individual department for outcome information.

First-Year Finnish

Basic language skills.

FINN 101

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Fall even years

Course Outcomes

Comprehension

Students will comprehend Finnish as they hear and read authentic language relating to familiar topics.

Speaking

Students will be able to speak Finnish well enough to satisfy immediate needs. (They will learn to communicate in basic social situations, meet routine travel needs, obtain food and lodging, carry out simple transactions, and talk about a variety of topics of common interest primarily in the present, with limited use of other time frames.)

Writing

Students will be able to write short messages and well-articulated sentences in Finnish on familiar topics.

Language Learning Strategies

Students will develop comprehension and learning strategies to help them derive meaning from a wide variety of authentic language texts.

Culture

Students will display appropriate awareness of everyday culture in Finnish-speaking countries.

First-Year Finnish

Basic language skills.

FINN 102

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	None
Taught	Winter odd years

Course Outcomes

Comprehension

Students will be able to comprehend Finnish as they hear and read authentic language relating to familiar topics.

Speaking

Students will be able to speak Finnish well enough to satisfy immediate needs. (They will learn to communicate in basic social situations, meet routine travel needs, carry out simple transactions, and talk about a variety of topics of common interest in present, past, and future times.)

Writing

Students will be able to write short messages and well-articulated sentences in Finnish on familiar topics.

Language Learning Strategies

Students will develop strategies to help them derive meaning from a wide variety of authentic language texts.

Culture

Students will display appropriate awareness of everyday culture in Finnish-speaking countries.

Second-Year Finnish

Conversation, vocabulary building, and reading and writing skills, emphasizing reading.

FINN 201

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	Finn 102 or equivalent experience.
Taught	Fall odd years

Course Outcomes

Comprehension

Students will be able to comprehend Finnish as they hear and read authentic language relating to familiar topics with strategies to even derive meaning out of less familiar topics.

Speaking and Writing

Students will be able to speak and write Finnish well enough to satisfy immediate needs. (Students will learn to communicate in social situations asking and answering questions, carrying out transactions, and talking about a variety of topics of common interest in present, past, and future times.)

Conversation

Students will be able to participate actively in conversations about Finnish-speaking countries, concrete topics, and current events.

Opinions

Students will be able to begin expressing and supporting opinions about familiar topics.

Second Year Finnish

Emphasis on literature and culture with continued writing, grammar, listening, and speaking.

FINN 202

Hours	4.0 Credit, 5.0 Lecture, 1.0 Lab
Prerequisites	FINN 201
Note	Culminating course for GE Foreign Language requirement (except for returned missionaries or those with equivalent experience). This course is part of a GE Mosaic. See ge.byu.edu/mosaic-list for more information.
Taught	Winter even years

Course Outcomes

Literature and Cultural History

Students will be able to identify and define key characteristics of the important moments in Finnish cultural history and place significant works in a meaningful cultural and historical context using the basic tools of literary analysis.

Comprehension

Students will be able to comprehend Finnish as they hear and read authentic language relating to familiar and less familiar topics.

Speaking and Writing

Students will improve their reading and writing skills in Finnish by beginning to communicate in connected and extended discourse, expressing and supporting opinion, and navigating less-familiar topics and situations.

Finnish Culture

Students will broaden and deepen their perception and appreciation of Finnish culture.

Second-Year Conversation

Intermediate listening comprehension and speaking skills.

FINN 211R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Finn 102 or equivalent experience.
Taught	

Course Outcomes

Description and Narration

Students will be able to describe and narrate in present, past and future times in the context of paragraph-level speech about autobiographical and concrete topics.

Opinions

Students will be able to speak about autobiographical and concrete topics, initiate and maintain conversations by asking and responding to questions, and cope with gaps in knowledge.

Fluency

Students will be able to use an appropriate variety of vocabulary related to autobiographical and concrete topics.

Vocabulary

Students will speak in a way so as to be understood most of the time without difficulty by native speakers unaccustomed to dealing with non-native speakers.

Third-Year Conversation

Advanced conversational skills.

FINN 311R

Hours	0.5 - 5.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Finn 211R or equivalent experience.
Taught	

Course Outcomes

Description and Narration

Students will be able to describe and narrate in present, past and future times in the context of paragraph-level speech about autobiographical and concrete topics.

Opinions

Students will be able to relate current events, plots of books or movies, and state opinion.

Fluency

Students will be able to initiate and maintain fluent conversations and cope with gaps in knowledge in contexts related to concrete topics.

Vocabulary

Students will be able to speak using an appropriate variety of vocabulary related to autobiographical and concrete topics as well as to current and other events.

Pronunciation

Students will speak in a way so as to be understood without difficulty by speakers unaccustomed to dealing with non-native speakers.

Third-Year Finnish

Third-year course in Finnish. Developing intermediate language skills in speaking, reading, listening, and writing as defined by ACTFL standards.

FINN 321

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	Finn 202 or equivalent experience.
Note	Entry course for returned missionaries or others with equivalent Finnish language experience. Required course for obtaining language credit by examination (Finn 101, 102, 201, 211R).
Taught	Fall even years

Course Outcomes

Intermediate Functions in Writing and Speech

Students will develop their ability to narrate and describe in the present, begin using connected discourse, and learn to manage complications in the language through communicative strategies, all with only slight gaps in communication.

Critical Thinking

Students employ proper grammatical, lexical, phonological, and stylistic features of intermediate-level Finnish in descriptive and narrative texts as well as in producing basic analyses.

Advanced Functions in Speech and Writing

Students will develop partial control of their ability to narrate and describe in the past and future with connected discourse.

Finnish Literature

Readings in Finnish literature; introduction to basic literary concepts. Includes International Cinema.

FINN 340

Hours	3.0 Credit, 3.0 Lecture, 0.0 Lab
Prerequisites	None
Recommended	Finn 321 or equivalent experience.
Note	Culminating course for GE Foreign Language requirement.
Taught	Winter odd years

Course Outcomes

Cultural Literacy

Students should understand key trends and works from Finnish culture, recognize connections between these works, and be able to relate them to the development of contemporary Finnish culture and other cultural traditions.

Cultural Awareness and Self-Reflection

Students should be able to relate the ideas and issues raised by the works we study in class to the students' own socio-historical moment as well as to their experiences with contemporary Finnish culture and even value the expression of perspectives and opinions they do not necessarily share.

Writing in Finnish

Students should begin to understand how to write and present well-organized, focused analyses interpreting literary texts and other cultural artifacts in Finnish.

Future Learning

Students should better know how to understand, interpret, and thoughtfully reflect upon the literature and art they will encounter in later life.

Academic Internship

On-the-job experience in Finnish.

FINN 399R

Hours	0.5 - 9.0 Credit, 0.0 Lecture, 0.0 Lab
Prerequisites	Department's consent.
Taught	

Course Outcomes

Professional Experience

Improve professional experience and appreciation of cultural practices in an international context.

Language Study

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Speaking

Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.

Social Situations

Function appropriately in familiar, routine social situations in the target culture.

Follow Instructions

Understand spoken and written target language well enough to follow simple instructions.

Top

Language Study: Afrikaans

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

FLANG 100 Survival Language and Culture

Speaking. Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.
Social Situations. Function appropriately in familiar, routine social situations in the target culture.
Follow Instructions. Understand spoken and written target language well enough to follow simple instructions.

Top

Language Study: Akan

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

FLANG 100 Survival Language and Culture

Speaking. Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.
Social Situations. Function appropriately in familiar, routine social situations in the target culture.
Follow Instructions. Understand spoken and written target language well enough to follow simple instructions.

Language Study: Albanian

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

FLANG 100 Survival Language and Culture

Speaking. Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.
Social Situations. Function appropriately in familiar, routine social situations in the target culture.
Follow Instructions. Understand spoken and written target language well enough to follow simple instructions.

Language Study: Arabic

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

FLANG 100 Survival Language and Culture

Speaking. Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.
Social Situations. Function appropriately in familiar, routine social situations in the target culture.
Follow Instructions. Understand spoken and written target language well enough to follow simple instructions.

Top

Language Study: Armenian

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

FLANG 100 Survival Language and Culture

Speaking. Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.
Social Situations. Function appropriately in familiar, routine social situations in the target culture.
Follow Instructions. Understand spoken and written target language well enough to follow simple instructions.

Top

Language Study: Aymara

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

FLANG 100 Survival Language and Culture

Speaking. Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.
Social Situations. Function appropriately in familiar, routine social situations in the target culture.
Follow Instructions. Understand spoken and written target language well enough to follow simple instructions.

Top

Language Study: Basque

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

FLANG 100 Survival Language and Culture

Speaking. Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.
Social Situations. Function appropriately in familiar, routine social situations in the target culture.
Follow Instructions. Understand spoken and written target language well enough to follow simple instructions.

Top

Language Study: Bicolano

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

FLANG 100 Survival Language and Culture

Speaking. Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.
Social Situations. Function appropriately in familiar, routine social situations in the target culture.
Follow Instructions. Understand spoken and written target language well enough to follow simple instructions.

Top

Language Study: Bulgarian

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

FLANG 100 Survival Language and Culture

Speaking. Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.
Social Situations. Function appropriately in familiar, routine social situations in the target culture.
Follow Instructions. Understand spoken and written target language well enough to follow simple instructions.

Top

Language Study: Burmese

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

FLANG 100 Survival Language and Culture

Speaking. Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.
Social Situations. Function appropriately in familiar, routine social situations in the target culture.
Follow Instructions. Understand spoken and written target language well enough to follow simple instructions.

Top

Language Study: Cakchiquel

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

FLANG 100 Survival Language and Culture

Speaking. Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.
Social Situations. Function appropriately in familiar, routine social situations in the target culture.
Follow Instructions. Understand spoken and written target language well enough to follow simple instructions.

Top

Language Study: Cambodian

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

FLANG 100 Survival Language and Culture

Speaking. Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.
Social Situations. Function appropriately in familiar, routine social situations in the target culture.
Follow Instructions. Understand spoken and written target language well enough to follow simple instructions.

Top

Language Study: Catalan

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

FLANG 100 Survival Language and Culture

Speaking. Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.
Social Situations. Function appropriately in familiar, routine social situations in the target culture.
Follow Instructions. Understand spoken and written target language well enough to follow simple instructions.

Language Study: Cebuano

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

FLANG 100 Survival Language and Culture

Speaking. Speak target language well enough to ask for instructions and to carry out simple, routine survival-type transactions.
Social Situations. Function appropriately in familiar, routine social situations in the target culture.
Follow Instructions. Understand spoken and written target language well enough to follow simple instructions.

Top

Language Study: Chinese

Survival-level conversation, reading, listening, and culture skills in the target language.

FLANG 100R

Hours	2.0 Credit, 2.0 Lecture, 0.0 Lab
Prerequisites	None

Synthesize lessons from different programs

Synthesize lessons that can be learned from dual language and immersion programs around the world

Lanaguage Skills Development: Ilonggo/Hilgaynon

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Top

Language Skills Development

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Afrikaans

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Akan

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Develop the specific language skill to the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Albanian

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Develop the specific language skill to the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Arabic

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Use the specific language skill at the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Armenian

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Develop the specific language skill to the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Aymara

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Develop the specific language skill to the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Basque

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Develop the specific language skill to the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Language Skills Development: Bicolano

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
Taught	Fall Contact Department, Winter Contact Department, Spring Contact Department, Summer Contact Department

Course Outcomes

Defined Special Purpose

Develop the specific language skill to the level required to meet the "special" foreign-language need defined by the Center for Language Studies.

Top

Language Skills Development: Bulgarian

Increasing proficiency in one or more of the following target-language or target-culture skills: speaking, listening, reading, writing, cultural awareness.

FLANG 305R

Hours	1.0 - 4.0 Credit, Arr Lecture, Arr Lab
Prerequisites	Instructor's consent.
